1. *Analysis of foreign agriculture and trade.*—Analyses are made of world trends in foreign agricultural production, trade, price, finance, marketing, consumption, competition, commercial and trade policies, and economic policies of foreign governments, as such trends affect U. S. foreign agricultural trade and the domestic economy. The Service directs and coordinates Department participation in the formulation of trade programs and agreements to stabilize and expand world trade in American agricultural products, and to reduce restrictive tariff and trade practices against import of American agricultural commodities. Recommendations for the departmental positions on trade agreements and international commodity agreements are formulated. Continuous review is made of the trade regulations and financial conditions of signatories to the General Agreement on Tariffs and Trade in American farm products. Policies, programs, positions, and standards of participation in public and private international organizations are developed.

2. *Agricultural attachés.*—A worldwide agricultural attaché program is conducted by the Department. Assistance is provided in development of markets abroad for

U. S. agricultural commodities. A comprehensive schedule of foreign agricultural market and trade reporting to meet the needs of the American agricultural industry is maintained.

Foreign currencies, generated by the sale of surplus agricultural commodities under title I of the Agricultural Trade Development and Assistance Act of 1954, are allocated to the Department to develop new foreign markets and expand existing markets for U. S. agricultural commodities, including cotton, dairy products, fats and oils, grain, feed, livestock and meat, poultry, fruits and vegetables, and tobacco. The types of market development projects being carried out by the Department include sales promotion campaigns, trade fairs and exhibits, nutrition demonstrations, and market analyses. A total of \$35 million is estimated as the amount available under sales agreements as of June 30, 1957, with 33 countries for projects of this kind.

Enforcement of the Commodity Exchange Act requires supervision over futures trading in 23 commodities on 16 exchanges to prevent price manipulation and corners, and insure honesty and fair dealing. Transactions on contract markets were estimated at \$8,837,000 in 1957, and the value of trading approximately \$36 billion.

1. *Licensing.*—Commission merchants and floor brokers are registered annually. In 1957 there were 579 commission merchants and 887 floor brokers so registered. The estimates for 1959 are 580 and 910, respectively. Exchange rules and regulations are reviewed to insure that legal requirements are met.

2. *Supervision of futures trading.*—This embraces (a) examination and analysis of reports and other market data, the making of market position surveys, and publication of summary data; (b) establishment, review, and enforcement of speculative limits; and (c) cooperative activities with control committees of contract markets. In 1957, position surveys covered 5,787 traders.

REPORTS TABULATED AND ANALYZED

Daily trading volume and open contracts.....	276,242	280,000	280,000
Daily and weekly reports on large traders.....	305,082	310,000	310,000
Delivery notices.....	37,189	38,000	38,000

3. *Audits.*—Misuse of customers' funds is prevented by (a) audit and examination of books of futures commission merchants; and (b) analysis of brokers' and traders' books and financial statements.

AUDITS

	1957 actual	1958 estimate	1959 estimate
Audits of customers' segregated funds.....	649	700	700
Accounts examined.....	33,270	34,000	34,000
Financial statements examined.....	677	580	580

4. *Investigations.*—Apparent or alleged violations of the law and regulations are investigated, and trade practice surveys are made to discover violations and compile legal evidence. The Authority also prepares and presents evidence of violations in administrative hearings and judicial proceedings. In 1957 there were 48 compliance investigations completed and 6,100 transactions examined.

SOIL BANK PROGRAMS

The Soil Bank Act (7 U. S. C. 1801-1837) authorized an acreage reserve program and a conservation reserve program to assist farmers to divert cropland from production of excessive supplies of agricultural commodities, and to carry out a program of soil, water, forest, and wildlife conservation. The activities are supplementary to the acreage allotments and marketing quota programs authorized and appropriated for under the Agricultural Adjustment Act of 1938, as amended, and together with such programs constitute an overall program to prevent excessive supplies of agricultural commodities from burdening and obstructing interstate and foreign commerce.

In 1957 the programs were financed from funds of the Commodity Credit Corporation pursuant to section 120 of the Soil Bank Act, which authorized the Secretary to utilize the facilities, services, authorities, and funds of the Corporation in carrying out the act through June 30, 1957. A supplemental appropriation for 1958 is anticipated to reimburse the Corporation for expenditures incurred during this period. Appropriations were provided for the conservation reserve and acreage reserve programs in 1958 from which funds are being advanced to the Cor-

poration to cover payments to farmers and ranchers under the programs.

Current authorizations:

CONSERVATION RESERVE PROGRAM

For necessary expenses to carry out a conservation reserve program as authorized by subtitles B and C of the Soil Bank Act (7 U. S. C. 1831-1837 and 1802-1814), **[\$162,940,000] \$350,000,000**: *Provided*, That not to exceed \$18,000,000 shall be available for administrative expenses of which not less than \$13,500,000 may be transferred to the appropriation account, "Local administration, section 388, Agricultural Adjustment Act of 1938": *Provided further*, That no part of this appropriation shall be used to enter into contracts with producers which together with contracts already entered into would require payments to producers (including the cost of materials and services) in excess of **[\$325,000,000] \$450,000,000** in any calendar year, and for purposes of applying this limitation, practice payments shall be chargeable to the first year of the contract period. (*Department of Agriculture and Farm Credit Administration Appropriation Act, 1958*.)

Appropriated 1958, **\$162,940,000** Estimate 1959, **\$350,000,000**

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Program by activities:

New obligational authority:			
Appropriation.....	\$0	\$162,940,000	\$350,000,000
Transferred from "Commodity Credit Corporation fund" (7 U. S. C. 1808).....	38,845,780		
Appropriation (adjusted).....	38,845,780	162,940,000	350,000,000

The objective of this program is to encourage the shift of 20 million acres of cropland into grass, trees, water storage or other long-range conservation uses. Producers may enter into contracts during calendar years 1956 through 1960 for periods of 3 to 15 years. In return for removing designated cropland from production and establishing long-range conservation practices, the producer receives cost-sharing assistance for establishment of the practice and annual payments for the duration of the contract. Total annual payments to a producer for any year are generally limited to \$5,000.

Accomplishments under the 1956 and 1957 programs are summarized below:

Number of agreements as of July 15, 1957.....	82,588
Number of acres.....	6,357,932
Payments approved through end of calendar year 1956.....	\$13,151,134
Estimated payments to be approved in calendar year 1957.....	\$55,097,075

For the 1958 program, greater encouragement is being directed toward the inclusion of total farms in the program, and greater emphasis is being placed on forestry and wildlife practices. The Secretary may not enter into contracts with producers which would require payments to producers in excess of \$325 million for the 1958 calendar year.

The budget proposes to increase the authorization for contracts in the 1959 calendar year to \$450 million. This increase is in lieu of an acreage reserve program on 1959 crops. This shift in emphasis, it is believed, will provide more permanent conservation benefits and will contribute to crop reduction.

Commodities covered in the 1958 program are the same as in 1957. The compensation paid producers with respect to the 1958 crops may not exceed \$500 million, and not more than \$3,000 in acreage reserve payments can be paid to any one producer with respect to one farming unit.

The budget proposes the elimination of a program for 1959 crops. The proposal to eliminate the 1959 program reflects a proposed change in emphasis to an expanded conservation reserve program under which it is believed more concrete and more permanent benefits in the areas of conservation and crop reduction will accrue to the Nation.

Under existing legislation, 1958.—Public Law 540, approved May 28, 1956, authorized the Secretary to utilize the facilities, services, authorities, and funds of the Commodity Credit Corporation in carrying out the Soil Bank Act through June 30, 1957. The law authorized appropriations to be made for payment to the Corporation for costs incurred by it under this legislation. A proposed supplemental appropriation for 1958 in the amount of \$567.5 million is anticipated for this purpose.

Acreage allotment and marketing quota programs are designed to keep the production and marketing of basic commodities in line with demand in order to give each farmer a fair share of the available market and the total production required.

Acreage allotments, when necessary, are established at National, State, and county levels (only at State level in

the case of tobacco). In general, the acreage allotted to any county is apportioned by farmer-elected county committeemen. National marketing quotas must be proclaimed whenever the total supply for the basic commodities, except corn, reaches a level specified in the Agricultural Adjustment Act of 1938 as amended. However, quotas do not become effective unless approved by two-thirds of those voting in a farmer referendum.

Acreage allotments and marketing quotas have been announced for the 1958 crops of flue-cured tobacco, peanuts, wheat, cotton, and rice, and acreage allotments will be in effect on the 1958 crop of corn. Acreage allotments and marketing quotas will be proclaimed for the other kinds of quota tobaccos not later than February 1, 1958. With respect to corn, however, legislation will be proposed to repeal the provisions of the Agricultural Adjustment Act of 1938, relating to acreage allotments on corn beginning with the 1959 crop. A savings of \$2,300,000 would result from the passage of such legislation.

Work in fiscal years 1958 and 1959 will consist primarily of the following:

	Tobacco	Peanuts	Wheat	Cotton	Corn	Rice
Collecting and compiling basic data, establishing acreage allotments, and preparing and issuing allotment notices and marketing cards, fiscal years 1958 and 1959 (estimated number of allotment farms).....	595,000	118,525	1,570,250	965,100	1,767,600	20,925

2. *Emergency famine relief to friendly peoples.*—The Commodity Credit Corporation, through June 30, 1958, is directed, under title II of Public Law 480, to make its stocks of agricultural commodities available for emergency assistance to friendly peoples in meeting famine or other urgent relief requirements and to pay ocean freight charges for the shipment of donated commodities. Through June 30, 1957, commitments undertaken under this authority totaled \$360 million. Of this amount the value of commodities authorized for shipment totaled \$326 million, of which over two-thirds or \$225 million was for grain including rice. Actual commodity and freight costs incurred through June 30, 1957, were \$298 million. During each of the fiscal years 1958 and 1959, commodity and freight costs of \$100 million are expected to be incurred under the program. Estimated costs in 1959 and subsequent years are pursuant to authorizations issued prior to June 30, 1958.

Appropriations are authorized for a maximum of \$800 million to reimburse the Corporation for its costs in carrying out the program. The estimate proposed for later transmission, \$125,761,388, provides such reimbursement for operations during 1957 (including interest to date of reimbursement).

The following table shows, by major cost elements, Commodity Credit Corporation costs of this program for the years 1955 through 1959, and the composition of the appropriations to reimburse the Corporation therefor.

Cumulative totals.....	498,329,922	18,292,911	516,622,833

3. *Sales of surplus agricultural commodities for foreign currencies.*—Surplus agricultural commodities are sold for foreign currencies. These currencies may then be used by departments and agencies for agricultural market development, purchase of strategic materials, military equipment facilities and services for the common defense, payment of United States obligations, military family housing, international education exchange, and loans for multilateral trade and economic development. If appropriations are available for the purpose for which foreign currencies are used, the agency must buy the currency for dollars which are used to reimburse the Commodity Credit Corporation. Through June 30, 1957, agreements had been signed with 34 countries for commodities representing an export market value of \$1,869.5 million. The major commodities included were wheat, cotton, and vegetable oils which together amounted to 77% of the total value of the agreements. Through that date commodities with an export market value of about \$1,400 million had been shipped.

The act authorizes appropriations of not to exceed \$4 billion to reimburse the Corporation for its net costs in carrying out this program. The estimate of \$1,290,841,000 proposed for later transmission, covers unreimbursed costs of operations through 1957 (including interest through date of reimbursement) amounting to \$1,406,518,291 less \$115,677,291, representing the dollar equivalent of various foreign currencies received for agricultural commodities exported as of June 30, 1957, for which the Corporation may eventually be reimbursed in dollars. The total dollar equivalent of foreign currencies deposited in the Treasury through June 30, 1957, amounted to \$1,411,557,718.

The following table shows, by major cost elements, Commodity Credit Corporation costs of this program for 1955 through 1959 and the composition of appropriations to reimburse the Corporation therefor. Estimated costs

in 1959 and subsequent years are pursuant to authorizations issued prior to June 30, 1958:

It is estimated that total costs incurred under this program, including interest, will amount to \$1,310,674,000 in 1958, and \$961,706,000 in 1959, for which reimbursement will be requested in subsequent years. Total costs incurred in carrying out this program through June 30, 1959, are estimated to be \$4,422,500,365, and the following table reflects the net costs incurred by Commodity Credit Corporation by years:

Fiscal year	Program expense	Interest	Total
1955.....	\$129,164,632	\$355,528	\$129,520,160

Unreimbursed costs June 30, 1959 (subsequent appropriations).....	2,121,286,741

In addition to the foregoing, the following programs are also currently carried out by the Corporation.

(a) *Grain for migratory waterfowl feed.*—The Commodity Credit Corporation is directed to make available to the Secretary of the Interior through July 3, 1959, such grain acquired through price-support operations and certified by the Commodity Credit Corporation to be available for such purposes or undesirable for human consumption, as the Secretary of the Interior shall requisition.

Appropriations are authorized to reimburse Commodity Credit Corporation for its investment in the grain.

During 1957, 50 tons of Commodity Credit Corporation corn with an investment value of \$4,609 was transferred under this program. It is estimated that 300 tons of grain will be transferred in 1958 and 1959 at a cost to Commodity Credit Corporation of about \$27,000 per year. The estimate proposed for later transmission, \$4,609, provides for reimbursement for operations during 1957.

The following table shows Commodity Credit Corporation costs of this program for 1957 through 1959.

(b) *Transfer of bartered materials to supplemental stockpile.*—The Commodity Credit Corporation is directed under title II of the Agricultural Act of 1956 (7 U. S. C. 1856) to transfer strategic and critical materials acquired as a result of barter and exchange of agricultural commodities, other than those acquired for the national stockpile to the supplemental stockpile.

The Act authorizes appropriations to reimburse the Corporation for amounts equal to the value of materials transferred. The estimate proposed for later transmission, \$218,946,145, provides for reimbursement for operations during 1957.

The following table shows Commodity Credit Corporation costs of this program for the years 1957 through 1959.

TRANSFER OF BARTERED MATERIALS TO THE SUPPLEMENTAL STOCKPILE

	[In millions]			
	1957	1958	1959	Total

Current authorizations—Continued

ALLOTMENTS AND ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

NOTE.—Obligations incurred under allotments and allocations from other accounts are included in the schedules of the parent appropriations as follows:

"Agricultural conservation program."
 "School lunch program," Agricultural Marketing Service.
 "Conservation reserve program," soil bank programs.
 "Acreage reserve program," soil bank programs.
 "Great Plains conservation program."
 "Removal of surplus agricultural commodities."
 "Disaster loans, etc., revolving fund."
 "Salaries and expenses, civil defense functions of Federal agencies," Federal Civil Defense Administration.
 "Mutual security," funds appropriated to the President.

Permanent authorizations:

REIMBURSEMENT TO COMMODITY CREDIT CORPORATION, NATIONAL WOOL ACT

(Indefinite)

Appropriation 1958, \$29,671,679 Estimate 1959, \$30,000,000

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
Reimbursement to Commodity Credit Corporation (total obligations).....	\$2,020,975	\$29,671,679	\$30,000,000
Financing:			
Appropriation (new obligational authority).....	2,020,975	29,671,679	30,000,000

Under provisions of the National Wool Act of 1954, incentive payments are being used to encourage the annual domestic production of approximately 300 million pounds of shorn wool. Support of prices of wool and mohair is mandatory. Incentive payments are made to eligible producers on a percentage basis, reflecting the amount required to bring the national average received by all producers up to the announced incentive level. The incentive level shall not exceed 110% of parity.

COSTS OF THE NATIONAL WOOL ACT

	Fiscal year 1957, 1956 marketing year	Fiscal year 1958, 1956 marketing year	Fiscal year 1959, 1957 marketing year
Volume of marketings:			
Shorn wool..... pounds..	260,308,000	255,367,000	254,700,000
Unshorn lambs..... hundredweight..	9,917,000	11,127,000	11,315,000
Incentive payments:			
Per pound, shorn wool..... cents..	19.2	17.7	9.5
Per hundredweight, unshorn lambs cents..	77.0	71.0	38.0
Incentive payments:			
Shorn wool.....	\$50,013,650	\$45,200,000	\$24,200,000
Unshorn lambs.....	\$7,607,409	\$7,900,000	\$4,300,000
Total payments.....	\$57,621,059	\$53,100,000	\$28,500,000
Administrative expenses.....	\$2,100,889	\$2,797,000	\$2,797,000
Interest expense.....	\$1,570,404	\$2,994,000	\$3,319,000
Total.....	\$61,292,352	\$58,891,000	\$34,616,000

Total payments made under the National Wool Act cannot at any time exceed an amount equal to 70% of the accumulated totals, as of the same date, of the gross receipts from specific import duties collected on and after January 1, 1953, on wool and wool products. Actual and estimated payments compared with this limitation are as follows:

	1957 actual	1958 estimate	1959 estimate
70% of customs receipts on wool and wool products—cumulative from Jan. 1, 1953 (calendar years) (estimated).....	\$150,649,505	\$182,649,505	\$190,649,505
Cumulative incentive payments (fiscal years).....	57,621,059	110,721,059	139,221,059
Balance of limitation available.....	93,028,446	71,928,446	51,428,446

Funds of the Commodity Credit Corporation are used to carry on the wool incentive program. A permanent appropriation is provided to reimburse the Corporation,

but the yearly amount is limited to 70% of duties collected on wool during the preceding calendar year. Estimated costs and reimbursements to Commodity Credit Corporation during 1957, 1958, and 1959 are indicated in the following table:

	1957 actual	1958 estimate	1959 estimate

Proposed for later transmission:

ACREAGE ALLOTMENTS AND MARKETING QUOTAS

Proposed legislative reduction, 1959.—Legislation will be proposed which will place corn in the same category with respect to acreage allotments as the other feed grains are now. Thus, acreage allotments would no longer be mandatory for corn and would reduce the need for obligating authority for acreage allotment and marketing quota work by \$2.3 million and expenditures by \$2.2 million in 1959.

COMMODITY DISPOSAL PROGRAMS—Continued

Corporation is authorized for its costs incurred in carrying out the programs. A proposed supplemental for 1958 in the amount of \$1,725,549,473 is anticipated to reimburse the Commodity Credit Corporation for authorized 1957 costs under the following special commodity disposal programs:

International Wheat Agreement (7 U. S. C. 1641-1642).
Emergency famine relief to friendly peoples (7 U. S. C. 1703, 1721-1724).

Sales of surplus agricultural commodities for foreign currencies (7 U. S. C. 1701-1709).

Grain for migratory waterfowl feed (7 U. S. C. 442-446).
Transfer of bartered materials to supplemental stockpile (7 U. S. C. 1856).

CORPORATIONS AND AGENCIES

The following corporations and agencies are hereby authorized to make such expenditures, within the limits of funds and borrowing authority available to each such corporation or agency and in accord with law, and to make such contracts and commitments without regard to fiscal year limitations as provided by section 104 of the Government Corporation Control Act, as amended, as may be necessary in carrying out the programs set forth in the budget for the fiscal year [1958] 1959 for such corporation or agency, except as hereinafter provided: (*Department of Agriculture and Farm Credit Administration Appropriation Act, 1958.*)

COMMODITY CREDIT CORPORATION

¹ Sales under the price support program include (1) the value of transfers of strategic and critical materials acquired under barter contracts to the national and the supplemental stockpiles and (2) sales to processors under contracts providing that the Corporation will repurchase the commodities in another form.

² Negative figures result from adjustment to sales to eliminate the market value of agricultural commodities transferred from the price support program.

The Commodity Credit Corporation engages in buying, selling, lending, and other activities with respect to agricultural commodities, their products, food, feeds, and fibers, for the purpose of stabilizing, supporting, and protecting farm income and prices; assisting in the maintenance of balanced and adequate supplies of such commodities; and facilitating their orderly distribution. The Corporation also makes available materials and facilities required in connection with the production and marketing of such commodities.

The Corporation has an authorized capital stock of \$100 million held by the United States, and authority to borrow up to \$14.5 billion.

Programs.—The budget is based on five types of programs: (1) price support, (2) supply and foreign purchase, (3) storage facilities, (4) commodity export, and (5) special activities.

Obligations and expenditures for these programs include primarily loans, purchases, purchase agreements, carrying charges, incentive payments, operating and interest expenses, and advances and current obligations incident to special activities as authorized by specific legislation.

Budget assumptions.—The Corporation's budget estimates for 1958 and 1959 are based on the general assumptions (a) that employment, production, and national income will rise moderately both in 1958 and 1959 from the

COMMODITY CREDIT CORPORATION—Continued

Public enterprise and intragovernmental funds—Continued

COMMODITY CREDIT CORPORATION FUND—Continued

present level; (b) that prices will change little, on the average, from the present level; (c) that developments in international relations will not be such as to affect Government civilian programs generally; (d) that exports of agricultural products generally will be slightly lower than during 1957; (e) that acreage allotments and marketing quotas will be in effect for the 1958 crops of peanuts, rice, wheat, cotton, and certain kinds of tobacco, and acreage allotments will be in effect for the 1958 crop of corn, in accordance with existing legislation; (f) that substantial acreages of applicable 1958 crops will be placed under the soil bank program and base acreages established for each participating farm will restrict planting of other crops on acreage placed under the program; (g) that yields for the 1958 crops will equal the high yield of the past 3 years; and (h) that the percentage of estimated production of the 1958 crop placed under price support will equal the average percentage of the production of the 1954 through 1956 crops actually placed under price support. Wheat, grain sorghums, and soybeans are exceptions to the latter two assumptions. Changes in the Corporation's wheat export program, providing for the sale of wheat for export from free markets rather than from Commodity Credit Corporation stocks, are expected to result in lower proportions of that commodity being placed under support. The estimates of grain sorghums and soybeans reflect the current outlook for yields and quantities being placed under support.

In considering these estimates, it should be recognized that it is difficult to estimate requirements for the year ending June 30, 1959. They are dependent upon weather conditions, volume of agricultural production in this country and abroad, economic conditions generally, food needs in occupied areas and other foreign countries, availability of dollar exchange, and other complex and unpredictable factors.

Price support.—Price-support operations are carried out under the Corporation's charter powers (15 U. S. C. 714), in conformity with the Agricultural Act of 1949 (7 U. S. C. 1421), the Agricultural Act of 1954 (7 U. S. C. 1741), which includes the National Wool Act of 1954, and the Agricultural Act of 1956 (7 U. S. C. 1442, 1380f), and with respect to certain types of tobacco, in conformity with the act of July 28, 1945 (7 U. S. C. 1312 note). Under the Agricultural Act of 1949, price support is mandatory for six basic commodities—corn, cotton, wheat, rice, peanuts, and tobacco—and specific nonbasic commodities, namely, tung nuts, honey, milk, butterfat, and the products of milk and butterfat. Price support for wool and mohair is mandatory under the National Wool Act of 1954, through the marketing year ending March 31, 1959. Price support for other nonbasic agricultural commodities is discretionary. This program may also include operations to remove and dispose of or aid in the removal or disposition of surplus agricultural commodities for the purpose of stabilizing prices at levels not in excess of permissible price-support levels.

Price support is made available through loans, purchase agreements, purchases, and other operations, and, in the case of wool and mohair, through incentive payments based on marketings. The producer's commodities serve as collateral for price-support loans. With limited exceptions, price-support loans are "nonrecourse" and the Cor-

poration looks only to the pledged or mortgaged collateral for satisfaction of the loan. Purchase agreements generally are available during the same period that loans are available. By signing a purchase agreement, a producer receives an option to sell to the Corporation any quantity of the commodity which he may elect within the maximum specified in the agreement.

In all its price-support operations the Corporation utilizes normal trade facilities to the maximum extent practicable. In its lending activities the Corporation uses local banks, cooperatives, and other private lending agencies. Commercial storage facilities are used to a great extent in the storage of loan collateral and in the storage of stocks acquired by the Corporation.

Disposition of commodities acquired by the Corporation in its price-support operations is made in compliance with sections 202, 407, and 416 of the Agricultural Act of 1949, and other applicable legislation, particularly the Agricultural Trade Development and Assistance Act of 1954 (7 U. S. C. 1691), title I of the Agricultural Act of 1954, and title II of the Agricultural Act of 1956. Reimbursement for strategic and critical materials acquired in the Corporation's barter activities which are transferred under title II of the 1956 Act to the supplemental stockpile is obtained by appropriations authorized by such Act. This is described under the heading "Reimbursement to Commodity Credit Corporation, special commodity disposal programs," Commodity Stabilization Service. To the extent that price-support commodities are disposed of through commodity export program and special activities, such as sales for foreign currencies, redemptions of acreage-reserve certificates under the soil-bank program by furnishing Commodity Credit Corporation commodities, and similar operations, such disposals are for accounting purposes treated as price-support program disposals.

Supply and foreign purchase program.—This program is carried out under the authority contained in the Corporation's charter, particularly sections 5 (b) and (c) thereof. The Corporation procures foods, agricultural commodities, their products, and related materials to supply the requirements of Government agencies, foreign governments, and relief and rehabilitation agencies, and to meet domestic requirements. Foods, agricultural commodities, and their products are procured or aid is given in their procurement to facilitate distribution or to meet anticipated requirements during periods of short supply. The Corporation may also, through purchases, loans, sales or other means, make available materials and facilities required in connection with the production and marketing of agricultural commodities.

Operations involving procurement for other Government agencies are conducted in accordance with procedures and policies reasonably calculated to assure compliance with section 4 of the act of July 16, 1943 (15 U. S. C. 713a-9), which requires that the Corporation be fully reimbursed for services performed, losses sustained,

operating costs incurred, or commodities purchased or delivered to or on behalf of any other Government agency from the appropriate funds of such agency. Operations not subject to section 4 of such act may involve losses if such are necessary to the accomplishment of the objectives of the particular operation.

The main activities now carried on are procurement of commodities for the International Cooperation Administration, and initial financing of certain programs authorized under the Defense Production Act to assure adequate supplies of strategic and critical materials.

Storage facilities program.—This program is carried out under the authority contained in the Corporation's charter, particularly sections 4 (h), 4 (m), and 5 (a). The Corporation (a) purchases and maintains granaries and equipment for care and storage of grain owned or controlled by the Corporation; (b) makes loans for the construction or expansion of farm storage facilities; (c) provides storage-use guaranties to encourage the construction of commercial storage facilities; and (d) undertakes other operations necessary to provide storage adequate to carry out the Corporation's programs.

Commodity export program.—The Corporation promotes the export of agricultural commodities and products through sales, barter, payments, and other operations. Such commodities and products may be those held in private trade channels as well as those in Commodity Credit Corporation's inventory. This program is carried out under the authority contained in the Corporation's charter, particularly sections 5 (d) and 5 (f), and in accordance with specific statutes where applicable, such as sections 407 and 416 of the Agricultural Act of 1949, the International Wheat Agreement Act of 1949 (7 U. S. C. 1641), the Agricultural Trade Development and Assistance Act of 1954, title I of the Agricultural Act of 1954 and title II of the Agricultural Act of 1956. In general, transactions involving foreign currencies are conducted pursuant to the Agricultural Trade Development and Assistance Act of 1954. However, other such transactions may be conducted under the charter authority.

Current obligations under the International Wheat Agreement and title I of the Agricultural Trade Development and Assistance Act of 1954, which operations are described in the estimates under the heading "Reimbursements to Commodity Credit Corporation, special commodity disposal programs," Commodity Stabilization Service, are paid by the Corporation subject to reimbursement from appropriations authorized for such purpose. Pending such reimbursements the net costs are reflected in the records of the Corporation as accounts receivable.

Currently, in addition to the exports under the International Wheat Agreement, Commodity Credit Corporation wheat is available for export trade under barter programs of Commodity Credit Corporation at competitive world prices and is also made available to exporters in payment of the price differential between the prevailing world export sales price and the domestic market price which is earned on exports of free-market wheat outside the International Wheat Agreement and under this agreement. Cash payments are made on all exports of wheat flour either under the International Wheat Agreement or outside the agreement.

Since August 1, 1956, the Corporation has conducted a cotton products export program designed to protect the competitive position of the domestic cotton industry in relation to sales of cotton products manufactured abroad from American cotton purchased at export prices. Equali-

zation payments, based on the raw cotton content in the products exported, are made to exporters on cotton products of upland cotton grown and wholly processed in the United States.

The Corporation also furnishes agricultural commodities and products for distribution or exhibition at international trade fairs to aid in the development of foreign markets for such commodities.

Expenses.—There are a number of expenses which are not allocated to a specific program. These include interest on the capital stock of the Corporation and on borrowings from Treasury, administrative expenses, and other miscellaneous costs, including expenses of the agricultural stabilization and conservation county committees, lending agencies, and Federal Reserve banks in connection with the Corporation's programs.

Administrative expenses are for the operating staff, including the services of employees of the Commodity Stabilization Service engaged in Commodity Credit Corporation activities, services performed by other agencies of the Department, costs of audit, and payments to the General Services Administration for space in the District of Columbia.

Estimates for 1959 include a limitation of \$36,100,000 for costs of administration including a reserve of not less than 7% for contingencies.

The requested authorization excludes administrative expenses in connection with the supply and foreign purchase program, the wool and mohair price-support program under the National Wool Act of 1954, and the sale of long staple cotton transferred from the national stockpile, since it is contemplated that full reimbursement will be received for these expenses. Such reimbursement will be obtained and used in 1959 in the same manner as in previous years.

Expenses in connection with the acquisition, operation, maintenance, improvement, or disposition (including inspection, classing, and grading work performed on a fee basis by Federal employees or Federal- or State-licensed inspectors) of property which the Corporation owns or in which it has an interest have been treated as program rather than administrative expenses since 1951.

Similarly, expenses of other Federal agencies whose services are utilized in the handling of Commodity Credit Corporation property are treated as program expenses. Such expenses would include the fleet storage operation of the Maritime Administration conducted intermittently since 1949 and the services rendered by the General Services Administration in connection with the strategic, critical, and other materials acquired by the Corporation.

Special activities.—These are intragovernmental transactions and other miscellaneous activities carried out under authority of section 5 (g) of the Corporation's charter and specific statutory authorizations or directives with respect thereto which are currently in effect or which may be subsequently enacted.

Illustrative of current intragovernmental transactions are loans to the Secretary of Agriculture in connection with the agricultural conservation program as authorized by section 391 (c) of the Agricultural Adjustment Act of 1938, as amended (7 U. S. C. 1391) and advances to the Agricultural Marketing Service for grading tobacco and classing cotton as authorized by the acts of June 29, 1949, and August 31, 1951 (7 U. S. C. 440, 414a). Current obligations for such transactions are paid by the Corporation and appropriations have been authorized to reimburse the Corporation for its costs. Pending such reimbursements the net costs of such transactions are

COMMODITY CREDIT CORPORATION—Continued

Public enterprise and intragovernmental funds—Continued

COMMODITY CREDIT CORPORATION FUND—Continued

reflected in the records of the Corporation as receivables.

In addition, pursuant to section 120 of the Agricultural Act of 1956 (7 U. S. C. 1808) the Secretary of Agriculture utilizes the services and facilities of the Corporation for carrying out the soil-bank program.

A more detailed description of the operations under these special activities may be found in the budget under appropriations pertaining to the Agricultural Conservation Program Service, the Agricultural Research Service, the Agricultural Marketing Service, the Commodity Stabilization Service, and the soil-bank programs.

Public Law 85-96, approved July 10, 1957 (71 Stat. 290), authorizes the transfer of 50,000 bales of long-staple cotton from the national stockpile to the Corporation for sale. Proceeds less costs incurred, including administrative expenses, will be covered into the Treasury as miscellaneous receipts.

Financing.—The programs of the Commodity Credit Corporation are financed by capital stock, borrowings, guaranties to purchase loans held by lending agencies, restoration of capital impairment, and receipts from operations.

Borrowing authority.—The Corporation has an authorized capital stock of \$100,000,000, held by the United States, and authority to borrow up to \$14,500,000,000.

Funds are borrowed from Treasury and may also be borrowed from private lending agencies when the Corporation desires to utilize such agencies in carrying out a particular program or financing operation. All bonds, notes, debentures and similar obligations issued by the Corporation are subject to approval by the Secretary of the Treasury as required by the Act of March 8, 1938 (15 U. S. C. 713a-4). Interest on borrowings from the Treasury (and on capital stock) is paid in accordance with a policy of the Treasury Department that the rate shall be based upon the average interest rate on all outstanding marketable obligations (of comparable maturity date) of the United States as of the preceding month. In connection with loan guaranties, the Corporation reserves a sufficient amount of its borrowing authority to purchase at any time all loans and other obligations held by lending agencies.

Pursuant to section 120 of the Agricultural Act of 1956 (70 Stat. 197) the Secretary of Agriculture utilized the funds of the Corporation to finance the soil bank program through June 30, 1957. A supplemental appropriation to reimburse the Corporation for funds used under this program, as well as for 1957 costs of the special commodity disposal programs, is proposed for later transmission.

On the basis of the budgetary assumptions heretofore described, the consequent estimated program requirements currently do not indicate a need for additional borrowing authority. However, subsequent developments in program or financing activities could result in the necessity for an increase.

POSITION WITH RESPECT TO BORROWING AUTHORITY AS OF JUNE 30

[In millions]

Net statutory borrowing authority available.....	757	2,470	1,916

Restoration of capital impairment.—Pursuant to the act of March 8, 1938, as amended (15 U. S. C. 713a-1), an appraisal of the assets and liabilities of the Corporation is made each year by the Secretary of the Treasury to determine the net worth. If the net worth is less than \$100 million, the Secretary of the Treasury restores the amount of capital impairment; if net worth is more than \$100 million the Corporation pays the surplus to the Treasury (15 U. S. C. 713a-2). The appraisal of assets is on the basis of cost to the Corporation. The capital impairment, therefore, represents realized losses. The realized losses reflected on the books of the Corporation for 1957 were \$1,760,399,886, for which restoration is included in the 1959 estimates.

Receipts from operations.—These include proceeds from sales of commodities, loan repayments, interest income, advances, reimbursements for special activities financed by the Corporation and miscellaneous income, refunds, and collections.

Loan and inventory operations and realized losses.—The schedule on pages 344-347 shows for 1957, 1958, and 1959 the actual and estimated loan and inventory operations and realized losses, by programs and commodities.

¹ Sales under the price support program include (1) sales value of agricultural commodities delivered under barter contracts, (2) the value of transfers of strategic and critical materials acquired under such barter contracts to the national and the supplemental stockpiles and (3) sales to processors under contracts providing that the Corporation will repurchase the commodities in another form.

² Operation and maintenance costs applicable to owned storage structures are reflected as carrying charges on the commodities stored.

³ Adjustment to eliminate the market value of agricultural commodities transferred from the price support program to the commodity export program.

COMMODITY CREDIT CORPORATION—Continued**Public enterprise and intragovernmental funds—Continued****LIMITATION ON ADMINISTRATIVE EXPENSES, COMMODITY CREDIT CORPORATION**

Nothing in this Act shall be so construed as to prevent the Commodity Credit Corporation from carrying out any activity or any program authorized by law: *Provided*, That not to exceed **[\$35,398,000]** \$36,100,000 shall be available for administrative expenses of the Corporation [including uniforms, or allowances therefor, as authorized by the Act of September 1, 1954 (5 U. S. C. 2131), as amended]: *Provided further*, That \$1,000,000 of this authorization shall be available only to expand and strengthen the sales program of the Corporation pursuant to authority contained in the Corporation's charter: *Provided further*, That not less than 7 per centum of this authorization shall be placed in reserve to be apportioned pursuant to section 3679 of the Revised Statutes, as amended, for use only in such amounts and at such time as may become necessary to carry out program operations: *Provided further*, That all necessary expenses (including legal and special services performed on a contract or fee basis, but not including other personal services) in connection with the acquisition, operation, maintenance, improvement, or disposition of any real or personal property belonging to the Corporation or in which it has an interest, including expenses of collections of pledged collateral, shall be considered as nonadministrative expenses for the purposes hereof. Proposed for later transmission:

Under proposed legislation, 1958 and 1959.—As indicated in the budget message, legislation will be proposed to extend the terminal date of title I of Public Law 480 to June 30, 1959, and increase the authorization from \$4 billion to \$5.5 billion. It is estimated that this increase of \$1.5 billion in the authorization will result in net in-

creased expenditures for the Commodity Credit Corporation of \$28 million in 1958 and \$95 million in 1959. It is further proposed to extend to June 30, 1959, title II of Public Law 480, which authorizes famine relief and other assistance to friendly peoples.

Under proposed legislation, 1959.—Legislation will be proposed to extend the special milk program for 2 years to June 30, 1960, with an annual authorization of \$75 million. It is also proposed to extend the authority, which expires December 31, 1958, to make dairy products (including milk) available to veterans' institutions and to members of the Armed Forces. It is estimated that extension of these programs will result in additional expenditures by the Commodity Credit Corporation of \$75 million in 1959.

Purpose and financial organization.—The Federal Crop Insurance Corporation, a wholly owned Government corporation, was created on February 16, 1938 (7 U. S. C. 1501-1519), to carry out the provisions of the Federal Crop Insurance Act. The purpose of this act is to promote the national welfare by improving the economic stability of agriculture through a sound system of crop insurance and providing the means for the research and experience helpful in devising and establishing such insurance. The Corporation provides all-risk insurance protection for the farmers' cost of producing crops against loss from unavoidable causes. Insurance programs since 1948 have been conducted on a limited basis in selected counties and on selected crops to obtain adequate actuarial data for the expansion of the program to a national basis.

Capital stock of \$100 million is authorized to be subscribed by the United States. As of June 30, 1957, the Secretary of the Treasury held receipts for \$40 million of the authorized stock, leaving \$60 million unissued. Of the \$40 million subscribed stock, \$13 million was issued during fiscal year 1957, when Congress approved an appropriation in that amount because of the Corporation's need for additional capital funds.

Funds from the issuance of capital stock provide working capital for the Corporation. Receipts which are for deposit to this fund come mainly from premiums for insurance protection afforded farmers on their investment

in the production of insured crops. The principal payments from this fund are for indemnities to farmers that suffer crop losses arising from causes against which crop insurance provides protection. In addition, the direct cost of adjusting losses and a limited amount of the administrative and operating expenses are payable from premium income.

Budget program.—The Corporation, operating on a limited experimental basis since 1948, will continue to offer insurance on the 1958 crops in selected counties, principally on wheat, multiple crops, tobacco, corn, and cotton. In addition, insurance on a limited basis will also be offered on barley, beans, citrus, flax, peaches, and soybeans.

The program planned for the 1958 crop year (fiscal year 1959) is a continuation of the efforts of the Corporation to increase premium income and spread the concentration of risk which exists in the major wheat-producing areas, which is urgently needed if a sound crop insurance program is to be developed. No net increase in participating counties is planned for the 1958 crop year; however, insurance will be offered on additional crops in some of the 818 counties where insurance is presently available.

The following table indicates the scope of the insurance program for the fiscal years shown:

	1957 fiscal year (1956 crop year) actual	1958 fiscal year (1957 crop year) estimate	1959 fiscal year (1958 crop year) estimate
Number of commodities insured.....	21	21	21
Number of counties.....	805	818	818

Number of crops insured.....	1,324,949	318,401	365,000
Premiums (\$1,000).....	\$22,145	\$17,326	\$24,129
Indemnities (\$1,000).....	\$27,889	\$10,460	\$21,716
Loss ratio.....	1.26	0.60	0.90

¹ Contracts in force.

The 1956 crop year operating experience reflected in the budget statements and schedules for fiscal year 1957 shows an excess of indemnity payments over premiums of \$5.7 million. Indemnity payments amounted to \$27.9 million as compared to \$22.1 million of premium income. A net loss of \$6.4 million which occurred on corn as a result of drought primarily in Nebraska, Iowa, South Dakota, Kansas, and Missouri, was the principal cause of the 1956 crop year deficit. However, an additional loss of \$1 million each was sustained on wheat and multiple crops, with the continuing drought being the main cause of loss. Premiums of \$4.9 million from insurance protection offered on the barley, bean, citrus, cotton, flax, soybean, and tobacco programs exceeded indemnity payments of \$2.3 million by \$2.6 million.

Preliminary estimates for the 1957 crop year (fiscal year 1958) indicate that premiums on all crops except flax and beans will exceed indemnity payments, providing average growing conditions continue until the crops are harvested. Current estimated premiums of \$17.3 million exceed estimated indemnity payments of \$10.4 million by \$6.9 million. The overall loss ratio is 0.60. Favorable experience on wheat, multiple crops, corn, and tobacco, which represents about 88% of the Corporation's insured liability, is primarily responsible for the surplus of premiums over indemnities.

Appropriations of up to \$12 million for any fiscal year are authorized for operating and administrative expenses of the Corporation. These annual appropriations are presented elsewhere in the budget. For the fiscal year 1958, direct costs of loss adjusters, as well as operating and administrative expenses not to exceed \$2 million, are being paid from premium income. No change in the

FEDERAL CROP INSURANCE CORPORATION—Con.

Public enterprise funds—Continued

FEDERAL CROP INSURANCE CORPORATION FUND—Continued

method of financing these costs is proposed in the 1959 budget.

Financing.—No new budgetary authorization is required for the 1959 fiscal year since the estimated net profit of \$4.0 million for the 1958 fiscal year will provide an increase in net capital from \$21.5 million at the beginning of 1958 to \$25.5 million at the beginning of 1959. Expenditures for the fiscal year 1957 were \$7.4 million as compared to an estimated net receipt of \$6.6 million in 1958. This is a net reduction of \$14.0 million in expenditures between fiscal years 1957 and 1958. For fiscal year 1959, net expenditures are estimated at \$0.5 million.

Operating results and financial condition.—Premium income for fiscal year 1959 is estimated at \$24.1 million as compared to \$17.3 million for 1958, and \$22.1 million for 1957.

The net result of an estimated profit of \$4.0 million for 1958 and a \$0.6 million loss for 1959 is a decrease of \$3.4 million in the deficit of \$18.5 million at June 30, 1957. Adjustment of coverages and rates and limitation of program operations in areas where the drought has been most severe have been effected to eliminate losses which occurred during the past several years. It is anticipated that surpluses from operations in future years will eventually offset the current deficit.

The following table summarizes the insurance operations of the 1957, 1958, and 1959 fiscal years:

SUMMARY OF INSURANCE OPERATIONS—NET PROFIT OR LOSS (—) BY COMMODITIES

[Fiscal years ending June 30, 1957, 1958, and 1959]

RURAL ELECTRIFICATION ADMINISTRATION

Current authorizations:

To carry into effect the provisions of the Rural Electrification Act of 1936, as amended (7 U. S. C. 901-924), as follows:

LOAN AUTHORIZATIONS

For loans in accordance with said Act, and for carrying out the provisions of section 7 thereof, to be borrowed from the Secretary of the Treasury in accordance with the provisions of section 3 (a) of said Act as follows: Rural electrification program, [\$179,000,000, of which not to exceed \$20,000,000 shall be placed in reserve to be borrowed under the same terms and conditions to the extent that such amount is required during the fiscal year 1958 under the then existing conditions for the expeditious and orderly development of the rural electrification program] \$150,000,000; and rural telephone program, [\$60,000,000, of which not to exceed \$10,000,000 shall be placed in reserve to be borrowed under the same terms and conditions to the extent that such amount is required during the fiscal year 1958 under the then existing conditions for the expeditious and orderly development of the rural telephone program] \$56,000,000. (Department of Agriculture and Farm Credit Administration Appropriation Act, 1958.)

The Administration conducts two major programs: (a) the rural electrification program to provide electric service to farms and other rural establishments; and (b) the rural telephone program to furnish and improve telephone service in rural areas. Funds for making loans are bor-

rowed from the Secretary of the Treasury. Legislation will be proposed to enable borrowers to obtain funds also from private lenders.

1. *Rural electrification.*—This program is financed through loans which bear 2% interest and must be repaid within a period not to exceed 35 years. Loans are also made for shorter periods at 2% interest to electrification borrowers to be reloaned to their consumers for wiring and for the installation of electrical and plumbing appliances and equipment.

When the rural electrification program was initiated in 1935, less than 11% of all farms had electric service. On June 30, 1957, about 95% of the farms were electrified.

Number of borrowers.....	1,078	1,080	1,082

2. *Rural telephone.*—Loans are made for the purpose of financing the improvement, expansion, construction, acquisition, and operation of the telephone lines and facilities or systems to furnish and improve telephone service in rural areas. The loans bear 2% interest and must be repaid within a period not to exceed 35 years.

In 1950, when the telephone program started, the U. S. census of agriculture showed 38.2% of all farms with telephone service, fewer in both number and percentage than in 1920. At the present time the percentage of farms having telephone service is estimated at approximately 54%. Cumulative Rural Electrification Administration loans through June 30, 1957, will provide initial or improved service to an estimated 863,329 rural subscribers.

The Administration makes self-liquidating loans for the extension and improvement of electric and telephone services in rural areas. Business management and technical help is furnished borrowers where needed to protect the Government's loan security and to assure that construction and operation of their systems conform to approved standards and are adequate to provide continuous and reliable service.

FARMERS' HOME ADMINISTRATION

Current authorizations:

To carry into effect the provisions of titles I, II, and the related provisions of title IV of the Bankhead-Jones Farm Tenant Act, as amended (7 U. S. C. 1000-1031); the Farmers' Home Administration Act of 1946 (7 U. S. C. 1001, note; 31 U. S. C. 82h; 12 U. S. C. 371; 35 D. C. Code 535; 60 Stat. 1062-1080); the Act of July 30, 1946 (40 U. S. C. 436-439); the Act of August 28, 1937, as amended (16 U. S. C. 590r-590x-3), for the development of facilities for water storage and utilization in the arid and semiarid areas of the United States; the provisions of title V of the Housing Act of 1949, as amended (42 U. S. C. 1471-1483), relating to financial assistance for farm housing; the Rural Rehabilitation Corporation Trust Liquidation Act, approved May 3, 1950 (40 U. S. C. 440-444); the items "Loans to farmers, 1948 flood damage" in the Act of June 25, 1948 (62 Stat. 1038), and "Loans to farmers, property damage" in the Act of May 24, 1949 (63 Stat. 82); the collecting and servicing of credit sales and development accounts in water conservation and utilization projects (53 Stat. 685, 719), as amended and supplemented (16 U. S. C. 590y, z-1 and z-10); and the Act to direct the Secretary of Agriculture to convey certain mineral interests, approved September 6, 1950 (7 U. S. C. 1033-1039), as follows:

LOAN AUTHORIZATIONS

For loans (including payments in lieu of taxes and taxes under section 50 of the Bankhead-Jones Farm Tenant Act, as amended, and advances incident to the acquisition and preservation of security of obligations under the foregoing several authorities, except that such advances under title V of the Housing Act of 1949, as amended, shall be made from funds obtained under section 511 of that Act, as amended): Title I, title II, and section 43 of title IV of the Bankhead-Jones Farm Tenant Act, as amended, **[\$24,000,000,]** and the Act of August 28, 1937, as amended, **\$175,000,000,** of which not to exceed \$2,500,000 may be distributed to States and Territories without regard to farm population and prevalence of tenancy, in addition to the amount otherwise distributed thereto**[,]** for title I loans in reclamation projects and to entrymen on unpatented public land**[,]**; title II of the Bankhead-Jones Farm Tenant Act, as amended, **\$180,000,000;** the Act of August 28, 1937, as amended, **\$5,500,000:]** *Provided,* That not to exceed the foregoing **[several amounts]** amount shall be borrowed in one account from the Secretary of the Treasury in accordance with the provisions set forth under this head in the Department of Agriculture Appropriation Act, 1952. (*Department of Agriculture and Farm Credit Administration Appropriation Act, 1953.*)

The Administration makes and insures loans to farmers unable to secure credit from other sources at reasonable rates.

The total borrowing authorization requested for farm ownership, operating, and conservation loans amounts to \$175,000,000, a reduction of \$34,500,000 below the authorization for 1958. Appropriation language is proposed to permit this amount to be obligated for farm ownership, soil and water conservation or operating loans as the need and demand may arise in 1959. It is anticipated that legislation will be proposed to extend the insured loan authority and thus reduce the need for direct loan funds for farm ownership and soil and water conservation loans.

1. Farm ownership loans.—Direct farm ownership loans

are made to tenants, sharecroppers, farm laborers, owners of inadequate farms, and eligible veterans for the purchase or improvement of family-type or less-than-family-type farms. Loans may be made to farm owners for the refinancing of secured or unsecured indebtedness. These loans may be made up to the fair value of the farm (normal market value on less than family-type farms to owner-operators with off-farm income) at not to exceed 5% interest up to 40 years. Farm ownership, and also farm housing loans, made with funds advanced by private lenders, are insured by the Government up to 90% of the value of the farm for 40 years at not more than 4% interest, plus 0.5% as an insurance premium, and 0.5% as an administrative expense charge. The Administration services these insured loans, makes collections, and pays the lender.

FARM OWNERSHIP LOANS

	Number	Amount	Number	Amount	Number	Amount
Number of applications.....	35,566		24,600		28,600	
Direct loans.....	3,702	\$46,307,836	1,870	\$24,000,000	1,250	\$15,000,000
Insured loans.....	2,452	29,771,530	1,450	17,500,000	4,370	40,000,000

2. Farm operating loans.—Direct loans are made for periods up to 7 years at 5% interest in amounts up to \$10,000, with a limitation of \$20,000 on the total principal indebtedness, to provide reasonable farm and home credit for the purchase of livestock, feed, seed, farm equipment, and other farm necessities, including the refinancing of indebtedness to operators of not larger than family-type farms. In justifiable cases, loans may be made beyond 7 years but not beyond 10 years.

Amount.....	\$179,999,994	\$180,000,000	\$155,000,000

3. Soil and water conservation loans.—Direct and insured loans are made to farmers and associations for the effective development and utilization of water supplies and for the improvement of farmland by soil and water conserving facilities and practices. Interest rates on these loans are set administratively at the same rates as farm ownership loans. In addition, at least 0.5% as an insurance premium and 0.5% as an administrative expense charge is collected on each loan. Loans are made for periods up to 20 years for individuals and 40 years for associations.

4. Farm housing loans.—Direct farm housing loans are made to farm owners for periods up to 33 years at 4% interest to construct, improve, alter, repair, or replace dwellings and other farm buildings. It is proposed to borrow \$10,000,000 under continuing authority of \$450,000,000 of which a balance of \$400,139,387 is estimated to be available at June 30, 1958.

Purpose and financial organization.—This fund finances loans to farmers and stockmen in the event of disasters and other emergencies, in areas where agricultural credit is not readily available. The fund is also used to provide emergency assistance in furnishing feed and seed, including hay and roughage, in areas suffering major disasters. It was created by the transfer of the assets of the Regional Agricultural Credit Corporation of Washington which was abolished.

Budget program—1. Loan commitments—(a) Production emergency loans.—Loans are made to farmers and stockmen suffering production disasters at 3% interest when agricultural credit is not readily available from other sources. The \$27.6 million estimate for 1958 is \$11.6 million lower than 1957 actual, and assumes a probable reduced need for this type of assistance. The estimate for 1959 of \$30.4 million is increased by \$2.8 million from the 1958 estimate.

(b) Economic emergency loans.—Loans are made at 3% interest in any economic disaster area declared by the President, if agricultural credit cannot be met temporarily by regularly established lending institutions. Loans are estimated at \$4 million each for 1958 and 1959, as compared with \$6.4 million actual in 1957.

(c) Special livestock loans.—For 4 years after July 14, 1953, loans were authorized to be made at 5% interest to established livestock producers who were temporarily unable to get credit from recognized lenders and who had a reasonable chance of working out their difficulties with supplementary financing. Supplemental loans may be made for an additional 2 years after July 14, 1957, to individuals already indebted. The estimate for such supplemental loans in 1958 is \$5 million. The 1959 estimate is \$3.6 million, a decrease of \$7.3 million from the 1957 actual and \$1.4 million from the 1958 estimate.

(d) Special emergency loans.—Special emergency loans up to a total of \$65 million may be made up to June 30, 1959, in areas where the Secretary finds a need for credit which cannot be met through other means. The estimates for 1958 and 1959 are \$12 million each, an increase of \$2.3 million over 1957.

(e) Other loans.—Loans at 5% interest may be made to bona fide fur farmers until June 30, 1958, where necessary to protect the Government's interest in existing loans which had been made by the Regional Agricultural Credit Corporation or other authorities.

3. Emergency hay and roughage assistance.—Assistance in purchasing hay and roughage was given to established farmers, ranchers, and stockmen in areas which were determined by the President to warrant assistance because of a major disaster. Programs were conducted in 1956 and 1957, but similar programs are not anticipated in 1958 or 1959.

4. Administrative expenses—Loan programs.—Administrative expenses applicable to the loan programs financed from this fund are incurred by the Farmers' Home Administration and the Office of the General Counsel, and are estimated to be \$3,676,600 in 1959.

Emergency feed programs.—Administrative expenses in connection with feed assistance furnished from Commodity Credit Corporation stocks will be incurred by the Commodity Stabilization Service in 1959 in an estimated amount of \$461,000, a decrease of \$217,000 below the estimated amount for 1958. In 1957, administrative expenses incurred by the Commodity Stabilization Service and the Farmers' Home Administration in connection with this program and the emergency hay and roughage assistance program amounted to \$3,311,565.

Financing the budget program.—No new budgetary authorization is required for 1959. Although a net loss of \$3.4 million is estimated on an accrual basis, net receipts of \$1.8 million are anticipated on a cash basis.

During 1959, the program is wholly financed by receipts from operations and, in addition, the balance of prior year authorization available at the end of the fiscal year to finance future years' programs will increase by \$2 million to \$44.5 million.

Operating results and financial condition.—Income for 1959, consisting principally of interest on loans, is estimated at \$3 million, compared to expenses of \$6.4 million, resulting in an estimated loss of \$3.4 million. Net loss of \$2.5 million is estimated for 1958, and a net loss of \$24.2 million resulted in 1957 due primarily to \$17.4 million in assistance to States under the hay and roughage program.

Loans receivable, after allowance for losses, are expected to amount to \$75.7 million on June 30, 1959, as compared with \$81.1 million at June 30, 1958, and \$92.4 million on June 30, 1957.

The Government investment at June 30, 1959, is expected to be \$121.7 million, consisting of \$205.9 million appropriated and donated, less a deficit of \$84.2 million.

Purpose and financial organization.—This fund relates to insured farm ownership loans and soil and water conservation loans. The initial fund of \$1 million is supplemented by charges collected from insured farm ownership and soil and water conservation loan borrowers, inspection and appraisal fees, and other charges. Receipts are available for administrative expenses and to cover losses.

Budget program.—Advances and purchases of loans are estimated at \$7,220,000 in 1959, a decrease of \$7,080,000 below 1958 and \$2,372,301 below 1957. Outstanding loans insured on June 30, 1957, total \$155,935,458 and are estimated at \$157,808,089 on June 30, 1958, and \$186,878,089 on June 30, 1959. The insurance endorsement on each loan includes an agreement by the Government to purchase the loan after a specified period at the holder's option.

Financing.—In order to finance the purchase of loans becoming eligible for redemption under the repurchase agreements, it is estimated that it will be necessary to utilize the statutory authorization (7 U. S. C. 1005c) to borrow from the Treasury in gross amounts of \$10,230,000 in 1958 and \$3,550,000 in 1959.

Operating results and retained earnings.—Total income, consisting principally of insurance premiums, is estimated at \$3.3 million in 1959, an increase of about \$0.7 million from 1958. Expenses are expected to increase less than half of this amount, resulting in increased net income of about \$0.5 million.

The necessity to purchase loans is expected to result in outstanding loans receivable of \$26.3 million at June 30, 1959. In the current investment market, there is little likelihood that any of these loans can be sold. Retained earnings, which are for absorption of any future losses, are estimated to be \$8.1 million at the end of 1959. These earnings, when added to the \$1 million appropriation and estimated borrowings of \$21.5 million from the Treasury, represent a \$30.6 million Government investment.

Appropriation (adjusted)	2,715,000	2,943,000	3,043,000

The Office serves as legal counsel for the Secretary of Agriculture and performs all legal work for the Department. It represents the Department in administrative proceedings for the promulgation of rules and regulations having the force and effect of law and in quasi-judicial hearings held in connection with the administration of Department programs. The Office also represents the Secretary in proceedings before the Interstate Commerce

Commission dealing with rates and practices relating to the transportation of agricultural commodities and in appeals to the courts from the decisions of the Commission. It examines titles to lands to be acquired by the Department or accepted as security for loans, and disposes of claims arising out of the Department's activities.

Increases in 1959 are to meet anticipated expansion in workload connected with disposal of surplus commodities and marketing and regulatory programs.

The Office provides overall planning, coordination, and administration of the Department's programs, and supplies certain services on a departmentwide basis.

2. *Personnel administration and service.*—Departmental policies and procedures are promulgated for the personnel management program. The operational phases of this program have been substantially delegated to the agencies. A systematic review is conducted to insure unification thereof and to measure its effectiveness in serving the agencies' personnel management requirements.

3. *Budgetary and financial administration and service.*—This covers the fields of departmental budgetary and financial management, internal audit and related activities; policies and procedures are promulgated, and programs and legislative proposals are evaluated for budgetary, financial, and related implications.

4. *General operations.*—These embrace departmental policies and procedures for real and personal property, and supply management. Administrative services are provided for the Office of the Secretary, and departmental service operations are furnished, including the Department's post office, telephone switchboard, telegraph office, and reproduction and supply services.

5. *Administrative management.*—This covers the areas of organization, paperwork activities (forms, reports, correspondence, and records maintenance and disposition), administrative issuances, and management improvement. Departmental policies and procedures are promulgated, improvement studies are undertaken, and agency administrative management programs are evaluated to insure economical and effective administration.

6. *Regulatory hearings and decisions.*—The hearing examiners hold hearings in connection with the prescribing of new regulations and orders and on disciplinary complaints filed by the Department or on petitions filed by private parties asking relief from some action of the Department. Final administrative decisions in regulatory proceedings are rendered by the judicial officer. Agriculture Decisions is published monthly.

7. *National Agricultural Advisory Commission.*—Provision is made for the payment of necessary expenses inci-

dent to periodic meetings of the National Agricultural Advisory Commission.

WORKING CAPITAL FUND, DEPARTMENT OF AGRICULTURE—Con.

This fund finances on a reimbursable basis certain central services in the Department of Agriculture, including duplicating, photographic, art and graphics, motion picture, tabulating, supply, and Library photocopying services. The capital consists of \$400,000 appropriated and \$509,605 donated assets, as of June 30, 1957. Earnings are retained to furnish adequate working capital.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table.

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year:				
Advances	\$2,480	\$1,139	\$1,139	\$1,100
Inventories, deferred charges, etc.	275,193	306,967	308,224	309,325

OFFICE OF INFORMATION

Current authorizations:

SALARIES AND EXPENSES

For necessary expenses of the Office of Information for the dissemination of agricultural information and the coordination of informational work and programs authorized by Congress in the Department, \$1,367,500, of which total appropriation not to exceed \$537,000 may be used for farmers' bulletins, which shall be adapted to the interests of the people of the different sections of the country, an equal proportion of four-fifths of which shall be delivered to or sent out under the addressed franks furnished by the Senators, Representatives, and Delegates in Congress, as they shall direct (7 U. S. C. 417) and not less than two hundred thirty thousand eight hundred and fifty copies for the use of the Senate and House of Representatives of part 2 of the annual report of the Secretary (known as the Yearbook of Agriculture) as authorized by section 73 of the Act of January 12, 1895 (44 U. S. C. 241): *Provided*, That in the preparation of motion pictures or exhibits by the Department, not exceeding a total of \$10,000 may be used for employment pursuant to the second sentence of section 706 (a) of the Organic Act of 1944 (5 U. S. C. 574), as amended by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a). (5 U. S. C. 511-512; *Department of Agriculture and Farm Credit Administration Appropriation Act, 1958*.)

The Office has responsibility for the information work of the entire Department. Its major objective is to report

to farmers, specially affected groups, and to the public the Department's research, action, regulatory, and other programs, using all information media. This work is carried on in close cooperation with the land-grant colleges and with private industries which serve agriculture. The workload is dependent upon the demands from Department programs, direct requests, and legislative requirements.

1. *Publications review and distribution.*—Publications include farmers' bulletins, leaflets, periodicals, scientific, research, and marketing publications, and agricultural statistics.

2. *Review and distribution of current agricultural information.*—The Department's activities require the issuance of about 3,700 periodic crop, price, and market reports and press releases annually. Special information is furnished to national magazines, encyclopedic annuals, and trade publications. Digests, newsletters, and other services are made available to press associations, daily newspapers, and farm publications. Part 2 of the Secretary's annual report, known as the Yearbook of Agriculture, is published by the Office and distributed by Members of Congress. Radio is used to reach farmers locally and to broadcast regular weekly programs on major networks. Television package programs are prepared for use of land-grant colleges and television farm broadcasters. Essential information on Department policies and programs is provided to Washington and field employees by the biweekly issuance of USDA employee news bulletin.

3. *Review, preparation, and distribution of visual agricultural information.*—Motion pictures for the Department and private industries which serve agriculture are produced on a reimbursable basis and distributed through 74 cooperating State film libraries. Still photographs, illustrations, and graphics are similarly produced. News- and general-type photographs of Department programs and activities are available from a centralized library. Exhibits are produced and supplied to State extension workers for their use in State exhibit showings.

The Library, a basic unit in the research, extension and regulatory work of the Department and the State agricultural agencies, makes available books, periodicals and other publications containing information on agricultural and allied fields. It contains approximately 1,074,000 volumes, probably the most extensive agricultural collection existing in any country. Its services are used by agricultural colleges and universities, other research and educational institutions throughout the world, individual farmers, and the general public. It serves as the national agricultural library.

During 1957, there were 23,878 volumes and 272,537 separate issues of periodicals added to the collection by

purchase, gift, and exchange. During 1957, a total of 1,100,024 loans of books and periodicals were made and 138,173 reference questions were answered. The Bibliography of Agriculture, a comprehensive monthly index to the technical agricultural knowledge of the world, listed a total of 94,690 items.

FOREST SERVICE

The Service carries on three primary functions: (1) Protection, development, and use of about 181 million acres of land in national forests in the United States, Alaska, and Puerto Rico; and management of land utilization projects covering about 5 million acres; (2) cooperation with States and private forest landowners to obtain better fire protection on approximately 435 million acres of forest lands and better forest practices on about 345 million acres of privately owned commercial timberlands, to encourage reforestation and stimulate development and management of State, county, and community forests; and (3) research for all public and private forest lands and related ranges to improve protection from fire, insects, and diseases; to increase production of timber, forage, water, and other products; to develop better utilization and marketing of forest products; and to maintain a current inventory of forest resources through a nationwide forest survey. These primary functions include construction and maintenance of roads and trails, control of forest pests, protection against floods, land exchange, and a number of cooperative projects.

Current authorizations:

FOREST PROTECTION AND UTILIZATION

For expenses necessary for forest protection and utilization, as follows:

Forest land management: For necessary expenses of the Forest Service, not otherwise provided for, including the administration, improvement, development, and management of lands under Forest Service administration, fighting and preventing forest fires on or threatening such lands and for liquidation of obligations incurred in the preceding fiscal year for such purposes, control of white pine blister rust and other forest diseases and insects on Federal and non-Federal lands; **[\$68,750,000] \$68,357,000**, of which \$5,000,000 for fighting and preventing forest fires and \$1,760,000 for insect and disease control shall be apportioned for use, pursuant to section 3679 of the Revised Statutes, as amended, to the extent necessary under the then existing conditions: *Provided*, That not more than \$100,000 may be used for acquisition of land under the Act of March 1, 1911, as amended (16 U. S. C. 513-519): *Provided further*, That funds appropriated for "Cooperative range improvements", pursuant to section 12 of the Act of April 24, 1950 (16 U. S. C. 580h), may be advanced to this appropriation.

Forest research: For forest research at forest and range experiment stations, the Forest Products Laboratory, or elsewhere, as authorized by law; **[\$11,835,000] \$12,128,000**.

State and private forestry cooperation: For cooperation with States in forest-fire prevention and suppression, in forest tree planting on non-Federal public and private lands, and in forest management and processing, and for advising timberland owners, associations, wood-using industries, and others in the application of forest management principles and processing of forest products, as authorized by law; **[\$13,245,000] \$12,195,000**.

[Forest Land Management:] During the current fiscal year not to exceed \$50,000 of the funds appropriated under this heading shall be available for the acquisition of sites authorized by the Act of March 3, 1925, as amended (16 U. S. C. 555), without regard to any other limitation on the amount available for this purpose. (5 U. S. C. 511-512, 524, 565a; 7 U. S. C. 428a, 1010-1012, 1621-1627; 16 U. S. C. 471-533i, 594-1-594-5, 594a; 30 U. S. C. 601-604, 611-615; 31 U. S. C. 534; 43 U. S. C. 1181h-1181j; 36 Stat. 557; Department of the Interior and Related Agencies Appropriation Act, 1958; Supplemental Appropriation Act, 1958.)

Appropriated 1958, **\$93,830,000**

Estimate 1959, **\$92,680,000**

* Excludes \$100,000 for activities transferred in the estimates to "Management of lands and resources," Bureau of Land Management, Department of the Interior. The amounts obligated in 1957 and 1958 are shown in the schedule as comparative transfers.

Appropriation (new obligational authority).....	-----	93,830,000	92,680,000

1. *Forest land management—(a) National forest protection and management.*—The 149 national forests are protected from fire and their resources are managed in such ways as to bring about full utilization and maximum sustained production. This item also provides for management of land utilization projects, including revegetation and other development work. Funds appropriated under "Cooperative range improvements" are merged with this appropriation for obligational purposes.

Some increase is included in the budget for construction of improvements. The program to provide recreational facilities for the increasing number of visitors to the

FOREST SERVICE—Continued

Current authorizations—Continued

FOREST PROTECTION AND UTILIZATION—Continued

national forests (15% in 1957) will go forward in 1959, but at a slower rate than had been anticipated earlier.

(b) *Fighting forest fires.*—This provides for employment of additional manpower and other facilities for forest-fire emergencies which cannot be met by the fire-control organization provided under national-forest protection and management.

(c) *Insect and disease control.*—Activities to suppress and control destructive insects and diseases that threaten timber areas include two types of work carried on jointly by Federal, State, and private agencies: (1) Surveys on forest lands to detect and appraise infestations of forest insects and infections of tree diseases and determination of protective measures to be taken. (2) Control operations to suppress or eradicate forest insects and diseases, including the white pine blister rust.

(d) *Acquisition of lands.*—Lands are acquired to protect the watersheds of navigable streams and to increase the production of timber with the approval of the National Forest Reservation Commission. The present acquisition program is only for purchase of small tracts within the 55 approved purchase areas.

2. *Forest research.*—Research is conducted at nine regional forest experiment stations, the Forest Products Laboratory, and elsewhere.

(a) *Forest and range management.*—This research provides private and public land managers and owners with a sound basis for protection and management of timber, range, and watershed lands. Studies are conducted to maintain a sustained yield of products at the lowest possible costs; increase forage on rangelands for maximum production of livestock without damage to soil, watershed, or other values; assure maximum regular flow of usable water, and reduce flood and sedimentation.

(b) *Forest protection.*—Research is conducted to develop sound measures for the protection of forests from damage by fire, insects, and diseases. These investigations provide the technical basis for control and preventive measures, including predictions of fire danger.

(c) *Forest products utilization.*—Studies are conducted to develop new and improved forest products, reduction and utilization of waste, and use of low-quality wood and unpopular species. They include studies to reduce costs of logging and wood utilization, and to develop basic knowledge of wood and disseminate this to forest owners, manufacturers, fabricators, and consumers.

(d) *Forest resources.*—These investigations are conducted to inventory and appraise the condition of forest lands, volume and quality of standing timber, ownership of timber resources, annual growth and depletion, potential need for timber products, and information on production and marketing of forest products.

MAIN WORKLOAD FACTORS

[Acres in millions]

	1957 actual	1958 estimate	1959 estimate
Initial surveys (annual).....	10	15	30
Initial surveys (cumulative).....	514	529	559
To be surveyed (total) ¹	270	255	225
Resurveys (annual).....	28	35	30
Resurveys (cumulative).....	276	311	341

¹ Includes all of Alaska.

3. *State and private forestry cooperation.*—This program, carried on in cooperation with the States, encourages private timber management. Privately owned forest lands comprise three-fourths of the Nation's commercial forest area and produce 90% of all timber cut. The fire-control program applies to all State and private forest lands within the boundaries of organized protection units. The remainder of the program is concentrated on small forest properties in private ownership because they are in greater need of management.

(a) *Forest fire control.*—Assistance is furnished 44 States and Hawaii in preventing and suppressing forest fires on private and State owned lands by financial aid, training, procurement of equipment, and a nationwide fire-prevention campaign. About 90% of the 435 million acres of non-Federal ownership are now partially covered. During 1956 the acreage burned on protected areas was 0.41% as against an estimated 11.22% on unprotected lands. Of the total expenditures under this program, 73% is contributed by States and counties, 5% by private owners, and 22% by the Federal Government.

(b) *Forest tree planting.*—To encourage woodland owners to reforest unproductive portions of their holdings, and farmers to plant wind barriers around their fields and farmsteads—a total of more than 53 million acres altogether—the States provide planting stock at less than cost. The Federal Government shares the cost of producing the stock with the States and private landowners.

(c) *Forest management and processing.*—In cooperation with State foresters, 285 projects in 1,376 counties and parts of 32 others are operated to aid small-woodland owners in applying good management to their timber holdings. In 1956 these projects covered some 38,121 owners and about 3.1 million acres.

(d) *General forestry assistance.*—Technical forest management assistance is provided to State, community, private, and other Federal agencies, forest industries, colleges, and landowners.

FOREST ROADS AND TRAILS

For expenses necessary for carrying out the provisions of section 23 of the Federal Highway Act approved November 9, 1921, as amended (23 U. S. C. 23, 23a), relating to forest development roads and trails, including the construction, reconstruction, and maintenance of roads and trails on experimental areas under Forest Service administration, [\$24,336,000] \$23,099,000, to remain available until expended: *Provided*, That funds available under the Act of March 4, 1913 (16 U. S. C. 501), shall be merged with and made a part of this appropriation: *Provided further*, That not less than the amount made available under the provisions of the Act of March 4, 1913, shall be expended under the provisions of such Act. (5 U. S. C. 565a; 16 U. S. C. 526; Department of the Interior and Related Agencies Appropriation Act, 1958.)

Roads and trails are essential to protection and management of national forests and utilization of their resources. The system consists of approximately 124,000 miles of earth or gravel surfaced roads and 116,000 miles of supplemental trails.

The 1959 program will permit the construction of 354 miles of general purpose roads and 644 miles of timber access roads to harvest national forest timber, a total of 998 miles. This compares with 1,134 miles constructed in 1957 and 1,120 being constructed in 1958.

Ten percent of the amounts received annually from national forest activities is available under the permanent

appropriation "Roads and trails for States" for construction and maintenance within the State from which such proceeds are derived. Such amounts are included in these schedules for 1958 and 1959.

Appropriation (new obligational authority)-----	500,000	500,000	300,000

Forest lands are acquired to preserve the wilderness conditions of part of the Superior National Forest in Minnesota. There are still 24 properties used for commercial resort purposes, 66 properties with other improvements, mostly cabins, and 36,700 acres of undeveloped lands, all to be acquired and the improvements dismantled. Through 1958, \$1,500,000 of an authorized \$2,500,000 has been appropriated.

GENERAL PROVISIONS, FOREST SERVICE—Continued

alteration of buildings and other public improvements, but the cost of any such building, exclusive of the cost of constructing a water-supply or sanitary system and of connecting the same with any such building, and exclusive of any tower upon which a lookout house may be erected, shall not exceed \$25,000 (\$30,000 in Alaska), *except for one building which shall not exceed \$80,000; Provided, That one building may be constructed to serve the purposes of two or more buildings at a cost not to exceed the sum of the limitations for separate buildings; Provided further, That any building, the cost of which as improved was \$25,000 or more, shall not be improved within any fiscal year by an amount in excess of 5 per centum of such cost (5 U. S. C. 565a) except that an additional \$400,000 may be used for improvements at the Forest Products Laboratory; and (f) expenses of the National Forest Reservation Commission as authorized by section 14 of the Act of March 1, 1911 (16 U. S. C. 514).*

SEC. 202. Except to provide materials required in or incident to research or experimental work where no suitable domestic product is available, no part of the funds appropriated to the Forest Service shall be expended in the purchase of twine manufactured from commodities or materials produced outside of the United States.

SEC. 203. No part of any appropriation to the Forest Service in this Act shall be used for publicity or propaganda purposes to support or defeat legislation pending before the Congress.

SEC. 204. The Secretary may sell at market value any property located in Yalobusha, Chickasaw, and Pontotoc Counties, Mississippi, administered under title III of the Act of July 22, 1937, and suitable for return to private ownership under such terms and conditions as would not conflict with the purposes of said Act.

SEC. 205. Funds appropriated under this Act shall not be used for acquisition of forest lands under the provisions of the Act approved March 1, 1911, as amended (16 U. S. C. 513–519, 521), where such land is not within the boundaries of a national forest nor shall these lands or lands authorized for purchase in Sanders County, Montana, be acquired without the approval of the local government concerned. (*Department of the Interior and Related Agencies Appropriation Act, 1958.*)

ALLOCATIONS AND ALLOTMENTS RECEIVED FROM OTHER ACCOUNTS

NOTE.—Obligations incurred under allocations or allotments from other accounts are included in the schedules of the parent appropriations as follows:

“Watershed protection,” Soil Conservation Service.
 “Flood prevention,” Soil Conservation Service.
 “Agricultural conservation program.”
 “Conservation reserve program,” soil bank programs.
 “Great Plains conservation program.”
 “Army industrial fund.”
 “Construction, general,” Corps of Engineers, Civil.
 “Research and development,” Department of the Navy.
 “Mutual security,” funds appropriated to the President.
 “Salaries and expenses, civil defense functions of Federal agencies,” Federal Civil Defense Administration.

Appropriation.....	29,172,394	27,586,600	27,586,600

1. *Forest fire prevention.*—Fees for the use of the character "Smokey Bear" by private enterprises are collected under regulations promulgated by the Secretary and are

available for furthering the nationwide forest fire prevention campaign (66 Stat. 92).

2. *Payment to Minnesota.*—At the close of each fiscal year the State of Minnesota is paid $\frac{3}{4}$ of 1% of the appraised value of certain Superior National Forest lands in the counties of Cook, Lake, and Saint Louis for distribution to these counties (16 U. S. C. 577g).

3. *Payments due counties, submarginal land program.*—Of the revenues received from the use of submarginal lands, 25% is paid to the counties in which such land is situated, for school and road purposes (7 U. S. C. 1012).

4. *Payments to school funds, Arizona and New Mexico.*—The States of Arizona and New Mexico are paid a share of the national-forest receipts for school purposes (36 Stat. 562, 573).

5. *Payments to States and Territories.*—With minor exceptions, 25% of the money received from the national forests is paid to the States and Territories for public schools and roads of the county in which such forests are situated (16 U. S. C. 500).

FOREST SERVICE—Continued

Intragovernmental funds—Continued

WORKING CAPITAL FUND, FOREST SERVICE—Continued

This fund is available, without fiscal year limitation, for financing, on a reimbursable basis or by advance payments in connection with firm orders, various services such as repairing and replacing equipment, stocking and issuing supplies, and operation of photographic and reproduction facilities in support of programs of the Forest Service. These service operations serve concurrently the programs of fire protection, timber utilization, construction and maintenance of roads and other improvements, reforestation, grazing, watershed, forest and forest products research, and kindred conservation activities of the Forest Service, including cooperative assistance with other Federal agencies, States, counties, farmers, forest land-owners, and others engaged in the same objectives. The principal of the fund as of June 30, 1957, including donated assets at its inception and retained earnings for fiscal year 1957, is \$13,094,994. This amount, together with earnings for 1958 totaling \$653,111, plus an estimated amount of assets to be donated during fiscal year 1958 of \$1,267,396, represents an estimated \$15,015,501 investment of the Government at the end of fiscal year 1958.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year:			
Inventories.....	\$828,851	\$899,941	\$947,941

1. Forest land management: (b) Fighting forest fires (total obligations).....		\$4,000,000	
Financing:			
Proposed supplemental appropriation.....		4,000,000	

Under existing legislation, 1958.—A proposed supplemental appropriation in the amount of \$4 million is anticipated for fighting forest fires.

GENERAL PROVISIONS

SEC. 501. Within the unit limit of cost fixed by law, appropriations and authorizations made for the Department under this Act shall be available for the purchase, in addition to those specifically provided for, of not to exceed [552] 466 passenger motor vehicles of which 462 shall be for replacement only, and for the hire of such vehicles.

SEC. 502. Provisions of law prohibiting or restricting the employment of aliens shall not apply to employment under the appropriation for the Foreign Agricultural Service.

SEC. 503. Funds available to the Department of Agriculture shall be available for uniforms or allowances therefor as authorized by the Act of September 1, 1954, as amended (5 U. S. C. 2131).

SEC. 504. No part of the funds appropriated by this Act shall be used for the payment of any officer or employee of the Department who, as such officer or employee, or on behalf of the Department or any division, commission, or bureau thereof, issues, or causes to be issued, any prediction, oral or written, or forecast, except as to damage threatened or caused by insects and pests, with respect to future prices of cotton or the trend of same.

SEC. 505. Except to provide materials required in or incident to research or experimental work where no suitable domestic product is available, no part of the funds appropriated by this Act shall be expended in the purchase of twine manufactured from commodities or materials produced outside of the United States.

SEC. 506. Not less than \$1,500,000 of the appropriations of the Department for research and service work authorized by the Acts of August 14, 1946, and July 28, 1954 (7 U. S. C. 427, 1621-1629), shall be available for contracting in accordance with said Acts.

SEC. 507. No part of any appropriation contained in this Act or of the funds available for expenditure by any corporation or agency included in this Act shall be used for publicity or propaganda purposes to support or defeat legislation pending before the Congress. (Department of Agriculture and Farm Credit Administration Appropriation Act, 1958.)

FOREST SERVICE								
Forest protection and utilization: Forest land management.....	6	320,000	4	25,000	295,000	27	180,000	Forest Service administrative personnel and fire fighters: Transportation of men and supplies, including smokejumpers, to inaccessible areas for reconnaissance and suppression of large fires, and for detection services in remote areas. Also for pest control in locating incipient outbreaks of forest insect pests and in appraising the scope and seriousness of infestations in forested areas, and directing and evaluating effectiveness of control operations.
Total, Department of Agriculture.	8	354,000	5	28,000	326,000	34	194,000	

DEPARTMENT OF COMMERCE

New obligational authority recommended for 1959 for the Department of Commerce totals \$951 million, an increase of \$249 million over 1958. Expenditures are estimated to rise from \$652 million in 1958 to \$803 million in 1959.

The major increases are to continue the expansion of the Federal airways system and the modernization of the merchant fleet. A substantial, though smaller, increase is needed for the periodic censuses. Transportation and related programs represent about 90% of the total new obligational authority requested.

Economic and technical development.—The recommendations for 1959 include, under proposed legislation, an additional \$10 million in new obligational authority needed to complete the Inter-American Highway.

Promotion of science and research.—New obligational authority and expenditures for the National Bureau of Standards and the Bureau of the Census will rise in 1959. Additional emphasis will be placed on programs of basic research directed at improving the national standards of physical measurement. Additional funds will also be required to collect and process data for the 1958 census of business, manufactures, and mineral industries and to prepare for the 1960 decennial census of population, housing, and agriculture.

Promotion of water transportation.—An appropriation of \$120 million for ship operating subsidies is recommended for 1959, an increase of \$20 million over 1958. Expenditures in 1959 will also amount to \$120 million, about the same as in 1958.

The new obligational authority recommended for 1959 includes \$160 million for ship construction subsidies. This is another installment in the program to schedule orderly replacement of the large bloc of ships, now in operation, which were built during the war years, 1942–45. Only \$3 million was appropriated in 1958 for ship construction, but the availability of unobligated funds from prior years will enable the program to proceed at about the same level as now proposed for 1959.

Other maritime programs will continue in the budget year at about the current level.

Provision of highways.—The Federal-aid highway program is financed from the highway trust fund, and contract authorizations and expenditures for this program are, therefore, not included in budget totals. In 1959 it is proposed to transfer the financing of the Department's forest and public lands highways programs to the highway trust fund, since these highways are in most instances on the Federal-aid highway systems. Accordingly, beginning with 1959, the contract authorizations and expenditures for these programs are not included in budget totals.

Budget expenditures of the Department, for highways, in 1959 will, therefore, be confined to the Woodrow

Wilson Memorial Bridge over the Potomac and other miscellaneous programs, none of which requires new obligational authority.

Promotion of aviation.—New obligational authority and expenditures for the Civil Aeronautics Administration will rise substantially in 1959, reflecting continued progress on the program to increase traffic handling capacity and to make other needed improvements on the airways system to accommodate growing traffic and the operation of commercial jet aircraft. To increase economy and efficiency of operations, the Departments of Commerce and Defense will expand joint use of certain facilities, such as long-range radar.

The new obligational authority recommended for the Civil Aeronautics Administration in 1959 includes \$175 million for the installation of new facilities and \$230 million for operation and maintenance of the airways system, enforcement of safety regulations, and administration of the Federal airport program. Legislation is being recommended to initiate a program of airways user charges, which will partly offset the cost of maintaining and operating the domestic airways system for civil users.

The 1959 appropriation recommended for air carrier subsidy payments by the Civil Aeronautics Board is \$40.75 million, an increase of \$3.5 million over the 1958 appropriation.

Other aids to business.—These include programs for promoting foreign trade, providing informational and statistical services to business, conducting industrial mobilization activities, granting patents, preparing aeronautical and nautical charts, establishing geodetic controls, and preparing analyses of business trends. In general, the funds requested in this budget will permit these activities to go forward at about the 1958 level. An increase is recommended, however, for the Business and Defense Services Administration, primarily to finance a new program expected to be initiated in 1958 for making foreign scientific and technical documents more readily available to United States science and industry. Additional funds will also strengthen the industry divisions and make technical and marketing information, available within the Government, more accessible to small business.

Regulation of commerce and finance.—Additional funds are recommended for administrative expenses of the Civil Aeronautics Board in order to meet its most pressing problems in the route, rate, and safety areas. The 1959 recommendations also include, under proposed legislation, new obligational authority to continue the export control program at the current level.

Civilian weather services.—New obligational authority and expenditures of the Weather Bureau will increase somewhat in 1959, primarily to install and maintain new meteorological equipment.

2. *Departmental staff services.*—Staff assistance and supervision in the general management and administration of the Department is provided in personnel, budget and management, information, publications, security, legal, internal inspection, and emergency planning activities.

3. *Administrative services.*—Departmentwide direction is provided in property and space, records, general administrative services, safety and motor vehicles, and library activities. Centralized general administrative services, including accounting, are furnished to the smaller bureaus of the Department.

4. *Air transport mobilization planning.*—This provides for planning the mobilization of civil resources in order to insure that in time of war the air transportation facilities of the Nation will be adequate and effectively used.

Public enterprise funds:

AVIATION WAR RISK INSURANCE REVOLVING FUND

The Secretary of Commerce is hereby authorized to make such expenditures, within the limits of funds available pursuant to section 1306 of the Act of June 14, 1951, as amended (49 U. S. C. 716), and in accordance with section 104 of the Government Corporation Control Act, as amended (31 U. S. C. 849), as may be necessary in carrying out the programs set forth in the budget for the fiscal year 1959 for aviation war risk insurance activities under said Act (49 U. S. C. 711-722).

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
Operating costs: Administrative expenses (total costs—obligations).....			\$5,000
Financing:			
Amounts becoming available: Fees for issuance of binders.....			11,000
Unobligated balance carried forward.....			—6,000
Financing applied to program.....			5,000

The purpose of this fund is to provide aviation war risk insurance in the event of an outbreak of war. Binders would be issued to cover aircraft and cargo, and would become war risk insurance automatically on the outbreak of war. Administrative costs will be paid out of fee receipts.

DEFENSE PRODUCTION GUARANTIES

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Financing:			
Unobligated balance brought forward	\$5,883	\$5,883	
Capital transfer (payment of profits to Treasury) (—)		—5,883	
Unobligated balance carried forward	—5,883		
Financing applied to program			

Guaranties are given on approved loans made by private sources or Federal Reserve banks to facilitate performance under defense production contracts. Guaranty fees are used to pay expenses of Federal Reserve banks which serve as fiscal agents. Net earnings are retained to meet possible future losses (Defense Production Act of 1950, sec. 301, as amended). Legislative authority for this program expires on June 30, 1958.

This fund finances, on a reimbursable basis, common services which can be performed to greater advantage centrally (5 U. S. C. 607). The principal of the fund consists of both appropriated and donated assets. Earn-

ings which are surplus to operational requirements of the fund are returned to the Treasury.

Relation of costs to obligation.—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate

1. *Air Coordinating Committee.*—In accordance with Executive Order 10655, the Air Coordinating Committee is composed of representatives from agencies having aviation responsibilities. The Committee examines aviation problems and developments affecting more than one agency and recommends joint policies. Recommendations are submitted to the President on aviation policies requiring his attention. Liaison is provided between Government and industry in aviation matters and with the International Civil Aviation Organization.

2. *Government Patents Board.*—The Board is responsible, under Executive Order 10096, for the administration and interpretation of the policy set forth therein governing the respective property rights of the Government and its employees in inventions made by its employees.

The Bureau is the principal fact-finding and statistical agency of the Federal Government.

1. *Retail, wholesale, and service trade statistics.*—Monthly dollar volume estimates of retail and wholesale sales are prepared and monthly trends on retail and wholesale inventories are computed. An advance report of retail sales is issued within 10 days after the close of the month. Once a year, additional data are reported on retail inventories, and accounts receivable outstanding at end of year and total sales for the year by regions. In 1959, monthly data will be obtained on outstanding consumer credit and on the receipts of service trades. Additional commodity detail will be obtained on the monthly retail and wholesale inventory surveys.

2. *Manufacturing and industrial statistics.*—Periodic surveys are made of production, shipments, orders, and materials consumed for important commodities. An annual survey of manufactures produces data on the number, size, industrial classification, and location of manufacturing establishments and key measures of factory operations such as employment, shipment, inventories, etc. In 1959 an improved probability sample embodying more adequate industrial classification and better coverage of reporting units will be developed.

3. *Agriculture statistics.*—Information is compiled on cotton ginned at 11 dates during the ginning season.

4. *Foreign trade and shipping statistics.*—Monthly, quarterly, and annual reports are published on the kind, quantity, shipping weight and dollar value of imports and exports. Some savings are anticipated because of the transition to more efficient tabulating equipment.

5. *Population and housing statistics.*—Based on a monthly survey of 35,000 households, monthly, quarterly, and annual estimates are published of employment, unemployment, population mobility, school enrollment, personal income, housing vacancies, and other characteristics of the population. Annual estimates of population by States are also published. In 1959, data collection on construction activity will be initiated.

6. *State and local government statistics.*—Reports are published providing national estimates of total governmental finances, employment, and payrolls, and comparative statistics for State governments and larger cities. In

1959, a quarterly survey on governmental finances will be initiated.

7. *Statistical abstract and special reports.*—The Statistical Abstract is an annual summary of Government and private statistics on the industrial, social, political, and economic activities of the United States. Historical and other general reports are also published periodically. A report showing for each county in the United States the number and kind of all business establishments, and their employment and payrolls is published on a biennial basis.

9. *Mobilization functions.*—Statistics relating primarily to industrial facilities are developed in support of the bomb-damage assessment program.

The 1958 censuses of business, manufactures, and mineral industries will provide data on the volume of production and trade, the number, size, geographical distribution, and other characteristics of the Nation's 3.3 million business and industrial enterprises. The printing, mailing, and most of the collection of report forms will be accomplished, and editing work will be started in 1959. Funds for completion of editing and for tabulation and printing of the reports will be requested in 1960.

Intensive preparatory work for the 18th decennial censuses of population, housing, and agriculture began in 1958 and will continue in 1959 and 1960. An objective is to achieve faster release of tabulated results through an extension of sampling, and by the use of electronic equip-

ment for processing and tabulating the returns. The work in 1959 includes the final determination of questions to be asked and of procedures to be employed, including a major field test of procedures scheduled for October 1958, the preparation of enumerator maps, the printing of the questionnaires for the agriculture census, and the purchase of electronic equipment needed for the rapid processing of results. Enumeration will not actually begin until 1960. The cost of the census, including preparatory work, will be spread over 6 fiscal years and is currently estimated at \$110 million.

CIVIL AERONAUTICS ADMINISTRATION

The Administration controls air traffic, installs, and operates aids to air navigation and traffic control, certifies the competency of airmen and the airworthiness of aircraft, and administers grants for airport construction.

Current authorizations:

OPERATION AND REGULATION

[Operation and regulation:] For necessary expenses of the Civil Aeronautics Administration in carrying out the provisions of the Civil Aeronautics Act of 1938, as amended (49 U. S. C. 401), and other Acts incident to the enforcement of safety regulations, maintenance and operation of air-navigation and air-traffic control facilities, and disposal of surplus airports and administering instruments of disposal; planning, research, and administrative expenses for carrying out the provisions of the Federal Airport Act of May 13, 1946, as amended, including furnishing advisory services to States and other public and private agencies in connection with the construction or improvement of airports and landing areas; developmental work and service-testing as tends to the creation of improved air-navigation facilities, including landing areas, aircraft, aircraft engines, propellers, appliances, personnel, and operation methods, and acquisition of sites for such activities by lease, or grant; purchase of not to exceed **[forty-four]** *forty* passenger motor vehicles for replacement only; *purchase of not to exceed two aircraft; hire of aircraft (not exceeding \$675,000); operation and maintenance of not to exceed [ninety-two] one hundred and twelve aircraft; fees and mileage of expert and other witnesses; and purchase and repair of skis and snowshoes; [\$181,747,800] \$230,000,000: Provided, That there may be credited to this appropriation, funds received from States, counties, municipalities, and other public authorities for expenses incurred in the maintenance and operation of air-navigation facilities. (49 U. S. C. 401-705; 49 U. S. C. 171-184; 49 U. S. C. 1101-1119; 50 U. S. C. App. 1622 (g) and 1622 a, b, c; Convention on International Civil Aviation Treaty, dated April 14, 1947; 49 U. S. C. 1151-1160; Department of Commerce and Related Agencies Appropriation Act, 1958.)*

1. *Federal airways.*—This is a program of maintaining and operating, 24 hours daily, a national network of aids to air navigation and traffic control along the primary air routes and at principal airports in the continental United States, its Territories and possessions. Major increases

CIVIL AERONAUTICS ADMINISTRATION—Con.

Current authorizations—Continued

OPERATION AND REGULATION—Continued

in 1959 are for (a) handling workload generated by increased air traffic; (b) operating newly commissioned radar, navigation aids and other airways facilities procured and installed with funds appropriated under "Establishment of Air Navigation Facilities"; (c) training of traffic control and maintenance personnel; and (d) full-year costs of facilities and services operated on a part-year basis in 1958.

2. *Flight operations and airworthiness.*—Inspections and certifications are made of aircraft, airmen, and operators of aircraft and air agencies, including the enforcement of the Civil Air Regulations which are designed to provide safe and competent operation of aircraft. Increases in 1959 are for handling workload incident to the increased volume of flying and the introduction of new types of aircraft.

3. *Airports.*—This activity includes costs of administering grants for airport construction; inspection of airport facilities to determine their utility and to assure compliance with law and regulations; and the provision of advisory services on airport design and engineering.

The Federal airways system is being improved by the procurement and installation of new equipment and the modernization of existing facilities. The 1959 estimate is to carry forward a program begun in 1957 which is designed to expand the capacity of the airways system to handle growing air traffic efficiently and safely.

The cost of operating and maintaining equipment installed under this appropriation is covered by the appropriation "Operation and regulation."

Funds are budgeted for the following types of facilities in 1959:

1. *Air navigation facilities*—(a) *VORTAC*.—Covers the ground installation portion of the standard short-range navigation system which defines the location of the principal airways and gives pilots of equipped aircraft their distance and direction from ground stations; (b) *Low/medium frequency radio ranges and markers*.—Covers radio beacons, ranges and associated equipment which provide pilots of equipped aircraft with direction information and define the location of certain airways; (c) *Instrument landing systems*.—Covers the ground installations of this standard system which provide pilots with direction, distance and glide slope information necessary for making approaches to runways under conditions of poor visibility; (d) *Approach lighting*.—Consists of a row of lights extending outward from runways to aid pilots during landings; and (e) *Intermediate fields*.—Are chiefly emergency landing areas provided on certain air routes at locations where provision of such facilities by local governing bodies cannot be obtained.

2. *En route traffic control aids*—(a) *Long-range radar*.—Aids en route air traffic control by displaying positions of

aircraft at distances up to 230 miles; (b) *Air route traffic control centers*.—Covers facilities, including structures and equipment such as air/ground radio, which are used in controlling air traffic over extensive geographical areas; (c) *Air traffic communications stations*.—Includes structures, communications, and other equipment used to relay traffic control information and to provide other flight assistance to pilots; and (d) *International air traffic communications stations*.—Includes structures and long-range communications equipment for providing flight assistance and controlling traffic on transoceanic international routes.

3. *Terminal area traffic control aids*—(a) *Airport traffic control towers*.—Covers air/ground communications and other gear required to equip towers for controlling traffic on and around airports; and (b) *Terminal area radar*.—Aids traffic control in the vicinity of airports by displaying aircraft positions at distances up to 70 miles.

4. *Supporting facilities*—(a) *Flight inspection and logistics aircraft*.—Aircraft and equipment used to flight check accuracy and other characteristics of navigation and traffic control aids, and also to provide logistic support for remote facilities; and (b) *Housing utilities and miscellaneous*.—Supporting facilities necessary at remote locations, and other items not covered elsewhere.

The following table lists the major facilities already funded and those budgeted in 1959:

	Number of facilities		
	Authorized through 1958	Proposed in 1959	
1. Air navigation facilities:			
(a) VORTAC:			
Radio omniranges.....	634	13	
Complete VORTAC installations.....	47	62	
Equipment to convert VOR's to VORTAC.....	299	150	
(c) Instrument landing systems.....	195	19	
(d) Approach lighting:			
Runway approach lighting systems.....	89	80	
Sequenced flashing lights.....	36	7	
2. En route traffic control aids:			
(a) Long-range radars.....	40	10	
Air traffic control radar beacons.....	---	43	
3. Terminal area traffic control aids:			
(a) Airport traffic control tower service.....	224	23	
(b) Terminal area radars.....	62	19	
Air traffic control radar beacons.....	---	5	
Airport surface detection radars.....	---	10

GRANTS-IN-AID FOR AIRPORTS (LIQUIDATION OF CONTRACT AUTHORIZATION)

【Grants-in-aid for airports (liquidation of contract authorization).】 For liquidation of obligations incurred under authority granted in the Act of August 3, 1955 (69 Stat. 441), to enter into contracts, 【\$25,000,000】 \$30,000,000, to remain available until expended. (49 U. S. C. 1101-1119 as amended by sec. 4, Public Law 211, 84th Congress (69 Stat. 441); Department of Commerce and Related Agencies Appropriation Act, 1958.)

Appropriated 1958, \$25,000,000

Estimate 1959, \$30,000,000

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
Grants for construction of airports (total obligations).....	\$37,491,306	\$61,250,000	\$73,000,000
Financing:			
Unobligated balance brought forward (contract authorization).....	—33,294,103	—58,802,797	—60,552,797
Unobligated balance carried forward (contract authorization).....	58,802,797	60,552,797	50,552,797

Contract authorization (new).....	63,000,000	63,000,000	63,000,000
Unfunded balance at end of year.....	—75,500,000	—113,500,000	—146,500,000
Appropriation to liquidate contract authorization.....	30,000,000	25,000,000	30,000,000

Grants are made to local sponsors for construction at airports which are part of a national system capable of meeting the needs of civil aviation and nontactical military operations. Public Law 211, approved August 3, 1955, amended the Federal Airport Act and provided contract authorizations of \$42.5 million for 1956 and \$63.0 million for each of the years 1957 through 1959. The following tabulation summarizes activity under the act.

(Dollars in millions)

	1947 through 1957 actual	1958 estimate		1959 estimate	
		Appropriated funds	Contract authorization	Appropriated funds	Contract authorization
Airports having projects in program.....	1,386	80	350	---	390
Projects physically completed.....	2,756	60	340	100	375
Grant funds authorized.....	\$340.3	---	\$63.0	---	\$63.0
Prior year balance available.....	---	\$7.0	\$58.8	---	\$60.6
Grant obligations.....	\$274.5	\$7.0	\$61.2	---	\$73.0
Federal expenditures.....	\$222.1	\$10.0	\$30.1	\$6.0	\$45.5

It is estimated that an appropriation of \$30 million will be required for fiscal year 1959 to pay obligations incurred under this program.

Appropriation (new obligational authority).....	1,500,000	1,566,000	2,500,000

This appropriation finances the operation and maintenance of the Washington National Airport, the air terminal facility for Washington, D. C. It serves as the primary terminal for commercial and private aeronautical activities in the metropolitan area of Washington.

Relation of costs to obligations.—The relationship is derived from year-end balances and selected resources as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year: Inventories and items on order:				
Stores (goods unconsumed by projects).....	\$58,903	\$91,365	\$90,000	\$90,000
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received).....	41,036	81,729	45,794	500,794
Total selected resources at end of year....	99,939	173,094	135,794	590,794
Selected resources at start of year (—).....		—99,939	—173,094	—135,794
Costs financed from obligations of other years, net (—).....			—37,300	
Obligations incurred for costs of other years, net.....		73,155		455,000

While the program is financed by direct appropriation, the airport earns revenues for services to tenants and other users, including other Government agencies. Financial statements shown below relate to both this appropriation and to the construction appropriation. They reflect total operations by including in revenues amounts representing the value of unrealized revenues for services furnished other Government agencies which will not be billed or collected, such as landing fees for Government aircraft and rental for office and hangar space. Similarly, total costs reflect unfunded depreciation on all depreciable assets and interest on the Government's investments on a basis comparable to that of other major metropolitan airports.

【CONSTRUCTION AND DEVELOPMENT, ADDITIONAL WASHINGTON AIRPORT】

【For necessary expenses for the construction and development of a public airport in the vicinity of the District of Columbia, as authorized by the Act of September 7, 1950 (64 Stat. 770), including acquisition of land, \$12,500,000, to remain available until expended: *Provided*, That not to exceed a total of \$250,000 may be advanced from this appropriation to the applicable appropriations of the Civil Aeronautics Administration for necessary administrative expenses: *Provided further*, That such sums as may be necessary but not to exceed \$100,000 shall be transferred from this appropriation to the President for expenses necessary for the investigation of alternate sites for said airport: *Provided further*, That no funds shall be expended for construction and development of said airport until the President shall make a report to the Congress with a recommendation as to the site, said report to be submitted not later than January 15, 1958.】 (64 Stat. 770; Supplemental Appropriation Act, 1958.)

Appropriated 1958, \$12,500,000

Program by activities:			
Construction (total obligations).....		\$12,500,000	
Financing:			
Appropriation (new obligational authority).....		12,500,000	

Funds were appropriated in 1958 to start construction of an additional airport to serve the Washington area. No action is being taken to proceed with construction until an investigation of alternate sites is completed and a recommendation by the President has been made to the Congress for a specific site. However, the budget reflects obligations in 1958 on the assumption that work will get underway after a final site selection has been made.

CIVIL AERONAUTICS BOARD—Continued

Current authorizations—Continued

SALARIES AND EXPENSES—Continued

The Board regulates the economic aspects of air carrier operations, both domestic and international; promulgates safety rules and standards; investigates aircraft accidents; and participates in the development of international air transportation. The increase proposed for 1959 is for continuing on a full-year basis in 1959 the program increases authorized in 1958 and for additional expansion in certain critical program areas, primarily in the routes, rates, and safety areas.

1. *Economic regulation.*—This includes granting certificates of public convenience and necessity; prescribing or approving rates and rate practices of air carriers; fixing mail rate compensation; preventing unfair competition; approving business relationships between air carriers; prescribing accounting regulations and a uniform system of carrier accounts; and enforcing the economic provisions of the act.

2. *Safety activities.*—These consist of promulgation of civil air regulations; adjudication of complaints alleging violations of these regulations; the coordination of the civil air regulations with international safety standards and practices; and investigation of civil aircraft accidents to determine probable cause. Potential hazards are also investigated, and preventive measures are recommended and put into effect.

3. *Legal staff activities.*—Legal advice and assistance is provided on all aspects of economic and safety regulatory activities; opinions of the Board are prepared; and litigation matters are handled.

The Board fixes rates for transportation of airmail to promote the development of air transportation required for the commerce of the United States, the postal service, and national defense. Many of these rates include an element of subsidy. The subsidy portion is paid by the Civil Aeronautics Board, and the service portion is paid by the Post Office Department.

The obligations shown above, less the obligated balances recovered, reflect the amounts recorded each year as due the air carriers. These sums cover services performed during the year, computed at rates then in effect, plus or minus such adjustments as are needed to reflect the issuance, during the year, of final rate orders affecting prior years. Approximately 1 to 2 months of obligations are due but unpaid at the end of any year.

The following table reflects the estimated amounts becoming due finally for each year, together with the adjustments between years:

ESTIMATED SUBSIDY EARNINGS AND OBLIGATIONS RELATED TO APPROPRIATIONS

	1957 actual	1958 estimate	1959 estimate
Estimated subsidy earnings under final Board action:			
Domestic trunklines.....	\$1,467,803		
Local service operations.....	27,264,765	\$29,785,662	\$29,722,024
Helicopter operations.....	3,535,275	4,074,480	4,417,800
Alaskan operations.....	6,053,645	5,952,598	5,806,833
Hawaiian operations.....	215,139		
International operations.....	3,573,452	789,000	781,000
Total earnings.....	42,110,079	40,611,740	40,727,657
Earnings in prior years recorded within the year.....	813,790	4,153,892	2,443,960
Reduction of earnings recorded in prior years.....	-8,917,848	-2,339,621	
Earnings of the year recorded in later years.....	-2,560,129	-1,653,231	-532,783
Total obligations (less recoveries).....	31,445,892	40,772,777	42,638,834

The following analysis shows the subsidy outlook for 1959 under final Board actions:

	Carrier units	Non-subsidized	Subsidized
Domestic:			
Domestic trunklines.....	12	--	--
Local service operations.....	--	13	--
Helicopter operations.....	--	3	--

All domestic trunklines have been in a nonsubsidized status since 1957. Subsidy need for local service and helicopter operations has increased as a result of certification of new feeder services and increasing costs.

Carrier units

Non-
subsi- Subsi-
dized dized

Territorial:			Subsidy will continue to support routes between United States and Alaska and to remote locations. All international carriers have been in a nonsubsidized status since 1957, with the exception of Braniff Airways' services to South America.
Alaskan operations.....	1	7	
Hawaiian operations.....	2	--	
International.....	11	1

Appropriation (adjusted).....	10,941,000	11,550,000	11,750,000

NOTE.—Reimbursements from non-Federal sources were derived from the sale of special maps and charts and for providing special surveys and related data (33 U. S. C. 883 (e)).

The survey publishes aeronautical and nautical navigation charts of the United States, its Territories, and surrounding waters, using data obtained through field surveys. In addition, seismological and geodetic control data are obtained and disseminated, and worldwide tide and current information is compiled and published.

Direct program by activities—1. Surveys and charts for marine and air navigation.—Hydrographic, topographic, tide and current, magnetic, and aeronautical surveys are made to secure information for nautical and aeronautical charts and tables required for safe sea and air navigation.

Miscellaneous receipts returned to the Treasury from the sale of charts and related publications were \$618,060 in 1957 and are estimated to be \$650,000 during 1958, and approximately the same in 1959.

Coast pilots, tide and current tables	82,715	83,000	83,000

2. *Geodetic control.*—Surveys are made in the United States and its Territories to determine the horizontal position (latitude and longitude) and the vertical positions (elevation above mean sea level) of a network of control points which are permanently marked on the ground. These points are spaced so that adequate survey control is available for topographic, geologic, and other types of mapping, and for planning large-scale engineering projects. The positions and descriptions of these points are published and distributed to Federal, State, and local agencies and the general public.

AREA SURVEYED AND MARKED POINTS ESTABLISHED

	1957 actual	1958 estimate	1959 estimate
Triangulation:			
Area (square miles)	44,110	40,000	40,000

Leveling:			
Linear miles	7,020	7,000	7,000
Marks established	5,060	5,000	5,000

3. *Earthquake investigation.*—Earthquakes are located and investigated to determine their severity and to obtain engineering data for the design of earthquake-resistant structures. The Bureau operates 7 seismograph stations, field investigates an average of 15 severe earthquakes annually, operates 71 strong motion stations in the seismic area of the Western States, collaborates with 13 universities, and cooperates with 150 domestic and foreign seismograph stations to determine the location of distant earthquakes.

4. *Instrument services.*—These include the design and construction, maintenance, storage, and issuance of intricate instruments used in surveying and processing operations.

7. *Relation of costs to obligations.*—The relationship between direct cost and direct obligations is derived from year-end balance of selected resources and applicable adjustments as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year: Inventories and items on order:				
Stores (goods unconsumed by projects)	\$449,466	\$262,391	\$635,131	\$550,504
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	698,182	799,917	225,704	194,731
Inventory of charts and publications for issue	332,556	355,630	356,000	356,000
Work in process (charts and publications)	34,928	66,348	66,000	68,000

Reimbursable program.—Reimbursable work for other Federal agencies provides products or services, the performance of which is of a special nature not normally

available, and is in conformance with the Economy Act of 1932 (31 U. S. C. 686) and the basic act defining the functions of the Coast and Geodetic Survey. The major part of this activity is to provide aeronautical and nautical charts of the United States and its Territories to user agencies and to perform geodetic control surveys where required.

Reimbursements from non-Federal sources are primarily from States to carry out geodetic surveys required as part of the interstate highway program.

7. *Relations of costs to obligations.*—Year-end balances of unpaid undelivered orders applicable to the reimbursable program are as follows: 1957, \$131,018; 1958, \$53,018; 1959, \$53,018.

BUSINESS AND DEFENSE SERVICES ADMINISTRATION—Continued

Current authorizations—Continued

SALARIES AND EXPENSES—Continued

The Administration provides statistical and informational services to the business community and carries out industrial mobilization readiness programs.

1. *Industry service.*—A focal point for the cooperation of Government and industry is provided in promoting economic stability and growth of industry; industrial and commercial information is analyzed, and basic, special and periodic studies and reports for use by both industry and Government are published; industrial capabilities to meet the requirements for industrial production in a national emergency are measured; and assistance is provided to industry in the current military procurement programs. The increase for the budget year will expand the programs of services to industry and mobilization planning.

2. *Marketing and distribution service.*—The Office of Distribution promotes the more effective distribution of goods and services by disseminating market facts and distribution information to Government, industry, and business. The increase is to strengthen these activities in 1959.

3. *Technical information service.*—Scientific and technical data are compiled primarily from Government research and made available upon request to business, industry, the general public, and Government agencies. In addition, direct assistance is furnished to industry in the development of voluntary programs for standardization of commodities. The major increase is for a translation center and clearinghouse for foreign scientific and technical information to be made available to the public on a fee basis. A 1958 supplemental is also anticipated for early initiation of this program.

4. *Field service.*—Thirty-three field offices, with assistance from local cooperating organizations, make available to the business community information and services of the Department, gather information on local business trends and developments for use of the Department and other agencies, and provide services for the Bureau of Foreign Commerce on export and import operations, including guidance on regulations and restrictions in effect here and abroad.

Export controls protect the domestic economy from excessive drain of scarce commodities, safeguard the national security by regulating exports of strategic commodities, and implement foreign policy. The Bureau of Customs is responsible for the policing of shipments at points of export. Since legislation providing for these activities expires June 30, 1958, the 1959 requirements are shown as a supplemental under "Proposed for later transmission."

Basic indicators of the condition of the national economy and current analyses of business trends are prepared and distributed to the public.

1. Preparation of national income and product data.—Calculations are made of the national income and gross national product, consumption expenditures, and other subsidiary measures of the Nation's economic well-being. The additional amount is to extend the statistics of real national product and interindustry flows in the various segments of the national economy.

2. Analysis of business trends.—Business developments are assessed monthly, and the results of continuing analysis of the major underlying factors and long-range business trends are published regularly for business use.

3. Computation of the balance of international payments.—The United States balance of international payments is determined and the official statistics of foreign expenditures by the U. S. Government are maintained.

The 1959 estimate is for:

1. Construction-differential subsidy and/or national-defense allowances for construction of an estimated 18 ships under the ship replacement program.

4. Acquisition costs of ships being replaced.

5. A program of advanced research and development with particular emphasis on nuclear propulsion.

7. Administrative and warehouse expenses of the program.

Since 1955, funds for new construction have been appropriated under "Ship construction." In order to differentiate between current programs available for obligation and those for expenditure only, all programs prior to 1955 are reflected under "Ship construction (liquidation of contract authorization)."

The following table reflects the annual obligation requirements for the projects financed from current funds, together with those requested for 1959.

Program by activities:			
Ship construction (total obligations).....	-----	\$925,258	-----
Financing:			
Unobligated balance brought forward.....	-\$4,963,561	-7,357,025	-----
Recovery of prior year obligations.....	-2,393,464	-----	-----
Unobligated balance carried forward.....	7,357,025	-----	-----
Unobligated balance no longer available.....	-----	6,431,767	-----
Contract authorization (new).....	-----	-----	-----

During 1957, obligations were reduced in the amount of \$2,393,464 as a result of contract adjustments. A total of \$512,433,950 was appropriated for this program which covers all postwar construction up to 1955. Of the June 30, 1957, unobligated balance of \$7,357,025, it is estimated that claims presented by the shipbuilders will use \$925,258, leaving a balance of \$6,431,767 to be returned to the Treasury.

At present 15 privately owned United States flag companies operate 309 ships under subsidy contract on 30 of the 36 designated essential foreign trade routes. The contracts cover the differential between their operating costs and those of foreign competitors (subsidy accrual). The Government withholds (subsidy recapture) one-half of net profits in excess of 10% of capital necessarily employed up to the subsidy accrual, the amount being finally determined on a cumulative basis at the end of a 10-year contract period. In estimating the subsidy payable, as shown in the table below, subsidy recapture is subtracted from subsidy accrual, but pending the close of the 10-year contract period the full amount of the accrual is a contingent liability of the United States.

SUMMARY OF PROGRAM JANUARY 1, 1947 THROUGH JUNE 30, 1959

[Dollars in thousands]

Calendar year:	Voyages	Estimated subsidy accrual
1947-56	12,842	\$765,590
1957	1,729	141,184
1958	1,840	148,036
1959 (1st 6 months).....	923	75,155
Total.....	17,334	1,129,965
		Cumulative total
Subsidy accrual.....		\$1,129,965
Subsidy recapture.....		218,620
Subsidy payable.....		911,345
Subsidy paid through June 30, 1957.....		568,143
Estimated subsidy payable.....		342,202
Subsidy to be paid in 1958.....		120,392
Subsidy to be paid in 1959.....		120,000
Subsidy to be paid in subsequent years.....		102,810

The approval of final subsidy rates and the audit of annual accountings of the subsidized operators prior to June 30, 1959, will make possible 100% payments of subsidy payable for all operators through calendar year 1953 and one-half the operators through calendar year 1954, thus eliminating a part of the backlog of subsidy payments dating back to 1947. The \$102,810,198 estimated unpaid subsidy as of June 30, 1959 begins to approach a normal backlog and consists of amounts withheld pending final rates and audits for calendar years 1955-59 plus subsidy bills for operators in the last quarter of 1959 which would not be presented and paid until 1960. This estimated unpaid balance is subject to adjustment for changes in the cumulative recapture position of each of the operators.

The above estimates do not include any amounts for pending subsidy applications of presently nonsubsidized operators or for pending applications for additional service by operators now holding subsidy contracts.

Appropriation (new obligational authority).....	15,350,000	15,425,000	15,050,000

1. *Administrative expenses.*—Shown herein are the expenses of administering most of the functions of the Federal Maritime Board and Maritime Administration, including operating-differential subsidy contracts, continuing ship construction activities, supervision of ship operations, auditing, and property management. Administrative expenses for maritime training, general agency ship operations, new ship construction, and chartering activities are provided in other funds.

2. *Maintenance of shipyard facilities.*—Four Government-owned reserve shipyards are maintained in a partial state of readiness for defense purposes.

3. *Operation of warehouses.*—Five warehouses store materials and equipment for vessel operations, repair and outfitting of reserve fleet ships, and reserve shipyards.

4. *Maintenance of reserve training station.*—One reserve training station has been maintained in a custodial status, but action to dispose of this facility is under consideration.

5. *Reserve fleet expenses.*—Provision is made for the preservation and security of approximately 2,000 merchant vessels, maintained for national defense purposes. A phased program for scrapping 100 Liberty ships per year is beginning in 1958.

Officers are trained for service in the maritime industry.

1. *Merchant marine cadet training.*—The Merchant Marine Academy at Kings Point, N. Y., was made a permanent Academy by enactment of Public Law 415, approved February 20, 1956. A 4-year course of training is provided, including 1 year of sea duty, designed to qualify graduates for licenses as merchant marine officers. The Academy provides subsistence, quarters, tuition, uniforms, and textbook allowances, and medical care for cadets.

2. *Cadet training office.*—This office provides staff assistance to the Administrator in the training area, assists in the selection and appointment of cadets, and maintains liaison with State marine schools.

The Maritime Administration is authorized to insure construction loans and mortgages on certain types of cargo and passenger-carrying vessels and other watercraft (title XI, Merchant Marine Act, 1936, as amended). Receipts, representing premiums for insurance and certain incidental fees, are deposited into this fund and, together with such amounts as may be appropriated, or otherwise made available, may be used toward the redemption of any defaulted loans or mortgages. As of September 1957, balances outstanding plus commitments for additional ship mortgages totaled approximately \$130 million, and the

outstanding balance for loans and mortgages at the end of the current year is expected to reach \$225 million. Based upon the expanded activity anticipated in this field, it is expected that by the end of 1959 insured ship loans under this title will exceed \$600 million.

To date one mortgage has been declared in default, and the Maritime Administration has initiated the necessary action to redeem such mortgage forthwith. To accomplish full satisfaction of principal and interest due on the mortgage in question, a partial payment has recently been made to the lending institution to the extent that retained earnings in the fund would permit. Under the legislative authority recommended in the current budget submission, it is proposed to transfer into this fund from the vessel operations revolving fund such amount as may be required to liquidate the remaining balance of such indebtedness, which is approximately \$3,500,000.

The proposed authority of the Secretary of Commerce to transfer up to \$10 million into this fund will enable the Government to meet its obligations under title XI more promptly in any similar circumstance that may arise in the future with consequent substantial savings in interest accruals on principal and other incidental expenses usually resulting from institution of foreclosure proceedings.

This fund was created in 1951 to finance direct operation and charter of cargo vessels to carry the heavy military and foreign aid shipments growing out of the Korean emergency (65 Stat. 52). Since mid-1952, vessel operations have been limited to military requirements.

In 1956 the fund was made available for expenses of certain chartering and ship custody contingencies, such as custody of ships in mortgage foreclosure or forfeiture proceedings, redelivery and layup of certain chartered ships, and custody and husbanding of Government ships other than those in reserve fleets (65 Stat. 226). In 1957 the fund was made available for expenses of activation, repair, and deactivation of chartered vessels and authority was granted to deposit in the fund charter hire revenue previously deposited to miscellaneous receipts (70 Stat. 897).

The initial appropriation to the fund of \$20 million has been repaid to the Treasury.

Budget program.—Three main activities are financed in the fund:

MARITIME ACTIVITIES—Continued

Public enterprise funds—Continued

VESSEL OPERATIONS REVOLVING FUND—Continued

1. *Vessel operations.*—Cargo vessels are operated by private operators acting as agents of the Maritime Administration to carry shipments for the Military Sea Transportation Service. Ships operated under the fund reached a peak of 538 in April 1952 and declined steadily thereafter to 18 on June 30, 1957. It is anticipated that this number will increase to a maximum of 24 vessels for seasonal operations during 1958 and 1959. These vessels are activated from temporary layup each spring for approximately 6 months operations after which they are again placed in a standby status in the reserve fleets during the late fall and winter months. The program also provides for the return of 12 T-2 tankers for layup in the reserve fleet during 1958 which are deemed to be in excess of military needs.

2. *Charter operations.*—As of June 30, 1957, there were 146 Government-owned ships under charter to private operators mostly for use in the carriage of Government-sponsored cargoes, chiefly grain. It is anticipated that approximately 101 vessels will return from charter during 1958 due to the stabilization of the charter market and the ability of privately owned tonnage to maintain cargo lift requirements. By the end of 1959 the total number of chartered ships is expected to decline to 18.

3. *Vessel custody and contingencies.*—This activity provides primarily for expenses of custody and layup of vessels (a) involved in mortgage-foreclosure proceedings, or (b) forfeited by owners for violation of shipping laws.

MARITIME CONTROLLED VESSELS IN ACTIVE STATUS

	1957 actual	1958 estimate	1959 estimate
With general agents.....	18	24	24
Under charter.....	146	45	18
Loaned to other agencies.....	57	44	44
Total.....	221	113	86

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances and selected resources as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year:				
Advances.....	\$545,539	\$143,694	\$240,000	\$240,000
Supplies.....	6,395,527	5,647,330	5,767,330	5,887,330

Unpaid undelivered orders.....	48,527	2,184,864	50,000	50,000
Total selected resources at end of year.....	7,201,068	8,457,536	6,518,978	6,638,978
Selected resources at start of year (—).....	—7,201,068	—8,457,536	—6,518,978	—6,518,978
Costs financed from obligations of other years, net (—).....	—	—	—1,938,558	—
Obligations incurred for costs of other years, net.....	—	—	—	120,000

Financing.—Net receipts for 1959 of \$4,571,500 are anticipated on a cash basis. During 1959, the program will be wholly financed by receipts from operation. In addition, the balance of prior year authorizations available at the end of 1957 to finance future years' programs will increase by \$12,888,922 to \$16,655,592 by 1959.

Operating results.—1. *Vessel operations.*—Rates charged the Military Sea Transportation Service for general agency operations cover full costs. The net loss in 1957 is due to the initial cost of repair and activation of 12 tankers for MSTs operations during the Suez Canal crisis. Under an agreement with the Military Sea Transportation Service recovery of these expenses was to be made over a 12-month period. However, due to the

stabilization of the tanker market these vessels have been declared in excess of the military needs, therefore full recovery of the repair and activation expenses will not be realized. Over the 2-year period 1957 and 1958 the fund reflects a loss of approximately \$500,000 in connection with the tanker activation.

2. *Charter operations.*—The net loss in 1957 is due to the initial cost of repair and activation of over 120 additional vessels. Recovery of this initial expense was anticipated through subsequent charter hire receipts. However, due to the decline in the charter market as a result of a decrease in cargo offerings, privately owned vessels are available for the carriage of Government-sponsored cargo. The number of Government-owned ships on charter at the end of 1959 is expected to decline to 18 ships. A net loss in charter operations for the 1957–59 period of \$6,744,400 is currently estimated.

Retained earnings.—The Government's investment consists entirely of retained earnings, amounting to \$12,224,206 at June 30, 1957. In view of present world conditions, retention of these earnings in the fund is necessary to provide for (a) working capital for current ship operations, and chartering and custody contingencies, (b) rapid expansion of shipping services in the event of an emergency, (c) the possible transfer of \$10,000,000 to the war risk insurance revolving fund (65 Stat. 747), and (d) the proposed transfer of not to exceed \$10,000,000 to the Federal ship mortgage insurance fund, revolving fund (1959 Appropriation Act).

This fund was established to provide war-risk insurance in the event that commercial insurance is not available at reasonable terms and conditions during time of war (46 U. S. C. 1281, 1283). Commercial war-risk insurance policies are at present subject to an automatic termination clause upon the outbreak of war between any of the four powers: United States, France, Great Britain, and Russia. As of June 30, 1957, interim binders for war-risk hull protection and indemnity, and second seamen's insurance, which become effective upon the outbreak of war, had been issued covering approximately 1,340 vessels and \$5,467,800,000 of insurance. The transfer of \$10 million is authorized from the vessel operations revolving fund to this fund if necessary (65 Stat. 747). To date no transfers have been made and none is anticipated in 1958 or 1959. Provision has been made in the 1958 estimate for the payment of protection and indemnity insurance claims in connection with the collision of the Government-owned tanker *Mission San Francisco* with the freighter *S. S. Elna II* in the Delaware River at New Castle, Del., on March 7, 1957. Reimbursement from the Military Sea Transportation Service will cover full costs. At present the income of the fund comes from insurance premiums and fees paid for issuance of the interim binders. Expenses of the fund consist of fees paid to underwriting agents, travel expenses for marine insurance experts, and for contract appraisal costs.

Retained earnings.—The Government's investment consists entirely of retained earnings amounting to \$376,850 at June 30, 1957; retention of these earnings is necessary for this program to get underway immediately upon the outbreak of a national emergency.

GENERAL PROVISIONS—MARITIME ACTIVITIES

[General provisions—Maritime activities:] No additional vessels shall be allocated under charter, nor shall any vessel be continued under charter by reason of any extension of chartering authority beyond June 30, 1949, unless the charterer shall agree that the Maritime Administration shall have no obligation upon redelivery to accept or pay for consumable stores, bunkers and slop-chest items, except with respect to such minimum amounts of bunkers as the Maritime Administration considers advisable to be retained on the vessel and that prior to such redelivery all consumable stores, slop-chest items, and bunkers over and above such minimums shall be removed from the vessel by the charterer at his own expense.

No money made available to the Department of Commerce for maritime activities, by this or any other Act shall be used in payment for a vessel the title to which is acquired by the Government either by requisition or purchase, or the use of which is taken either by requisition or agreement, or which is insured by the Government and lost while so insured, unless the price or hire to be paid therefor (except in cases where section 802 of the Merchant Marine Act, 1936, as amended, is applicable) is computed in accordance with subsection 902 (a) of said Act, as that subsection is interpreted by the General Accounting Office.

Notwithstanding any other provision of this Act, the Maritime Administration is authorized to furnish utilities and services and make necessary repairs in connection with any lease, contract, or occupancy involving Government property under control of the Maritime Administration, and payments received by the Maritime Administration for utilities, services, and repairs so furnished or made shall be credited to the appropriation charged with the cost thereof: *Provided*, That rental payments under any such lease, contract, or occupancy on account of items other than such utilities, services, or repairs shall be covered into the Treasury as miscellaneous receipts.

No obligations shall be incurred during the current fiscal year from the construction fund established by the Merchant Marine Act, 1936, or otherwise, in excess of the appropriations and limitations contained in this Act, or in any prior appropriation Act, and all receipts which otherwise would be deposited to the credit of said fund shall be covered into the Treasury as miscellaneous receipts. (71 Stat. 74; Department of Commerce and Related Agencies Appropriation Act, 1958.)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

NOTE.—Obligations incurred under allocations from other accounts are included in the schedules of the parent appropriations as follows:

"Commodity Credit Corporation fund."
 "Construction of ships, Military Sea Transportation Service," Department of Defense.
 "Shipbuilding and conversion," Department of the Navy.
 "Construction of a surveying ship," Coast and Geodetic Survey.

Financing applied to program.....	15,293	9,500	7,500

The physical facilities and operating rights of the Inland Waterways Corporation were sold to Federal Barge Lines, Inc., in 1953, for \$9 million, payable through a mortgage bearing interest at 3¼%. Current activities of the Corporation consist of administering the mortgage and winding up its affairs as a carrier.

The loans due the Corporation are being repaid at the anticipated rate. The loan to the dock commissioners at New Orleans, La., was liquidated in 1957, and it is anticipated that the other municipality loan can be settled by the end of 1959.

Net income of \$266,349 is expected for 1958. The income from interest payments serves to reduce the deficit accumulated when the line was federally operated. Although ultimate interest earnings will not be sufficient to eliminate this deficit, the collection of such interest together with the remaining principal will add substantially to the 1959 estimated unobligated balance of \$6.1 million, which will eventually be returned to the Treasury.

The Office administers laws governing the granting of patents for inventions and the registration of trademarks.

The 1959 program is the second year of an effort to reduce the patent application backlog to a manageable level. The Office is continuing its modernization of the patent classification system and its research, in conjunction with the National Bureau of Standards, to develop electronic devices in the patent search process.

Receipts from fees deposited in miscellaneous receipts were \$7,423,649 (including \$593,794 applicable to 1956 operations) in 1957, and are estimated under existing legislation to be \$7,000,000 in 1958 and in 1959. Legislation has been proposed which, if enacted, would raise 1959 receipts to \$10,500,000.

1. *Administration of patent and trademark system.*—Applications are examined to determine the patentability of claimed inventions and the registrability of trademarks; quasi-judicial functions are performed in appeal or interference proceedings within the Office; patents and trademarks are issued; and copies of records are furnished.

2. *Printing and publication of patent and trademark material.*—Included in this activity are printing of specifications and drawings of patents and trademark registrations; and publication of their issuance, and of official notices, rules of practice, and laws. The need for funds is governed largely by the volume of issuances and related public demand for printed copies.

BUREAU OF PUBLIC ROADS

Current authorizations:

General administrative expenses: Necessary expenses of administration, including advertising (including advertising in the city of Washington for work to be performed in areas adjacent thereto), purchase of [seventy-five] fifty passenger motor vehicles for replacement only, and the maintenance and repairs of experimental highways, shall be paid, in accordance with law, from appropriations available to the Bureau of Public Roads.

Of the total amount available from appropriations of the Bureau of Public Roads for general administrative expenses, pursuant to the provisions of section 21 of the Act of November 9, 1921, as amended (23 U. S. C. 21), \$100,000 shall be available for all necessary expenses to enable the President to utilize the services of the Bureau of Public Roads in fulfilling the obligations of the United States under the Convention on the Pan-American Highway Between the United States and Other American Republics (51 Stat. 152), cooperation with several governments, members of the Pan American Union, in connection with the survey and construction of the Inter-American Highway, and for performing engineering service in Pan-American countries for and upon the request of any agency or governmental corporation of the United States. (23 U. S. C. 21; section 6 of the Act of June 29, 1948, 62 Stat. 1105, as amended or supplemented by the Act of May 6, 1954, 68 Stat. 70; Department of Commerce and Related Agencies Appropriation Act, 1958.)

FEDERAL-AID HIGHWAYS (TRUST FUND)

[Federal-aid highways (trust fund):] For carrying out the provisions of the Federal-Aid Road Act of July 11, 1916, as amended and supplemented, which are attributable to Federal-aid highways, to remain available until expended, not more than [\$1,690,000,000] \$2,350,000,000, to be derived from the "Highway trust fund"; which sum is composed of [\$264,500,000] \$327,500,000, the balance of the amount authorized for the fiscal year [1956, and \$1,422,500,000] 1957, and \$2,014,500,000, a part of the amount authorized to be appropriated for the fiscal year [1957, and \$2,396.73, \$17,700.07,

\$816,392.20, and \$1,492,268] 1958, and \$51,055.41 and \$7,483,952.74, the latter sums being for reimbursement of the sums expended for the repair or reconstruction of highways and bridges which have been damaged or destroyed by floods, hurricanes, or landslides, as provided by [section 4 of the Act approved June 8, 1938, section 7 of the Act approved July 13, 1943, and] section 9 of the Act approved September 7, 1950, as amended (23 U. S. C. 13a and 13b), and section 7 of the Act approved June 25, 1952, [and \$671,243] as amended, and \$464,991.85 for reimbursement of the sums expended for the design and construction of highway bridges upon and across dams in accordance with the Act of July 29, 1946 (60 Stat. 709): *Provided, That the amount made available herein shall be available for the purchase, construction, or alteration of buildings and sites necessary for road construction and maintenance activities in Alaska.* (Department of Commerce and Related Agencies Appropriation Act, 1958.)

1. *Grants for construction.*—Grants are made to States for construction and improvement of the 41,000-mile national system of interstate and defense highways, the primary and secondary systems, and urban extensions of the primary and secondary systems. The Federal-aid highway program was greatly expanded with enactment of the Federal-Aid Highway Act of 1956.

The Federal share of the cost of projects on the national system of interstate and defense highways is 90% plus not more than an additional 5% for those States having large areas of public lands. The Federal share of primary, secondary, and urban highway projects is 50% plus an additional percentage for States having large public land areas.

The Highway Revenue Act of 1956 created the highway trust fund into which are deposited certain percentages of tax receipts on motor fuel, tires and tubes, tread rubber, trucks, buses, trailers and truck use, and from which transfers are now made to finance the Federal-aid highway program. Revenues accruing to the highway trust fund were sufficient to meet program expenditure requirements in 1957 and it is estimated they will continue to satisfy expenditure requirements without delaying the program through 1959.

Actual and estimated progress of the program is summarized in the following tables:

[Dollars in thousands]

Fiscal year	Contract authorization ¹	Unobligated contract authorization, end of year	Projects approved		
			Federal payments	Number	Federal share
1955.....	\$575,000	\$837,322	\$594,925	5,898	\$1,382,992
1956.....	875,000	1,939,236	740,343	6,650	1,695,808
1957.....	2,000,000	2,268,148	965,507	8,011	3,370,000
1958.....	2,550,000	2,630,548	1,774,493	8,400	3,750,000
1959.....	2,875,000	2,521,809	2,350,000	8,200	3,475,000

¹ Each fiscal year authorization becomes available for obligation not later than Jan. 1 in the preceding fiscal year. Amounts exclude contract authorizations for disaster assistance.

¹ Mileage of designated interstate system as of Dec. 31, 1956. Does not include increase in mileage of system authorized by Federal-Aid Highway Act of 1956, which increased the total system to 41,000 miles.

² Includes completed projects authorized prior to July 1, 1956.

³ Less than 0.05 of a mile.

2. *Administration and research.*—Administrative, engineering, and research expenses are met by deductions of not to exceed 3¼% from the Federal-aid authorizations and by reimbursement from other appropriations for highway construction. The 1958 and 1959 estimates include costs in connection with the AASHO (Illinois) road test and several special studies expressly directed in the 1956 act. Highway research is carried out independently as well as in cooperation with the State highway departments.

Reimbursable obligations.—Highway construction and maintenance services are performed in Alaska for other highway programs of (a) the Bureau of Public Roads, (b) other Federal agencies, and (c) the Territory of Alaska. Administrative services for other programs of the Bureau of Public Roads are initially financed from this fund and reimbursements of their pro rata share are collected periodically from the other programs.

FOREST HIGHWAYS (TRUST FUND)

[Forest highways (liquidation of contract authorization):] For expenses, not otherwise provided for, necessary for carrying out the provisions of section 23 of the Federal Highway Act of November 9, 1921, as amended (23 U. S. C. 23, 23a), to remain available until expended, **[\$25,000,000] \$30,000,000, to be derived from the "Highway trust fund,"** which sum is composed of **[\$16,250,000] \$22,250,000,** the remainder of the amount authorized to be appropriated for the fiscal year **[1957] 1958,** and **[\$8,750,000] \$7,750,000,** a part of the amount authorized to be appropriated for the fiscal year **[1958] 1959: Provided,** That this appropriation shall be available for the rental, purchase, construction, or alteration of buildings and sites necessary for the storage and repair of equipment and supplies used for road construction and maintenance, but the total cost of any such item under this authorization shall not exceed \$15,000. (*Department of Commerce and Related Agencies Appropriation Act, 1958.*)

NOTE.—Estimate is for activities previously carried under "Forest highways (liquidation of contract authorization)". The amounts obligated in 1957 and 1958 are shown in the schedule as comparative transfers.

1. *Construction.*—Main highways within or adjacent to the national forests are constructed and improved. Projects are jointly selected by the States, the Forest Service, and the Bureau of Public Roads on the basis of their contribution to meeting traffic and national defense requirements within the national forests. Authorizations are apportioned by States on the basis of a formula which uses as factors the national forest area and value in each State. Contract authorizations of \$30 million for both 1958 and 1959 are available.

It is proposed that, beginning in 1959, the financing of this program be transferred to the highway trust fund. Since forest highways are similar in character and use to Federal-aid highways and in most cases are on the Federal-aid highway systems, they should logically be financed from the highway trust fund in the same manner as the regular Federal-aid programs.

Actual and estimated progress of the program are summarized in the following table:

Fiscal year	Annual authorization ¹	Miles completed	Unobligated balance—end of year	Obligations for projects	Expenditures
1955.....	\$22,500,000	400	\$20,139,465	\$23,168,840	\$21,367,836
1956.....	22,500,000	701	22,079,498	19,762,068	23,647,714
1957.....	22,500,000	497	27,996,634	23,424,112	21,502,050
1958.....	30,000,000	600	29,996,634	27,085,000	26,779,403
1959.....	30,000,000	700	1,800,000	27,276,634	30,000,000

¹ Each fiscal year authorization becomes available for obligation not later than Jan. 1 in the preceding fiscal year.

2. *Administration.*—In addition to administration this covers the costs of engineering supervision of the program.

3. *Forest Service administration.*—Payments to the Forest Service are made to cover its administrative and engineering costs in connection with the forest highway program.

PUBLIC LANDS HIGHWAYS (TRUST FUND)

Public lands highways (liquidation of contract authorization): For payment of obligations incurred pursuant to the contract authorization granted by [section 6 of the Federal-Aid Highway Act of 1954 (68 Stat. 73) and] section 106 of the Federal-Aid Highway Act of 1956 [(70 Stat. 376)] (23 U. S. C. 155), to remain available until expended, \$1,500,000, a part of the amount authorized for fiscal year 1957; \$2,692,000, to be derived from the "Highway trust fund"; which sum is composed of \$692,000, the balance of the amount authorized to be appropriated for the fiscal year 1958, and \$2,000,000, the amount authorized for the fiscal year 1959. (Department of Commerce and Related Agencies Appropriation Act, 1958; Supplemental Appropriation Act, 1958.)

NOTE.—Estimate is for activities previously carried under "Public lands highways (liquidation of contract authorization)." The amounts obligated in 1957 and 1958 are shown in the schedule as comparative transfers.

Contract authorization.....			

Status of Unfunded Contract Authorization

	1957 actual	1958 estimate	1959 estimate
Unfunded balance transferred from "Public lands highways (liquidation of contract authorization)".....			\$2,692,000
Transfer from "Highway trust fund" to liquidate contract authorization (see below).....			2,692,000

1. **Construction.**—Highways are constructed and improved through public lands in those States with large

areas of such lands. The 1959 estimate finances the remainder (\$692,000) of the authorization for 1958 and the full amount (\$2,000,000) of the authorization for 1959 as provided by sections 105 and 106 of the Federal-Aid Highway Act of 1956.

It is proposed that, beginning in 1959, the financing of this program be transferred to the highway trust fund. These highways are similar in character and use to Federal-aid highways and are all on either the Federal-aid primary or secondary systems. Therefore, they should logically be financed from the trust fund in the same manner as the regular Federal-aid programs.

1. *Construction.*—The Central American section of the Inter-American Highway is being constructed in cooperation with the Republics of Guatemala, El Salvador, Honduras, Nicaragua, Costa Rica, and Panama. These Republics pay one-third of the cost of the highway through their countries. The section will be approximately 1,573 miles of all-weather road and will connect with the completed Mexican section to permit uninterrupted motor travel from the United States to Panama. With the closing of the 25-mile gap in northern Guatemala early in 1958, the highway will be opened to controlled travel as far south as San Isidro, Costa Rica.

It is estimated that additional authorization of \$10 million will be required in order to provide a bituminous surface on the full length of the highway. These funds should be made available in 1959, and a supplemental appropriation for this purpose is proposed for later transmission.

2. *Administration and engineering.*—A small administrative and engineering staff is maintained in Washington and in the Central American countries.

Total appropriations.....	25,950,000		
Applied to contract authorization.....	-2,834,942		

1. *Woodrow Wilson Memorial Bridge.*—During 1958 the design for the construction of a bridge over the Potomac River near Jones Point, Va., will be completed and late in the fiscal year construction will be initiated. It is anticipated that construction may be completed in the latter part of 1961.

3 and 4. *Construction, operation, and maintenance of roads, Alaska.*—Construction, operation, and maintenance of highways in Alaska are now financed from Federal-aid highway funds under the Federal-Aid Highway Act of 1956. The remaining unobligated amounts, available for construction, are being used to complete the program previously under the jurisdiction of the Department of Interior, Office of Territories (Alaska Road Commission).

5. *Access roads (act of Sept. 7, 1950).*—Access roads to defense establishments and sources of raw materials are constructed and maintained on certification of defense essentiality by designated Federal agencies. These funds will be exhausted during 1959 on maintenance of the Pentagon network and Shirley Highway in Arlington County, Va.

REDUCTIONS IN APPROPRIATIONS

FOREST HIGHWAYS

The unexpended balances as of June 30, 1958, of appropriations granted under this head for fiscal year 1958, and prior fiscal years, are rescinded and shall revert to the general fund.

PUBLIC LANDS HIGHWAYS

The unexpended balances as of June 30, 1958, of appropriations granted under this head for fiscal year 1958, and prior fiscal years, are rescinded and shall revert to the general fund.

GENERAL PROVISIONS—BUREAU OF PUBLIC ROADS

[General provisions—Bureau of Public Roads:] None of the money appropriated for the work of the Bureau of Public Roads during the current fiscal year shall be paid to any State on account of any project on which convict labor shall be employed, but this provision shall not apply to labor performed by convicts on parole or probation.

During the current fiscal year authorized engineering or other services in connection with the survey, construction, and maintenance, or improvement of roads may be performed for other Government agencies, cooperating foreign countries, and State cooperating agencies, and reimbursement for such services (which may include depreciation on engineering and road-building equipment used) shall be credited to the appropriation concerned.

During the current fiscal year appropriations for the work of the Bureau of Public Roads shall be available for expenses of warehouse maintenance and the procurement, care, and handling of supplies, materials, and equipment for distribution to projects under the supervision of the Bureau of Public Roads, or for sale or distribution to other Government activities, cooperating foreign countries, and State cooperating agencies, and the cost of such supplies and materials or

the value of such equipment (including the cost of transportation and handling) may be reimbursed to current applicable appropriations.

Appropriations to the Bureau of Public Roads may be used in emergency for medical supplies and services and other assistance necessary for the immediate relief of employees engaged on hazardous work under that Bureau, and for temporary services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), but at rates for individuals not in excess of \$100 per diem: *Provided*, That not to exceed \$10,000 may be expended for services of individuals employed at rates in excess of \$50 per diem. (23 U. S. C. 1-117; *Department of Commerce and Related Agencies Appropriation Act, 1958.*)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

NOTE.—Obligations incurred under allocations from other accounts are shown in the schedules of the parent appropriations, as follows:

"Mutual security," funds appropriated to the President.
 "Construction," Central Intelligence Agency.
 "Plant acquisition and construction," Atomic Energy Commission.
 "Roads and trails for States, national forests fund," Forest Service, Department of Agriculture.
 "Forest roads and trails," Forest Service, Department of Agriculture.
 "Salaries and expenses," Agricultural Research Service, Department of Agriculture.
 "Access roads, Department of Defense."
 "Military construction, Air Force."
 "Military construction, Army."
 "Maintenance and operation," Department of the Army.
 "Military construction, Navy."
 "Construction (liquidation of contract authorization)," National Park Service, Department of the Interior.
 "Road construction and maintenance," Bureau of Indian Affairs, Department of the Interior.
 "Construction," Bureau of Land Management, Department of the Interior.
 "Management of lands and resources," Bureau of Land Management, Department of the Interior.
 "Construction and rehabilitation," Bureau of Reclamation, Department of the Interior.
 "Rama road, Nicaragua," Department of State.
 "Buildings management fund," General Services Administration.

Total transfers and balances.....	1,482,019,053	2,654,335,489	3,010,642,223

The Highway Revenue Act of 1956 (70 Stat. 374), provides for the transfer from the general fund to this fund of a sum equal to certain percentages of taxes received on gasoline, diesel fuel, trucks, buses, tires, etc. The Secretary of the Treasury estimates the amounts to be so transferred.

In turn, transfers are authorized annually from this trust fund to "Federal-aid highways (trust fund)" and to "Refunds and labor standards" (see following account). Amounts in the fund not currently required are invested in U. S. securities, and interest thereon is added to the fund.

The budget proposes to transfer the financing of the Department of Commerce's forest and public lands

highways programs from the general fund to the "Highway trust fund." Accordingly, the above schedules reflect transfers from the trust fund for these two programs in 1959.

The status of the fund is as follows:

	1957 actual	1958 estimate	1959 estimate
Investments in U. S. securities at beginning of year (par).....	-----	\$404,444,000	\$634,444,000

REFUNDS AND LABOR STANDARDS

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
1. Refund of taxes.....	\$16,830	\$95,000,000	\$110,000,000
2. Labor standards.....	160,000	200,000	200,000
Total obligations.....	176,830	95,200,000	110,200,000
Financing:			
Transfer from "Highway trust fund".....	176,830	95,200,000	110,200,000

There is transferred (a) an indefinite amount for payment into the general fund to cover refund of certain taxes, primarily for gasoline used for farming, and (b) a specific sum annually for services rendered by the Department of Labor for administration and coordination of enforcement of labor standards pertaining to the Federal-aid highway program.

Object Classification

	1957 actual	1958 estimate	1959 estimate
07 Other contractual services: Services performed by other agencies.....	\$160,000	\$200,000	\$200,000
13 Refunds, awards, and indemnities.....	16,830	95,000,000	110,000,000

Proposed for later transmission:

FEDERAL-AID HIGHWAYS (TRUST FUND), FOREST HIGHWAYS (TRUST FUND), AND PUBLIC LANDS HIGHWAYS (TRUST FUND)

Under proposed legislation, 1959.—It is expected that the 1958 biennial Federal-aid highway legislation will provide additional contract authorizations for both 1960 and 1961 for the (a) primary and secondary Federal-aid

BUREAU OF PUBLIC ROADS—Continued

Proposed for later transmission—Continued

FEDERAL-AID HIGHWAYS (TRUST FUND), FOREST HIGHWAYS (TRUST FUND), AND PUBLIC LANDS HIGHWAYS (TRUST FUND)—Continued

systems and urban extensions thereof, (b) forest highways, and (c) public lands highways, and that the 1960 authorizations will become available for obligation during 1959. Amounts of \$900 million, \$30 million, and \$2 million respectively are anticipated.

INTER-AMERICAN HIGHWAY

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
Construction (total obligations).....			\$9,450,000
Financing:			
Unobligated balance carried forward.....			550,000
Proposed supplemental appropriation.....			10,000,000

Under proposed legislation, 1959.—It is anticipated that authorization of an additional \$10 million will be provided to complete construction of the Inter-American Highway as an all-weather road.

HIGHWAY TRUST FUND

	1957 actual	1958 estimate	1959 estimate
Reduction in trust fund receipts: Excise taxes (transfer from general fund receipts).....			\$46,000,000
Reduction in balances carried forward: Cash.....			46,000,000

Under proposed legislation, 1959.—Revenues from the 3-cent excise tax on aviation gasoline now go into the "Highway trust fund"; and subsequently, 1 cent of the 3-cent tax is refunded to the taxpayer. Legislation is proposed elsewhere in the budget to initiate an airways user charge program. Under this proposal, the revenues from the aviation gasoline tax would be retained in the general fund. If this proposal is enacted, \$46 million of aviation gas tax revenues would not be transferred to the trust fund in 1959.

NATIONAL BUREAU OF STANDARDS

The National Bureau of Standards is the agency of the Federal Government responsible for the national standards of physical measurement. Against these standards, all the working standards of the Nation—those used by scientists and engineers in research and development, those used by industry in the measurement and production of interchangeable parts, and those used by other Government and State agencies to ascertain conformity—are calibrated. Closely associated with the standards activity, the Bureau serves science, industry, and Government as a national laboratory conducting research and development on methods of measurement and instrumentation; determining fundamental physical constants and basic properties of materials; developing improved methods for testing materials and equipment; developing codes and specifications; and assisting other Government agencies through advisory services on technical problems and by invention and development of devices to meet special needs.

Current authorizations:

EXPENSES

[Expenses:] For expenses necessary in performing the functions authorized by the Act of March 3, 1901, as amended (15 U. S. C. 271–278c), including general administration; operation, maintenance, alteration, and protection of grounds and facilities; and improvement and construction of temporary or special facilities as authorized by section 2 of the Act of July 21, 1950 (15 U. S. C. 286); **[\$9,428,250] \$11,500,000: Provided,** That during the current fiscal year the maximum base rate of compensation for employees appointed pursuant to the Act of July 21, 1950 (15 U. S. C. 285), shall be equivalent to the entrance rate of GS-12. (15 U. S. C. 271–278c, 285, 286; 40 U. S. C. 14a; 5 U. S. C. 596a; Department of Commerce and Related Agencies Appropriation Act, 1958.)

The 1959 budget proposes an increase of \$2,071,750 to strengthen the basic scientific programs of the Bureau, to provide for greater emphasis on basic research and on the development of authoritative standards of greater range and precision necessitated by the increasing technological nature of the Nation's industrial and defense programs, to provide for improved technical balance in the Bureau's scientific activities, and to approach a level of research and development activity consistent with the assigned responsibilities of the Bureau. The Bureau programs are classified under four activities:

1. *Research.*—This activity includes investigations of fundamental physical phenomena and determinations of physical constants and properties of materials which are of great importance to science and industry. Fundamental scientific knowledge is applied to achieve more effective use of new scientific and technological processes, materials, and equipment.

2. *Development.*—This activity includes the development of new and improved standards of measurement, instruments, instrumentation techniques, methods of measurement and analysis, and commodity testing techniques. Materials, devices, and technological processes in fields of importance to national welfare are also developed.

3. *Testing, calibration, and specifications.*—This activity includes the comparison of working standards used in scientific investigations for engineering, manufacturing, communication, commercial, and educational institutions with the national primary standards. It also includes the preparation of standard samples of accurately known composition or characteristics and the formulation of

specifications and standards for commodities and equipment.

4. *General technical services.*—This activity includes the provision of advisory and consultative services to other Government agencies, the operation of special technical installations, and the compilation and dissemination of scientific and technical data, such as data on propagation of radio waves which are analyzed for the prediction of radio propagation conditions.

The National Bureau of Standards' laboratories and administrative offices occupy 86 buildings located on a 69-acre tract in Washington, D. C. The Bureau also has a laboratory on a 217-acre site at Boulder, Colo., and several small field sites, some of which are outside the continental limits.

1. *Facilities.*—This activity includes alterations and other improvements to the Bureau's facilities.

2. *Special equipment.*—This activity includes the procurement of large and unusual items of equipment which are not appropriate for purchase by the working capital fund. Funds are included for continuing construction of a pilot electronic data-processing device begun in 1956.

3. *Construction.*—An addition to the Boulder laboratory and a fire protection system for field stations are being completed with previously appropriated funds. No new projects are budgeted for 1959.

This fund finances, on a reimbursable basis, all operations of the National Bureau of Standards, including the furnishing of services to other Government agencies (64 Stat. 279). The principal of the fund, as of June 30, 1957, consisted of \$5 million in appropriations and \$35 million in net donated assets.

Budget program.—The programs of the fund include research, development, testing, and general technical services for other Government agencies and the public. Also included is the acquisition of facilities and special equipment.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year:				
Inventories.....	\$1,683,413	\$1,829,582	\$1,970,252	\$2,132,252
Advances.....	30,357	39,157	35,000	35,000

WEATHER BUREAU

Current authorizations:

SALARIES AND EXPENSES

[Salaries and expenses:] For expenses necessary for the Weather Bureau, including maintenance and operation of aircraft; **[purchase of two passenger motor vehicles for replacement only;]** not to exceed \$25,000 for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a); and not to exceed \$10,000 for maintenance of a printing office in the city of Washington, as authorized by law; **[\$37,880,100] \$40,000,000: Provided,** That during the current fiscal year, the maximum amount authorized under section 3 (a) of the Act of June 2, 1948 (15 U. S. C. 327), for extra compensation to employees of other Government agencies for taking and transmitting meteorological observations, shall be \$5 per day; and the maximum base rate of pay authorized under section 3 (b) of said Act, for employees conducting meteorological investigations in the Arctic region, shall be \$6,500 per annum, except that not more than five of such employees at any one time may receive a base rate of \$9,000 per annum, and such employees may be appointed without regard to the Classification Act of 1949, as amended. (15 U. S. C. 311–313, 325–328; 49 U. S. C. 401, 603; Department of Commerce and Related Agencies Appropriation Act, 1958.)

Appropriated 1958,* \$37,980,100 Estimate 1959, \$40,000,000

* Includes \$100,000 appropriated in Supplemental Appropriation Act, 1958.

The Weather Bureau observes, records, reports, forecasts, and distributes information on weather conditions and river stages for the benefit of U. S. commerce, industry, agriculture, and the general public.

1. *General weather services.*—Regular forecasts are issued for U. S. territory and waters with special emphasis on floods and severe storms. Special forecasts and advisory services are provided for international and domestic aviation; fire-weather forecasts are furnished to assist in conservation of timber resources; and fruit-frost forecasts and warnings are prepared for areas where such crops form a major economic interest. Surface and upper-air observations are taken at several hundred locations to serve forecasting requirements. Several thousand voluntary and part-time observers record river stage, temperature, and precipitation readings for use in flood-control and water-use activities. All observational records are combined to form the climatic history of the United States and possessions. The estimate provides (1) for operation of new weather surveillance radar and other instrumentation previously authorized for improving the public weather forecasts and warnings, and (2) for staff and facilities needed to improve the weather services for aviation.

2. *Research.*—Research is directed primarily toward the development of new operational and forecasting techniques directly applicable to major service programs, but also includes some supplemental studies of basic meteorology and meteorological physics. Intensive investigations of hurricanes and tornadoes will be continued.

GENERAL PROVISIONS—DEPARTMENT
OF COMMERCE

Sec. 102. During the current fiscal year applicable appropriations and funds available to the Department of Commerce shall be available for the activities specified in the Act of October 26, 1949 (5 U. S. C. 596a), to the extent and in the manner prescribed by said Act.

Sec. 103. Appropriations in this title available for salaries and expenses shall be available for expenses of attendance at meetings of organizations concerned with the activities for which the appropriations are made; hire of passenger motor vehicles; services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), but, unless otherwise specified, at rates for individuals not to exceed \$50 per diem; and uniforms, or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U. S. C. 2131). (*Department of Commerce and Related Agencies Appropriation Act, 1958.*)

GENERAL PROVISIONS

Sec. 401. [(a)] No part of any appropriation contained in this Act shall be used for publicity or propaganda purposes not heretofore authorized by the Congress.

[(b) No part of any appropriation contained in this Act shall be used for payment of any expert or consultant, or of any management engineering corporation, company, firm, or other organization, for the performance of any service relating to the management or organization of the Department of Commerce or any bureau, administration, office, corporation, or other agency thereof, the Canal Zone Government, the Panama Canal Company, or any independent board, corporation, or commission, unless the utilization and payment of experts or consultants, or of management engineering corporations, companies, firms, or other organizations, is specifically authorized by law for the performance of such service.]

Sec. 402. No part of any appropriation contained in this Act shall be used to pay any expenses incident to or in connection with participation in the International Materials Conference. (*Department of Commerce and Related Agencies Appropriation Act, 1958.*)

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1959

DEPARTMENT OF DEFENSE—MILITARY FUNCTIONS

The 1959 budget for the military functions of the Department of Defense reflects the great impact of science and technology on modern military power. Continual adjustment of military forces, strategy, techniques and organization to keep pace with the rapid strides of scientific and technological progress has been a principal objective of defense policy since the end of the Korean War. The tempo of change is increasing, and the change during the coming year will be greater than in any preceding year.

Although the Defense Establishment during the last four years has been reshaping its military programs to take advantage of new developments in military technology, recent demonstrations of Soviet scientific progress have pointed up some areas which should now receive still greater emphasis. These areas include ballistic missiles, ballistic missile submarines, ballistic missile detection and defense, the further dispersal of the retaliatory forces and the improvement of their alert status, modernization of the early warning system, outer space projects and basic research. The budget for 1959 together with the proposed supplemental appropriations for 1958 will provide the funds to accelerate efforts in these areas.

At the same time, rapid progress in military technology has diminished the importance of certain other areas of the military program. This budget reflects the lessened effort in those areas.

DEPARTMENT OF DEFENSE—MILITARY FUNCTIONS COSTS BY MAJOR CATEGORIES

Based on existing and proposed legislation
[In millions]

¹ Excludes amounts in support of this category, and development, test and evaluation activities which are included in the procurement and other categories shown separately.

The changing pattern of defense expenditures from 1955 through 1959 is shown in the accompanying table. The

year 1955 is selected for this comparison because it was the first full post-Korean war year, and is therefore the period from which the changes in military concepts are most strikingly measured. The comparisons demonstrate clearly the continuous and substantial nature of this shift in major direction in the intervening 4-year period.

The steady upward trend in defense spending since 1955 is expected to continue through 1958 and 1959. Expenditures in 1959 are estimated at \$39,779 million, or \$4¼ billion more than in 1955.

Military personnel.—Including the additional pay adjustments recommended in this budget, military personnel costs in 1959 are estimated at \$10,523 million, only 1% less than in 1955, even though there will be about 20% fewer military personnel on active duty. Over the years there has been a steady increase in those cost factors associated with the maturing of the forces—longevity pay, allowances for an increasing number of dependents of military personnel, reenlistment bonuses, etc. There has also been a significant increase in grade structure in an effort to make the service career more attractive and to meet the increasing requirements generated by expanding military technology.

But the principal single cause of increased costs in this category is the pay raise which became effective in the last quarter of 1955 and the revised military pay system proposed in this budget. This new proposal is based generally on the principles recommended by the Advisory Committee on Technical and Professional Compensation (Cordiner Committee). The additional cost of the revised system together with other cost increases will offset the savings accruing from the reduction in numbers of military personnel in 1958 and 1959.

The introduction of increasingly complicated weapons systems into our forces raises the skill and experience level required of military personnel in all the services. For example, 52% of the military personnel in a B-47 medium bomber wing are required to be technically trained. This proportion is 61% in the B-52 wings. On the basis of projected manning requirements, technical personnel will constitute two-thirds or more of total military personnel in the intermediate and intercontinental range ballistic missile units.

By rewarding proficiency and merit, the new pay system is expected to reduce the turnover of skilled and experienced military personnel and to increase the effectiveness of the forces.

Operation and maintenance.—Expenditures for operation and maintenance are estimated at \$9,292 million in 1959, about \$1,400 million or 18% more than in 1955. Part of this increase in cost arises from the gradual phasing out of deutschemark support heretofore received by our forces in Germany from the Federal Republic of Germany, increases in civilian pay rates, and the new dependent medical care program. But much of the increase is caused by the higher unit costs of maintaining and operating the newer and more complex weapons and equipment which are continually being introduced into our military forces. For example, the number of operating active jet aircraft in the Defense Department inventory will increase by 2,275 from 1955 to 1959. The cost of operating these additional more complex jet aircraft is estimated at over \$400 million per year for fuel, oil, and depot maintenance alone. As a result, the average cost per flying hour for all types of aircraft in the Air Force and

Navy will have increased by about 40% during this period.

Operation and maintenance of the greatly expanding continental defense warning net which includes the SAGE system, and the DEW line and its seaward extensions, will add over \$300 million to the 1959 budget as compared with 1955. Operation and maintenance of missile sites and units and the cost of training people to man them will add another \$160 million to the budget in 1959 as compared with 1955.

Major procurement and production.—Expenditures for procurement and production in 1959 are estimated at \$13,753 million, about \$750 million greater than in 1955. More important than this overall increase is the dramatic change in the composition of these expenditures. While expenditures for aircraft are expected to decline about 14%, expenditures for missiles will increase by more than 360%.

Even within the aircraft and missile categories the shift in emphasis to new weapons is most striking. With one or two exceptions there is hardly a production model aircraft on the Air Force's 1959 procurement list that was included in the 1955 program. All the fighters and bombers proposed for 1959 procurement will be capable of supersonic speeds and the employment of guided missiles and nuclear weapons. Of the \$1.5 billion of aircraft, engines and aeronautical equipment the Navy expects to buy in 1959, about 80% will go for models which were not being bought in production quantities in 1955. In 1959 over 40% of the Army's procurement will be for missiles and related equipment, compared with approximately 10% in 1955.

Spending for the procurement of missiles will continue to expand at a rapid rate, from about \$700 million in 1955 to \$2.9 billion in 1958 and about \$3.3 billion in 1959, more than a four-and-a-half-fold increase in 4 years. A continued rise in missile spending beyond 1959 is indicated by the new obligational authority recommended for that year—more than \$3.8 billion. Even in this new field of military technology there will be a very marked shift from the earlier, initial weapons systems to the much more sophisticated systems of the future. About 90% of the dollars programed for missile procurement in 1959 are for weapons which were not in production in operational quantities in 1955. Of the different models of missiles planned for procurement in 1959 only four were being bought in operational quantities in 1955. The longer range ballistic missile systems—Atlas, Titan, Thor, Jupiter, Polaris—which were still in the early developmental stage only a few years ago will account for just about half of the missile procurement program for 1959.

The Department of Defense, late in November 1957, decided to place both the Jupiter and Thor intermediate range ballistic missiles into production so as to achieve an early operational date. This action, of course, entails certain financial risks which must be accepted under the circumstances. Work on the Atlas intercontinental ballistic missile and the submarine-based Polaris missile is also being accelerated. Very substantial sums are included in the 1959 budget for all these programs as well as in the 1958 supplemental.

Expenditures for ships will increase substantially from the \$900–\$1,000 million level in 1955–57 to approximately \$1,300 million in 1959. New obligational authority of \$1,335 million is requested for 1959 plus a supplemental of \$296 million for 1958. These funds will provide for the construction of 23 new major naval vessels and for 8 con-

versions, as well as for the advance procurement of long lead-time components for ships to be started in subsequent years, including advance components for a second nuclear-powered attack carrier. The shipbuilding and conversion program places major emphasis on anti-submarine warfare vessels (including submarines), guided missile ships and nuclear propulsion, including the first nuclear-powered frigate. Most of the ships in the 1959 construction program are entirely new types not to be found in the 1955 shipbuilding list. Work on the construction of a ballistic missile submarine fleet capable of employing the Polaris missile is greatly accelerated under this program to bring it into phase with the missile, which is now expected to become available appreciably earlier than originally planned.

Expenditures for "Other major procurement" will continue to decline through fiscal year 1959 and will be about \$1 billion less than in 1955. Spending for conventional type weapons, and for production equipment and facilities will be considerably lower in 1959 than in 1955. Expenditures for electronics and communication equipment, however, will be about \$225 million higher. New obligational authority in the amount of \$2,410 million is requested for 1959 plus a supplemental of \$207 million for 1958 for all procurement other than aircraft, missiles, and ships. About half of these combined funds are for electronics and communication equipment, including entirely new and vastly more powerful equipment for the new ballistic missile detection system now under accelerated development, and equipment for the further improvement and extension of the existing continental air defense warning system—SAGE, Missile Master and the newly developed frequency diversity radars.

Military construction.—Expenditures for military construction will be about \$150 million higher in the coming fiscal year than in 1957 and 1958 and almost \$500 million higher than in 1955. New obligational authority of \$1,576 million is requested for 1959 plus a 1958 supplemental of \$520 million. Funds are included to speed up the dispersal and alert program of the Strategic Air Command, which entails the dispersal of the SAC bomber force, including refueling tankers, to additional bases and the construction of additional facilities to improve the readiness of both aircraft and crews for prompt response to attack. The threat of an enemy missile attack requires a higher degree of alert and readiness on the part of our retaliatory forces than in the past. Also included are funds for the construction of facilities for the new ballistic missile detection system and the related communication lines. In this and other categories for 1958 and 1959, a total of about \$900 million is included for these two related programs. Fully half of the 1959 construction program is for SAC dispersal or facilities for weapons systems and equipment which will have been brought into operational use since 1955.

Reserve components.—Expenditures for reserve components will be 60% higher in 1959 than in 1955. The total number of reserve personnel on paid status will be considerably greater in 1959 than in 1955 but slightly less than in 1958, particularly in the Army reserve components. Greater attention is to be given to combat readiness and equipment rather than to mere numbers of personnel. The overall level of equipping of the Army National Guard, for example, has been raised from about 44% of authorized tables of organization and equipment in 1955 to between 65% and 75% in 1957, and will be further improved during 1958 and 1959. Army National Guard AAA units which

are now actively participating in the peacetime air defense system in significant numbers are being converted to the Nike ground-to-air missiles.

The amount and quality of equipment for the Air National Guard has also been greatly improved since 1955. At that time the Guard had about 2,000 aircraft, half of which were jets. In 1959, the Guard will have 2,400 aircraft, over 90% of which will be jets, with the balance consisting of transport and related types of aircraft. All the combat aircraft will be jet and all the early model jet aircraft such as the F-80, F-84E, F-86A and E, and F-94A and B will have been eliminated and replaced with more modern types.

Research and development.—Expenditures for research and development will continue their upward trend through 1958 and 1959 and will be almost \$700 million or 50% higher in 1959 than in 1955. A total of \$2,256 million of new obligational authority is recommended for 1959, substantially more than the amounts appropriated for 1957 or 1958. In order to achieve the desired acceleration of research and development programs, supplemental authorizations of \$62 million have been recommended for 1958, as well as a \$100 million increase in the transfer authority for the Department of Defense emergency fund. This increase in new obligational authority for 1958 and 1959 indicates that there will be a continuation of the upward trend in research and development expenditures beyond 1959.

Included in the recommended new obligational authority are funds for the new Advanced Research Projects Agency to be set up directly under the Secretary of Defense. This organization is being established to handle the research and development phases of advanced science programs, such as satellites and other outer-space projects, the development of an antiballistic-missile system and such other special projects as may be designated by the Secretary.

The important areas of guided missiles, basic research and the operation of research, development and test facilities will together take a much greater proportion of the research and development budget in 1959 than in 1955. The proportion of total effort devoted to research in aircraft and related equipment and conventional weapons and ammunition will be smaller. In the 4 fiscal years 1956-1959, roughly \$20 billion of research and development, procurement, military personnel costs, and construction funds will have been programed for the research, development, test and evaluation of new weapons systems to bring them to operational status.

Establishmentwide activities.—Expenditures for Department of Defense establishmentwide activities will also continue their upward trend through 1959, caused for the most part by the increasing cost of retired pay, which will amount to \$601 million in 1959, compared with \$419 million in 1955.

The estimate for the fiscal year 1959 includes \$205 million for the cost to the Department of Defense of the proposed governmentwide pay adjustment for classified civilian employees.

Working capital funds.—As in past years, it is estimated that the working capital or revolving funds of the Department of Defense will spend less than they take in. The excess of collections over expenditures in 1959 is estimated at \$240 million. This sum is taken as a credit against other expenditures, bringing the estimated grand total of expenditures for the year to \$39,779 million.

Composition of Armed Forces.—The accelerated trend to guided missiles and other new weapons systems is reflected in the changing composition of our military forces.

Army.—The Army with an active duty military personnel strength of 870,000 on June 30, 1959 will support 14 divisions, 6 regiments, 1 armored combat command, 2 brigades, and 3 separate battle groups. This compares with an active Army strength of 1,109,000 men, 20 divisions and 12 regiments and regimental combat teams in 1955. However, 3 separate battle groups and 4 missile commands have been organized since 1955, to permit a closer tailoring of forces to particular missions. The Army will complete the reorganization of its divisions along pentomic lines during the current year, thus providing these divisions with an organic atomic capability.

In addition, the Army will have 4 missile commands compared with none at the end of 1955 and a considerably larger number of separate surface-to-surface missile battalions. Although the total number of anti-aircraft battalions will decline from 122 to 86 from 1955 through 1959, the number of guided missile antiaircraft battalions will more than double. The reduction is primarily in 90 and 120 mm AAA gun battalions which are now of limited combat effectiveness. By June 30, 1959, there will only be 1 such gun battalion left in the Army. There will, however, still be a number of "sky sweeper" battalions and a number of self-propelled automatic weapons battalions for the protection of the Army in the field.

The great increase in the unit effectiveness of Army antiaircraft battalions is not evident in the above figures.

In 1959 an appreciable proportion of the guided missile battalions will have been converted from Nike Ajax to Nike Hercules missiles. The latter are not only vastly superior in altitude and range but will be capable of using atomic warheads.

Army aviation will continue to expand, particularly with respect to helicopters. The active aircraft inventory of the Army on June 30, 1959, is expected to be over 50% greater than on June 30, 1955.

Navy and Marine Corps.—The Navy with an active duty personnel strength of 630,000 on June 30, 1959, will support a total of 864 active ships of which 396 will be warships. This compares with 1,030 active ships, including 402 warships, at the end of 1955. While the total number of warships remains virtually unchanged, the total capability of these ships will be greater because of the increased combat effectiveness of the new ships and aircraft which will have joined the fleet during this period. The number of operating aircraft in the Navy will decline while the number of missiles of all types will increase considerably by June 30, 1959.

The Marine Corps with an active duty strength of 175,000 on June 30, 1959, will continue to support 3 divisions and 3 air wings.

Air Force.—The Air Force with an active duty personnel strength of 850,000 will be supporting 105 wings on June 30, 1959, 16 fewer than on June 30, 1955. Part of the reduction, however, occurs in areas where guided missiles are greatly modifying the role of manned aircraft. Most of the remaining reduction is being made in those elements which are of decreasing importance in the light of evolving force requirements. The SAC bomber force will have been greatly strengthened both in numbers and quality of aircraft since 1955. Virtually all SAC bomber wings will be jet equipped by the end of 1959 as the conversion of heavy bomber wings to the B-52 is completed. The number of aircraft in each heavy bomber wing is being increased from 30 B-36's to 45 B-52's. The strategic fighter wings associated with the B-36 bombers have already been phased out of the force and, in consonance with changing requirements, there will be a further reduction of one strategic reconnaissance wing during 1959.

During 1959 the Air Force will begin to show a missile capability in its strategic forces. The introduction of the Bomarc ground-to-air missile will also provide the Air Force with an enhanced guided missile capability in

its air defense forces. Virtually all intercepter squadrons will be equipped with the Falcon or Sidewinder air-to-air guided missiles, and a considerable number of squadrons will be equipped with the new nuclear-armed air-to-air rocket Genie. The tactical missile capability of the Air Force will be further improved as the new Mace surface-to-surface tactical missile is added to the inventory.

Reflecting the reduction in wings and increasing emphasis on missiles, the operating aircraft inventory of the Air Force at the end of 1959 will be about 2,250 less than at the end of 1955.

Transfer authority.—This budget also includes a general provision which will authorize the President to transfer, between appropriations available for obligation for military functions of the Department of Defense, up to \$2 billion. This transfer provision is desirable in order to be able to modify and accelerate programs on short notice if new discoveries and developments indicate shifts are desirable from already programed items to other weapons that show a demonstrated superiority.

The budget proposed for 1959 will thus provide for numerically smaller but more powerful and better equipped military forces, with particular emphasis on the development and production of ballistic missiles, ballistic missile submarines, ballistic missile detection and defense, the further dispersal of the retaliatory forces and the improvement of their alert status, modernization of the early warning system, outer space projects and basic research.

In summary, the 1959 budget provides for the Department of Defense as follows:

New obligational authority.—\$39,145,400,000 (excluding the proposed transfers of \$345,000,000 from the Army, Navy, and Marine Corps stock funds in lieu of new appropriations). In addition there are proposed supplemental appropriations for 1958 totaling \$1,270,000,000.

Direct obligations.—\$41,141,000,000 (including \$157,000,000 attributable to unobligated portions of letters of intent issued in prior years which are expected to be recorded as obligations during 1959). This gross direct obligational program contemplates utilization of the unprogramed fund resources that can be applied to new programs and \$385,000,000 in projected recoveries of prior obligations in addition to the new obligational authority being requested for 1959.

Net expenditures.—\$39,779,000,000.

OFFICE OF THE SECRETARY OF DEFENSE—Con.

Current authorizations—Continued

ADVANCED RESEARCH PROJECTS AGENCY—Continued

SALARIES AND EXPENSES—continued

This appropriation provides the Secretary of Defense with funds to support programs of an advanced type having military significance such as antimissile missile systems, satellites and other space vehicle systems, and other advanced programs. Specific activities may include studies, research, component and system development, testing, construction of facilities and necessary land acquisition, and such other activities as may be determined by the Secretary of Defense. These programs will be administered directly by the Department of Defense Advanced Research Projects Agency although implementation of specific projects may be assigned to a military department to utilize, on a reimbursable basis or otherwise, specialized competence or facilities which may be available. Funds for this appropriation in 1958 are to be derived by transfer from available appropriations of the Department as shown at the end of this section under "Proposed for later transmission."

Program by activities:			
Research and development of advanced systems (total obligations).....		\$10,000,000	
Financing:			
Proposed transfer from "Operation and maintenance," Army (adjusted appropriation).....		10,000,000	

Under existing legislation, 1958.—In order to provide initial funding of the Advanced Research Projects Agency of the Department of Defense it is proposed to request authority to transfer \$10 million from annual appropriations of the Department and to request additional authority to transfer to the agency from other appropriations unexpended balances available for programs related to those to be conducted by the agency.

INTERSERVICE ACTIVITIES

Current authorizations:

CLAIMS

For payment of claims by the Office of the Secretary of Defense, the Army (except as provided in appropriations for civil functions administered by the Department of the Army), Navy, Marine Corps, and Air Force, as authorized by law; claims (not to exceed \$1,000 in any one case) for damages to or loss of private property incident to the operation of Army and Air National Guard camps of instruction, either during the stay of units of said organizations at such camps or while en route thereto or therefrom; claims for damages arising under training contracts with carriers; and repayment of amounts determined by the Secretary of the Army, the Secretary of the Navy, or the Secretary of the Air Force, or officers designated by them, to have been erroneously collected from military and

civilian personnel of the Departments of the Army, Navy, and Air Force or from States, Territories, or the District of Columbia, or members of National Guard units thereof; **[\$12,000,000]** \$18,620,000. (*Department of Defense Appropriation Act, 1958.*)

Appropriated 1958, **\$12,000,000**Estimate 1959, **\$18,620,000**

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
1. Personnel claims.....	\$4,647,937	\$5,600,000	\$7,782,000
2. Tort claims.....	4,451,588	8,508,000	10,146,000
3. Admiralty claims.....	304,793	865,000	665,000
4. Other miscellaneous claims.....	15,490	27,000	27,000

Appropriation (new obligatory authority)	515,000,000	\$555,000,000	\$600,000,000

This estimate includes funds for the pay of all military personnel on the retired lists of the Department of Defense and represents the consolidated requirements of the military departments for (1) payments to retired officers and enlisted personnel of the Army, Navy, Marine Corps, and Air Force; (2) the retainer pay of regular enlisted personnel of the Fleet Reserve of the Navy and Fleet Marine Corps Reserve; and (3) survivors' benefits payable under the Uniformed Services Contingency Option Act of 1953. The amount requested is exclusive of any administrative expense. The more liberal retirement laws result in a significant increase to the retired rolls. The following tabulation shows the average number of personnel on the rolls during 1957 compared with the estimated number for 1958 and 1959:

	Actual average number, 1957	Estimated average number, 1958	Estimated average number, 1959

Provision has been made for advances to the Coast Guard for construction of additional loran stations in areas essential to the defense of the United States. Loran transmitting stations permit safe and effective operation of Navy and Air Force ships and aircraft in all kinds of weather, day or night, by an electronic system of navigation which provides continuous navigational positions by means of intersecting lines of position.

An additional amount anticipated for loran stations is included under the heading "Proposed for later transmission."

Appropriation (new obligational authority).....			-----

The balances of two of these 1955 appropriations are recommended for rescission, as their purposes have been accomplished.

1. *National defense access roads.*—The Secretary of Defense advanced funds to the Bureau of Public Roads, Department of Commerce, for the construction of access roads important to the national defense pursuant to section 6 of the Defense Highway Act of 1941 and section 12 of the Federal Aid Highway Act of 1950.

2. *Construction of ships.*—This program provided for the construction of commercial-type ships and high-speed tankers to meet requirements of the Military Sea Transportation Service which could not be satisfied from existing sources.

3. *Family housing.*—The Secretary of Defense was authorized to make available to the respective military

departments funds for military family housing where he had determined that (1) it was impracticable to construct family housing under the provisions of title VIII of the National Housing Act, (2) adequate housing at reasonable rental rates was not available in the immediate vicinity of the military installations, and (3) it was impracticable to acquire suitable housing under other existing provisions of law.

NOTE.—This schedule excludes the acquisition of housing in France through surplus commodity barter transactions (69 Stat. 350) which are as follows: 1957, \$456,750; 1958, \$24,543,250; and 1959, \$25,000,000.

Not to exceed the equivalent of \$250 million (70 Stat. 1017) of the proceeds in foreign currencies obtained from the sale of surplus agricultural commodities, pursuant to the provisions of the Agricultural Trade Development and Assistance Act of 1954 (68 Stat. 454), is authorized to be used to provide family housing facilities for the use of Department of Defense personnel stationed abroad (68 Stat. 1125). Such housing is not owned by the Department but is available under leasing agreements for assignment by the Department as public quarters. Quarters allowances forfeited by military occupants and rents collected from civilian occupants are used, after deducting amounts required to maintain and operate the housing, to reimburse the Commodity Credit Corporation for the dollar equivalent of the foreign currencies used to obtain the housing. In addition to the foreign currencies, funds not in excess of 25% of the total cost of obtaining the use of a housing project may be appropriated as are necessary to supplement the foreign currencies in order to obtain the required housing (70 Stat. 1017).

This fund finances the acquisition costs, mortgage payments and initial alteration, improvement, rehabilitation, and repair of certain family units of Wherry Act housing (70 Stat. 1111–1112).

Budget program.—The budget program contemplates acquisition of 40,522 units of Wherry family housing costing \$346.7 million in 1958 and 18,638 units costing \$152.7 million in 1959. Acquisition of Wherry Act housing is mandatory at installations where the construction of housing under the armed services housing mortgage insurance program (Capehart housing) has been

approved by the Secretary of Defense and is permissive in all other cases. Approvals to date and anticipated approvals of Capehart housing in 1958 and 1959 will necessitate the acquisition of approximately 48,000 units of Wherry Act housing.

Although the estimated number of units to be acquired in 1959 is less than half those estimated in 1958, obligations are expected to increase due to the large number of units to be rehabilitated in 1959 (12,500 units in 1958 and 30,000 units in 1959).

Financing the budget program.—This program is funded from reappropriations, rentals, and, where the housing is assigned as public quarters, from payments from appropriations for pay and allowances of military personnel in amounts equal to the quarters allowances to which the occupants would otherwise be entitled. The cost of maintaining and operating the housing is financed from the military operation and maintenance appropriations. Mortgage indebtedness assumed in acquiring the housing is reflected in the schedules.

A reappropriation of \$50 million is estimated in 1959 pursuant to the authority in section 512 of the Housing Act of 1956. Income from quarters allowances and rentals is expected to increase from an estimated \$19.1 million in 1958 to approximately \$50.2 million in 1959.

Operating results and financial condition.—Net budget expenditures of \$40 million and \$55 million are expected in 1958 and 1959, respectively, since outlays for acquisition of sponsors' equities, mortgage payments, rehabilitation, and other costs will substantially exceed the amounts available from quarters allowances and rentals. Operating income is expected to exceed operating expenses paid from the fund by an estimated \$11.3 million in 1958 and \$32.3 million in 1959. This income is available for financing the acquisition and rehabilitation of additional units as well as for payments of operating expenses. The schedules do not reflect depreciation or operation and maintenance costs. Government investment is estimated at \$168.6 million at June 30, 1959, consisting of \$125 million in reappropriations and \$43.6 million in retained earnings.

Relation of costs to obligations.—The year-end balances of unperformed contracts (for rehabilitation) are as follows: 1957, \$33,100; 1958, \$10,000,000; 1959, \$10,000,000.

Construction (total obligations).....			\$20,000,000
Financing:			
Proposed transfer from "Marine Corps stock fund".....			20,000,000

Under proposed legislation, 1959.—Legislation will be proposed to provide for construction of additional loran stations, with funds to be provided by transfer.

DEPARTMENT OF THE ARMY

Current authorizations:

MILITARY PERSONNEL

For pay, allowances, individual clothing, interest on deposits, and permanent change of station travel, for members of the Army on active duty (except those undergoing reserve training); expenses incident to movement of troop detachments, including rental of camp sites and procurement of utility and other services; expenses of apprehension and delivery of deserters, prisoners, and soldiers absent without leave, including payment of rewards (not to exceed \$25 in any one case), and costs of confinement of military prisoners in non-military facilities; donations of not to exceed \$25 to each prisoner upon each release from confinement in an Army or contract prison (other than a disciplinary barracks) and to each person discharged for fraudulent enlistment; authorized issues of articles to prisoners, other than those in disciplinary barracks; subsistence of enlisted personnel, selective service registrants called for induction and applicants for enlistment while held under observation, and prisoners (except those at disciplinary barracks), or reimbursement therefor while such personnel are sick in hospitals; and subsistence of supernumeraries necessitated by emergent military circumstances; **[\$3,113,000,000]** **\$3,105,200,000**, and in addition, **[\$350,000,000]** **\$225,000,000**, to be derived by transfer from the Army Stock Fund **[and \$50,000,000 to be derived by transfer from the Army Industrial Fund]**: *Provided*, That section 212 of the Act of June 30, 1932 (5 U. S. C. 59a), shall not apply to retired military personnel on duty at the United States Soldiers' Home: *Provided further*, That the duties of the librarian at the United States Military Academy may be performed by a retired officer detailed on active duty. (10 U. S. C. 651, 711, 3066, 3201, 3205, 3209, 3210, 3212, 3213, 3281-88, 3295, 3310, 3311, 3442-45, 3447, 3448, 3491, 3531, 3536, 3572-74, 4353, 4533, 4561, 4562; 37 U. S. Military Academy cadets.....	1,751	1,900	1,900
Total.....	997,079	900,000	870,000

1. *Pay and allowances.*—This provides for the pay and allowances of military personnel including cadets at the U. S. Military Academy.

Provision is made for amounts otherwise available as quarters allowances to be paid (1) in an estimated amount of \$5.7 million in 1958 and \$14.6 million in 1959 to the revolving fund for "Acquisition, rehabilitation, and rental of Wherry Act housing," in cases where such housing is assigned as public quarters, and (2) as mortgage payments on Capehart housing.

The Capehart program authorized under title VIII of the National Housing Act, as amended (69 Stat. 646), provides for the acquisition of family housing built on military installations with financing obtained through mortgages which are insured by the Federal Housing Administration. These mortgages are amortized over a 25-year period from quarters allowances to which military personnel assigned to occupy these public quarters would otherwise be entitled and from rentals paid by civilian personnel whose duties require their occupancy of Government quarters. The following schedule indicates the payments from the quarters allowance portion of this appropriation to be applied to reduction of the principal obligations, to pay interest on the unpaid balance at 4% per annum, and to pay the insurance premiums on the mortgages.

	1957 actual	1958 estimate	1959 estimate
Mortgage indebtedness:			
Mortgage debt at start of year.....			\$140,100,000
Amount of mortgages executed during year.....		\$141,128,000	\$117,800,000
Payments applied to reduce principal.....		-\$1,028,000	-\$4,100,000
Mortgage debt at end of year.....		\$140,100,000	\$253,800,000
Mortgage payments:			
Amortization of principal.....		\$1,028,000	\$4,100,000
Interest expense.....		\$1,976,000	\$7,906,000
Insurance premium expense.....		\$124,000	\$494,000
Total mortgage payments.....		\$3,128,000	\$12,500,000
Number of housing units:			
Beginning of year.....			9,105
Completed during year.....		9,105	7,600
End of year.....		9,105	16,705
Average occupied during year.....		3,272	12,955

In addition, provision is made for payment for proficiency advancements to selected enlisted personnel in critical-skill areas and for the Government's contribution to the Federal old-age and survivors' insurance trust fund under the Servicemen's and Veterans' Survivor Benefits Act. It also provides for purchase of individual clothing for initial issue to enlisted personnel and for replacement issues in Korea and for payment of clothing maintenance allowances to enlisted personnel. An additional amount anticipated under proposed pay legislation is shown under "Proposed for later transmission."

2. *Subsistence in kind.*—This provides for the purchase of food supplies for issue as rations to enlisted personnel and contract meals for applicants for enlistment and selective service registrants while held to determine fitness for service.

3. *Movements, permanent change of station.*—This provides for permanent change of station travel for individuals and groups of military personnel and their dependents, including dislocation and separation travel allowances, storage of household effects in commercial facilities, and transportation of personal property. Payment for travel services furnished by the Military Sea

Transportation Service and (in 1959) by the Military Air Transport Service is included.

4. *Other costs.*—This provides for apprehension of deserters, absentees, and escaped military prisoners, payment of interest on soldiers' deposits, payment of death gratuities to beneficiaries of military personnel, and payment of premiums on servicemen's mortgage insurance.

NOTE.—Reimbursements from non-Federal sources are principally from the sale of goods and services to authorized individuals, and include such items as laundry services, subsistence of hospital patients, surcharge on commissary sales, and unofficial telephone service.

1. *Tactical forces.*—These include all active Army tactical forces such as missile commands, the Strategic Army Forces in the United States, forces overseas, and the Army Air Defense Command assisting in the air defense of the continental United States. Costs cover the support of these units and the installations at which they are stationed, the basic training of inductees and enlistees including the Reserve Forces Act of 1955 trainees, and the conduct of field exercises and unit tests. The 1959 program includes the support of 14 divisions and other major combat units and provides for the operation of additional missile commands and on-site missile battalions for the air defense program. Other types of units, such as anti-aircraft, gun battalions, are being decreased.

DEPARTMENT OF THE ARMY—Continued

Current authorizations—Continued

OPERATION AND MAINTENANCE—Continued

2. *Training activities.*—Provision is made for specialized training of military personnel in the Army school system, including combat arms, aviation and missile training, technical, administrative, and specialist schools and colleges; the operation of the U. S. Military Academy; tuition costs at civilian institutions; and costs of training aids and publications. The average student load is as follows:

	1957 actual	1958 estimate	1959 estimate
Army schools.....	35,055	39,870	35,117
Army colleges.....	935	875	883
U. S. Military Academy.....	2,349	2,400	2,400

3. *Central supply activities.*—This covers the Army's supply distribution system, the administrative costs of procurement activities, the operation of supply management offices, the maintenance of standby industrial facilities to be activated in the event of mobilization, and the operation of port facilities in the United States and overseas. Provision is also made for the Army's share of the governmentwide cataloging and standardization programs. Costs include those attributable to the Army's responsibility as single manager for all phases of supply management and operation with respect to subsistence and to clothing and textiles and for traffic management for all military departments.

The supply distribution system comprises 45 supply depots in the United States and 37 overseas which receive, store, and issue Army supplies and equipment, including Army aviation materiel.

4. *Major overhaul and maintenance of materiel.*—Major items of equipment, including combat and support vehicles, Army aircraft, guided missiles, and ammunition, are overhauled and rebuilt at Army depots. Other equipment maintenance costs, including contracts with industry for technical assistance, are also provided. Provision is made for central procurement of guided missile, aircraft, and special weapons repair parts for worldwide issue. The program for 1959 reflects the increased emphasis on guided missiles and the expansion of Army aviation activities, and decreases in other types of materiel.

5. *Medical activities.*—This covers medical (including dental and veterinary) support of the Army, Army National Guard, Army Reserve, and Reserve Officers' Training Corps; operation and maintenance of medical facilities in the United States and overseas; medical care and hospitalization of Army personnel in localities where Army medical facilities are not available; medical care and hospitalization of civilian employees and their dependents in the Canal Zone; medical care of dependents of military personnel; and training of military personnel in medical specialties.

Provision is made for operation in the continental United States of 51 hospitals and 86 dispensaries. The average number of patients is indicated in the following table:

	1957 actual	1958 estimate	1959 estimate
Patients in Army hospitals:			
Army, active duty.....	8,691	7,938	7,387
Dependents.....	3,695	3,487	3,399
Veterans Administration, Navy, Air Force, and others.....	2,642	2,612	2,583
Total average daily occupied beds.....	15,028	14,037	13,369
Army patients in other hospitals:			
Active duty, retired, and others (average daily occupied beds).....	1,400	1,300	1,296
Dependents in other Federal hospitals.....	259	377	377
Dependents in civilian hospitals.....	479	1,220	1,187

6. *Armywide activities.*—This includes the following administrative-type activities:

	1957 actual	1958 estimate	1959 estimate
Major command headquarters:			
Departmental headquarters.....	\$41,849,957	\$43,760,000	\$41,180,000
Headquarters technical services.....	41,416,228	41,476,000	38,700,000
Major field commands.....	90,689,850	91,172,000	88,088,000
Specialized services:			
Armywide communications services.....	68,999,944	54,000,000	57,670,000
Armywide finance services.....	21,280,561	21,362,000	21,000,000
Armywide audit services.....	15,799,220	16,200,000	15,410,000
Evaluation activities.....	57,460,901	83,987,000	86,538,000
Military surveys and maps.....	42,920,461	40,667,000	34,432,000
Other specialized services.....	80,255,538	82,900,000	81,482,000

7. *Army Reserve and Reserve Officers' Training Corps.*—Provision is made for the maintenance and operation of the U. S. Army Reserve and Reserve Officers' Training Corps; operation of military district and Army Corps (Reserve) headquarters; operation of training facilities for Army Reserve and Reserve Officers' Training Corps units at summer training camps, institutions, and home stations; and expenses for Army Reserve recruiting. This activity is related to the average strength in paid status of the U. S. Army Reserve.

8. *Joint projects.*—These are activities of a defensewide nature, for which the Department of the Army is assigned administrative responsibility. Included are such activities as the National War College, the Industrial College of the Armed Forces, the Joint Alternate Communications Center, certain joint headquarters in oversea areas, international activities, certain classified activities, and the Armed Forces information and education program.

Provision is made for military personnel costs of training the Army Reserve and the Reserve Officers' Training Corps.

1. *Reserve personnel.*—Included are funds for military personnel costs of pay, travel, subsistence, and clothing. Provision is made for paid drills for members of organized units and staff and faculty of USAR schools. One mandatory tour of paid active duty for training is provided each year for members receiving drill pay and for mobilization designees and USAR school students who do not receive drill pay. School training is provided for selected mem-

bers of the Ready Reserve. An additional amount anticipated under proposed pay legislation is shown under "Proposed for later transmission." The paid personnel strength is indicated in the following table:

National Guard personnel are trained in their respective units in 48 armory drills and 15 days field training. Non-prior service recruits must take 6 months active duty for basic training in a Federal status under provisions of 10 U. S. C. 672. Selected personnel receive specialized training at Army schools and command post exercises. The States, Territories and the District of Columbia also provide support for the Army National Guard.

There were 5,493 federally recognized local units on June 30, 1957. The structure of the major units will be maintained in 1959 at 27 divisions, together with combat support units. The military personnel strength is summarized in the following table:

ARMY NATIONAL GUARD PERSONNEL STRENGTH

[In paid status]

	1956 actual	1957 actual	1958 planned	1959 proposed
End of year:				
Officers.....	34,899	36,795	36,000	35,000
Enlisted.....	369,504	385,353	364,000	325,000
Total.....	404,403	422,178	400,000	360,000
Average:				
Officers.....	34,550	35,934	36,400	35,500
Enlisted.....	345,692	377,537	370,400	341,900
Total.....	380,242	413,471	406,800	377,400

In 1959 the training level will continue to rise through the requirement of basic training for new enlistees who have not had prior military service, and all Army National Guard units will enter unit training. The composition

of the Guard by training category during 1959 is indicated below:

Paid drills	Paid days of active duty for training		Beginning strength	Average strength	Ending strength
48	15	{Officers.....	36,000	35,500	35,000
0	180	{Enlisted.....	342,100	328,500	311,900
		do.....	21,900	13,400	13,100
		Total.....	400,000	377,400	360,000

1. *Military personnel.*—Army National guardsmen attending armory drills receive basic pay; those participating in field training and other active duty training receive additional allowances. Subsistence is provided for enlisted men during active duty training and for both officers and enlisted men at drill assemblies of 8 hours or more on 1 day. Uniform clothing is provided for enlisted men, and monetary uniform allowance for officers. An additional amount anticipated under proposed pay legislation is shown under "Proposed for later transmission."

2. *Command and management.*—This provides for the administrative expenses of the National Guard Bureau (except the air division), including civilian salaries, military and civilian travel, printing and reproduction costs at the seat of the Government, and assistance to the States in recruiting.

3. *Training.*—Provides for expenses of drill assemblies and field training, including travel of Regular Army personnel, transportation of supplies and equipment, and miscellaneous supplies and services.

4. *Materiel.*—Organizational and individual equipment, and other necessary materiel are provided for unit training.

5. *Supplies and repair parts.*—Provides for supplies and repair parts, publications, and organizational and office supplies.

6. *Services including equipment maintenance.*—Provision is made for transportation, travel, communication and miscellaneous services for the support of units, an average strength of 16,940 State civilian employees for the administration of units, and the maintenance and repair of equipment; for maintenance, repair and utility costs of National Guard facilities; and for the operation of State and Federal field training camps.

7. *Antiaircraft defense.*—This provides for training and operating expenses (other than military personnel costs) of Army National Guard AAA gun and missile battalions as part of the air defense of the United States. It provides for an average of 1,650 State civilian employees to maintain and secure on-site positions and equipment in a continued state of operational readiness. The program in 1959 will be limited to units equipped with missiles or in training for conversion to missile units.

Scientific and technical resources are applied to the problems of providing the Army with the firepower, mo-

bility, intelligence, and supporting capabilities necessary to meet the changing conditions of modern war. The work is carried on under contracts with industry and other private institutions, and in the research, development, and test facilities of the Army and other Government agencies. Additional funds for development and for procurement of items for test and evaluation are provided in the appropriation for procurement of equipment and missiles.

1. *Aircraft and related equipment.*—This activity covers research and development of piloted aircraft, including propulsion systems and other equipment. Emphasis is on short-takeoff fixed and rotary-wing aircraft of increased range and all-weather capability.

2. *Guided missiles and related equipment.*—The objective of this activity is the development of surface-to-air missiles for air defense and surface-to-surface missiles for tactical support of ground troops in land combat. Propulsion and guidance systems and other related equipment are also developed under this activity. The substantial increase planned for 1959 reflects the increasing importance of guided missiles in modern warfare.

3. *Ships and small craft and related equipment.*—Small craft for transport, reconnaissance, and assault use are under development.

4. *Combat and support vehicles and related equipment.*—This activity includes a variety of vehicles ranging from tanks and self-propelled guns to personnel and cargo carriers.

5. *Artillery and other weapons and related equipment.*—Rocket launchers for advanced weapons are included in this activity in addition to improved field guns, howitzers, mortars, small arms, and other weapons, together with fire control and other related equipment.

6. *Ammunition and related equipment.*—Emphasis is placed on new types of ammunition such as rockets, as well as on increased effectiveness of artillery ammunition, mines, grenades, and small-arms ammunition. Development of improved explosives and propellants is included.

7. *Other equipment.*—Development of a wide variety of supporting equipment for communications, construction, reconnaissance, mapping, and other purposes is carried on under this activity.

8. *Military sciences.*—This provides for basic and applied scientific research of general application to military problems and for the development of materials and components not directly associated with other items under development. Examples of the work under this activity are medical research and operations research studies.

9. *Operation and management of facilities.*—Included in this activity are those support costs for operation, maintenance, and management of research, development, and test facilities, such as the White Sands Proving Ground, not charged directly to other budget activities.

Provision is made for the procurement of major supplies and equipment, including missiles, necessary to equip, maintain, and train the active Army and Reserve forces; and for the provision of facilities essential to industrial mobilization objectives.

Sales of equipment and supplies from stock which do not require replacement in kind provide a source of funds for procurement of items for the Army. These amounts are included as direct obligations, as follows: 1957, \$280 million; 1958, \$236 million; and 1959, \$10 million.

1. *Major equipment.*—Provision is made for procurement of weapons and vehicles actually used for combat, such as antiaircraft artillery, recoilless rifles, fire-control equipment, mortars, rifles, machine guns, tanks and tank accessories, self-propelled artillery, etc.; vehicles used for general purposes; Army aircraft, including liaison aircraft, helicopters, and target equipment used in antiaircraft training; electronics and communications equipment; and other major items of equipment used by the Army, such as railroad equipment, bridges, materials-handling equipment, construction equipment, generators, road-building equipment, etc.

2. *Ammunition and missiles.*—Provision is made for procurement of missiles, ammunition used with conventional weapons, and ground explosives.

3. *Industrial mobilization.*—Provision is made for the rehabilitation and expansion of manufacturing facilities needed for current operations; for development of mass-production methods for new items, for pilot-line production, for production engineering tests leading to reduction in the use of critical materials and manpower; and for the layaway of Government-owned production facilities and equipment as they are released.

4. *Reimbursements.*—In accordance with coordinated procurement assignments, supplies are provided to other military services, foreign governments cooperating in mutual defense programs and others, on a reimbursable basis, either by issue from stock or by procurement.

The National Board for the Promotion of Rifle Practice assists in providing citizens training in the use of military-type small arms. Assistance is provided to approximately 3,800 clubs and schools enrolled with the director of civilian marksmanship with a total membership of approximately 204,000, by the loan of rifles and equipment, the issuance of targets and supplies for use in marksmanship practice, and the issuance of trophies, medals, and badges for marksmanship. Ammunition is provided from other appropriations for issue to members of rifle clubs and to competitors at national, regional, State, and local competitions. Funds are included for travel of civilian shooting teams to the national matches and to the international shooting games to be held in August 1958 in Moscow, Russia.

This system provides internal and external telegraph and long distance telephone service for the Territory of Alaska. The amount appropriated provides for all expenses incident to the normal maintenance, operation, and equipment modernization of the system exclusive of costs of pay, allowances, subsistence, and medical care of military personnel utilized. Revenues and reimbursements earned by the system are deposited in the Treasury.

In 1957 the value of governmental and commercial use was \$7.6 million. The estimated value in 1958 is \$8 million and in 1959 is \$8.4 million. Revenue from commercial customers was \$3.6 million in 1957, and is estimated at \$3.8 million for 1958 and \$4.2 million for 1959.

Appropriation (new obligational authority).....	-----	-----	-----

This account provides for the construction of operations buildings and utilities to house technical equipment, barracks to house enlisted men, and family quarters for the housing of operating personnel. Obligations in 1958 will permit the completion of projects initiated in 1957 at Nome, Bethel, Kotzebue, and Lena Point, and will provide for the construction of a combination operations and troop housing building for the ionosphere sounding station at Adak.

1. *Public works construction.*—This program provides for acquisition of land for, and construction of, military public works projects in the United States and overseas as authorized by Congress in current military public works authorization acts. These projects support the current and long-range program to strengthen and modernize the Army.

2. *Minor construction.*—Provision is made for construction of permanent and temporary public works that are not otherwise authorized by law but which are determined to be urgently required and do not exceed \$200,000 per project.

3. *Planning.*—This provides for necessary planning of military construction projects, including design, standards, criteria, studies, appraisals, and other related activities.

4. *Supporting activities.*—Provision is made for activities such as the defense access road program and the architect-engineer services, land and utilities, in support of the privately financed Capehart housing program.

An additional amount is anticipated for military construction under "Proposed for later transmission."

This program is to provide adequate training and storage facilities for the Army National Guard and the Army Reserve. Facilities are utilized to the greatest practicable extent by two or more of the Reserve forces of the armed services.

1. *National Guard armory construction.*—Requirements include construction of new armories and expansion and modification of existing armories. One hundred and ninety-five projects were initiated in 1957.

2. *National Guard nonarmory construction.*—Requirements include construction of aircraft hangars, maintenance shops, field training facilities, and storage facilities.

3. *Army Reserve construction.*—This provides for acquisition of Army Reserve training centers. During 1957, contracts were awarded for 68 projects. Approximately the same number are planned in 1959.

This fund finances the maintenance, operation, improvement, and liquidation of temporary family housing units transferred to the Department of Army (70 Stat.

1106). During 1957, there were 2,289 family units maintained, and a slight reduction in the number of units will occur in 1958 and 1959. Funds are provided by rental receipts. During 1959, the sum of \$550,000 which is surplus to operational requirements of the fund will be returned to the Treasury.

Financing applied to program.....	455,580,544	529,827,700	502,032,513

This fund finances industrial- and commercial-type activities on a reimbursable basis (5 U. S. C. 172d).

Budget program—Printing and pictorial activities.—This includes a printing plant and a pictorial center, which produces and distributes motion pictures, film strips, and television programs on military training subjects. Costs increase in 1958 because the pictorial center was financed through this fund for only 4 months in 1957, and are expected to remain relatively stable in 1959.

Manufacturing and maintenance divisions, Quartermaster depots.—Four of these installations were financed through this fund in 1957. Closing of one during 1958 causes costs to decline in 1958 and 1959. These installations are engaged in the manufacture and repair of clothing and textile items, rebuild of furniture, air-drop equipment, and other items of quartermaster equipage, and in printing.

Ordnance arsenals.—In these 7 arsenals about one-third of the costs are for manufacturing and assembly, about one-third for research and development, and the remainder for repair work, supply services, maintenance of idle and underutilized industrial facilities, and miscellaneous other support services. About 90% of this work is performed for the Army and about 10% for other agencies, principally the Air Force. From 1957 to 1959, costs are expected to decline by about \$1 million. This is the net

of increases of \$10 million for civil service retirement and \$5.5 million to put 1957 wage increases on a full-year basis, offset by reductions of \$16.5 million due to declining workload and employment. Decreased workload at installations specializing in artillery, small arms, and fire control equipment more than offsets increases of \$13.5 million at installations doing work related to guided missiles and atomic munitions.

Ordnance proving grounds and research activities.—This includes a laboratory specializing in work on fuzes and a proving ground. About 93% of the industrial effort at these installations is in research and development and 7% in manufacturing. Costs increase in 1958 and 1959 because the proving ground has been financed through the fund only since September 1957. Workload and employment are expected to decline in 1959 at both installations.

Chemical arsenals.—These 2 arsenals are equipped for the production and loading of chemical warfare agents and provide for related repair and supply support. Costs decrease by about \$17.1 million during 1958 and are expected to decrease by another \$1.7 million in 1959, primarily because production operations have ceased at one of the arsenals during 1958 and are dropping to a very low level at the other through 1958 and 1959. Most of the costs incurred at these arsenals in 1958 and 1959 relate to supply services, maintenance of reserve industrial facilities, and miscellaneous support services furnished to tenant and neighbor organizations.

Chemical proving grounds and research activities.—These 3 installations are engaged primarily in research and development activities on chemical warfare agents and delivery systems. Costs increase by \$28.2 million in 1958, primarily because the financing of the chemical center through this fund began in 1958, and will decline by about \$2.2 million in 1959 as a result of reductions in workload and employment.

Transportation terminal commands.—These 3 commands are engaged in the import and export movement of personnel and cargo through Army terminals on the Atlantic, Pacific, and Gulf coasts. The following table presents workload and cost information:

	1957 actual	1958 estimate	1959 estimate
Terminal costs:			
Cargo.....	\$68,914,580	\$75,632,000	\$71,463,000
Passengers.....	1,607,944	1,581,000	1,165,000
Services for commercial vessel owners and cargo-handling contractors.....	4,270,064	5,066,000	5,118,000
Commercial transportation.....	12,308,842	8,435,000	-----
Other services.....	27,689,228	28,350,000	19,159,000
Total costs.....	114,790,658	119,064,000	96,905,000
Measurement—tons of cargo handled.....	8,757,861	9,256,600	8,159,000
Number of passengers.....	773,466	694,000	515,000
Cost per measurement-ton:			
Ammunition.....	\$23.24	\$23.28	\$21.01
Bulk cargo.....	.77	-----	-----
Other cargo.....	7.58	7.83	8.23
Cost per passenger.....	2.08	2.28	2.26

The cost increase of \$4.3 million in 1958 consists mainly of a \$6.7 million increase in cargo-handling costs due to increased workload, offset by a reduction of \$3.9 million in commercial transportation costs financed through the fund. In 1959, costs decrease by \$22.2 million; \$4.5 million of this decrease results from decreasing cargo and passenger workload, \$8.4 million because commercial line-haul transportation costs will no longer be financed through the fund, and \$9.2 million from reductions in other costs, most of which is related to depots no longer to be financed through the fund. Unit cost increases in 1958 are due to civil service retirement, wage increases granted in 1957

DEPARTMENT OF THE ARMY—Continued

Intragovernmental funds—Continued

ARMY INDUSTRIAL FUND—Continued

being in effect on a full-year basis, changes in cargo mix, and the operation of wage-increase clauses in contractors' labor agreements. The latter two factors cause unit costs on other cargo to increase in 1959.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources and applicable adjustments, as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year:				
Materials and supplies.....	\$25,921,514	\$24,461,133	\$26,769,283	\$26,464,343
Advances.....	1,210,959	2,199,810	570,595	529,355
Provision for subsequent maintenance, claims, etc. (-)	-5,040,113	-9,037,632	-7,731,174	-4,609,013
Unpaid undelivered orders.....	98,784,323	75,814,420	69,335,553	67,110,301
Total selected resources at end of year.....	120,876,683	93,437,731	88,944,257	89,495,016
Selected resources at start of year (-).....		-120,876,683	-93,437,731	-88,944,257
Increase or decrease (-) in selected resources.....		-27,438,952	-4,493,474	550,759
Materials and supplies capitalized (-).....		-1,700,957	-5,325,843	
Inventory adjustment charged to prior year income.....		39,866		
Liabilities assumed or canceled (-): Accrued leave.....		3,497,066	4,796,381	-213,361
Adjustment of prior year payables.....		9,679		
Goods manufactured for inventory (-) (included both as a cost and an increase in inventory above).....		-648		
Costs financed from obligations of other years, net (-).....		-25,593,946	-5,022,936	
Obligations incurred for costs of other years, net.....				337,398

Costs exceeded obligations by \$25.6 million in 1957, primarily because of a reduction in new work initiated in ordnance and chemical arsenals. New orders at chemical arsenals are again estimated to be lower than production in 1958, which is the major reason why costs exceed obligations in that year.

Additional activities being considered for industrial-fund financing.—Extension of industrial-fund financing to 20 additional installations is being considered for 1958 and 1959, including 11 ordnance equipment rebuild activities, 4 signal equipment rebuild facilities, 2 engineer equipment rebuild facilities, 2 railroad repair shops, and a general depot. Industrial-fund financing will be extended to these activities when (1) analysis of the specific installation indicates that definite economies can be derived thereby and (2) a program is developed for the installation that will assure the application of management and cost controls so as to achieve these economies.

Financing the budget program.—This program is financed from customer orders received, which constitute valid obligations of the ordering appropriations. Costs are charged initially to the fund and are billed to orders at the completion of work or periodically as work progresses. Such billings constitute revenue as reported in the statement of revenue and expense.

Orders received increase by \$40.4 million in 1958, the net of a decrease of \$40.7 million in ordnance arsenals and an increase of \$81.1 million elsewhere. In ordnance arsenals, the reduction in orders received in 1958 does not result in a reduction in production costs, because of the large balance of unbilled orders brought forward, which will be sharply reduced during the year. The 1958 increases in other orders received result primarily from the addition of an ordnance proving ground and a chemical center to this fund in 1958.

In 1959, orders received are estimated to decline by \$53.3 million, the net of a \$7.2 million increase in chemical arsenals and \$60.5 million in reductions elsewhere. In chemical arsenals, 1959 orders are expected to be substantially the same as costs incurred, in contrast to 1958 when new orders were partially offset by cancellations of prior-year production orders. The 1959 estimates for ordnance and chemical proving grounds and research activities reflect reductions in orders received of \$7.7 million and \$13 million, respectively. The decrease occurs because 1958 orders were unusually high as a result of establishing normal backlogs of customers' orders at the two installations added to this fund in 1958. Decreases of \$39.8 million in orders received in 1959 in other activities relate primarily to reduced program requirements.

Operating results and financial condition.—The following table indicates 1957 revenue and expense by activity:

	Revenue	Expense	Gain or loss (-)
Printing and pictorial activities.....	\$1,079,995	\$1,099,099	-\$19,104
Manufacturing and maintenance divisions, Quartermaster depots.....	12,602,723	12,566,149	36,574
Ordnance arsenals.....	284,396,546	283,398,452	998,094
Ordnance proving grounds and research activities.....	22,269,258	22,269,258	
Chemical arsenals.....	38,690,074	38,630,929	59,145
Chemical proving grounds and research activities.....	27,763,316	27,727,233	36,083
Transportation terminal commands.....	108,488,623	107,800,258	688,365
Total.....	495,290,535	493,491,378	1,799,157

About \$700,000 of this gain was realized at installations billing at fixed prices, where those prices generated income in excess of costs incurred. The balance was realized largely because overhead applied to production at fixed rates exceeded actual overhead costs. No gain or loss is expected in 1958 or 1959. While it is not possible to achieve an absolute break-even position each year in actual practice, installations develop budgets upon this basis in order to avoid, so far as possible, any augmentation or overcharging of current customer appropriations.

Amounts billed for the support of reserve industrial capacity are estimated to increase by \$7.6 million in 1959, primarily at ordnance arsenals. While these arsenals are operating at considerably below their capacity, maintenance and certain other costs cannot be reduced proportionately. Application of these fixed costs to current production buries such costs in charges against customer appropriations used to procure goods and services. At ordnance arsenals in 1959 fixed costs will be charged to current production in the ratio that current production bears to capacity. The costs attributable to unutilized production capacity will be financed from industrial mobilization funds. A similar practice is reflected in the chemical arsenals for 1957, 1958, and 1959. The cost of maintaining totally idle facilities, as distinct from partially utilized facilities, is financed from industrial mobilization funds in all cases.

Collections exceeded expenditures by \$31.8 million in 1957. Billings were greatly accelerated in 1957, and progress billings on uncompleted orders were made to an abnormal extent at the end of the year. The 1958 estimates contemplate a normal billing and collection cycle, with progress billings for uncompleted orders limited to cases where relatively long periods of time are involved in production. As a result, accounts receivable and unbilled costs of work in process increase in 1958 and expenditures are expected to exceed collections by \$23 million.

A rescission of \$110 million was effected in 1957, and \$50 million was transferred to "Military personnel, Army" in 1958. Of the estimated Government investment of \$226 million at the close of 1959, \$131.7 million is necessary to provide working capital for the activities currently financed through this fund, estimates for which appear in the statements and schedules. The balance of \$94.3 million will provide for contingent requirements, including the provision of working capital for additional installations being considered for industrial-fund financing in 1958 and 1959.

This fund was created to facilitate operations which are financed by two or more appropriations (5 U. S. C. 172e). The corpus of the fund consists of \$1 million. The activities presently financed include:

1. The defense telephone service, Washington, which finances the operations of the telephone service of the Department of Defense, Washington, D. C.

2. The U. S. Army, Europe, construction activity, which finances certain administrative and overhead expenses of the Department of Defense construction programs in Western Europe.

This fund finances the procurement and maintenance of inventories of common-use items for resale and for mobilization reserve. These inventories include approximately 686,000 line items, or 90% of the line items in the Army's total inventory.

Stock fund operations are organized under the management of 7 technical services and are detailed in the schedules by 13 categories of material. These categories include the two Army single-manager assignments covering continental U. S. depot inventories of clothing and subsistence for all the military services. Sales of inventories held by the two single managers are generally made to the retail stock funds of all military services at continental U. S. stations and oversea areas for resale to the consuming appropriations. Inventories of other categories are sold directly to the consuming appropriations.

The net increase in capitalized inventories during 1957 was \$930.3 million. Included in this net increase is \$530.1 million of clothing and textile inventory received from the other services. Also during the year \$155.2 million of medical-dental inventories were decapitalized to permit establishment of the Navy's medical-dental single-manager assignment. The remaining part of the capitalized inventories resulted from the extension of stock fund operations to the Southeastern Europe Task Force and from receipt of material without reimbursement. The fund will be extended hereafter to include to the maximum extent practicable the stocks at all major posts, camps, and stations along with additional categories of ordnance and aircraft supplies and spare parts. The statements printed herein do not reflect these further extensions.

During 1957 the Army initiated new accounting and reporting procedures which are resulting in continued improvements in supply, accounting, and financial data, and in turn in improved supply management.

Changes in inventory capitalized under each category are as follows:

	1957 actual	1958 estimate	1959 estimate

Budget program.—The net obligation program for 1959 is \$82.7 million higher than for 1957 and includes an increase of over \$100 million in the single-manager clothing and textile category to meet other service requirements which were not a part of the 1957 program. This increase in the clothing and textile category is offset in part by decreases in other categories resulting primarily from reductions in customers' requirements.

Net obligations are approximately 85% of net sales in 1958 and 88% in 1959. In 1957, only about 80% of the net sales required replacement. This increased percentage of sales replacement reflects a decrease in the utility of the long-supply inventories that remain under the fund. Of the total reduction in inventory of \$1,689.8 million that is estimated to occur in 1958 and 1959 only \$630 million is expected to be accomplished through sales at standard prices without replacement. The budget program provides for year-end inventories as follows:

Financing operations.—Funds for financing the budget program are derived from sales to authorized customers. Excluding sales of the single-manager clothing and textile category which was not fully established until 1958, net sales in 1958 and 1959 decrease 11% and 16%, respectively, from the 1957 level. This reflects the reduced requirements of the operating appropriations.

Cash receipts will continue to exceed cash expenditures in 1958 and 1959. In 1959, \$225 million is proposed for transfer to another appropriation. This will bring the total rescissions and transfers through that period to \$2,419.5 million.

DEPARTMENT OF THE ARMY—Continued

Intragovernmental funds—Continued

ARMY STOCK FUND—Continued

Operating results.—Net losses of \$607.6 million and \$678 million are estimated for 1958 and 1959, respectively, compared to \$388.7 million in 1957. These losses are due in large measure to disposal or donation of excess and surplus stocks. The analysis of inventories, to identify stocks which would be more economical for the Government to dispose of than to retain, is being accelerated in 1958 and 1959. The losses increase in proportion to the volume of the disposal program.

Other significant factors which contributed to the 1957 operating loss and are not projected in 1958 or 1959 include a net inventory loss of \$59.7 million (primarily a large accounting adjustment for ordnance tank-automotive supplies), an \$11.6 million loss resulting from sales prices on petroleum products not being increased rapidly enough to cover abruptly increased product and transportation costs during the year, and an \$8 million loss in some other categories in which standard prices were insufficient to cover all normal costs. The operating losses in 1957 and 1958 are offset by \$41.2 million and \$17.3 million, respectively, from a net markup of inventory values due to revision of standard prices to reflect the cost of current purchases.

The \$4 million adjustment of prior-year income in 1957 is a net change from a \$33 million decrease in accounts receivable and \$29 million decrease in accounts payable from the balances shown in those accounts on June 30, 1956. This results mainly from a \$28.9 million overstatement of sales of ordnance tank-automotive supplies in prior years and an overstatement of prior year payables of \$20.4 million in the Army clothing and textile category.

Financial condition.—Liabilities outstanding at the end of 1957 include \$6.8 million in stock withdrawal credits, which represents the unused balance of the credits granted the Air Force stock fund at the time of transfer of Air Force depot stocks of clothing and textiles to the single manager; and \$43.2 million in unapplied sales return credits. Both of these are applicable only to requisitions which were submitted prior to June 30, 1957. About 60% of these amounts were not applied to requisitions and have been recorded as additional capitalization in 1958.

The Government investment in the fund as of June 30, 1957, is estimated at \$6,629.4 million, made up of \$10,738.5 million capitalized inventory less \$1,994.9 million of net rescissions of appropriations and reappropriations, and \$2,114.2 million of deficit.

1. *Pay and allowances.*—This provides for the pay and allowances of military personnel including midshipmen at the U. S. Naval Academy, aviation cadets, and officer candidates.

Provision is made for amounts otherwise available as quarters allowances to be paid (1) in an estimated amount of \$0.6 million in 1958 and \$5.5 million in 1959 to the revolving fund for “Acquisition, rehabilitation, and rental of Wherry Act housing,” in cases where such housing is assigned as public quarters, and (2) as mortgage payments on Capehart housing.

The Capehart program authorized under title VIII of the National Housing Act, as amended (69 Stat. 646), provides for the acquisition of family housing built on military installations with financing obtained through mortgages which are insured by the Federal Housing Administration. These mortgages are amortized over a 25-year period from quarters allowances to which military personnel assigned to occupy these public quarters would otherwise be entitled and from rentals paid by civilian personnel whose duties require their occupancy of Government quarters. The following schedule indicates the payments from the quarters allowance portion of this appropriation to be applied to reduction of the principal obligations, to pay interest on the unpaid balance at 4% per annum, and to pay the insurance premiums on the mortgages.

	1957 actual	1958 estimate	1959 estimate
Mortgage indebtedness:			
Mortgage debt at start of year.....			
Amount of mortgages executed during year.....			\$21,080,000
Payments applied to reduce principal.....			—180,000
Mortgage debt at end of year.....			\$20,900,000
Mortgage payments:			
Amortization of principal.....			\$180,000
Interest expense.....			\$343,400
Insurance premium expense.....			\$21,600
Total mortgage payments.....			\$545,000
Number of housing units:			
Beginning of year.....			
Completed during year.....			1,360
End of year.....			1,360
Average occupied during year.....			565

In addition, provision is made for payment for proficiency advancements to selected enlisted personnel in critical-skill areas and for the Government's contribution to the Federal old-age and survivors' insurance trust fund under the Servicemen's and Veterans' Survivor Benefits Act. It also provides for purchase of individual clothing for initial issue to enlisted personnel and payment of clothing maintenance allowances to enlisted personnel. An additional amount anticipated under proposed pay legislation is shown under “Proposed for later transmission.”

2. *Subsistence in kind.*—This provides for the purchase of food supplies for issue as rations to enlisted personnel, including emergency rations, flight rations, and operational rations.

3. *Movements, permanent change of station.*—This provides for permanent change of station travel for individuals, and groups of military personnel and their dependents, including dislocation and separation travel allowances, storage of household effects in commercial facilities, and transportation of personal property. Payment for travel services furnished by the Military Sea Transportation Service and (in 1959) by the Military Air Transport Service is included.

4. *Other costs.*—This provides for apprehension of deserters, absentees, and escaped military prisoners, payment of interest on deposits, payment of death gratuities to beneficiaries of military personnel, and payment of premiums on servicemen's mortgage insurance.

Total.....	161,681	156,908	144,159	144,062

The program provides 48 paid drills and 15 days of active duty training for personnel assigned to aviation squadrons, enlisted training units, units required immediately upon mobilization, staff and faculty of officer schools, and selected mobilization billets. Twenty-four paid drills are provided for other mobilization assignees, and for reservists assigned to the administration of volunteer units. Reservists whose mobilization duties do not require frequent inactive duty training are given active duty training only. An additional amount anticipated under proposed pay legislation is shown under “Proposed for later transmission.” Estimated strengths for training categories for 1959 are as follows:

Paid drills	Paid days of active duty for training		Beginning strength	Average strength	Ending strength

1. *Training, Navy.*—Training and instruction of naval personnel extends from the indoctrination of recruits to technical and specialized instruction at the postgraduate level. Provision is also made for supporting services to training and for maintenance and operation of training centers, service schools for enlisted personnel and officers, the Naval War College, the Armed Forces Staff College, the Postgraduate School, the Supply Corps School, and other miscellaneous schools. Recruits trained: 1957, 92,645; 1958, 90,360; 1959, 89,856. Other personnel trained: 1957, 373,190; 1958, 385,713; 1959, 383,529.

2. *Training, Naval Reserve.*—This provides for the academic instruction of officer candidates in the Naval Reserve Officers' Training Corps units and of Reserve officers who have completed active duty under the naval aviation college program, and the maintenance and operation of Naval Reserve training facilities, except air in-

stallations. Officer candidates in training: 1957, 14,003; 1958, 14,093; 1959, 14,363. Reserve personnel in drill status: 1957, 132,354; 1958, 130,711; 1959, 130,440.

3. *Naval Academy.*—This provides for the education and training of midshipmen at the Naval Academy and the maintenance and operation of the supporting physical facilities. Number of midshipmen: 1957, 3,790; 1958, 3,772; 1959, 3,650.

4. *Personnel support.*—This provides for the recruiting of military personnel and for maintenance and operation of recruiting stations. It also provides for military personnel administration in the field, including appropriate offices in the district headquarters and at other personnel facilities, together with recreational and morale-building activities for naval personnel, such as ship and station libraries, motion-picture programs afloat and in remote areas, chaplains' supplies and equipment, the family allowance activity at Cleveland, Ohio, the naval examining center at Great Lakes, Ill., the Reserve Officers' performance recording activity at Fort Omaha, Nebr., and the Naval Reserve training command, Omaha, Nebr. The increase in this activity results principally from completing the new manpower data system.

5. *Other personnel facilities.*—This provides for maintenance and operation of receiving stations, retraining commands, the Naval personnel center at Omaha, Nebr., the Naval Home at Philadelphia, Pa., and certain personnel facilities in caretaker status.

1. *Pay and allowances.*—This provides for the pay and allowances of military personnel.

Provision is made for amounts otherwise available as quarters allowances to be paid (1) in an estimated amount of \$0.5 million in 1958 and \$4.3 million in 1959 to the revolving fund for "Acquisition, rehabilitation, and rental of Wherry Act housing," in cases where such housing is assigned as public quarters, and (2) as mortgage payments on Capehart housing.

The Capehart program authorized under title VIII of the National Housing Act, as amended (69 Stat. 646), provides for the acquisition of family housing built on military installations with financing obtained through mortgages which are insured by the Federal Housing Administration. These mortgages are amortized over a 25-year period from quarters allowances to which military personnel assigned to occupy these public quarters would otherwise be entitled and from rentals paid by civilian personnel whose duties require their occupancy of Government quarters. The following schedule indicates the payments from the quarters allowance portion of this appropriation to be applied to reduction of the principal obligations, to pay interest on the unpaid balance at 4% per annum, and to pay the insurance premiums on the mortgages.

	1957 actual	1958 estimate	1959 estimate
Mortgage indebtedness:			
Mortgage debt at start of year.....			\$9,184,000
Amount of mortgages executed during year.....		\$9,220,000	\$3,890,000
Payments applied to reduce principal.....		—\$36,000	—\$228,000
Mortgage debt at end of year.....		\$9,184,000	\$12,846,000
Mortgage payments:			
Amortization of principal.....		\$36,000	\$228,000
Interest expense.....		\$68,700	\$439,600
Insurance premium expense.....		\$4,300	\$27,400
Total mortgage payments.....		\$109,000	\$695,000
Number of housing units:			
Beginning of year.....			595
Completed during year.....		595	251
End of year.....		595	846
Average occupied during year.....		114	720

In addition, provision is made for payment for proficiency advancements to selected enlisted personnel in critical-skill areas and for the Government's contribution to the Federal old-age and survivors' insurance trust fund under the Servicemen's and Veterans' Survivor Benefits Act. It also provides for purchase of individual clothing for initial issue to enlisted personnel and payment of clothing maintenance allowances. An additional amount anticipated under proposed pay legislation is shown under "Proposed for later transmission."

2. *Subsistence in kind.*—This provides for the purchase of food supplies for issue as rations to enlisted personnel, including emergency rations, flight rations and operational rations.

3. *Movements, permanent change of station.*—This provides for permanent change of station travel for individuals, and groups of military personnel and their dependents, including dislocation and separation travel allowances, storage of household effects in commercial facilities, and transportation of personal property. Payment for travel services furnished by the Military Sea Transportation Service and (in 1959) by the Military Air Transport Service is included.

4. *Other costs.*—This provides for apprehension of deserters, absentees, and escaped military prisoners, payment of interest on deposits, payment of death gratuities to beneficiaries of military personnel, and payment of premiums on servicemen's mortgage insurance.

This appropriation provides for pay and allowances' subsistence, clothing, and travel of Marine Corps reservists and Reserve officer candidates. The personnel program is summarized in the following table.

MARINE CORPS RESERVE PERSONNEL STRENGTH

(In paid status)

	1956 actual	1957 actual	1958 planned	1959 proposed
End of year:				
Officers.....	6,627	6,577	5,446	5,322
Enlisted.....	39,352	42,460	42,034	41,578
Total.....	45,979	49,037	47,480	46,900
Average:				
Officers.....	6,112	6,521	5,499	5,384
Enlisted.....	38,987	40,728	42,281	41,806
Total.....	45,099	47,249	47,780	47,190
Reserve officer candidates.....	1,535	2,600	2,900	3,100

The program provides 48 paid drills and 15 days of active duty training for personnel assigned to ground combat units or to aviation squadrons. Members of ground or aviation staff groups receive 24 paid drills. Those individuals receiving only 15 or 30 days' active duty training are reservists who are not able to participate in unit training because of employment and residential limitations or whose mobilization assignments do not require frequent inactive duty training. An additional amount anticipated under proposed pay legislation is shown under "Proposed for later transmission." Estimated strengths for training categories for 1959 are as follows:

Paid drills	Paid days of active duty for training		Beginning strength	Average strength	Ending strength

The objectives of this program are to: (1) procure new types of equipment suited to meet the vertical envelopment doctrine, aircraft for which are procured for the Marine Corps by the Bureau of Aeronautics; (2) procure and modify major items of equipment such as ammunition, electronics, and guided missiles, necessary to equip, maintain, and train active Marine Corps forces and Reserve components; (3) replace conventional items of major equipment with improved models; (4) procure major items of equipment to augment mobilization reserve stock; and (5) test and evaluate new types of equipment

and supplies to determine their suitability for Marine Corps use.

Appropriation (adjusted).....	171,720,000	173,000,000	168,252,000

This appropriation provides for the maintenance and operation of all Marine Corps activities except air facilities.

1. *Training and operations.*—This provides primarily for the support of the Fleet Marine Force as well as the bases at which these combat units are garrisoned and trained. It includes procurement of supplies and equipment; repair and overhaul of equipment; recruiting expenses; and troop services such as education of dependents, and welfare and recreational expenses.

2. *Depot supply system.*—This includes the operation of five supply facilities to provide materiel for Marine Corps units stationed throughout the world.

4. *Marine Corps Reserve training.*—This covers facilities for Reserve training including personnel support, maintenance and operation of Reserve armories, supplies and equipment for ground and aviation units of the Marine Corps Reserve.

5. *Cataloging.*—Provision is made for Marine Corps participation in the central cataloging project of items used by the Marine Corps.

Appropriation (new obligational authority).....	1,732,900,000	1,837,000,000	2,069,105,000

This appropriation finances the procurement of aircraft, guided missiles, and supporting equipment for the Navy and Marine Corps. It provides also for the modification and modernization of service aircraft and ground electronics equipment required in aircraft and missile operations. The funds requested permit carrying out a 1959 program costing \$2,197.8 million, compared to \$2,008.7 million for 1958.

1. *Aircraft and related equipment.*—This activity finances procurement of new aircraft, including supporting components and spare parts. Procurement requirements for new aircraft are based on the projected aircraft operating program, and replacement of attrition losses and obsolescence.

2. *Missiles, drones, and related equipment.*—This activity provides for the procurement of guided missiles for initial outfitting of the fleet, training, test and evaluation, and related projects such as target drone and missile industrial facilities. An ever increasing number of supersonic aircraft in fleet squadrons has made mandatory an accelerated program of development and procurement of air

launched missiles for both offensive and defensive armament. Similarly, in the surface launched category, emphasis is being placed on supersonic missiles capable of delivering nuclear loads with minimum risk to the launching ship or submarine. Approximately 70% of the budgeted funds provide for missiles for fleet operational or training purposes and the remainder covers procurement of newly developed or improved missiles for test and evaluation.

3. *Training equipment.*—Operational flight trainers, specialized maintenance trainers, and other training aids are financed by this activity in phase with procurement of aircraft and missiles under activities 1 and 2.

4. *Aircraft modernization.*—Major emphasis in the 1959 aircraft modernization program is directed toward improvements in the antisubmarine warfare capability of fleet aircraft through installation of improved search and detection equipment. Other programs provide for making mandatory safety-of-flight improvements, extending the air-launched guided missile program and incorporating technical improvements in the airborne early-warning systems.

5. *Ground electronic and detection equipment.*—Increased performance characteristics require corresponding improvements in communication, navigation and other ground-control equipment. The 1959 estimate provides for the continued modernization of air station ground control equipment and expansion of ground instrumentation facilities for testing guided missiles and aircraft.

Unobligated balance carried forward (69 Stat. 438).....		1,217,147	217,147
Unobligated balance no longer available.....	6,398,503	13,500,000	
Appropriation (new obligational authority).....	810,772,000	853,500,000	840,548,000

This appropriation finances the operating costs of naval aviation, including air combat forces of the Regular Navy and Marine Corps, supporting service and training forces, Naval and Marine Air Reserves, naval air stations, and related activities.

1 and 2. *Flight operations, Regular Navy and Naval Reserve.*—These activities provide fuel, lubricants, and supplies for naval aviation flight operations. In total, the number of operating aircraft and flying hours pro-

gramed for 1959 are lower than those in 1958. The 1959 program, however, reflects a larger percentage of high-performance aircraft in the combat operating complements.

3. *Aircraft overhaul.*—This activity finances major overhaul of naval aircraft, engines and components. Workload is based on operating strength and level of flight operations programed for 1959, and costs are based on 1957 experience adjusted for prices current in October 1957.

4 and 5. *Station operations, Regular Navy and Naval Reserve.*—The cost of operating and maintaining Regular and Reserve Navy and Marine Corps stations, whose missions are predominantly air, is less in 1959 than in 1958. The lower 1959 estimate reflects the continuation of station closings commenced in 1958, offset in part by the phasing-in of other stations and facilities both in continental United States and overseas to support operations of modern high-performance aircraft.

6. *Alteration and replacement of facilities.*—Provision is made for structural repairs to aeronautical shore facilities, maintenance of industrial reserve aircraft plants and tools, and replacement of landing aids and aircraft overhaul shop equipment.

7. *Supporting equipment, materiel and services.*—General services to naval aviation include procurement of weather instruments, technical publications, ground equipment, and aerial cameras and related photographic equipment. In addition this activity provides for improvement of production methods, evaluation of newly developed equipment, standardization of material and equipment, and maintenance of shipboard catapults and arresting gear.

Appropriation (new obligational authority).....	1,479,700,000	1,584,000,000	1,381,000,000

This appropriation covers shipbuilding programs authorized subsequent to 1951. Funds are provided for construction and procurement of hulls, machinery, and equipment, including armor and armament for new naval vessels; conversion of existing naval vessels; and other related costs, including tools and equipment, facilities in private plants, and departmental salaries. The 1959 program of \$1.159 billion includes 15 guided missile ships, one of which is to be nuclear powered. This program has previously financed 6 *Forrestal*-type carriers, 1 nuclear-powered carrier, 19 nuclear-powered submarines, and other military ships. Funds are requested for the 1960 program for the procurement of long-lead-time components and designs for ships to be constructed or converted in the future and approximately \$100 million for repricing ships now under construction.

This appropriation also provides for the procurement of electronics equipment for the fleets, fleet support activities, and commissioned ships assigned to Military Sea Transportation Service and Coast Guard; other electronics equipment as may be required in connection with ship operations; and related costs.

Expenditures are expected to increase substantially in 1959 because of larger ship types and greater complexity of ships in recent programs.

An additional amount anticipated for 1958 is shown under "Proposed for later transmission."

The ships of the U. S. Navy are maintained and operated by this appropriation, including the three main fleets: Active, reserve, and reserve training. Incident to this primary mission is the provision of shore facilities which back up the fleet and keep it in good condition. The appropriation also provides technical assistance at headquarters for the fleet.

1. *Maintenance and operation of the active fleet.*—Provision is made for the overhaul, both scheduled, and unscheduled, of active fleet ships and for their necessary supplies and equipage. Average number of ships: 1957, 966; 1958, 924; 1959, 874. Number of overhauls: 1957, 425; 1958, 369; 1959, 378.

2. *Active fleet alterations and improvements.*—This allows for a comprehensive program of military and technical alterations and improvements to vessels of the active fleet. Also included are programs for shipboard habitability improvements; alterations of installed ordnance; and evaluation of newly developed items by the operating forces.

3. *Technical support programs.*—Provision is made for a wide range of programs which contribute directly or indirectly to fleet maintenance. These programs are: The maintenance of service craft at shore activities; commissioning and outfitting of vessels; preparation or procurement of design work (except for conversion and new construction plans); salvage operations; charter and hire of vessels; furnishing private electronic engineers to supplement fleet and shipyard technical capabilities; procurement of equipment (except electronics) for Regular Navy schools and Naval Reserve training facilities and maintenance repair parts for support of the servicewide cryptographic system; and support of ocean weather stations operated by the Coast Guard.

4. *Maintenance and preservation of reserve fleet.*—This program allows for maintenance of 1,510 reserve vessels; provides for maintenance, repair, preservation of hulls, machinery, and ordnance equipment, improvement of reserve fleet ships, and the inactivation of ships.

5. *Maintenance and operation of Naval Reserve training vessels.*—Provision is made for maintenance, operation, alteration, and improvement of 81 ships assigned to the Naval Reserve training program.

6. *Fuel for ships.*—This includes fuel, water, and utility services for ships and service craft of the active fleet and the reserve fleet, and for Naval Reserve training vessels. Active fleet steaming hours for 1959 are estimated at 2,021,000, compared to 2,049,000 for 1958.

7. *Procurement of maintenance material.*—This project finances the procurement of the wide range of shipboard hull and machinery components required for the fleets; the rehabilitation of components turned into store; and inspection testing and standardization of material and equipment.

8. *Fleet support facilities.*—This covers fleet support and plant improvements at 11 naval shipyards and 8 Bureau of Ships' laboratories; maintenance, operation, and miscellaneous charges at other shore stations; expenses of fleet shore activities assigned to the operating forces; procurement and maintenance of equipment for advanced bases and harbor defense; maintenance of industrial facilities held in standby condition; care of machine tools and industrial equipment; industry preparedness measures designed to reduce lead and production time; and planning and scheduling mobilization equipment requirements.

Unobligated balance carried forward.....	157,412,043	49,278,870	36,513,870
Appropriation (new obligational authority).....	294,000,000	176,000,000	460,235,000

The appropriation provides for ammunition, ordnance equipment, and guided missiles necessary to support the operational requirements of approved naval forces, to improve the Navy materiel readiness position, to retain an acceptable base on which to mobilize, and to provide for the systematic introduction into fleet utilization of newly developed procurement items. Generally this appropriation funds a selected number of weapons to meet the peacetime-force materiel requirements. In a few instances, where peacetime requirements are exceeded, this has been done to keep basic production lines operating at a minimum rate.

1. *Ammunition.*—Provides for the procurement of adaptations for nuclear warheads and of conventional aircraft, gun, and antisubmarine ammunition, mines, torpedoes, and other munitions to support naval forces, including facilities and related costs.

2. *Ordnance equipment.*—Provides for the procurement of aviation, shipboard, underwater, and shore-based ordnance equipment, not otherwise provided, to support naval forces, including facilities and related costs.

3. *Ordnance guided missiles.*—Provides for procurement, including facilities and related costs, of guided and ballistic missiles assigned to the Bureau of Ordnance for the naval forces, and of auxiliary equipment for control, handling, checkout, servicing, and testing. Sizable increases are reflected in this activity for evaluation, improvement, and production of both defensive- and offensive-type missiles, especially for Polaris. The Navy's modernized shipbuilding program leads to a guided missile nuclear-powered fleet. It has arrived at a point where funds must now be requested to supply these ships with designated missiles. A supplemental appropriation is anticipated for 1958 for the acceleration of the Polaris program and is shown under "Proposed for later transmission."

This appropriation provides for basic and applied scientific research and for the development and improvement of weapons and equipment of the Navy. The work is conducted by contracts with industry, private research organizations, and universities; and by the research, development, and test facilities operated by the Navy and other Government agencies. Additional funds for development and for procurement of items for test and evaluation are provided in the procurement appropriations of the Navy.

1. *Aircraft and related equipment.*—This activity provides for research and development of piloted aircraft and related integral equipment including, for example, engines, armament, and communications, navigation, bombing, and fire-control equipment.

2. *Guided missiles and related equipment.*—This activity provides for research and development of air-to-air, air-to-surface, surface-to-air and surface-to-surface guided mis-

DEPARTMENT OF THE NAVY—Continued

RESEARCH AND DEVELOPMENT—Continued

siles and related equipment, fuels, and propellants. An increase is budgeted in 1959 primarily to provide for an augmented effort in the development of surface-to-surface missiles.

3. *Ships and small craft and related equipment.*—This activity provides for research and development of ships and small craft and their components, such as hulls, engines and propulsion machinery, guns, radar, sonar, fire-control systems and other electronics equipment for shipboard use, catapults and arresting gear, shipboard mine countermeasures equipment, and other installed equipment.

4. *Combat and support vehicles and related equipment.*—This activity provides for research and development of vehicles for the Marine Corps.

5. *Artillery and other weapons and related equipment.*—The developments under this activity relate to specialized weapons for the Marine Corps.

6. *Ammunition and related equipment.*—This activity provides for research and development of mines, depth charges, rockets, bombs and clusters, shells, torpedoes, and other types of ammunition and related components.

7. *Other equipment.*—This activity provides for research and development of equipment not separately provided for under other budget programs including certain navigation, detection, and warning equipment, harbor defense equipment, shore-based antisubmarine and mine countermeasures systems, training devices, radiological and aerological equipment, and personal equipment.

8. *Military sciences.*—This activity provides for research in areas of science important to military technology and operations; for scientific analyses of military operations; and for the development of materials and components having navywide application.

The costs of operating Navy research and development installations, such as the Naval Research Laboratory and the Naval Air Missile Test Center, are distributed among these activities.

Obligations incurred in the above programs are attributable to the various naval organizations, as follows:

Provision is made for operation of activities performing servicewide supply and finance functions, such as supply, purchasing, supply demand control, fleet-fueling, overseas air cargo handling, accounting and disbursing, materiel cataloging, and transportation control.

1. *Supply distribution.*—The Bureau of Supplies and Accounts provides for receipt, custody, warehousing, and issue of logistic materials and equipment in support of naval forces through 50 supply outlets.

Function	Workload factor	1957 actual	1958 estimate	1959 estimate
Direct force support.....	Supply issues.....	14,490,800	13,833,600	13,346,800

Financing:			
Unobligated balance no longer available.	\$4, 099, 611	\$700, 000	-----
New obligational authority-----	102, 435, 000	105, 100, 000	\$113, 257, 000
New obligational authority:			
Appropriation-----	\$102, 435, 000	\$107, 000, 000	\$113, 257, 000
Transferred to "Emergency fund" (71 Stat. 313)-----	-----	-1, 900, 000	-----
Appropriation (adjusted)-----	102, 435, 000	105, 100, 000	113, 257, 000

1. *Administrative headquarters for naval districts, bases, and stations.*—This activity finances administration at 14 naval districts, 1 river command, 5 naval bases, 5 boards of inspection and survey, and 16 naval stations.

2. *Service-wide communications.*—The naval communication system, a combination of leased and Government-owned communication facilities, provides rapid and secure worldwide communications to the naval operating forces and the Naval Shore Establishment.

3. *Hydrographic Office.*—The Hydrographic Office provides hydrographic and oceanographic charts and publications for safe navigation of the Navy and merchant marine; it also supports and participates in special and military projects for the Department of Defense.

4. *Naval Observatory.*—Astronomical data are supplied for safe navigation. Accurate time is determined and time signals and time transmissions are controlled, not only for the Navy, but for the Nation. Continuous astronomical observations and research are conducted for the general advancement of navigation and astronomy. The residence of the Chief of Naval Operations is maintained.

5. *Inter-American affairs and support of international projects.*—Hemispheric defense is improved by standardization of equipment and training and operation of Latin-American navies in accordance with U. S. Navy standards. Provision is also made for support of those unified commands and for support of Pacific command military assistance advisory groups, for which the Department of the Navy is the executive agency; as well as support of civil administration in the Trust Territory of the Pacific.

6. *Departmental administration.*—Provision is made for expenses incurred at the seat of government by the Offices of (a) the Chief of Naval Operations in commanding the operating forces, (b) the Judge Advocate General in providing legal services for the Naval Establishment, (c) the Chief of Naval Research in coordinating and conducting naval research and development, and (d) the Secretary of the Navy in directing and supervising the Department.

7. *Printing equipment and related costs, printing plants.*—This provides funds for purchase and installation of printing equipment for the 28 printing plants of the Defense printing service (Washington) and the Navy printing service (field) which are operated under the Navy industrial fund.

8. *Field services.*—Provision is made for expenses incurred in the field in administering the navywide records administration, wage and classification, Fleet Home Town News, and internal and contract audit programs. Included also are costs of installation and maintenance of specialized training equipment which simulates operating problems for use in individual and large-scale training, and administration of all activities on behalf of the Department of the Navy relating to patents, inventions, trademarks, copyrights, royalty payments, and similar matters.

9. *Contingencies of the Navy.*—Expenditures for emergencies and for extraordinary requirements are provided for upon approval of the Secretary.

Appropriation (new obligational authority)-----	683, 000	825, 000	1, 683, 000

The naval petroleum and oil shale reserves were established by Executive order to provide a supplemental stockpile of oil for national defense.

Provision is made for maintenance and operational activities as follows:

1. *Naval petroleum reserves and related development.*—This activity provides for Navy's share of operation and

production costs under the unit plan contract in Naval Petroleum Reserve No. 1 (Elk Hills field), California; supervision of lease operations on Government-leased lands in Naval Petroleum Reserve No. 2 (Buena Vista Hills field), California; and the drilling and production of offset wells in Naval Petroleum Reserve No. 3 (Teapot Dome field), Wyoming, to prevent drainage of oil from the reserve.

3. *Field administration.*—This provides for the office of the director, two field inspection offices, and employment of expert consultants.

1. *Public works construction.*—This program provides for acquisition of land for, and construction of military

public works projects in, the United States and overseas as authorized by Congress in current military public works authorization acts. These projects support the current and long-range programs to strengthen and modernize the Navy.

2. *Minor construction.*—Provision is made for construction of permanent and temporary public works that are not otherwise authorized by law but which are determined to be urgently required and do not exceed \$200,000 per project.

3. *Planning.*—This provides for necessary planning of military construction projects, including design, standards, criteria, studies, appraisals, and other related activities.

4. *Supporting activities.*—Provision is made for activities such as the defense access road program and the architect-engineer services, land, and utilities in support of the privately financed Capehart housing program.

An additional amount anticipated for military construction is included under "Proposed for later transmission."

Appropriation (new obligational authority).....	0,704,000		

This appropriation provides funds for the construction of training centers and stations for fleet, ground, and aviation units of the Naval and Marine Corps Reserve with provisions for joint use with the Reserve forces of the other services. The requirements for aviation facilities include

such items as airfield pavement, administrative facilities, barracks, maintenance, repair, and storage facilities. The requirements for Naval and Marine facilities provide mostly for the construction or purchase of training centers for established units.

An additional amount anticipated under proposed legislation is shown under "Proposed for later transmission."

DEPARTMENT OF THE NAVY—Continued

Public enterprise funds—Continued

DEFENSE HOUSING—Continued

This fund finances the maintenance, operation, improvement, and liquidation of temporary family housing units transferred to the Department of Navy (70 Stat. 1106). During 1957, there were 4,263 family units maintained, and a slight reduction in the number of units will occur in 1958 and 1959. Funds are provided by a transfer of \$375,000 in 1957 from the Housing and Home Finance Agency and by rental receipts. During 1959, the sum of \$450,000 which is surplus to operational requirements of the fund will be returned to the Treasury.

Relation of costs to obligations.—The year-end balances of unpaid undelivered orders are as follows: 1957, \$269,311; 1958, \$86,311; and 1959, \$87,311.

Financing applied to program	58,138,821	93,000,000	90,400,000

This fund finances the procurement and maintenance of levels of inventories of common-use items for resale and mobilization reserve.

In 1957 this fund was extended to include perishable subsistence and additional items in a number of the other categories. These increases in capitalization, however, were more than offset by a large-scale transfer of depot-level stocks of clothing and textile material to the control of the single manager for that material in the Army stock fund so that a net decrease of approximately \$50 million was shown for the year.

In 1958 inventories of commissary stores are brought under the fund along with additional items of electronics, ordnance, general property, and engineers materiel. By the end of 1958 practically all of the secondary items and repair parts will be financed under the stock fund, except for ammunition.

Changes in inventory capitalized under each category of the fund are as follows:

	1957 actual	1958 estimate	1959 estimate
Electronics parts	\$3,873,415	\$64,418,000	\$3,151,000
Engineer property materials and parts	3,989,352	9,750,000	147,000

Budget program.—The \$32.3 million increase in the budget program from 1957 to 1959 is almost directly related to the increases in the capitalization of the fund. Commissary stores, which were not under the fund in 1957, will attain a \$15.6 million level program in 1959. The \$9.9 million increase in subsistence results from a full year's requirement for perishable subsistence compared to a 6 months' requirement in 1957 and the \$3.9 million increase in electronics results from items capitalized in 1958. The clothing and textiles increase results from a higher number of recruits required in 1959 even though the overall strength of the Marine Corps is coming down.

In 1959 approximately \$16 million worth of inventory will be sold from long-supply stocks which do not require replacement. This is essentially the same amount of inventory drawdown that occurred in 1957 and 1958. The budget program is based on year-end inventories as follows:

Financing operations.—Funds for financing the budget program are derived from sales to authorized customers. Sales are expected to increase in 1959 about 52% over 1957. Practically all of this increase results from the sale of items brought into the fund in 1958 and 1959. Cash receipts are expected to exceed cash sales in 1959. It is recommended that \$20 million in excess cash be transferred to the Loran stations appropriation.

Operating results.—A net loss of \$13.1 million is forecast for 1959 operations. This results in a large measure from the disposal or donation of material in long supply at the

time of capitalization under the fund. Since the excess material awaiting disposal is still a substantial quantity at the end of 1959, losses of this magnitude or greater can be expected in the future.

Net inventory losses of \$1.7 million and \$1.8 million are expected in 1958 and 1959, respectively, compared with a \$2.9 million loss experienced in 1957. This loss represents the net from discrepancies in shipment, losses in storage, pilferage, differences disclosed by physical inventories, and accounting adjustments. The decreases in 1958 and 1959 result largely from the exclusion of accounting adjustments which made up about one-half of the net loss in 1957.

Financial condition.—The investment of the Government in the fund at June 30, 1959, will be \$397 million made up of \$518.5 million of capitalized assets, less net rescissions of \$88 million and a deficit of \$33.5 million.

This fund was established to account for advances received by the Navy for the cost of work or services to be furnished other Government agencies, foreign governments, and private parties (31 U. S. C. 643). Obligations against special deposits relate primarily to: (a) Utilities, repair, and maintenance furnished to morale, welfare, and recreation activities; (b) utilities furnished to tenants of Navy housing projects; and (c) utilities, sale of material, equipment rental, and other services for contractors and other private parties, primarily in overseas locations. The private individuals and organizations involved advance amounts to cover the estimated costs to

this fund, which amounts are used to pay the costs involved. Work performed for foreign governments consists primarily of ship repairs. From the advances made, this fund finances the Navy activity performing the work.

This fund finances industrial- and commercial-type activities on a reimbursable basis (5 U. S. C. 172d).

Budget program—Navy printing plants.—The estimates cover 27 plants, including 6 overseas. Prices have been held constant since July 1, 1955, except at 1 plant, where a slight increase has been made. The slight decline in costs represents a drop in workload.

DEPARTMENT OF THE NAVY—Continued

Intragovernmental funds—Continued

NAVY INDUSTRIAL FUND—Continued

Naval research activities.—These include the Naval Research Laboratory, the David Taylor Model Basin, and an ordnance laboratory. The Model Basin was financed through this fund beginning in 1958, accounting for about \$12 million of the cost increase in that year. Costs are expected to decrease about \$24 million in 1959, representing a reduction in work performed under contracts monitored by the Naval Research Laboratory. Work performed at these installations, as distinct from work performed by contract, is expected to remain at a constant level through 1958 and 1959.

Marine clothing and equipment factory.—This factory serves as a pilot production plant to test design, specifications, and production methods prior to commercial procurement, and also manufactures clothing and textile items needed on short notice, in small lots, or under other conditions making commercial procurement impracticable. Unit costs are generally about 5% greater in 1958 than in 1957; they are expected to remain stable in 1959. Unit cost increases in 1958 are due to civil-service retirement contributions and a 1957 wage increase being in effect on a full-year basis. These factors, plus a slight increase in workload, account for the overall cost increase of \$664,000 in 1958.

Naval ordnance plants.—The 7 plants reflected in the estimates include 1 which began industrial-fund financing during 1957. Placing this plant on a full-year basis in 1958 accounts for the cost increase reflected in that year. Costs are expected to continue at about the same level in 1959. About 75% of the costs of these plants relate to manufacturing and assembly; overhaul and repair constitutes about 6%, research and development about 4%, and miscellaneous activities the remaining 15%. Items involved are guns and mounts, torpedoes, powder, fuses, and other items of ordnance and ammunition.

Naval shipyards.—These include 11 shipyards and a ship repair facility. Costs decline by \$8 million from 1957 to 1958, the net of a \$32 million increase for civil service retirement and a \$40 million reduction due to declining workload. Workload and costs are expected to decline by an additional \$7 million, or 1%, in 1959. About 48% of shipwork costs relate to overhaul and repair of ships, and 40% to construction and conversion. About 95% of this shipwork is performed for United States fleet vessels, and the rest for allied fleets. Each item of shipwork tends to be unique, so comparable unit cost data are not available.

Military Sea Transportation Service.—This organization provides ocean transportation of passengers, petroleum, and dry cargo for the Department of Defense. The agency arranges and pays for commercial ships, and operates and pays costs on Government-owned ships employed. Customers are billed for work performed on the basis of published tariff schedules, with a few exceptions where they are billed for the use of specific ships on the basis of costs applied. Costs are decreasing in 1958 and 1959 because of reductions in workload and in the number of ships operated.

Naval base service activities.—These two activities operate motor pools, furnishing transportation and vehicle maintenance and repair service to adjacent commands. In addition, one of the activities operates and maintains utility services, performs maintenance services on structures,

roads, and grounds, and performs other custodial functions. Costs increase slightly from 1958 to 1959, primarily because one of the activities was financed through the fund for only 11 months in 1958.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources and applicable adjustments, as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year:				
Materials and supplies.....	\$75,106,449	\$88,507,104	\$88,588,291	\$85,871,324
Advances.....	3,324,176	11,922,123	923,851	765,001
Provision for subsequent maintenance, claims, etc. (-)	-18,249,563	-26,857,673	-19,302,000	-18,127,000
Unpaid undelivered orders..	177,366,558	107,349,987	146,246,613	138,947,430
Total selected resources at end of year.....	237,547,620	180,921,541	216,456,755	207,456,755
Selected resources at start of year (-).....	-237,547,620	-180,921,541	-180,921,541	-216,456,755
Increase or decrease (-) in selected resources.....		-56,626,079	35,535,214	-9,000,000
Materials and supplies capitalized (-).....		-1,042,380	-1,533,575	
Inventory adjustment charged or credited (-) to prior year revenue.....		-10,103	1,445	
Liabilities assumed: Accrued leave.....		653,875	1,445,075	
Adjustment of prior year payables.....		3,877,949		
Costs financed from obligations of other years, net (-).....		-53,146,738		-9,000,000
Obligations incurred for costs of other years, net.....			35,448,159	

During 1957, costs exceeded obligations by \$53.1 million, largely attributable to the net of a \$70 million reduction in unpaid undelivered orders and an increase of \$13 million in materials and supplies. The increase in inventories occurred in shipyards. About \$60 million of the decrease in unpaid undelivered orders occurred in the Military Sea Transportation Service; a normal balance is expected at the end of 1958, which is the main reason why unpaid undelivered orders increase by \$39 million, causing obligations to exceed costs in that year. The reduction of \$7 million in unpaid undelivered orders at the end of 1959 is expected to result from a generally lower volume of activity. Changes in the balances of advances and provision for subsequent maintenance relate largely to operations of the Military Sea Transportation Service. These changes tend largely to cancel each other with respect to the relationship between costs and obligations.

Additional activities being considered for industrial-fund financing.—Thirty-one additional installations are being considered for industrial-fund financing, including 9 aircraft and engine overhaul facilities, 8 base service activities, 4 specialized ordnance depots, 4 ammunition depots, 3 ship repair facilities, 2 installations which overhaul vehicles and other ordnance equipment, and an installation engaged in development, test, and manufacture of aeronautical equipment. Industrial-fund financing will be extended to these installations when (1) analysis of the specific installation indicates that definite economies can be derived thereby and (2) a program is developed for the installation that will assure the application of management and cost controls so as to achieve these economies.

Financing the budget program.—This program is financed by orders received from customer appropriations, which authorize industrial-fund installations to incur costs in performing the work or services required. Orders received decrease by \$200 million in 1958; \$138 million of this reduction relates to shipyards, largely because an order for a large aircraft carrier was placed with a naval shipyard in 1957. Declining workload in the Military Sea Transportation Service results in a \$44 million decrease in orders received in 1958. The decrease of \$26 million in ordnance plants results from declining workload and reduction in the unbilled balance of orders on hand. In

1959, orders received are expected to decrease by \$10 million, primarily resulting from (a) an increase of \$38 million in shipyards, largely in shipbuilding and conversion; (b) a decrease of \$36 million in the Military Sea Transportation Service as a result of decreasing workload; and (c) a decrease of \$17 million in research activities.

Orders placed with industrial-fund installations constitute obligations of the ordering accounts. The Government is obligated only when these installations place orders with the public for goods and services. During 1957, industrial-fund customers recorded obligations of \$1,520 million for orders placed with industrial-fund installations, and these installations incurred obligations of \$1,392 million. These installations, therefore, produced a net negative effect of \$128 million upon Government obligations in total. In 1958 and 1959, obligations incurred by the installations will exceed orders received in those years, and the net obligation effect is estimated at a positive \$148 million and \$45 million, respectively.

Industrial-fund costs are limited to amounts stated in valid orders issued from appropriations, except for minor operating gains and losses which may occur. In order to avoid, so far as possible, any augmentation or overcharging of customer appropriations, activities financed through this fund develop budgets and establish bases for charging each year upon the basis of no profit or loss. Financial policies are being strengthened to assure that only costs necessary to the performance of work specifically requested are charged to the customer funds involved. Beginning in 1958, the Military Sea Transportation Service will charge through the tariff only the costs of ships needed for the performance of current lift. Costs of any other ships maintained will be charged to the specific agency for which such ships are maintained. Systems are being developed to determine the cost of maintaining idle and underutilized facilities at shipyards and ordnance plants. Procedures for assuring that funds are available in appropriations prior to the incurring of costs by industrial-fund installations are being strengthened.

Operating results and financial condition.—The following table indicates 1957 revenue and expense by activity:

	Revenue	Expense	Gain or loss (—)
Navy printing plants.....	\$11,081,457	\$11,049,340	\$32,117
Naval research activities.....	63,157,501	63,285,539	—128,038
Marine clothing and equipment factory.....	4,443,288	4,431,461	11,827
Naval ordnance plants.....	117,249,589	117,267,325	—17,736
Naval shipyards.....	770,141,261	771,401,817	—1,260,556
Military Sea Transportation Service.....	471,601,578	477,211,236	—5,609,658
Total.....	1,437,674,674	1,444,646,718	—6,972,044

A break-even operation is contemplated in 1958 and 1959. Inventories are expected to decline slightly from 1958 to 1959, in line with declining levels of activity. A rescission of \$52 million was effected in 1957, and in 1958 \$70 million was transferred to "Military personnel, Navy." Of the estimated \$314.7 million in Government investment on June 30, 1959, \$269.7 million is necessary to provide working capital for activities now financed through the fund, estimates for which are reflected in the statements and schedules. The remaining \$45 million is necessary to provide working capital for additional activities to be financed through this fund hereafter.

This fund was created to facilitate the financing of operations supported by two or more appropriations (5 U. S. C. 172e). The corpus of the fund consists of \$1 million transferred from the naval procurement fund. Principal operations financed in this manner are construction of the Army, Navy, and Air Force bases and stations in Spain; the material inspection service; departmental telephone and maintenance services; transportation of the supplies, goods and materials of the Navy; the Electronics Production Resources Agency which coordinates the production and allocation of electronics equipment for the Department of Defense; certain interdepartmental activities discharging obligations placed on the Department of Defense by executive direction and such other obligations jointly affecting more than one component of the Department; and the Navy industrial exhibits program. The purpose of the industrial exhibits program is to facilitate, through the medium of exhibits, displays and other appropriate visual means, the U. S. Navy's programs in the following areas: Internal training and indoctrination; recruitment and personnel procurement; property and material acquisition and disposal; incentives to industry; and dissemination of technical, scientific, research and development, procurement and production information.

This fund, initially established in 1893, finances the procurement and maintenance of inventories of common-use material and supplies for resale and mobilization reserve. It includes items in all levels of shore-based inventories and in inventories of fleet issue ships afloat.

In 1957 inventories capitalized under the fund increased almost \$1 billion. This was the net result of bringing in new stocks of ships and submarine repair parts; electronics, photographic, and single-manager medical material, and forms and publications; and transferring to the Army stock fund depot-level stocks of clothing and textiles.

Selected stocks of ordnance repair parts are being considered for stock-fund financing as well as the extension of the stock-fund distribution system afloat to include inventories on tenders and repair ships. These considerations are not reflected in the statements contained herein.

The estimates contemplate changes in inventory capitalized under each category of the fund as follows:

	1957 actual	1958 estimate	1959 estimate
Special shipboard electrical fittings and fixtures.....	\$2,200,914	-----	-\$27,100,000

Budget program.—The budget program shows a net decrease in obligations for all categories of \$46.6 million from 1957 to 1959. This decrease in obligations reflects the general reductions in strength and operations in the Navy.

The decreases in the fuel and provisions categories of approximately \$20 million each make up a little over half of the total decreases. The only significant increase over the 1957 program is in the single-manager medical category. Since this category was established on January 1, 1957, the 1957 column reflects only a 6-month program. On a comparable basis this category also shows a program reduction in 1959.

Estimates for 1959 show only \$29.6 million of sales from long-supply stocks that will not require replacement. This substantial reduction from the \$76.9 million sold from long-supply stocks in 1957 and the \$88.5 million estimate of sales from such stocks in 1958, reflects the reduced availability of usable long-supply inventories remaining under the fund. Even though total inventories under the fund decrease \$685.2 million or almost one-third in 1958 and 1959, only 16% of the reduction is accomplished through sales at standard prices. The balance is brought about largely from the disposal of excess and surplus material.

The budget program provides for year-end inventories as follows:

Financing operations.—Funds for financing the budget program are derived from sales of material to authorized customers. Net reimbursable sales in 1959 are \$11.3 million less than in 1957, again reflecting the general reduction in naval operations. In 1959 cash receipts are expected to continue to exceed disbursements. In 1957 and 1958, excess cash was withdrawn or transferred from the fund in amounts of \$300 million and \$100 million, respectively. An additional \$100 million is recommended for transfer in 1959.

Operating results.—The statements show substantial net losses of \$207.9 million in 1958 and \$310.4 million in 1959 compared with a slight gain of \$6.5 million in 1957. These losses are brought about largely by the disposal of excess and surplus inventories at about 5% of standard prices. Losses of this magnitude can be expected to continue for at least 1 more year since \$176.4 million of excess or surplus inventory will be awaiting disposal at the end of 1959.

Net inventory losses of \$14.3 million and \$15.5 million are forecast for 1958 and 1959, respectively, compared to the \$3.9 million loss experienced in 1957. This loss represents the net from discrepancies in shipments, pilferage, losses in storage, differences disclosed by physical inventories, and accounting adjustments. The increases in 1957 and 1958 result largely from the exclusion of accounting adjustments which offset most of the losses in 1957.

Financial condition.—It is estimated that the Government investment in the fund as of June 30, 1959, will be \$1,854.7 million, consisting of \$506.6 million of appropriations and reappropriations, \$1,841 million of net capitalized inventory, and \$492.9 million deficit.

Appropriation (new obligational authority).....	6,848,500,000	5,886,000,000	5,888,800,000

This appropriation provides for (a) procurement of new aircraft and missiles with spare components, industrial facilities, and equipment; and (b) modification of inservice aircraft, missiles, and components. The 1959 program is designed to accelerate the guided and ballistic missile programs and to continue modernization of the Air Force with the most advanced type of aircraft, to be delivered through 1961. The funds requested provide for a procurement program of \$6,746 million for 1959, as compared to \$6,041.5 million for 1958.

1. *Aircraft*.—New aircraft are procured for the projected aircraft inventory required to support currently planned forces, taking account of estimated aircraft losses, obsolescence of aircraft in the inventory, and development of new models. This activity also provides for modification of inservice aircraft and spare components thereof; and production facilities for expansion to maintain a reasonable production capability.

2. *Missiles*.—Ballistic missiles and other types of guided missiles, both ground and air launched, are procured to augment the combat capabilities of the Air Force in strategic and tactical air operations and air defense. This activity also provides for the support of advanced missile development and the modification of inservice missiles and spare components thereof.

Activities 3 through 6 are no longer budgeted in this account.

【PROCUREMENT OTHER THAN】 AIRCRAFT AND MISSILE SUPPORT—Continued

procured ground equipment in support of the regular Air Force, the Air Force Reserve, the Air National Guard, and the Air Reserve Officers Training Corps. Additional funds anticipated for 1958 are shown under "Proposed for later transmission."

1. *Weapons, ammunition, and propellants.*—Provision is made for aircraft rockets, ammunition, propellants, and small arms weapons for the combat materiel reserve and for peacetime training.

2. *Vehicular equipment.*—Provision is made for passenger motor vehicles, trucks, tractors, trailers, and materials handling equipment.

3. *Ground communication-electronic equipment.*—Includes equipment for extension and augmentation of distant early warning lines, radar surveillance systems, data processing systems such as SAGE, and worldwide communications networks, and procurement of other electronic and meteorological equipments. The increase in 1959 stems largely from acceleration and augmentation of ballistic missile detection systems and other programs directly contributing to air defense.

4. *Ground handling equipment.*—Includes launching, guidance, and ground test equipment for ballistic and other guided missiles, and specialized ground servicing equipment for both manned aircraft and guided missiles. The increasing trend for missile equipment in 1958–59 is expected to continue in subsequent years.

5. *Training equipment.*—Provision is made for aircraft and missile flight simulators, mobile maintenance trainers, and armament and communications training aids and devices.

6. *Support equipment and supplies.*—Provision is made for items such as shop machinery, tools and materials, personal equipment, photographic equipment and supplies, office machines, furniture, and food service equipment.

7. *Base maintenance equipment.*—Provision is made for fire-fighting equipment, maintenance machinery, utility equipment, prefabricated structures, and decontaminating equipment.

8. *Airborne electronics and communication equipment.*—Amounts represent obligations against balances of 1956 and prior funds which were not transferred to "Aircraft and missile procurement."

Appropriation (adjusted).....	723,968,500	655,707,000	719,000,000

This appropriation provides for development and improvement of Air Force weapon systems, components, and equipment and for basic and applied research in fields of particular concern to the Air Force. The major portion of research and development work is carried out through contracts with industry, with the remainder carried out in universities and in Air Force and other governmental facilities. Testing and evaluation of newly developed

items are carried on at the development and test centers of the Air Force. Additional funds for development and for procurement of items for test and evaluation are provided in the procurement appropriations of the Air Force.

1. *Aircraft and related equipment.*—This program provides for research and development of aircraft and related aircraft equipment, including, for example, airframes, engines, armament, communications, navigation, bombing and fire control equipment.

2. *Guided missiles and related equipment.*—This program provides for research and development of air-to-air, surface-to-air, air-to-surface, and surface-to-surface guided missiles, guided missiles training and test vehicles, and related equipment. The increased funds in 1959 reflect a continued emphasis on the development of guided missiles. An additional amount is anticipated for 1958 and is shown under "Proposed for later transmission."

3. *Ammunition and related equipment.*—This program provides for the research and development of ammunition, rockets, bombs, components such as fuzes and propellants, and related ammunition equipment and components.

4. *Other equipment.*—This program provides for research and development of equipment not separately provided for under other budget programs including communications, construction, training, photographic, organizational, and personal equipment.

5. *Military sciences.*—This program provides for studies in the physical, engineering, and biological sciences to acquire fundamental knowledge applicable to the solution of development problems and studies of techniques and skills having military applications. The program also includes development of general materiel and components.

6. *Operation and management.*—This program provides for the operation, management, and maintenance of the research, development, and test facilities of the Air Force such as the Air Force Missile Test Center.

Work performed by other agencies under allocations in 1957 is to be performed on a reimbursable basis in 1958 and 1959.

OPERATION AND MAINTENANCE

For expenses, not otherwise provided for, necessary for the operation, maintenance, and administration of the activities of the Air Force, including the Air Force Reserve and the Air Reserve Officers' Training Corps; maintenance, operation, and modification of aircraft; transportation of things; repair of facilities; field printing plants; hire of passenger motor vehicles; recruiting advertising expenses; training and instruction of military personnel of the Air Force, including tuition and related expenses; pay, allowances, and travel expenses of contract surgeons; utility services for buildings erected at private cost as authorized by law (10 U. S. C. 9778), and buildings on military reservations authorized by Air Force regulations to be used for welfare and recreational purposes; rental of land or purchase of options to rent land without reference to section 3648, Revised Statutes, as amended, use or repair of private property, and other necessary expenses of combat maneuvers; civilian clothing not to exceed \$30 in cost for each person upon each release from a military prison, each enlisted man discharged for unsuitability, inaptitude, or otherwise than honorably, each enlisted man sentenced by a civil court to confinement in a civil prison, and each enlisted man interned, or discharged without internment as an alien enemy; authorized issues of articles for use of applicants for enlistment and persons in military custody; payment of exchange fees and exchange losses incurred by Air Force disbursing officers or their agents; losses in the accounts of Air Force disbursing officers as authorized by law (31 U. S. C. 95a; 50 U. S. C. App. 1705-1707); care of the dead; chaplain and other welfare and morale supplies and equipment; conduct of schoolrooms, service clubs, chapels, and other instructional, entertainment, and welfare expenses for enlisted

Appropriation (adjusted).....	3,738,919,418	4,039,120,000	4,100,000,000

1. *Operation of aircraft.*—Provision is made for (a) aviation fuel and oil consumed in support of the Regular Air Force and Air Force Reserve flying hour program except those programed for research and development activities and those associated with Military Air Transport Service aircraft whose operating costs will be financed by the Air Force industrial fund in 1959; (b) aviation fuel and oil utilized in maintenance activities; (c) aviation fuel and oil used in crash fire trucks, auxiliary power units, and by non-Air Force aircraft in performing emergency search and rescue missions; (d) missile fuel components for training and operational purposes; and (e) special fuels and lubricants for service testing.

2. *Logistical support.*—Provision is made for (a) depot maintenance of aircraft, engines and accessories, missiles, electronics and communication equipment, ground powered and marine equipment, and other miscellaneous equipment; and storage of aircraft and other equipment; (b) operation of the depot supply system; (c) commercial transportation incident to shipment from Air Force depots and from other agencies; transportation of Air Force personnel and material by Military Sea Transportation Service; and payment to the Air Force industrial fund for Air Force cargo shipped by the airlift service; (d) contract printing and printing procured from Air Force printing plants financed from industrial funds; (e) procurement and production operations; industrial preparedness program; and maintenance of reserve production plants and equipment; (f) disposition of deceased Air Force personnel; (g) installation of fixed communication-electronics technical equipment; (h) base operation and maintenance of Air Force installations having logistical support as a primary mission; and (i) repairs and modification of buildings and systems at logistical installations.

3. *Training support.*—Provision is made for formal training of the Regular Air Force, Air Force Reserve, Air National Guard, Air Force Reserve Officers' Training Corps, foreign students in the military assistance program; and students from other services and governmental agencies. Training of Regular Air Force consists of: (a) basic military training and technical training leading toward specialization; (b) advanced technical training in specialized fields and cross-training in new weapons systems, including missiles; (c) pilot, navigator, and combat crew flying training; (d) professional education to qualify personnel for positions of greater responsibility; and (e) scientific training required in the research, development, and operation of increasingly more complex equipment. Air Force reservists are trained at 129 Reserve flying training locations and Air Reserve centers. The training of Air Force Reserve Officers' Training Corps cadets, including flight instruction in light planes, is conducted at civilian institutions and summer encampments. The Air Force Academy, which has been temporarily located at Lowry Air Force Base, Colo., will move to the permanent site at Colorado Springs, Colo., during the first quarter of 1959. During 1959 the Academy will have, for the first time, 4 classes with an average load of 1,184 cadets. Recruitment costs are also included.

4. *Operational support.*—Provision is made for (a) the maintenance and operation of the installations and facilities required to support primary combat missions; (b) the operation of aircraft control and warning systems and tactical control systems; (c) operation of the aeronautical chart and information center; (d) the supporting operational requirements incident to air combat maneuvers, rotational movements of Strategic Air Command and Tactical Air Command operational units; (e) Airways and Air Communication Service and other supporting

services; and (f) installation of fixed communications-electronics components and repairs and modification of facilities at operational installations. The increase in this activity is based, in part, on additional dispersal of Strategic Air Command units.

5. *Medical support.*—This program covers (a) operation of medical treatment facilities in the United States and overseas; (b) medical care and hospitalization of Air Force personnel and dependents where Air Force medical facilities are not available; (c) medical care and hospitalization for civilian employees and dependents by the Canal Zone Government; and (d) training military personnel in medical specialties. These activities are shown in the following table:

	1957 actual	1958 estimate	1959 estimate
Fixed medical treatment facilities, worldwide:			
Hospitals.....	132	134	129
Class A dispensaries.....	68	63	62

The number of Air Force personnel provided for are shown below. The distribution between officers and enlisted in 1959 is subject to revision.

AVERAGE NUMBER

	1957 actual	1958 estimate	1959 estimate
Officers.....	141,436	136,211	131,738
Enlisted.....	769,700	753,899	728,925
Aviation cadets.....	2,712	1,836	2,115
Air Force Academy cadets.....	514	764	1,128
Total.....	914,362	892,710	863,906

YEAR-END NUMBER

	1957 actual	1958 estimate	1959 estimate
Officers.....	140,563	133,000	129,200
Enlisted.....	776,566	739,050	717,720
Aviation cadets.....	2,202	2,200	2,200
Air Force Academy cadets.....	504	750	880
Total.....	919,835	875,000	850,000

1. *Pay and allowances.*—This provides for the pay and allowances of military personnel, including aviation cadets and cadets at the U. S. Air Force Academy. Also included are personnel of the Reserve components while on active duty for purposes other than undergoing training such as duty under 10 U. S. C. 265 or 8033.

Provision is made for amounts otherwise available as quarters allowances to be paid (1) in an estimated amount of \$12.2 million in 1958 and \$25.7 million in 1959 to the revolving fund for "Acquisition, rehabilitation, and rental of Wherry Act housing," in cases where such housing is assigned as public quarters, and (2) as mortgage payments on Capehart housing.

The Capehart program authorized under title VIII of the National Housing Act, as amended (69 Stat. 646), provides for the acquisition of family housing built on military installations with financing obtained through mortgages which are insured by the Federal Housing Administration. These mortgages are amortized over a 25-year period from quarters allowances to which military personnel assigned to occupy these public quarters would otherwise be entitled and from rentals paid by civilian personnel whose duties require their occupancy of Government quarters. The following schedule indicates the payments from the quarters allowance portion of this appropriation to be applied to reduction of the principal obligations, to pay interest on the unpaid balance at 4% per annum, and to pay the insurance premiums on the mortgages.

	1957 actual	1958 estimate	1959 estimate
Mortgage indebtedness:			
Mortgage debt at start of year.....		\$12,450,459	\$94,571,459
Amount of mortgages executed during year.....	\$12,493,900	\$83,018,000	\$167,230,000
Payments applied to reduce principal.....	-43,441	-897,000	-3,733,000
Mortgage debt at end of year.....	\$12,450,459	\$94,571,459	\$258,068,459
Mortgage payments:			
Amortization of principal.....	\$43,441	\$897,000	\$3,733,000
Interest expense.....	\$83,300	\$1,721,000	\$7,169,000
Insurance premium expense.....	\$5,206	\$107,000	\$448,000
Total mortgage payments.....	\$131,947	\$2,725,000	\$11,350,000
Number of housing units:			
Beginning of year.....		944	6,300
Completed during year.....	944	5,356	10,789
End of year.....	944	6,300	17,089
Average occupied during year.....	157	2,852	11,760

In addition, provision is made for payment for proficiency advancements to selected enlisted personnel in critical skill areas and for the Government's contribution to the Federal old-age and survivors' insurance trust fund under the Servicemen's and Veterans' Survivor Benefits Act. It also provides for purchase of individual clothing for initial issue and for payment of clothing maintenance allowances. An additional amount anticipated under proposed pay legislation is shown under "Proposed for later transmission."

2. *Subsistence in kind.*—This provides for the purchase of food supplies for issue as rations to enlisted personnel, including emergency and operational rations. Also included is provision for payment of meals furnished under contract at commercial facilities where the payment of a subsistence allowance would create an individual hardship or the cost of establishing a Government mess facility would be prohibitive.

3. *Movements, permanent change of station.*—This provides for permanent change of station travel for individuals, and groups of military personnel and their dependents, including dislocation and separation travel allowances, storage of household effects in commercial facilities and transportation of personal property. Payment for travel services furnished by the Military Sea Transportation Service and (in 1959) by the Military Air Transport Service is included.

4. *Other costs.*—This provides for apprehension of deserters, absentees, and escaped military prisoners, payment of interest on deposits, payment of death gratuities to beneficiaries of military personnel, and payment of premiums on servicemen's mortgage insurance.

Appropriation (adjusted).....	59,300,000	53,000,000	50,500,000

This appropriation provides for pay and allowances, travel, subsistence, and clothing requirements incident to training and instruction of Air Force Reserve personnel and Reserve Officers' Training Corps students. The Reserve program is designed to provide trained units to supplement regular Air Force units and trained individuals to augment regular Air Force organizations and activities. An additional amount anticipated under proposed pay legislation is shown under "Proposed for later transmission." The Reserve Officers' Training Corps program is designed to provide qualified junior officers for the regular Air Force and the Reserve. During 1959 the Reserve will be organized in 15 combat training wings and miscellaneous supporting units continuing the structure planned for 1958. The personnel program is summarized in the following table:

AIR FORCE RESERVE PERSONNEL STRENGTHS

[In paid status]

	1956 actual	1957 actual	1958 planned	1959 proposed
End of year:				
Officers.....	35,529	36,740	32,650	35,920
Enlisted.....	24,264	31,495	36,664	39,632
Total.....	59,793	68,235	69,314	75,552
Average:				
Officers.....	38,247	34,371	31,709	34,492
Enlisted.....	21,761	27,410	34,677	38,217
Total.....	60,008	61,781	66,386	72,709

The program is based on 48 paid drills and 15 days of active duty training for personnel assigned to Reserve flying training wings, combat support training units, and mobilization assignees who occupy positions that require they be proficient in an aeronautical skill. An additional 36 paid drills are provided for personnel who are required to meet minimum flying proficiency standards. Other reservists required to meet mobilization needs of the Air Force also receive 15 days of paid active duty training. Assignees who will be ordered to specific spaces in major commands receive 24 paid drills. In addition to the normal on-the-job training, selected courses at Air Force

schools and special tours of active duty have been provided to further individual proficiency. Estimated strengths for training categories for 1959 are as follows:

Paid drills	Paid days of active duty for training		Beginning strength	Average strength	Ending strength
48	15	{ Officers.....	8,400	9,195	9,585
		{ Enlisted.....	17,110	18,167	19,225

Officers.....			32,650	34,492	35,920
Enlisted.....			36,664	38,217	39,632

The Air Force Reserve Officers' Training Corps program is being conducted at 179 college institutions with average enrollment as follows:

Course	1956 actual	1957 actual	1958 planned	1959 proposed
Air Science I (basic).....	47,000	49,753	49,750	50,250
Air Science II (basic).....	28,111	29,666	31,400	32,150
Air Science III (advanced).....	6,865	5,540	5,800	5,685
Air Science IV (advanced).....	7,690	5,749	5,000	5,325

Uniforms are provided either in kind to the students or by commutation in lieu of uniforms to the institutions. Commutation in lieu of subsistence is provided for advanced students. A summer encampment of 28 days duration is provided for students completing Air Science III. Pay, travel costs, subsistence, and clothing while attending camp are provided.

Provision is made for facilities, supplies, equipment, pay and allowances essential for the training, operation and maintenance of the Air National Guard as a Reserve component of the Air Force. An additional amount anticipated under proposed construction authorization and pay legislation is shown under "Proposed for later transmission." During 1959 the Guard will have 2,400 aircraft, over 902 of which will be jets, and will be organized in 24 wings, 83 squadrons, and 489 support units, continuing the structure planned for 1958. This will also continue the improvements in organization made possible by slight reductions in the number of units active in 1957. The personnel program is summarized in the following table:

AIR NATIONAL GUARD STRENGTH

	1956 actual	1957 actual	1958 planned	1959 proposed
End of year:				
Officers.....	7,300	8,033	8,400	8,900
Enlisted.....	56,234	59,917	60,600	62,100
Total.....	63,534	67,950	69,000	71,000

Officers.....	6,971	7,747	8,200	8,900
Enlisted.....	56,230	57,747	60,500	61,300
Total.....	63,201	65,494	68,700	69,900

Estimated strengths for training categories during 1959 are as follows:

Paid drills	Paid days of active duty for training	Beginning strength	Average strength	Ending strength
48	15	8,400	8,600	8,900
0	83-180	55,400	58,750	56,750
		5,200	2,550	5,350
		69,000	69,900	71,000

1. *Major procurement.*—Provision is made for the procurement of replacement weapons, ammunition, and various types of communications, electronic, training, vehicular, and other equipment required for aircraft and base operations or maintenance.

2. *Military construction.*—It is anticipated that a supplemental for 1959 will be submitted later to finance projects for which legislative authorization is to be recommended.

3. *Maintenance and operation.*—Provision is made for the operation of 134 Air National Guard installations, including unit equipment and the pay of State civilian employees. Funds are provided for the support of the flying hour program for both tactical and support pilots, transportation costs of supplies and equipment, hospitalization, disposition of deceased personnel, and communication services.

4. *Military personnel.*—Provision is made for the pay and allowances for 48 inactive duty training assemblies and 15 days' active duty training. An additional 36 paid drills are provided for personnel who are required to meet minimum flying proficiency standards. Training for Air National Guard personnel will be provided in service and technical schools, pilot and observer training schools, and by supplementary exercises. Funds for subsistence and uniforms are also included.

Appropriation (adjusted).....	1,197,665,000	900,000,000	

1. *Public works construction.*—This program provides for acquisition of land for, and construction of, military public works projects in the United States and overseas as authorized by Congress in current military public works authorization acts. These projects support the current and long-range programs to strengthen and modernize the Air Force.

2. *Minor construction.*—Provision is made for construction of permanent and temporary public works that are not otherwise authorized by law but which are determined to be urgently required and do not exceed \$200,000 per project.

3. *Planning.*—This provides for necessary planning of military construction projects, including design, standards, criteria, studies, appraisals, and other related activities.

4. *Supporting activities.*—Provision is made for activities such as the defense access road program and the architect-engineer services and land and utilities in support of the privately financed Capehart housing program.

5. *Reserve forces construction.*—This provides for the acquisition and construction of facilities for the training and administration of the Reserve components of the Air Force.

An additional amount anticipated for military construction is included under "Proposed for later transmission" in this chapter.

This fund finances industrial- and commercial-type activities on a reimbursable basis (5 U. S. C. 172d).

Budget program.—Activities currently financed through this fund consist of 8 printing and duplicating plants located within the continental United States and laundry and dry-cleaning plants at approximately 50 Air Force installations in the continental United States and overseas.

The airlift services portion of the Military Air Transport Service, encompassing the performance or procurement of air transportation and incidental services required for the movement of persons, cargo, mail, or other goods, will be financed through this fund in 1959, and the estimates in operating appropriations of the military departments include funds for their respective airlift requirements. The statements and schedules reflect \$75 million transferred in 1958 to provide working capital for this program, pursuant to the Supplemental Appropriation Act, 1958 (71 Stat. 430), but do not reflect estimates for operations, since operating plans have not been completely developed. For the same reason, civilian personal services for these airlift operations to be financed initially from this fund are reflected for 1959 in the schedules for appropriations from which they are currently financed.

The Department of Defense is continuing its evaluation of the extension of this fund to aircraft overhaul and repair facilities. Since this evaluation has not been completed, the estimates do not reflect working capital for this purpose.

Printing and duplicating plants.—Plant capacity and performance capability for printing are expected to remain at about the same levels from 1957 through 1959. During 1957 approximately 1.5 billion units of printing were produced by these 8 plants. Costs increase by about \$2 million in 1958 because duplicating facilities adjunct to the printing plants were financed through this fund beginning in 1958. Addition of duplicating functions causes an increase in total production of the printing and

duplicating service of about 200 million units from 1957 to 1959.

Laundry and dry-cleaning plants.—The number of plants financed through this fund will decrease by a net of 2 in 1958 (4 plants will be added and 6 dropped), and 4 plants will be added in 1959. This accounts for the decrease in costs in 1958 and the increase in 1959. Otherwise, plant capacity and performance capability are expected to remain at about the same level from 1957 through 1959. These plants processed about 114 million pieces in 1957 and about the same workload is anticipated in 1958 and 1959.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year:				
Materials and supplies.....	\$756,759	\$736,552	\$839,552	\$802,552
Advances.....	1,119	4,294	—	—
Unpaid undelivered orders.....	203,337	120,458	216,458	219,458
Total selected resources at end of year.....	961,215	861,304	1,056,010	1,022,010
Selected resources at start of year (—).....	—	—961,215	—861,304	—1,056,010
Increase or decrease (—) in selected resources.....	—	—99,911	194,706	—34,000
Materials and supplies capitalized (—).....	—	—1,838	—180,000	—
Liabilities assumed: Accrued leave.....	—	—	74,000	—
Adjustment of prior year payables.....	—	559	—	—
Costs financed from obligations of other years, net (—).....	—	—101,190	—	—34,000
Obligations incurred for costs of other years, net.....	—	—	88,706	—

Operating results and financial condition.—Net income was \$186,314 in 1957 because income at fixed prices exceeded costs incurred by about 1.5%. In 1958, \$180,000 in supplies was capitalized and \$74,000 in accrued leave liability assumed incident to extension of this fund to duplicating services. During 1958, expenditures exceed collections primarily because of payment to the Treasury of an amount equivalent to deutschemark support previously provided laundry and dry-cleaning plants in Germany. Collections are expected to exceed expenditures in 1959, largely as a result of reductions in inventories.

The estimated Government investment of \$82 million at June 30, 1959, includes a transfer of \$75 million effected in 1958. Of the total investment, an estimated \$1.8 million is necessary to provide working capital for activities currently financed through this fund. The balance will be used primarily to provide working capital for the airlift functions of the Military Air Transport Service, to be financed through this fund beginning in 1959.

This fund was created to facilitate the financing of activities supported by two or more appropriations (5 U. S. C. 172e). The corpus of the fund consists of \$1 million. Amounts required for activities financed are provided through advances or reimbursements. The initial construction, equipment, and prestocking of operating supplies and materials of the main segment of the distant early warning line, largely in northern Canada, was begun in 1954 and completed in 1958 and has been financed through this fund. This fund also finances the centralized functions of the Federal catalog program which is under the management control of the Office of the Secretary of Defense. During 1957 this project was financed jointly by the Departments of the Army, Navy, and Air Force. During 1958 and 1959 cataloging services will also be performed for the General Services Administration on a reimbursable basis.

This fund finances the procurement and maintenance of approximately 94,000 common-use items for resale and mobilization reserve. These statements reflect the extension of the fund in 1958 to include selected organizational clothing items and locally purchased medical material. At Eglin Air Force Base as a test for the future inclusion of such stocks at all bases, base stocks of selected general supply items are also included. No other change in scope is planned for 1958 and 1959.

During 1957 depot stocks of clothing and medical-dental items were transferred to single-manager control

in Army and Navy, respectively. Additional transfers will be completed in 1958.

Changes in inventory capitalized under each category are as follows:

	1957 actual	1958 estimate	1959 estimate
Clothing.....	—\$135,625,558	—\$24,510,000	\$900,000
Medical-dental supplies.....	—48,092,334	—1,288,750	
Aviation fuels.....	—440,499		
Subsistence, commissaries.....	347,743	374,828	150,000
General supplies.....	7,895,681	7,510,000	50,000
Total inventories capitalized during year (net of decapitalizations).....	—175,814,967	—17,913,922	1,100,000
Increase or decrease (—) in undelivered purchases to be paid from other accounts.....	6,337,168	—6,337,168	
Net change in capitalized inventories.....	—169,477,799	—24,251,090	1,100,000

Budget program.—The program shows a net increase in obligations of \$136.9 million from 1957 to 1959. About 63% of the increase is in the aviation fuel category and reflects increasing sales and buildup of reserves inventory. The balance results from the procurement of organizational clothing brought under the fund in 1958, and the necessity to replace through procurement essentially all base sales of individual clothing and medical items, whereas, in 1957 such sales were partially satisfied through reductions of depot stocks then under Air Force control.

Inventory totals continue to decrease. A net decrease of \$62 million from 1957 to 1959 reflects reduction of operating stocks of \$129.3 million, including decapitalizations of \$17 million, offset by increases in reserves of \$68.3 million in fuel. The budget program is based on year-end inventories as follows:

	1957 actual	1958 estimate	1959 estimate
Clothing:			
Operating stocks.....	\$52,279,093	\$28,299,993	\$25,699,993
Mobilization reserve stocks.....	125,000	125,000	125,000
Medical-dental supplies:			
Operating stocks.....	10,599,000	7,837,000	7,537,000

Mobilization reserve stocks.....	1,682,729	1,846,000	1,846,000
Excess or surplus stocks awaiting disposal.....	6,710,622	5,563,000	7,500,000
Summary:			
Operating stocks.....	413,831,830	306,984,768	294,565,788
Mobilization reserve stocks.....	214,617,690	252,127,961	282,964,961
Excess or surplus stocks awaiting disposal.....	8,858,383	6,209,201	7,846,201
Total inventories.....	637,307,903	565,321,930	575,366,950

Financing operations.—Funds for financing the budget program are derived from sales to authorized customers. Sales in 1959 increase over 1957 due mainly to increased demand for aviation fuel and oil to meet operating programs; to the inclusion of certain organizational clothing items and to increased sales in commissary sales stores. The number of such stores increases from 213 in 1957 to 230 in 1958 and 1959. Cash collections are expected to exceed cash expenditures by \$40 million in 1958 largely through reductions in inventories. In 1959 a net expenditure of \$19 million is forecast as collections will be less than payments largely because of increased procurement of reserve stocks.

Operating results.—The estimates reflect a net operating loss in 1959 of \$3.4 million, resulting mainly from the disposal or donation of material which was excess at the time capitalized. In 1958 a slight operating gain is forecast

resulting mainly from an increase in standard prices of fuel which offset the losses on disposal in other categories. The net operating loss in 1957 of \$28.5 million resulted from losses on disposal and donations totaling \$19.9 million and unusual operating losses in the aviation fuel category of \$17.3 million less minor gains in other categories.

Financial condition.—Investment of the Government at June 30, 1959, will be \$826.9 million, made up of \$221.3 million in appropriations and reappropriations, \$745.2 million of capitalized assets and \$139.6 million of deficit. This is a decrease of \$25.3 million from the total investment at the end of 1957.

DEPARTMENT OF THE AIR FORCE—Continued

Proposed for later transmission—Continued

AIRCRAFT AND MISSILE SUPPORT—Continued

Under existing legislation, 1958.—An additional amount is anticipated in 1958 for ground communication-electronic equipment for the ballistic missile detection program, and for launching and servicing equipment for the IRBM and ICBM programs, to enable the early exploitation of technological advances realized since submission of the 1958 budget.

RESEARCH AND DEVELOPMENT

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
Guided missiles and related equipment (total obligations).....		\$30,000,000	
Financing:			
Proposed supplemental appropriation.....		30,000,000	

Under existing legislation, 1958.—This supplemental appropriation for 1958 is for acceleration of intermediate range ballistic missile development.

MILITARY PERSONNEL

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
Pay and allowances (total obligations).....			\$182,000,000
Financing:			
Proposed supplemental appropriation.....			182,000,000

Under proposed legislation, 1959.—Legislation will be proposed to modernize the compensation system for the uniformed services in accordance with the recommendations of the Defense Advisory Committee on Professional and Technical Compensation, to assist in attracting and retaining highly trained personnel.

RESERVE PERSONNEL

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
Reserve personnel (total obligations).....			\$3,000,000
Financing:			
Proposed supplemental appropriation.....			3,000,000

Under proposed legislation, 1959.—Legislation will be proposed to modernize the compensation system for the uniformed services in accordance with the recommendations of the Defense Advisory Committee on Professional and Technical Compensation, to assist in attracting and retaining highly trained personnel.

AIR NATIONAL GUARD

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
1. Military construction.....			\$9,600,000
2. Military personnel.....			3,000,000
Total obligations.....			12,600,000
Financing:			
Proposed supplemental appropriation.....			12,600,000

Under proposed legislation, 1959.—Legislation will be proposed to provide authorization for construction of aircraft parking aprons, rocket ammunition storage facilities, and training facilities to accommodate jet aircraft; and to modernize the compensation system for the uniformed services in accordance with the recommendations of the Defense Advisory Committee on Professional and Technical Compensation, to assist in attracting and retaining highly trained personnel.

MILITARY CONSTRUCTION, AIR FORCE

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
1. Public works construction.....		\$340,000,000	\$808,288,000
2. Minor construction.....			19,700,000
3. Planning.....			24,000,000
4. Supporting activities.....			13,000,000
5. Reserve forces construction.....			3,000,000

CIVILIAN PERSONNEL PAY ADJUSTMENTS

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
Civilian personnel pay adjustments (total obligations).....			\$205,000,000
Financing:			
Proposed supplemental appropriation.....			205,000,000

Under proposed legislation, 1959.—Additional funds are anticipated for the Department of Defense share of the cost of proposed legislation to increase pay rates for Federal civilian employees.

GENERAL PROVISIONS

SEC. 601. During the current fiscal year, the Secretary of Defense and the Secretaries of the Air Force, Army, and Navy, respectively, if they should deem it advantageous to the national defense, and if in their opinions, the existing facilities of the Department of Defense are inadequate, are authorized to procure services in accordance with section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), but at rates for individuals not in excess of **[\$50] \$75** per day under regulations prescribed by the Secretary of Defense, and to pay in connection therewith travel expenses of individuals, including actual transportation and per diem in lieu of subsistence while traveling from their homes or places of business to official duty station and return as may be authorized by law: *Provided*, That such contracts may be renewed annually.

SEC. 602. During the current fiscal year, provisions of law pro-

hibiting the payment of compensation to, or employment of, any person not a citizen of the United States shall not apply to personnel of the Department of Defense.

SEC. 603. Appropriations contained in this Act shall be available for insurance of official motor vehicles in foreign countries, when required by laws of such countries; payments in advance of expenses determined by the investigating officer to be necessary and in accord with local custom for conducting investigations in foreign countries incident to matters relating to the activities of the department concerned; reimbursement of General Services Administration for security guard services for protection of confidential files; reimbursement of the Federal Bureau of Investigation for expenses in connection with investigation of defense contractor personnel; and all necessary expenses, at the seat of government of the United States of America or elsewhere, in connection with (1) instruction and training, including tuition, specifically approved by the Secretary of the department concerned and not otherwise provided for, of civilian employees, and (2) communication and other services and supplies as may be necessary to carry out the purposes of this Act: *Provided*, That no appropriation contained in this Act, and no funds available from prior appropriations to component departments and agencies of the Department of Defense, shall be used to pay tuition or to make other payments to educational institutions in connection with the instruction or training of file clerks, stenographers, and typists receiving, or prospective file clerks, stenographers, and typists who will receive compensation at a rate below the minimum rate of pay for positions allocated to grade GS-5 under the Classification Act of 1949, as amended.

SEC. 604. Any appropriation available to the Air Force, Army, or the Navy may, under such regulations as the Secretary concerned may prescribe, be used for expenses incident to the maintenance, pay, and allowances of prisoners of war, other persons in Air Force, Army, or Navy custody whose status is determined by the Secretary concerned to be similar to prisoners of war, and persons detained in such custody pursuant to Presidential proclamation.

SEC. 605. Appropriations available to the Department of Defense for the current fiscal year for maintenance or construction shall be available for acquisition of land as authorized by section 406 of the Act of August 3, 1956 (70 Stat. 1015).

SEC. 606. During the current fiscal year, appropriations otherwise available for construction of family quarters for personnel shall not be obligated for such construction at a cost per family unit in excess of \$20,000 on housing units for generals or equivalent; \$18,000 on housing units for colonels or equivalent; \$16,000 on housing units for majors and lieutenant colonels, or equivalent; \$14,000 on housing units for second lieutenants, lieutenants, captains, and warrant officers, or equivalent; or \$12,000 on housing units for enlisted personnel, except that when such units are constructed outside the continental United States or in Alaska, the average cost per unit of all such units shall not exceed \$25,850 and in no event shall the individual cost exceed \$35,000, except units for the Alaska Communication System the individual cost of which shall not exceed \$40,000.

SEC. 607. Appropriations for the Department of Defense for the current fiscal year shall be available, (a) except as authorized by the Act of September 30, 1950 (20 U. S. C. 236-244), for primary and secondary schooling for minor dependents of military and civilian personnel of the Department of Defense residing on military or naval installations or stationed in foreign countries, as authorized for the Navy by section 7204 of title 10, United States Code, in amounts not exceeding an average of \$245 per student, when the Secretary of the Department concerned finds that schools, if any, available in the locality, are unable to provide adequately for the education of such dependents; (b) for expenses in connection with administration of occupied areas; (c) for payment of rewards as authorized for the Navy by section 7209 (a) of title 10, United States Code, for information leading to the discovery of missing naval property or the recovery thereof; (d) for payment of deficiency judgments and interest thereon arising out of condemnation proceedings; (e) for payment of rentals at the seat of government or elsewhere, and, in administering the provisions of 43 U. S. C. 315g, rentals may be paid in advance.

SEC. 608. No part of any appropriation contained in this Act shall be used directly or indirectly except for temporary employment in case of emergency, for the payment of any civilian for services rendered by him on the Canal Zone while occupying a skilled, technical, clerical, administrative, executive, or supervisory position unless such person is a citizen of the United States of America or the Republic of Panama: *Provided, however*, (1) That, notwithstanding the provision in the Act approved August 11, 1939 (53 Stat. 1409), limiting employment in the above-mentioned positions to citizens of the United States from and after the date of approval of said Act, citizens of Panama may be employed in such positions; (2) that at no time shall the number of Panamanian citizens employed in the above-mentioned positions exceed the number of citizens of the United States so employed, if United States citizens are available in continental United States or on the Canal Zone; (3) that nothing in this Act shall prohibit the continued employment of any person

who shall have rendered fifteen or more years of faithful and honorable service on the Canal Zone; (4) that in the selection of personnel for skilled, technical, administrative, clerical, supervisory, or executive positions the controlling factors in filling these positions shall be efficiency, experience, training, and education; (5) that all citizens of Panama and the United States rendering skilled, technical, clerical, administrative, executive, or supervisory service on the Canal Zone under the terms of this Act (a) shall normally be employed not more than forty hours per week, (b) may receive as compensation equal rates of pay based upon rates paid for similar employment in continental United States plus 25 per centum; (6) this entire section shall apply only to persons employed in skilled, technical, clerical, administrative, executive, or supervisory positions on the Canal Zone directly or indirectly by any branch of the United States Government or by any corporation or company whose stock is owned wholly or in part by the United States Government: *Provided further*, That the President may suspend from time to time in whole or in part compliance with this section if he should deem such course to be in the public interest.

SEC. 609. Insofar as practicable, the Secretary of Defense shall assist American small business to participate equitably in the furnishing of commodities and services financed with funds appropriated under this Act by making available or causing to be made available to suppliers in the United States, and particularly to small independent enterprises, information, as far in advance as possible, with respect to purchases proposed to be financed with funds appropriated under this Act, and by making available or causing to be made available to purchasing and contracting agencies of the Department of Defense information as to commodities and services produced and furnished by small independent enterprises in the United States, and by otherwise helping to give small business an opportunity to participate in the furnishing of commodities and services financed with funds appropriated by this Act.

SEC. 610. No appropriation contained in this Act shall be available for expenses of operation of messes (other than organized messes the operating expenses of which are financed principally from nonappropriated funds) at which meals are sold to officers or civilians except under regulations approved by the Secretary of Defense, which shall (except under unusual or extraordinary circumstances) establish rates for such meals sufficient to provide reimbursement of operating expenses and food costs to the appropriations concerned: *Provided*, That officers and civilians in a travel status receiving a per diem allowance in lieu of subsistence shall be charged at the rate of not less than \$2.25 per day: *Provided further*, That for the purposes of this section payments for meals at the rates established hereunder may be made in cash or by deductions from the pay of civilian employees.

SEC. 611. No part of any appropriation contained in this Act shall be available until expended unless expressly so provided elsewhere in this or some other appropriation Act.

SEC. 612. Not more than \$41,000,000 \$49,000,000 of the amounts received during the current fiscal year by the Department of Defense as proceeds from the sale of scrap, salvage or surplus materials, shall be available during the current fiscal year for expenses of transportation, demilitarization, and other preparation for sale or salvage of military supplies, equipment, and materiel: *Provided*, That a report of receipts and disbursements under this limitation shall be made quarterly to the Committees on Appropriations of the Congress: *Provided further*, That no funds available to agencies of the Department of Defense shall be used for the operation, acquisition or construction of new facilities or equipment for new facilities in the continental limits of the United States for metal scrap baling or shearing or for melting or sweating aluminum scrap unless the Secretary of Defense or an Assistant Secretary of Defense designated by him determines, with respect to each facility involved, that the operation of such facility is in the national interest.

SEC. 613. During the current fiscal year, the President may exempt appropriations, funds, and contract authorizations, available for military functions under the Department of Defense, from the provisions of subsection (c) of section 3679 of the Revised Statutes, as amended, whenever he deems such action to be necessary in the interest of national defense.

SEC. 614. No appropriation contained in this Act shall be available in connection with the operation of commissary stores of the agencies of the Department of Defense for the cost of purchase (including commercial transportation in the United States to the place of sale but excluding all transportation outside the United States) and maintenance of operating equipment and supplies, and for the actual or estimated cost of utilities as may be furnished by the Government and of shrinkage, spoilage, and pilferage of merchandise under the control of such commissary stores, except as authorized under regulations promulgated by the Secretaries of the military departments concerned, with the approval of the Secretary of Defense, which regulations shall provide for reimbursement therefor to the appropriations concerned and, notwithstanding any other provision of law, shall provide for the adjustment of the sales prices in such commissary stores to the extent necessary to furnish

GENERAL PROVISIONS—Continued

sufficient gross revenue from sales of commissary stores to make such reimbursement: *Provided*, That under such regulations as may be issued pursuant to this section all utilities may be furnished without cost to the commissary stores outside the continental United States and in Alaska: *Provided further*, That no appropriation contained in this Act shall be available in connection with the operation of commissary stores within the continental United States unless the Secretary of Defense has certified that items normally procured from commissary stores are not otherwise available at a reasonable distance and a reasonable price in satisfactory quality and quantity to the military and civilian employees of the Department of Defense.

SEC. [615] 614. No funds appropriated in titles I, III, IV, and V of this Act shall be used for the payment in excess of 470,000 full-time graded civilian employees (including (a) the full-time equivalent of part-time employment, (b) persons who are described as "consultants" or who are compensated on a "when actually employed" basis if such persons are employed on a contract basis or are paid on a per diem basis, and (c) persons employed without compensation if they are reimbursed for expenses) at any one time during the current fiscal year: *Provided*, That whenever, in the opinion of the Secretary of the Military Department concerned, the direct substitution of civilian personnel for an equivalent or greater number of military personnel will result in economy without adverse effect upon national defense, such substitution may be accomplished without regard to the foregoing limitation, and such funds as may be required to accomplish the substitution may be transferred from the appropriate military personnel appropriation to, and merged with, the appropriation charged with compensation of such civilian personnel.

SEC. [616] 615. Notwithstanding any other provision of law, executive order, or regulation, no part of the appropriations in this Act shall be available for any expenses of operating aircraft under the jurisdiction of the Armed Forces for the purpose of proficiency flying except in accordance with the regulations issued by the Secretaries of the Departments concerned and approved by the Secretary of Defense which shall establish proficiency standards and maximum and minimum flying hours for this purpose: *Provided*, That without regard to any provision of law or executive order prescribing minimum flight requirements, such regulations may provide for the payment of flight pay at the rates prescribed in section 204 (b) of the Career Compensation Act of 1949 (63 Stat. 802) to certain members of the Armed Forces otherwise entitled to receive flight pay during the fiscal year [1958] 1959 (1) who have held aeronautical ratings or designations for not less than twenty years, or (2) whose particular assignment outside the United States makes it impractical to participate in regular aerial flights.

SEC. [617] 616. No part of any appropriation contained in this Act shall be available for expense of transportation, packing, crating, temporary storage, drayage, and unpacking of household goods and personal effects in excess of eleven thousand pounds net in any one shipment: *Provided*, That the limitations imposed herein shall not be applicable in the case of members transferred to or serving in stations outside the continental United States or in Alaska under orders relieving them from a duty station within the United States prior to July 10, 1952, and who are returned to the United States under orders relieving them from a duty station beyond the United States or in Alaska on or after July 1, 1953.

SEC. [618] 617. Vessels under the jurisdiction of the Department of Commerce, the Department of the Army, the Department of the Air Force, or the Department of the Navy may be transferred or otherwise made available without reimbursement to any such agencies upon the request of the head of one agency and the approval of the agency having jurisdiction of the vessels concerned.

SEC. [619] 618. None of the funds provided in this Act shall be available for training in any legal profession nor for the payment of tuition for training in such profession: *Provided*, That this limitation shall not apply to the off-duty training of military personnel as prescribed by section [624] 623 of this Act.

SEC. [620] 619. Funds provided in this Act for public information and public relations shall not exceed [\$3,000,000] \$3,170,000.

SEC. [621] 620. Not more than 20 per centum of the appropriations in this Act which are limited for obligation during fiscal year [1958] 1959 shall be obligated during the last two months of the fiscal year: *Provided*, That this section shall not apply to obligations for support of active duty training of civilian components or summer camp training of the Reserve Officers' Training Corps.

SEC. [622] 621. During the fiscal year [1958] 1959, the agencies of the Department of Defense may accept the use of real property from foreign countries for the United States in accordance with mutual defense agreements or occupational arrangements and may accept services furnished by foreign countries as reciprocal international courtesies or as services customarily made available without charge; and such agencies may use the same for the support of the United States forces in such areas without specific appropriation therefor.

[In addition to the foregoing,] *Except as provided in this section, after June 30, 1958*, agencies of the Department of Defense may not accept real property, services, and commodities from foreign countries for the use of the United States in accordance with mutual defense agreements or occupational arrangements and [such agencies may] use the same for the support of the United States forces in such areas without specific appropriation therefor: *Provided*, That within thirty days after the end of each quarter the Secretary of Defense shall render to the Committees on Appropriations of the Senate and the House of Representatives and to the Bureau of the Budget a full report of such property, supplies, and commodities received during such quarter.

SEC. [623] 622. During the current fiscal year, appropriations available to the Department of Defense for research and development may be used for the purposes of section 2353 of title 10, United States Code, and for purposes related to research and development for which expenditures are specifically authorized in other appropriations of the service concerned.

SEC. [624] 623. No appropriation contained in this Act shall be available for the payment of more than 75 per centum of charges of educational institutions for tuition or expenses for off-duty training of military personnel, nor for the payment of any part of tuition or expenses for such training for commissioned personnel who do not agree to remain on active duty for two years after completion of such training.

SEC. [625] 624. No part of the funds appropriated herein shall be expended for the support of any formally enrolled student in basic courses of the senior division, Reserve Officers' Training Corps, who has not executed a certificate of loyalty or loyalty oath in such form as shall be prescribed by the Secretary of Defense.

SEC. 626. No part of any appropriation contained in this Act shall be available for the procurement of any article of food, clothing, cotton, spun silk yarn for cartridge cloth, or wool (whether in the form of fiber or yarn or contained in fabrics, materials, or manufactured articles) not grown, reprocessed, reused, or produced in the United States or its possessions, except to the extent that the Secretary of the Department concerned shall determine that a satisfactory quality and sufficient quantity of any articles of food or clothing or any form of cotton, spun silk yarn for cartridge cloth, or wool grown, reprocessed, reused, or produced in the United States or its possessions cannot be procured as and when needed at United States market prices and except procurements outside the United States in support of combat operations, procurements by vessels in foreign waters and emergency procurements or procurements of perishable foods by establishments located outside the continental United States, except the Territories of Hawaii and Alaska, for the personnel attached thereto: *Provided*, That nothing herein shall preclude the procurement of foods manufactured or processed in the United States or its possessions: *Provided further*, That no funds herein appropriated shall be used for the payment of a price differential on contracts hereafter made for the purpose of relieving economic dislocations.]

SEC. [627] 625. None of the funds appropriated in this Act shall be used for the construction, replacement, or reactivation of any bakery, laundry, or dry-cleaning facility in the United States, its Territories or possessions, as to which the Secretary of Defense does not certify in writing, giving his reasons therefor, that the services to be furnished by such facilities are not obtainable from commercial sources at reasonable rates.

SEC. [628] 626. During the current fiscal year, appropriations of the Department of Defense shall be available for reimbursement to the Post Office Department for payment of costs of commercial air transportation of military mail between the United States and foreign countries.

SEC. [629] 627. Appropriations of the Department of Defense available for the payment of rental allowances shall be available for the leasing of quarters in foreign countries constructed under the authority of section 302 of Public Law 534, approved July 14, 1952, for assignment as public quarters to military personnel of the Department of Defense.

SEC. [630] 628. Appropriations contained in this Act shall be available for providing furnishings, without charge, in other than public quarters occupied by military or civilian personnel of the Department of Defense on duty outside the continental United States or in Alaska, upon a determination, under regulations approved by the Secretary of Defense, that such action is advantageous to the Government.

SEC. [631] 629. During the current fiscal year appropriations available to the Department of Defense for pay of civilian employees shall be available for uniforms, or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U. S. C. 2131).

SEC. [632] 630. During the current fiscal year, the Secretary of Defense shall, upon requisition of the National Board for the Promotion of Rifle Practice, and without reimbursement, transfer from agencies of the Department of Defense to the Board ammunition in such amounts as he may determine.

Such appropriations of the Department of Defense available for obligation during the current fiscal year as may be designated by the

Secretary of Defense shall be available for the travel expenses of military and naval personnel, including the reserve components, and members of the Reserve Officers' Training Corps attending regional, national or international rifle matches.

Sec. 631. At such times during the current fiscal year as the President shall determine that such action is necessary in the interests of national security, he is authorized to transfer, between any appropriations, funds, or authorizations available for military functions of the Department of Defense, not to exceed a total of \$2,000,000,000, in such amounts as he may deem to be necessary for the purposes of any appropriation, fund, or authorization to which any such transfer is made: Provided, That within ten days after the end of each calendar quarter the Secretary of Defense shall inform the Committees on Appropriations of the Senate and the House of Representatives of all such transfers which have been made during the preceding quarter. (Department of Defense Appropriation Act, 1958.)

【GENERAL PROVISIONS】

【Sec. 301. Funds appropriated to the military departments for construction in prior years are hereby made available for construction authorized for each such department by the authorizations enacted into law during the first session of the Eighty-fifth Congress.】

【Sec. 302. None of the funds appropriated in this chapter shall be expended for payments under a cost-plus-a-fixed-fee contract for work where cost estimates exceed \$25,000 to be performed within the continental United States without the specific approval in writing of the Secretary of Defense setting forth the reasons therefor.】

【Sec. 303. None of the funds appropriated in this chapter shall be expended for additional costs involved in expediting construction unless the Secretary of Defense certifies such costs to be necessary to protect the national interest and establishes a reasonable completion date for each project, taking into consideration the urgency of the requirement, the type and location of the project, the climatic and seasonal conditions affecting the construction and the application of economical construction practices.】

【Sec. 304. None of the funds appropriated in this chapter shall be used for the construction, replacement, or reactivation of any bakery, laundry, or dry-cleaning facility in the United States, its Territories or possessions, as to which the Secretary of Defense does not certify, in writing, giving his reasons therefor, that the services to be furnished by such facilities are not obtainable from commercial sources at reasonable rates.】

【Sec. 305. Funds appropriated to the military departments for construction are hereby made available for advance planning, construction design and architectural services, as authorized by section

504 of the Act of September 28, 1951, as amended (69 Stat. 352), and for hire of passenger motor vehicles.】

【Sec. 306. Appropriations to the military departments for construction may be charged for the cost of administration, supervision and inspection of family housing authorized pursuant to title IV of the Act of August 11, 1955 (Public Law 345), in an amount not to exceed three and one-half per centum of the cost of each such project: *Provided*, That such appropriations shall be reimbursed from the proceeds of any mortgage executed on each such project.】

【Sec. 307. Any limitations contained in the Department of Defense Appropriation Act, 1958, on the unit cost of construction of family quarters shall not be applicable to forty-seven units of family quarters at the United States Air Force Academy, the individual cost of which shall not exceed the following limitations: \$75,000 on one unit for the superintendent; \$50,000 on two units for the deans; and \$30,000 on forty-four units for department heads.】

【Sec. 308. Funds appropriated to the military departments for construction may be used for advances to the Bureau of Public Roads, Department of Commerce, for the purposes of section 6 of the Defense Highway Act of 1941 (55 Stat. 765), as amended, and section 12 of the Federal-Aid Highway Act of 1950 (64 Stat. 785), as amended, when projects authorized therein are certified as important to the national defense by the Secretary of Defense.】

【Sec. 309. The family unit costs for family housing including land authorized to be purchased by section 103 of H. R. 8240, Eighty-fifth Congress, may exceed by not more than 15 per centum the respective limitations on such costs contained in the Department of Defense Appropriation Act for 1958.】

【Sec. 310. Any limitations contained in the Department of Defense Appropriation Act, 1958, on the unit cost of the construction of family quarters shall not be applicable to such units constructed in Canada, Alaska, and the Aleutian Islands. The average per unit cost of all family quarters constructed in Canada, Alaska, and the Aleutian Islands shall not exceed \$32,000, and in no event shall the individual cost exceed \$40,000.】

【Sec. 311. None of the funds appropriated in this chapter may be used to begin construction on new bases for which specific appropriations have not been made.】

【Sec. 312. The Secretary of Defense is hereby authorized to transfer to the "Air Force industrial fund" not to exceed \$75,000,000 from appropriations to the Department of the Air Force available for obligation during the fiscal year 1958.】

【Sec. 313. Section 612 of the Department of Defense Appropriation Act of 1958, Public Law 117, approved August 2, 1957, is amended by deleting the figures "\$41,000,000" in the first line and inserting in lieu thereof "\$45,000,000".】

【Sec. 314. The General Counsel of the Department of Defense shall be paid at the rate prescribed by Reorganization Plan Numbered 6 approved June 30, 1953 (67 Stat. 638).】 (*Supplemental Appropriation Act, 1958.*)

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1959

DEPARTMENT OF DEFENSE—MILITARY FUNCTIONS

¹ Items shown without an exchange allowance represent overage and wornout vehicles which are not exchanged but will be disposed of as surplus.

² Includes \$153,000 for payment for rental from pools, \$147,000 for other charges.

³ Includes \$1,300,000 for lease of 300 buses in Japan, \$221,000 for charter bus service in Europe, \$579,000 for charter service in continental United States which includes \$121,000 for Washington, D. C., shuttle operations.

⁴ Includes \$15,000 for payment for rental from pools, \$13,000 for other charges.

⁵ In addition there are 125 sedans to be disposed of as follows: (a) 74 sedans are to be disposed of without replacement; (b) 51 sedans are to be transferred to the General Services Administration motor pool.

⁶ This quantity represents carryalls which are to be replaced by 1,306 station wagons.

In addition, there are 73 station wagons to be transferred to the General Services Administration motor pool.

⁷ Excludes 1,291 carryalls.

⁸ In addition, there are 64 buses to be disposed of without replacement.

⁹ In addition, there are 4 sedans to be disposed of without replacement.

¹⁰ In addition, there are 7 ambulances to be disposed of without replacement.

¹¹ Totals shown are net figures after elimination of the following vehicles to be disposed of without replacement: Sedans, 2,640; station wagons, 61; and ambulances, 38.

¹² The above figures are not comparable with similar entries for previous years, as they include a number of Government-owned, contractor-operated, indigenous, and other vehicles not included in previous reports.

DEPARTMENT OF DEFENSE—CIVIL FUNCTIONS

New obligational authority recommended for the Civil Functions of the Department of Defense for 1959 is \$12 million more than the estimated 1958 total of \$674 million. Approximately 92% of this amount is for programs of the Corps of Engineers, but the increase over 1958 is mainly for construction by the Panama Canal Company. Estimated expenditures of \$701 million will be \$38 million over those for 1958 as construction progresses on projects financed in part from appropriations made in prior years.

Economic and technical development.—New obligational authority requested for administration of the Ryukyu Islands is \$5 million more than in 1958. Most of the increase is for construction of utility systems to be operated by the United States Civil Administration.

Other veterans' services and administration.—The budget for the national cemetery system administered by the Department of the Army Quartermaster Corps anticipates a continued rise in numbers of interments, in grave spaces maintained, and in headstones procured, with a decrease in development and construction projects.

Conservation and development of land and water resources.—The budget request for the Corps of Engineers, Civil Functions, contemplates that construction underway will be at an orderly rate of progress on all projects. Funds are recommended to continue work on 59 navigation projects, 101 flood-control projects, and 20 multiple-purpose projects for hydroelectric power as well as flood control or navigation. It is anticipated that 20 of these projects will be completed in 1959.

No funds are recommended for starting new projects in 1959. Preliminary investigations and advance engineering and design work will be reduced. Completed projects are to be operated and maintained with strict economy but adequately to preserve their usefulness.

New obligational authority of \$628 million requested for 1959 is \$18 million less than for 1958. However, the estimated expenditures of \$665 million in 1959 will be \$35 million more than in 1958, mostly because construction on a greater number of large projects started in recent years will be at a more advanced stage. Some of the 1959 expenditures will be financed from unexpended balances from prior years. A supplemental appropriation of \$7 million is anticipated in 1958 for flood fighting and emergency repair of flood-protection works.

Promotion of water transportation.—Total operating costs of the Panama Canal Company in 1959 are estimated to be higher than in 1958. The budget also anticipates an increase in the number of vessels passing through the canal and in toll revenues. Work will continue on the seventh year of a 9-year project for converting the electric power system of the Panama Canal from 25 cycles to 60 cycles. Construction is to begin in 1959 on a \$20 million bridge over the Panama Canal at Balboa, pursuant to treaty legislation enacted in August 1957. The Company also plans to start in 1959 a series of improvements to the canal that will facilitate passage of the rapidly increasing volume of shipping. These improvements will take 4 years and cost an estimated \$19 million.

Territories and possessions.—Operating expenses of the Canal Zone Government are estimated to increase in 1959, due largely to a provision for additional teachers and to the increased cost of operating hospital facilities. These expenses are repaid by the Panama Canal Company and by the individuals served. Capital outlays are planned for construction of a high school and an outpatient clinic to replace facilities which will be transferred to the Republic of Panama in accordance with treaty legislation, and for renovating three hospitals.

DEPARTMENT OF THE ARMY

CEMETERIAL EXPENSES

Current authorizations:

SALARIES AND EXPENSES

For necessary cemeterial expenses as authorized by law, including maintenance, operation, and improvement of national cemeteries, and purchase of headstones and markers for unmarked graves; purchase of two passenger motor vehicles [for replacement only]; maintenance of that portion of Congressional Cemetery to which the United States has title, Confederate burial places under the jurisdiction of the Department of the Army, [the Surrender Tree site in Cuba,] and graves used by the Army in commercial cemeteries; [\$6,815,000, of which \$40,000 shall be available for additional expenses in connection with the Act of June 24, 1946 (60 Stat. 302) and the Act of August 3, 1956 (70 Stat. 1027)] \$6,915,000: *Provided*, That this appropriation shall not be used to repair more than a single approach road to any national cemetery: *Provided further*, That this appropriation shall not be obligated for construction of a superintendent's lodge or family quarters at a cost per unit in excess of \$17,000, but such limitation may be increased by such additional amounts as may be required to provide office space, public comfort rooms, or space for the storage of Government property within the same structure: *Provided further*, That reimbursement shall be made to the applicable military appropriation for the pay and allowances of any military personnel performing services exclusively for the purposes of this appropriation. (24 U. S. C. 271, 273, 274-276, 278, 282, 288, 290; Public Works Appropriation Act, 1958.)

Appropriated 1958, \$6,815,000

Estimate 1959, \$6,915,000

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
1. Procurement of headstones.....	\$2,493,669	\$2,444,000	\$2,540,000
2. Construction and acquisition of land.....	548,958	440,000	235,000
3. Repair of Arlington Memorial Amphitheater.....	30,000		
4. Maintenance and operation.....	3,076,822	3,370,000	3,570,000
5. Administration.....	510,752	561,000	570,000
Total obligations.....	6,660,201	6,815,000	6,915,000
Financing:			
Unobligated balance no longer available.....	104,799		
Appropriation (new obligational authority)	6,765,000	6,815,000	6,915,000

1. *Procurement of headstones.*—The procurement of headstones for 3 years is shown in the table below. The increased purchases in 1959 result from the normal increase in applications anticipated on the basis of previous experience.

HEADSTONE PROCUREMENT REQUIREMENTS

	1957 actual	1958 estimate	1959 estimate
Applications from previous year.....	17,907	7,520	7,542
New applications.....	98,392	104,110	109,600
Total applications.....	116,299	111,630	117,142
Less applications carried forward.....	7,520	7,542	8,966
Total procurement.....	108,779	104,088	108,176

2. *Construction and acquisition of land.*—This item provides for development projects at five national cemeteries, including engineering investigations and preparation of plans for future construction.

3. *Maintenance and operation.*—The national cemetery system operates and maintains 119 installations in the continental United States, its Territories and possessions, including 85 national cemeteries, 22 soldiers lots, 5 Confederate cemeteries, 2 Confederate plots, 2 Confederate monument sites, 1 national monument site, 1 memorial park, and Government-owned burial lots in the Washington Parish Burial Ground. There will be 2,007 developed acres in the national cemetery system with 778,027 used graves and 260,547 developed grave sites in

1959. It is estimated that 26,770 burials will be made in 1958 and 29,270 in 1959 compared to 25,368 burials in 1957.

RIVERS AND HARBORS AND FLOOD CONTROL

Current authorizations:

The following appropriations shall be expended under the direction of the Secretary of the Army and the supervision of the Chief of Engineers for authorized civil functions of the Department of the Army pertaining to rivers and harbors, flood control, beach erosion, and related purposes:

GENERAL INVESTIGATIONS

For expenses necessary for the collection and study of basic information pertaining to river and harbor, flood control, shore protection, and related projects, and when authorized by law, preliminary examinations, surveys and studies (including cooperative beach erosion studies as authorized in Public Law Numbered 520, Seventy-first Congress, approved July 3, 1930, as amended and supplemented), of projects prior to authorization for construction, to remain available until expended, [\$10,779,600] \$7,800,000. (33 U. S. C. 426-426c, 540, 541, 701; Public Works Appropriation Act, 1958.)

Appropriated 1958, \$10,779,600

Estimate 1959, \$7,800,000

1. *Examinations and surveys.*—Preliminary examinations and surveys for navigation and flood control improvements are made to determine the need and economic justification of the proposed improvements. These studies are made in cooperation with appropriate Federal and State agencies and will be restricted to a limited number of high-priority investigations.

In addition, cooperative beach erosion investigations are conducted at specific localities. These cooperative investigations are paid for equally by the Federal Government and by State and other local agencies.

Special studies are made in cooperation with State and other Federal agencies in the interest of navigation, flood control, power and related purposes.

NUMBER OF REPORTS

Status	1957 actual	1958 estimate	1959 estimate
River and harbor and flood control investigations:			
Completed.....	89	121	65
Continued.....	110	78	45
Initiated.....	41	28	0
Cooperative beach erosion control investigations:			
Completed.....	8	11	4
Continued.....	0	2	0
Initiated.....	5	1	6
Special studies:			
Completed.....	0	1	2
Continued.....	3	8	7
Initiated.....	5	1	0

Completed reports are those acted upon by the Board of Engineers for Rivers and Harbors or the Beach Erosion Board.

2. *Collection and study of basic data.*—Funds are made available to the Weather Bureau for hydrometeorological studies and precipitation stations and to the Geological Survey for installation, operation, and maintenance of stream gaging stations. Funds are also made available to the Fish and Wildlife Service for preauthorization studies of the effect of proposed flood control and river and harbor projects upon fish and wildlife. Also, members of the Corps of Engineers will participate in a number of engineering and control boards to study and control international streams and watersheds which mutually affect the United States and bordering nations.

3. *Research and development.*—General beach erosion development studies deal with physical phenomena, techniques, basic principles, and remedial or control measures related to shore protection and improvement. The results of these studies are disseminated to other Federal, State, and local agencies and individuals using this information.

Hydrologic studies include storm studies, general hydrologic investigations, and sedimentation studies. Stream-flow and rainfall data stations are operated to provide a background of information for use in future design and operation of water control projects.

Civil works investigations assist in the solution of engineering problems. The solutions are widely applicable to the design, construction, and operation and maintenance of civil works projects. The amount requested will be applied to 77 individual investigations and will provide for the operation of the research center at the Waterways Experiment Station, Vicksburg, Miss.

Construction of the Mississippi Basin model at the Waterways Experiment Station at Vicksburg, Miss., will be continued. In addition, funds are requested to begin the initial phase of a Mississippi River comprehensive study on the completed portion of the Mississippi Basin model. The primary objectives of this initial basinwide testing program are to improve the operation of the reservoir system in the Mississippi River Basin, to determine the benefits that can be expected from optimum operation of the reservoir system, and to study potential flood levels on the lower Mississippi River.

4. *Tennessee-Tombigbee Waterway restudy.*—A restudy of the economic feasibility of the Tennessee-Tombigbee Waterway will be completed with funds provided in 1957.

6. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year: Inventories and items on order:				
Unpaid undelivered orders (appropriation balance obligated for goods and services on order not yet received).....	\$286,365	\$468,962	\$491,463	\$450,030

CONSTRUCTION, GENERAL

For the prosecution of river and harbor, flood control, shore protection, and related projects authorized by law; detailed studies, and plans and specifications, of projects (including those for development with participation or under consideration for participation by States, local governments, or private groups) authorized or made eligible for selection by law (but such studies shall not constitute a commitment of the Government to construction); and not to exceed \$1,600,000 for transfer to the Secretary of the Interior for conservation of fish and wildlife as authorized by law; to remain available until expended, \$449,398,500; \$449,920,000: *Provided*, That funds appropriated herein may at the discretion and under the direction of the Chief of Engineers be used in payment to the accounts of the Confederated Tribes of the Yakima Reservation; the Confederated Tribes of the Warm Springs Reservation; the Confederated Tribes of the Umatilla Reservation; or other recognized Indian tribes, and those individual Indians not enrolled in any recognized tribe, but who through domicile at or in the immediate vicinity of the reservoir and through custom and usage are found to have an equitable interest in the fishery, all of whose fishing rights and interests will be impaired by the Government incident to the construction, operation, or maintenance of The Dalles Dam, Columbia River, Washington and Oregon, and must be subordinated thereto by agreement or litigation: *Provided further*, That no part of this appropriation shall be used for projects which are authorized by a law limiting the amount to be appropriated therefor, except as may be within the limits of the amount now or hereafter authorized to be appropriated: *Provided further*, That not to exceed \$3,500,000 of the funds herein or hereafter provided for the Plaquemine-Morgan City alternate route, shall be available for the construction of a four-lane, high level, fixed bridge on Louisiana State Highway Numbered 1 (formerly route 16S) over the extension of the Plaquemine-Morgan City route of the Gulf Intracoastal Waterway in West Baton Rouge Parish, Louisiana: *Provided further*, That the Secretary of the Army shall advance to the North Dakota State Water Conservation Commission out of funds herein or hereafter appropriated for the Garrison project, North Dakota, 50 per centum of the cost, but not to exceed \$40,000, for the construction of works to improve the productivity and fertility of Government-owned lands within the Garrison Reservoir, North Dakota, formerly part of the Lewis and Clark Irrigation District, subject, however, to a mutual agreement being reached by the Chief of Engineers, the North Dakota State Water Conservation Commission, and the lessees using the land for the full repayment of the funds advanced by the Federal Government within a period of ten years: *Provided further*, That the contribution by local interests toward construction of the Ferrell's Bridge Reservoir, Texas, as required by Public Law 160, Eighty-fourth Congress, may be made in two equal installments of 50 per centum each, payable on January 1, 1958, and September 1, 1958, and that title to the proportionate share of the water supply storage authorized in said reservoir shall pass to such local interests upon completion of each of the separate payments: *Provided further*, That none of the funds appropriated for "Construction, General", in this Act shall be used on the project "Missouri River, Kansas City to mouth", for any purpose other than bank stabilization work: *Provided further*, That not to exceed \$4,000,000 of the funds provided herein shall be available for the construction of small authorized projects selected by the Secretary of the Army the cost of which is not in excess of \$400,000 and any such project shall be completed within the funds herein appropriated. (16 U. S. C. 661-666, 756; 33 U. S. C. 511-523, 540, 701; 55 Stat. 638; 66 Stat. 635, 732; Public Works Appropriation Act, 1958.)

Appropriated 1958, * \$449,823,500 Estimate 1959, \$449,920,000

* Includes \$425,000 appropriated in Supplemental Appropriation Act, 1958.

1 Advance engineering and design only.

DEPARTMENT OF THE ARMY—Continued

RIVERS AND HARBORS AND FLOOD CONTROL—Continued

Current authorizations—Continued

CONSTRUCTION, GENERAL—Continued

The appropriation requested for this program amounts to \$449.9 million and represents an increase of \$0.1 million compared with the amount appropriated for 1958 and a decrease of \$8.5 million compared with the appropriation for 1957. Of the appropriations requested, about 63% will be applied to 27 major projects in amounts of \$5 million or more. Appropriations for this program may be summarized as follows:

[In thousands]

Activity	Major projects	Other	Total
1. Advance engineering and design.....		\$5,500	\$5,500
2. Navigation projects.....	\$73,500	57,398	130,898
3. Alteration of bridges.....		4,465	4,465
5. Flood control projects.....	72,450	108,848	181,298
6. Multiple-purpose projects.....	108,200	18,559	156,759
8. Lower Columbia River fish sanctuary program.....		1,000	1,000
12. Undistributed reduction based on anticipated delays and savings.....		-30,000	-30,000
Appropriations.....	284,150	165,770	449,920

The monetary authorization available for appropriation after 1959 for projects in the construction, general program, amounts to \$4,462.4 million. Budget recommendations for 10 projects contemplate that Congress will provide additional monetary authorization this year.

1. *Advance engineering and design.*—Design studies establish project features and cost estimates required for preparation of contract plans. The funds requested will bring designs and plans for a number of high priority projects to the stage where they will be ready for construction, and will permit continuation of planning on other needed projects. The program of restudy of projects classified as "Deferred for restudy" will be continued.

2. *Navigation projects.*—This activity includes improvement of channels and harbors for navigation by dredging; and construction of breakwaters, jetties, dikes, locks, dams, and canals.

With the funds requested, work will be continued on 42 channel and harbor projects, of which 8 will be completed, and on 12 lock, dam, and canal projects. Eight major projects will require appropriations of \$5 million or more in 1959 and will be brought to a percent of completion as follows:

Project	Appropriations 1959	Percent of completion
Great Lakes connecting channels, Mich.....	\$18,000,000	24.4
Delaware River to Trenton, N. J.....	10,000,000	21.7
Jackson lock and dam, Alabama.....	5,000,000	29.2
Illinois Waterway.....	6,000,000	29.8
Markland lock and dam, Indiana, Kentucky and Ohio.....	11,000,000	37.4
New Cumberland lock and dam, Ohio and West Virginia.....	10,000,000	66.7
Greenup locks and dams, Kentucky and Ohio.....	8,500,000	59.1
Lock and dam 41, Kentucky and Indiana.....	5,000,000	17.8
Total.....	73,500,000	

3. *Alteration of bridges.*—Obstructive bridges over navigable waterways are altered in accordance with an apportionment of the costs of alteration between the United States and the bridge owners.

The funds requested will finance the Federal share of the cost of altering 5 bridges, of which 1 will be completed in 1959.

4. *Beach erosion control projects.*—The Federal Government assists in the construction of works for the restoration and protection against erosion by waves and currents, of the shores of the United States, its Territories, and possessions. Federal contributions may not exceed one-third of the construction costs of such projects.

5. *Flood control projects.*—This activity includes local protection projects and flood control reservoirs without power installations. Local protection projects consist of channel improvements, levees, and floodwalls. Provision is made for emergency bank protection; for snagging and clearing work on navigable streams and tributaries when such work is necessary in the interest of flood control; and for the construction of small flood control projects not specifically authorized by Congress.

The estimate for Chamita (Abiquiu) Reservoir, N. Mex., contemplates that no Federal funds will be spent for a separate uncontrolled outlet. This outlet is not required, since the United States will operate the dam in accordance with the Rio Grande compact as required by the project authorization.

With the funds requested, construction will be continued on 51 local protection projects, of which 6 will be completed, and on 37 reservoir projects, of which 3 will be completed in 1959. Eight major projects will require appropriations of \$5 million or more in 1959 and will be brought to a percent of completion as follows:

Project	Appropriations 1959	Percent of completion
Los Angeles County, Calif.....	\$16,500,000	58.1
Central and southern Florida.....	5,000,000	20.2
Painted Rock Reservoir, Ariz.....	6,000,000	62.2
Tuttle Creek Reservoir, Kans.....	12,500,000	43.7
Dillon Reservoir, Ohio.....	5,000,000	63.8
Oologah Reservoir, Okla.....	10,000,000	68.4
Eagle Gorge Reservoir, Wash.....	6,000,000	72.0
Sutton Reservoir, W. Va.....	11,450,000	80.9
Total.....	72,450,000	

6. *Multiple-purpose projects including power.*—With the funds requested, construction will be continued on 20 multiple-purpose projects with power installations. Four revenue-producing multiple-purpose projects with power will be substantially completed in 1959. In addition, the funds necessary to complete construction of the Cheatham lock and dam, Tennessee, project will be provided. Eleven major projects will require appropriations of \$5 million or more in 1959 and will be brought to a percent of completion as follows:

Project	Appropriations 1959	Percent of completion
Fort Gaines lock and dam, Alabama and Georgia.....	\$10,000,000	24.1
Hartwell Reservoir, Ga. and S. C.....	10,000,000	25.2
Barkley Dam, Ky. and Tenn.....	8,500,000	8.1
Table Rock Reservoir, Mo. and Ark.....	12,400,000	91.8
Port Peck Dam, Mont. (2d powerplant).....	6,000,000	36.1
Garrison Reservoir, N. Dak.....	9,000,000	94.4
Cougar Reservoir, Oreg.....	6,500,000	31.6
Hills Creek Reservoir, Oreg.....	11,000,000	44.7
The Dalles lock and dam, Oregon and Washington.....	13,000,000	93.4

Total.....	138,200,000	

7. *Small authorized projects.*—The Federal Government assists in the construction of authorized channel and harbor, shore protection, and flood control projects, each of which has a total estimated Federal cost of \$400,000 or less.

8. *Lower Columbia River fish sanctuary program.*—A program to counteract damages to fisheries resulting from the construction of major dams and other obstructions in the lower Columbia River has been developed by the Fish and Wildlife Service together with the fisheries departments of the States of Oregon and Washington.

9. *Northeast flood emergency.*—Following the floods in the Northeast in the summer of 1955, the Corps participated in an emergency assistance program there.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

OPERATION AND MAINTENANCE, GENERAL

For expenses necessary for the preservation, operation, maintenance, and care of existing river and harbor, flood control, and related works, including such sums as may be necessary for the maintenance of harbor channels provided by a State, municipality, or other public agency, outside of harbor lines, and serving essential needs of general commerce and navigation; financing the United States share of the cost of operation and maintenance of remedial works in the Niagara River; surveys and charting of northern and northwestern lakes and connecting waters; clearing and straightening channels; removal of obstructions to navigation; rescue work, and repair, restoration, or maintenance of flood control projects threatened or destroyed by flood; and not to exceed **[\$1,315,000]** \$1,415,000 for transfer to the Secretary of the Interior for conservation of fish and wildlife as authorized by law; to remain available until expended, **[\$103,850,000]** \$100,000,000. (16 U. S. C. 661-666, 756; 33 U. S. C. 1, 414, 415, 540, 603a, 701, 701n, 705; Public Works Appropriation Act, 1958.)

Appropriated 1958, **\$103,850,000** Estimate 1959, **\$100,000,000**

Appropriation (new obligational authority).....	95,900,000	103,850,000	100,000,000

The appropriation requested is \$100 million. This represents a decrease of \$3.8 million compared with 1958 and an increase of \$4.1 million compared with 1957. With the amount recommended, essential maintenance work will be accomplished on an orderly and current

DEPARTMENT OF THE ARMY—Continued

RIVERS AND HARBORS AND FLOOD CONTROL—Continued

Current authorizations—Continued

OPERATION AND MAINTENANCE, GENERAL—Continued

schedule designed to hold costly repair and rehabilitation work in the future to a minimum.

1. *Navigation.*—Minimum essential maintenance requirements will be met on 156 channel and harbor projects, 31 canals and canalized waterways, and 2 obsolescent waterways to be disposed under Public Law 996. Surveys of the northern and northwestern lakes to obtain data for charts and bulletins for safe navigation will be continued.

2. *Flood control.*—In 1959, 114 flood control reservoirs will be operated and maintained. Provision is also made for the minimum regular maintenance of 18 local flood protection projects, urgent rehabilitation work, and inspection of completed flood control projects to determine adequacy of compliance by local interests with prescribed maintenance requirements.

3. *Multiple purpose projects including power.*—The facilities of 34 multiple purpose projects with an installed capacity at the end of 1959 of 6,156,400 kilowatts will be operated and maintained.

4. *Lower Columbia River fish sanctuary program.*—Funds are allocated to the Fish and Wildlife Service for operation and maintenance of hatcheries and other facilities.

5. *Niagara remedial works.*—The costs of operation and maintenance of works to preserve and enhance the scenic beauty of Niagara Falls are divided equally between the United States and Canada.

6. *Emergency operations.*—Wrecks and other obstructions to safe navigation are marked and removed. Provision is made for emergency work on channels of navigable waters and their tributaries.

The requested amount includes \$4 million to replenish the emergency fund authorized by Public Law 99, approved June 28, 1955, for emergency flood control activities.

Data will be obtained by the Corps of Engineers in 1959 to assist in emergency planning by the Federal Civil Defense Administration and the Office of Defense Mobilization.

8. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table:

1. *Executive direction and management.*—This provides for administration of the program by the Office, Chief of Engineers, including a data processing center, and 9 division offices, which supervise work decentralized in 40 district offices.

2. *Review boards.*—The River and Harbor Board reviews reports on proposed projects and makes advisory recommendations to the Chief of Engineers. The Beach Erosion Board, in cooperation with the States, studies the prevention of shore erosion, develops standards, and reviews reports.

3. *Regulation.*—The Corps administers laws for the protection and preservation of the navigable waters of the United States. It inspects bridges, approves bridge plans, establishes fish stake limits, issues permits, investigates wrecks and oil pollution, controls dumping, regulates hydraulic mining, and establishes harbor lines.

4. *Commercial statistics.*—Data on waterborne commerce are collected, compiled, and published.

5. *Special investigations.*—Investigations are made and reports prepared pursuant to congressional and other special requests for current information pertaining to the civil works program.

6. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate

FLOOD CONTROL, MISSISSIPPI RIVER AND TRIBUTARIES

For expenses necessary for prosecuting work of flood control, and rescue work, repair, restoration, or maintenance of flood control projects threatened or destroyed by flood, as authorized by law (33 U. S. C. 702a, 702g-1), to remain available until expended, **[\$60,715,000] \$57,000,000.** (*Public Works Appropriation Act, 1958.*)

Appropriated 1958, **\$60,715,000**

Estimate 1959, **\$57,000,000**

¹ Advance engineering and design only.

The Corps of Engineers is responsible for the flood control program for the lower Mississippi Valley from Cape Girardeau, Mo., to the Gulf of Mexico, including the main alluvial stream, the basins of the St. Francis and White, Lower Arkansas, Yazoo, Tensas, and Atchafalaya Rivers, and Bayou La Fourche, and the alluvial lands around Lake Pontchartrain. The adopted plan calls for raising and strengthening about 1,600 miles of existing levees along the main river, for enlarging or constructing some 1,700 miles of levees on tributaries and in side basins, for channel improvement and bank stabilization on the main river, for dredging of the main river to provide a navigation channel 12 feet deep and 300 feet wide from Baton Rouge, La., to Cairo, Ill., and for 5 flood-detention reservoirs on minor tributaries.

The total estimated cost for flood control and improvement of the lower Mississippi River in its alluvial valley is \$1,460 million, of which \$1,008 million has been appropriated through 1958.

1. *General investigations.*—Provision is made for continuing a comprehensive review of the Mississippi River and tributaries project and for the collection of basic data which is subsequently used in planning and designing projects.

3. *Construction.*—Funds requested will be applied to continuation of 12 features and to completion of 1 feature of the project. About 93% of these funds will be applied to 6 major features, which by the end of 1959 will have been brought to a percent of completion as follows:

Feature	Appropriations 1959	Percent of completion
Mississippi River levees.....	\$1,800,000	87
Channel improvement.....	18,000,000	84
Old River control.....	7,750,000	36
St. Francis Basin.....	2,600,000	37
Yazoo Basin.....	3,250,000	51
Atchafalaya Basin.....	4,510,000	83
Total.....	37,910,000	

4. *Maintenance.*—Provision is made for operation and ordinary maintenance of the major features of the project.

5. *Flood control emergencies.*—Provision is made for rescue work and for the repair, restoration, or maintenance of flood control work on tributaries of the Mississippi River threatened or destroyed by flood.

7. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year:				
Inventories and items on order:

UNITED STATES SECTION, SAINT LAWRENCE RIVER JOINT BOARD OF ENGINEERS

For necessary expenses of the United States section of the Saint Lawrence River Joint Board of Engineers, established by Executive Order 10500, dated November 4, 1953, including services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), at rates not to exceed \$100 per day for individuals; [\$125,000] \$100,000: *Provided*, That no part of these funds shall be obligated until agreement has been entered into, by the United States Government and the United States entity authorized to construct the power works in the International Rapids section of the Saint Lawrence

River, providing for the reimbursement of the expenditures of the United States section of this Board by the construction entity. (*Public Works Appropriation Act, 1958.*)

Appropriated 1958, \$125,000

Estimate 1959, \$100,000

	150,000	125,000	100,000

Executive Order 10500 established the United States section of the Saint Lawrence River Joint Board of Engineers. Its duties include review of plans and coordination of construction, in conjunction with the Canadian section of the Joint Board, of power facilities being constructed in the International Rapids section of the St. Lawrence River by the Power Authority of the State of New York jointly with the Hydro-Electric Power Commission of Ontario. These expenses will be repaid to the general fund by the Power Authority of the State of New York.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

ADMINISTRATIVE PROVISIONS

Appropriations in this title shall be available for expenses of attendance at meetings of organizations concerned with the work for which the appropriation is made, for uniforms, or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U. S. C. 2131), and for printing, either during a recess or session of Congress, of survey reports authorized by law, and such survey reports as may be printed during a recess of Congress shall be printed, with illustrations, as documents of the next succeeding session of Congress; and during the current fiscal year the revolving fund, Corps of Engineers, shall be available for purchase (not to exceed [one hundred and fifty] two hundred and thirty-six for replacement only) and hire of passenger motor vehicles. (*Public Works Appropriation Act, 1958.*)

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

NOTE.—Obligations incurred under allocations from other appropriations are shown in the schedules of the parent appropriation as follows:

"Hospital and domiciliary facilities," Veterans Administration.
 "Capital outlay," United States Soldiers' Home.
 "Repair of reserve fleet facilities," maritime activities.
 "Operating expenses," Coast Guard.
 "Construction and rehabilitation," Bureau of Reclamation.
 "Salaries and expenses," maritime activities.
 "Disaster relief," funds appropriated to the President.
 "Construction," Fish and Wildlife Service.
 "Commodity Credit Corporation fund."
 "United States dollars advanced from foreign governments, United States educational exchange program," Department of State.
 "Passamaquoddy tidal power survey," Department of State.
 "Salaries and expenses," National Science Foundation.
 "Maintenance and operation," United States Soldiers' Home.
 "Mutual security," funds appropriated to the President.

Permanent authorizations:

PAYMENTS TO STATES, FLOOD CONTROL ACT OF 1954

(Indefinite special account)

1. *Hydraulic mining in California, debris fund.*—Fees paid by mine operators in the Sacramento and San Joaquin basins for depositing mine debris in restraining works are used for maintenance of restraining reservoirs (33 U. S. C. 683).

2. *Maintenance and operation of dams and other improvements of navigable waters.*—Half of the proceeds from certain licenses issued by the Federal Power Commission for constructing, operating, and maintaining dams, conduits, reservoirs, etc., are used for maintenance and operation of Federal dams and other navigation structures and for improvement of navigable waters (16 U. S. C. 810; 31 U. S. C. 725c).

3. *Relation of costs to obligations.*—The year-end balances of unpaid undelivered orders are as follows: 1956, \$43; 1957, \$45.

The fund provides for expenses necessary for the acquisition, operation, and maintenance of plant and equipment of the Corps of Engineers used in civil functions, and for furnishing of facilities and services for the military functions of the Department of the Army and other governmental agencies and private persons. The fund is credited by reimbursements or advances from the appropriations or individuals who utilize the services or facilities, at rates

to cover all operating costs. Capital for the fund was provided by assumption of the assets, liabilities, and obligations of the plant accounts, as carried on the records of the Corps of Engineers as of June 30, 1953, and by an appropriation of \$100. Capital of the fund is limited to \$140 million (67 Stat. 199).

Budget program.—Plant and equipment services include operating costs of such items of plant as dredges, other floating plant, and land-based plant. Warehousing covers cost of receipt, storage, and issue of inventories. Shop and facility services include repair and maintenance shops, boatyards, and printing and reproduction plants. General administrative services include general and administrative expenses of Corps of Engineers district offices. In addition, capital gains and losses become a part of the activities of the fund. Operating costs of these activities are expected to remain at about the same level through 1959. The increase in outlay for plant, properties, and equipment is expected to result primarily from modernization and replacement of major items of plant and facilities.

As a result, 1958 gross expenditures of the fund are expected to increase \$0.9 million over the preceding year, and 1959 gross expenditures are expected to increase \$2.4 million over 1958.

Operating results and financial condition.—In reducing the excess inventories with which the fund began in 1954, losses of \$1.6 million have been incurred including the amount of \$353,731 in 1957. The investment of the Government is estimated to remain at about the same level through 1959.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate

The United States Soldiers' Home provides medical and domiciliary care and other authorized benefits for the relief and support of certain old, invalid, or disabled soldiers of the Regular Army and airmen of the Air Force. Funds for maintenance and operation of the home are

authorized from the Soldiers' Home permanent fund and not from the general funds of the Treasury.

1. *Medical care.*—As part of the home, the 480-bed hospital will care for a daily average of 380 patients during 1959. In addition, a daily average of 81 patients will receive specialized care in other Government hospitals.

2. *Domiciliary activities.*—An average of 1,345 members will receive domiciliary care within the 1,429-bed capacity.

3. *Administration and central services.*—This activity includes service functions for the home, such as administration, supply, utilities, maintenance, transportation, and laundry.

4. *Permanent improvements.*—Funds are included for purchasing equipment for new warehouse, members' parking lot, construction of road, preliminary plans for remodeling portion of Grant Building for administrative offices, and increases in cost of construction of service area.

Financing:			
Unobligated balance no longer available.....	34,978		
Appropriation (new obligational authority).....	2,350,000	2,475,000	3,150,000

This appropriation provides for administering the Ryukyu Islands. The United States is empowered by

the treaty of peace with Japan to exercise jurisdiction over the territory and its 820,000 inhabitants. Pursuant to Executive Order 10713 of June 5, 1957, the Army is charged with developing an effective and responsible Ryukyuan Government, based on democratic principles and supported by a sound financial structure, and with improving the welfare and well-being of the inhabitants of the Ryukyu Islands. The civil administration established by the United States is headed by a High Commissioner. A system of military bases and other installations pertinent to the defense of the Pacific area has been developed in the islands. Since these islands are of critical strategic importance to the security of the free world, it is expected that the United States will be responsible for their administration for an indefinite period.

2. *Construction of facilities.*—A civil administration court building is to be built and furnished with funds requested for 1959.

3. *Exchange of persons.*—Provision is made for visits of Ryukyuan leaders and for a program of advanced study by Ryukyuan students in the United States.

4. *Aid to the Ryukyuan economy.*—Technical assistance is furnished for the education program in the Ryukyus. Grants are made to supplement the revenues of the local government in meeting the costs of essential governmental services and of public facilities. In 1959 \$1 million is proposed for police, school, and hospital facilities.

United States Civil Administration.—In addition to the funds in this appropriation the United States Civil Administration utilizes other funds, including: income from business-type instrumentalities of the civil administration; earnings on foreign exchange deposits and income from investments in financial and public-utility organizations. Summary statements of assets and liabilities and of the cash receipts and expenditures of the general fund of the United States Civil Administration follow:

FINANCIAL CONDITION

	1957 actual	1958 estimate	1959 estimate
Assets:			
Current assets: Cash.....	\$3,891,531	\$1,126,033	\$91,333
Investments:			
Ryukyu reconstruction finance fund.....	18,896,756	21,071,756	22,671,756
Ryukyu Electric Power Corp.....	7,395,315	8,365,315	11,215,315
Okinawa Housing Corp.....	2,480,739	2,250,739	2,020,739
Ryukyu Warehouse Co.....	486,068	456,068	426,068
Bank of Ryukyu.....	127,500	127,500	127,500
Ryukyu Life Insurance Co.....		5,555	5,555
Other investments.....	4,113,806	4,205,827	3,005,827
Water system.....			2,300,000
Fixed assets (net).....	2,047,000	1,376,000	1,351,000
Total assets.....	39,438,715	38,984,793	43,215,093
Current liabilities	210,491		
Net worth, United States Civil Administration.....	39,228,224	38,984,793	43,215,093

The investments in the named business enterprises represent the total capital of the organizations, except in the case of the Bank and Life Insurance Company in each of which the United States Civil Administration holds 51% of the outstanding stock. In these two organizations, the investment is stated at cost but has a higher actual value because of accumulated undistributed earnings. In the wholly owned enterprises, the stated investment has been adjusted each year to reflect the net book value. Other investments are primarily related to financing of rice and petroleum products to meet requirements of the civilian economy. Fixed assets will represent only petroleum terminal and storage facilities, after the planned sale of a refrigeration plant in 1958.

CASH RECEIPTS AND EXPENDITURES

	1957 actual	1958 estimate	1959 estimate
Receipts:			
Income from operations.....	\$2,006,084	\$2,439,300	\$1,755,300
Liquidation of investments.....	2,966,751	1,019,979	1,200,000
Total receipts.....	4,972,835	3,459,279	2,955,300
Expenditures:			
Investments:			
Fixed assets: Petroleum facilities.....		370,000	40,000
Capital, Ryukyu reconstruction finance fund.....	3,187,437	2,175,000	1,600,000
Capital, Ryukyu Electric Power Corporation.....	369,392	350,000	350,000
Capital, water system.....			1,800,000
Other investments.....		923,777	
Total investments.....	3,556,829	3,818,777	3,790,000
Economic-aid programs:			
Grants to Government, Ryukyu Islands.....	873,199	1,486,000	
Grants to municipalities.....	185,784	375,000	200,000
Allocation to typhoon relief fund.....		525,000	
USCAR expenses.....	181,589	20,000	
Total aid programs and expenses.....	1,240,572	2,406,000	200,000
Total expenditures.....	4,797,401	6,224,777	3,990,000
Net increase or decrease (—) in cash balance..	175,434	—2,765,498	—1,034,700

Income from operations is derived primarily from the net earnings of the Ryukyu Electric Power Corporation and the Ryukyu reconstruction finance fund, from the purchase and sale of petroleum products, and from interest on time deposits of the dollar reserves for the occupation currency. No interest income is anticipated in 1959. The Okinawa Housing Corporation and the Ryukyu Warehouse Company operate at a loss each year as the revenues received are not sufficient to cover operating expenses and depreciation charges. Receipts from liquidation of investments represent reductions in the working capital used in financing the supply of rice and petroleum products in the Ryukyus and, in 1958, include the estimated return from the planned sale of a refrigeration plant.

The earnings of the Ryukyu Electric Power Corporation and the Ryukyu reconstruction finance fund are fully reinvested each year. Additional capital also is being invested in the reconstruction finance fund to assist in continued economic development by local enterprise and in financing the construction of typhoon-resistant family housing. In 1959, an investment of \$1.8 million to supplement the proposed appropriation is planned to assist in development of an adequate water system to serve the civil population. Investments directly in fixed assets involve only essential additions to petroleum terminal facilities. Grants are made to the local central government and to municipalities for of essential public facilities and programs.

Government of the Ryukyu Islands.—The Government of the Ryukyu Islands was created by the United States Civil Administration on April 1, 1952. In addition to local revenues derived primarily from taxes on income and excise taxes, the Ryukyuan Government receives grants to cover expenses related to the requirements of the United States forces and for assistance in the development of public facilities and services. The Government of the Ryukyu Islands has not been authorized by the United States to incur deficits in its fiscal operations or to borrow for any purpose and it must therefore maintain a minimum working balance in its treasury. A financial statement of the Government of the Ryukyu Islands follows:

1. *Transmission line and substations.*—A transmission line, including four substations, is under construction and is expected to be in operation by June 30, 1959.

2. *Conventional powerplant.*—The 1959 estimate is for the construction and equipment of an additional 22,000-kilowatt generating plant, together with related facilities, expected to be placed in operation by March 31, 1961. This will then decrease the need for the use of high-cost, temporary facilities in order to supply power requirements in Okinawa, including those of the United States forces.

3. *Construction, installation, and equipment of water system.*—Provision is made for the construction of a dam and pumping station together with a supply line to provide an additional source of water to the civil population. These facilities are expected to be placed in operation by July 1, 1960, and to deliver 2 million gallons per day.

Appropriation (new obligational authority).....	15,410,000	15,765,600	17,597,000

This appropriation provides for those functions in the Canal Zone which, in the United States, would be performed by State and local governments and civilian departments of the Federal Government, and for the operation of hospitals and clinics. All operating expenses, including depreciation, are recovered and paid into Treasury as miscellaneous receipts. These are derived from revenues from individuals and agencies served and the balance from the Panama Canal Company as follows:

	1957 actual	1958 estimate	1959 estimate
Appropriations:			
Current or requested.....	\$15,410,000	\$15,765,600	\$17,597,000
Proposed for later transmission.....		221,500	
Total appropriations.....	15,410,000	15,987,100	17,597,000
Repayments to Treasury (including depreciation):			
Revenue:			
Hospitals and clinics.....	2,906,406	2,900,000	3,159,600
Education.....	1,568,310	1,752,000	1,963,000
Postal service.....	858,595	870,000	935,000
Fire protection.....	554,550	681,200	673,500
All others.....	483,225	508,900	507,800
Total revenue.....	6,371,086	6,712,100	7,238,900
Net costs reimbursable by Panama Canal Company.....	10,135,514	10,303,300	11,435,600
Total repayments to Treasury.....	16,506,600	17,015,400	18,674,500

1. *Civil functions.*—(a) *Customs and immigration.*—This provides for the activities usually incident to such functions (except that no collection of customs duties is involved) and in addition includes special activities relating to transiting vessels and the execution of certain treaty obligations to the Republic of Panama.

(b) *Postal service.*—The postal system serves the entire Canal Zone and operates under policies and regulations generally similar to those of the United States Post Office Department, including money order and postal savings services. Beginning in 1959, rail transportation cost of mail across the Isthmus is transferred to this activity from the Panama Canal Company.

WORKLOAD

	1957 actual	1958 estimate	1959 estimate
Airmail received and dispatched (pounds).....	495,341	480,000	460,000
Surface mail dispatched (pounds).....	483,973	460,000	450,000
Surface mail received (sacks).....	85,734	83,000	81,000
Transit mail received and dispatched (sacks).....	130,333	130,000	125,000

(c) *Police protection.*—This includes the usual police functions of preservation of the peace and enforcement of the law in the Canal Zone (not including military reservations), operation of prisons, and police guards for certain facilities.

(d) *Fire protection.*—Beginning in 1957, all firefighting facilities, including military reservations, were consolidated under the Canal Zone Government except for aircraft crashes and fires aboard naval vessels or in ammunition depots.

(e) *Judicial system.*—This includes the operation of two magistrate courts, and the expenses of the district court (exclusive of salaries) which serves as both a State and Federal court.

(f) *Education.*—This provides for the operation of schools, kindergarten through junior college, for the dependents of Canal Zone residents and, on a space available basis, to certain residents of Panama. There are two school systems, one for United States citizens, the other for Panamanians and other noncitizens conducted in the Spanish language. Specialized facilities for handicapped children were started in 1958. Cost increases exceed the amount that would be indicated by enrollment increases because of the extraordinary amount of maintenance work required in 1959; also, provision is made for improving the pupil-teacher ratio.

ENROLLMENT DATA

	1957 actual	1958 estimate	1959 estimate
Citizen schools.....	6,831	7,179	7,099
Noncitizen schools.....	4,003	4,028	4,110
Total.....	10,834	11,207	11,209

(g) *Public areas and facilities.*—This includes the cleaning, lighting, and maintenance of streets and highways, maintenance of sewers, and care of public areas, not including military reservations.

(h) *Library.*—This provides for the operation of public library facilities for residents and technical reference services for Government agencies.

(i) *Internal security.*—This provides for loyalty investigations and related intelligence services for the Government and the Company.

(j) *Other civil affairs.*—This includes licensing and civil defense activities and supervision of the civil functions program.

2. *Health and sanitation.*—A complete survey of the health requirements, including plant and services, was started in 1957 and will be continued in 1958. The survey is expected to provide the means for achieving major improvements in this field.

(a) *Hospitals and clinics.*—Two complete general medical and surgical hospitals with outpatient clinics, a neuropsychiatric and domiciliary hospital, and a leprosarium are operated and maintained. Medical care of all eligible civilians and military personnel in the Canal Zone is provided in the two general hospitals operated by the Government.

AVERAGE NUMBER OF INPATIENTS PER DAY (EXCLUDING NEWBORNS)

	1957 actual	1958 estimate	1959 estimate
Gorgas Hospital.....	262.5	287.0	287.0
Coco Solo Hospital.....	93.7	90.0	90.0
Corozal Hospital.....	262.7	265.0	265.0
Palo Seco Leprosarium.....	117.7	124.0	124.0
Total.....	736.6	766.0	766.0

(b) *Other public health services.*—This provides for sanitation and quarantine work in the Canal Zone and for ships calling at its ports and transiting the canal. A large growth in the number of anopheles mosquitoes, the carriers of malaria, was found late in 1957. To prevent a serious outbreak of this disease, an intensive program was started in 1958, and will be continued on a modified scale in 1959, to eliminate the breeding sources of this insect. Beginning in 1959 there will be consolidated under the Canal Zone Government all inspection of food processing establishments as well as facilities for animal care and quarantine.

3. *General Government expense.*—(a) *Office of the Governor.*—This provides for the executive direction of all Canal Zone Government activities and includes the expense of the office of the Governor and his residence, and the office of the executive secretary.

(b) *Other general Government expenses.*—This includes the Canal Zone Government's share of the cost of general and administrative expense, provided by the Company, which the Government is without staff or facilities to perform or furnish, expenses of recruitment and repatriation, employees' home leave travel costs, and other general charges.

During 1957 net write-offs of prior capitalizations amounted to \$33,113, principally for costs of engineering studies, designs, and specifications for abandoned construction projects.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year:				
Inventories and items on order:				
Stores (goods unconsumed by projects).....	\$111,234	\$125,511	\$125,511	\$125,511
Unpaid undelivered orders (appropriation balance obligated for goods and services on order not yet received).....	45,280	52,253	52,253	52,253
Accrued annual leave (leave earned and not yet taken by employees charged to activity costs) (—).....	-1,533,865	-1,626,179	-1,626,179	-1,626,179
Total selected resources at end of year.....	-1,377,351	-1,448,415	-1,448,415	-1,448,415
Selected resources at start of year.....		1,377,351	1,448,415	1,448,415
Adjustment of selected resources reported at start of year.....		4,340		
Costs financed from obligations of other years, net (—).....		-66,724		

A proposal for later transmission to provide supplemental funds for 1958 appears below.

This provides for the acquisition by purchase, construction, or otherwise, of capital assets required by the Canal Zone Government. The principal projects to be undertaken in 1959 are: (a) Continuing the replacement in the Canal Zone of facilities to be transferred to the Republic of Panama under the terms of the 1955 treaty. In 1959, this includes (1) \$3,990,000 for a school plant, and (2) \$85,000 for a medical clinic, both on the Atlantic side of the Isthmus; and (b) other capital outlay requirements, including (1) \$264,900 for replacements, additions and renewals of equipment, (2) \$112,000 for modernization of the psychiatric hospital, (3) \$128,400 for improvements to the Atlantic side hospital and (4) \$50,000 for space studies at Gorgas Hospital.

Relation of costs to obligations.—The year-end balances of undelivered orders are as follows: 1956, \$197,378; 1957, \$200,930; 1958, \$387,100; 1959, \$57,100.

A supplemental appropriation of \$750,000 was enacted in 1958 to provide for certain activities preliminary to the construction of a high-level bridge across the Panama Canal at Balboa, Canal Zone, as authorized by the act of July 23, 1956. The appropriation for 1959 is to complete the preliminary work and to construct the bridge in fulfillment of the United States treaty commitments to the Republic of Panama.

Relation of costs to obligations.—Year-end balances of unpaid undelivered orders are as follows: 1958, \$371,000; 1959, \$3,866,000.

The Panama Canal Company is a wholly owned Government corporation chartered by the act of June 29, 1948 (62 Stat. 1076), as amended by the act of September 26, 1950 (64 Stat. 1041), for the primary purpose of maintaining and operating the interoceanic canal at the Isthmus of Panama. In furtherance of that mission, and in consideration of the international agreements under which the canal enterprise is operated, the Company conducts necessary supporting operations.

The valuation of assets transferred to the Company from its predecessor agency was approved by the Director, Bureau of the Budget, on September 9, 1957, pursuant to section 246 (b) of title 2, Canal Zone Code. The financial status and results of operations, both for 1957 and as estimated in the budget program shown in the accompanying statements, reflect this action.

This valuation of assets established the net interest bearing investment of the Panama Canal Company as at July 1, 1951, as follows:

Approved valuation of properties transferred from the Panama Canal (agency).....	\$402,095,947
Capital stock of original Panama Railroad Company.....	7,000,000
Gross interest bearing investment.....	409,095,947
Less dividends and other charges deductible from direct investment.....	35,754,861
Net interest bearing investment, July 1, 1951.....	373,341,086

As a result of dividends paid to the Treasury and net property transfers subsequent to July 1, 1951, the net interest bearing investment at June 30, 1957, stood at \$356,885,966. The resultant total interest expense payable to the Treasury for the years 1952 through 1957 was \$50,280,491. For 1958 and 1959, at interest rates of 2.482% and 2.5% interest costs will be \$8,587,900 and \$8,922,100, respectively.

Budget program—1. Canal operations.—This is the primary program of the Company and comprises the transiting operations and the maintenance of the canal. The number of ships using the canal continues to increase more rapidly than anticipated with a corresponding increase in receipts from operations. In 1959 a test of miter gate removal and overhaul will be made to ascertain whether lock overhauls can be shortened. Costs for these operations are shown in the following table:

	1957 actual	1958 estimate	1959 estimate
Maintenance of channels and harbors.....	\$2,975,844	\$3,464,600	\$2,440,300
Navigation service and control.....	5,921,243	6,210,000	6,320,000
Locks operations.....	7,632,169	8,352,400	8,302,200
General canal expense.....	1,472,123	1,553,000	1,491,200
Total operating costs.....	18,001,379	19,580,000	18,553,700

The volume of traffic is shown by the following data:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected data on canal operations:				
Commercial vessel transits:				
Number of ships (over 300 net P. C. tons).....	8,209	8,579	8,880	9,100
Tonnage (Panama Canal net)....	41,273,020	43,714,264	44,463,000	44,806,000
Ships berthed.....	4,573	5,331	5,400	5,500
Tolls and toll credits at current rates.....	\$36,219,085	\$39,653,520	\$42,090,000	\$42,295,500
Other canal revenues.....	\$3,406,042	\$3,897,309	\$3,692,500	\$3,704,500

Capital outlay costs amount to \$6,324,500 in 1959 and are mainly for (1) starting canal improvements that are expected to accommodate projected traffic requirements for 1 or 2 decades, \$1 million; (2) continuing the conversion of locks electrical distribution and equipment from 25 to 60 cycles, \$2.5 million; (3) locks, towing locomotives and cranes, \$1.4 million; and (4) channel improvement work at Paraiso curve in Gaillard Cut, \$0.9 million.

2. *Allied maritime operations.*—These consist of vessel repair facilities, and harbor terminal and marine bunkering operations. The Hotel Washington, formerly in this group, was transferred to the Republic of Panama on November 7, 1957, under the 1955 treaty with that country. Costs depend upon customer demand for service as follows:

	1957 actual	1958 estimate	1959 estimate
Vessel repair.....	\$1,767,346	\$1,240,000	\$1,327,200
Harbor terminals.....	3,914,395	4,205,000	4,367,000
Hotel Washington.....	146,219	62,900	-----
Total costs.....	5,827,960	5,507,900	5,694,200

Capital outlay costs include routine replacement of cargo-handling equipment of \$141,500 and reroofing one of the terminal piers of \$190,000.

3. *Employee services.*—As shown below, these costs include housing, commissary, and community services for eligible employees against whom charges are made to reimburse the Company.

	1957 actual	1958 estimate	1959 estimate
United States rate housing.....	\$1,544,873	\$1,554,700	\$1,590,600
Local rate housing.....	651,581	679,000	658,100
Commissaries.....	20,176,690	13,985,000	14,285,800
Service centers.....	3,261,804	2,827,400	2,794,600
Total.....	25,634,948	19,046,100	19,329,100
Less intra-agency recoveries.....	2,408,670	2,160,100	2,137,300
Net operating costs.....	23,226,278	16,886,000	17,191,800

There has been a decline of 40% in the volume of business since the end of calendar year 1956 due to the reduction in sales of consumer goods to employees resulting from a provision in the 1955 treaty prohibiting Panamanian employees not residing in the Canal Zone from patronizing the Company's commissaries and service centers after December 31, 1956.

Capital outlay projects include completion of employee quarters and other facilities in the Canal Zone amounting to \$125,000 to replace those lost to the Republic of Panama as a result of treaty commitments. Other projects provide for routine equipment replacements of \$158,500, and replacement of a service station on the Pacific side amounting to \$150,000.

4. *Transportation and utility services.*—Estimated 1959 gross costs of \$13.5 million approximates the same level as for 1957 and 1958. The annual costs for the activities comprising this group are:

	1957 actual	1958 estimate	1959 estimate
Railroad.....	\$1,429,311	\$1,371,000	\$1,386,000
Motor transportation.....	1,538,053	1,597,000	1,648,000
Steamship line.....	6,778,969	6,314,600	6,296,500
Power system.....	2,019,411	2,371,600	2,418,400
Communications system.....	494,760	529,600	558,300
Water system.....	1,237,500	1,216,100	1,233,900
Total.....	13,498,004	13,399,900	13,541,100
Less intra-agency recoveries.....	4,742,102	4,910,500	4,920,200
Net operating costs.....	8,755,902	8,489,400	8,620,900

Capital outlay costs total \$3,432,700 in 1959 and are mainly for (1) continuing the conversion of the power

system to 60 cycles, \$1,900,000; (2) completing the replacement of the switchgear at a power substation, \$500,000; and (3) replacing a portion of the trans-Isthmian telephone cable, \$300,000.

5. *Other supporting services.*—Costs of this group follow:

	1957 actual	1958 estimate	1959 estimate
Tivoli guest house.....	\$341,449	\$321,300	\$320,100
Printing plant.....	338,787	344,000	355,000
Grounds maintenance.....	958,450	984,100	1,013,400
Engineering and maintenance services.....	4,275,492	4,247,900	4,573,800
Supply operations.....	5,174,062	4,828,900	4,640,100
Total.....	11,088,246	10,726,200	10,902,400
Less intra-agency recoveries.....	8,690,949	8,631,800	8,780,200
Net operating costs.....	2,397,297	2,094,400	2,122,200

Capital outlay costs total \$325,300 for 1959 and are for minor replacements of equipment.

6. *General corporate expense.*—These include payments to the Treasury for the net cost of Canal Zone Government and interest, general and administrative expenses under statutory limitation, and other general charges. The scope of general and administrative expenses under statutory limitation was broadened in 1958 to include virtually all general charges other than interest on the investment of the United States and the net cost of the Canal Zone Government. In 1959 the latter is expected to be about \$1 million higher than in 1958 in the education and hospital fields.

Capital outlay costs amount to \$1,015,000 in 1959 of which \$580,000 is for completing the installation of air conditioning equipment in, and modernization of, the Company's main administration building constructed in 1914.

7. *Relation of costs to obligations.*—The relationship is derived by year-end balances of selected resources and applicable adjustments as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year:				
Inventories.....	\$8,664,576	\$7,928,134	\$7,900,000	\$7,900,000
Other current assets.....	669,694	193,325	200,000	200,000
Deferred charges.....	3,622,465	4,148,849	3,888,849	3,645,849
Unpaid undelivered orders.....	6,762,044	5,808,480	10,319,067	16,586,767
Total selected resources at end of year.....	19,718,779	18,078,788	22,307,916	28,332,616
Selected resources at start of year (—).....	-----	—19,718,779	—18,078,788	—22,307,916
Adjustment of selected resources reported at start of year.....	-----	—580,030	-----	-----
Costs financed from obligations of other years, net (—).....				
Obligations incurred for costs of other years, net.....	-----	—2,220,021	-----	-----
			4,229,128	6,024,700

Operating results and financial condition.—It is expected that the foregoing budget programs will continue to be financed entirely from revenues. The resulting operating margin is expected to remain fairly stable through 1959, as shown in the operating statements below.

In addition, the Company is authorized to obtain appropriations for its capital needs and to cover losses sustained in the conduct of its activities. It may borrow without interest up to \$10 million from an emergency fund established with the Treasury by deposits made by the Company. To date it has not been necessary to use this fund.

NOTE.—The Company has outstanding at all times an indeterminate amount of contingent and continuing liabilities, not reflected in the accounts, arising principally from monthly relief benefits payable to retired alien employees, compensation payments due employees and their dependents under the provisions of the Federal Employees Compensation Act, suits and claims pending against the Company, uncompleted supply, service, rental, and construction contracts, and unfilled purchase orders. The foregoing figures do not include a contingent liability in excess of \$27 million representing a tolls suit pending against the Company which was filed by certain shipping interests in New York on Sept. 13, 1955. The court dismissed this but it was later appealed. The matter now pending in the Supreme Court of the United States.

LIMITATION ON GENERAL AND ADMINISTRATIVE EXPENSES, PANAMA CANAL COMPANY

Not to exceed [\$7,820,000] \$7,976,000 of the funds available to the Panama Canal Company shall be available during the current fiscal year for general and administrative expenses of the Company, which shall be computed on an accrual basis. Funds available to the Panama Canal Company for operating expenses shall be available for the purchase of not to exceed [seventeen] eighteen passenger motor vehicles for replacement only, [including one at not to exceed \$5,000,] and for uniforms or allowances therefor, as authorized by the Act of September 1, 1954, as amended (5 U. S. C. 2131). (Department of Commerce and Related Agencies Appropriation Act, 1958.)

GENERAL PROVISIONS—THE PANAMA CANAL

SEC. 202. No part of any appropriation contained in this Act shall be used directly or indirectly, except for temporary employment in case of emergency, for the payment of any civilian for services rendered by him on the Canal Zone while occupying a skilled, technical, clerical, administrative, executive, or supervisory position unless such person is a citizen of the United States of America or of the Republic of Panama: *Provided, however,* (1) That, notwithstanding the provision in the Act approved August 11, 1939 (53 Stat. 1409) limiting employment in the above-mentioned positions to citizens of the United States from and after the date of approval of said Act, citizens of Panama may be employed in such positions; (2) that at no time shall the number of Panamanian citizens employed in the above-mentioned positions exceed the number of citizens of the United States so employed, if United States citizens are available in continental United States or on the Canal Zone; (3) that nothing in this Act shall prohibit the continued employment of any person who shall have rendered fifteen or more years of faithful and honorable service on the Canal Zone; (4) that in the selection of personnel for skilled, technical, administrative, clerical, supervisory, or executive

GENERAL PROVISIONS—THE PANAMA CANAL—Continued

positions, the controlling factors in filling these positions shall be efficiency, experience, training, and education; (5) that all citizens of Panama and the United States rendering skilled, technical, clerical, administrative, executive, or supervisory service on the Canal Zone under the terms of this Act (a) shall normally be employed not more than forty hours per week, (b) may receive as compensation equal rates of pay based upon rates paid for similar employment in continental United States plus 25 per centum; (6) this entire section shall apply only to persons employed in skilled, technical, clerical, administrative, executive, or supervisory positions on the Canal Zone directly or indirectly by any branch of the United States Government or by any corporation or company whose stock is owned wholly or in part by the United States Government: *Provided further*, That the President may suspend from time to time in whole or in part compliance with this section if he should deem such course to be in the public interest.

SEC. 203. The Governor of the Canal Zone is authorized to employ services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a), in an amount not exceeding \$15,000: *Provided*, That the rates for individuals shall not exceed \$100 per diem.

SEC. 204. The Governor of the Canal Zone and the President of the Panama Canal Company, in computing allowances for the cost of travel on home leave for persons who elect at their expense to take other than the lowest first-class travel to the United States, shall take into account as the cost to the United States the actual cost, as computed by the General Accounting Office, of travel by United States owned and operated vessels rather than a reduced fare rate which is available for such employees when traveling on their own account.

Guaranties are given on loans made by public and private financing institutions to facilitate performance of defense production contracts. When necessary, loans may be purchased by the Government. Administrative expenses are paid out of guaranty fees and interest on loans receivable. Funds in excess of guaranteed loan program requirements may be transferred to miscellaneous receipts of the Treasury. Advances from appropriations available for procurement may be made to this fund for its temporary use. Net earnings are retained to purchase loans when required under guaranty commitments and to cover possible future losses. Of 673 loans authorized under this program since 1950, there were 34 outstanding on June 30, 1957, in the amount of \$28 million. Additional credit available thereunder was \$11.3 million up to an authorized limit of slightly less than \$40 million. It is anticipated that as of the end of 1958 there will be 28 loans outstanding in the amount of \$25 million and as of the end of 1959 the number will be 24 in the amount of \$22 million.

Guaranties are given on loans made by public and private financing institutions to facilitate performance of defense production contracts. When necessary, loans

may be purchased by the Government. Administrative expenses are paid out of guaranty fees and interest on loans receivable. Funds in excess of guaranteed loan program requirements may be transferred to miscellaneous receipts of the Treasury. Advances from appropriations available for procurement may be made to this fund for its temporary use. Net earnings are retained to purchase loans when required under guaranty commitments and to cover possible future losses (50 U. S. C. app. 2091).

RIVERS AND HARBORS AND FLOOD CONTROL								
All appropriations.....						4	\$260,000	Used by Chief of Engineers and division engineers for expediting inspections and supervision of authorized projects on large scale where commercial forms of transportation would result in costly delays and cumbersome schedules between works in widely separated sections of the country.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

The budget recommends new obligational authority totaling \$2,793 million for the Department of Health, Education, and Welfare for 1959, a decrease of \$76 million from 1958 and an increase of \$302 million over 1957. The total includes \$335 million for educational programs, of which \$276 million is for programs under proposed legislation.

The decrease in new obligational authority for public assistance grants from 1958 to 1959 is \$85 million. This does not reflect a decrease in program requirements but results from technical adjustments in the financing of this activity as explained below. New obligational authority for all other programs is \$9 million greater in 1959 than in 1958.

The activities of the Department fall, roughly, into four major categories: Public assistance, representing 65% of the recommended appropriations; promotion of public health, 21%; promotion of education, 12%; and other related welfare activities, 2%.

Appropriations for 1959 are requested at the 1958 level for constructing waste treatment works and for vocational education. The Joint Federal-State Action Committee, after studying the division of responsibility between the State and Federal Governments, has recommended transfer of these programs to the States, coupled with appropriate revenue adjustments. There will be adequate time to make these transfers and adjustments by 1960, and it is anticipated that the budget for that year will not include further appropriations for these purposes.

Public assistance.—The major portion of the Federal economic security programs operated under the Social Security Administration are financed from tax receipts under the old-age and survivors' insurance trust fund discussed in part III of the budget. However, the Federal Government also makes grants to States out of general revenues for public assistance benefits and for their administration. These expenditures are included in this part of the budget. Federal expenditures for public assistance in 1959 are estimated at \$1,809 million, compared with the State and local share of \$1,452 million.

Federal budget expenditures in 1959 are expected to be \$251 million more than the 1957 level of \$1,558 million, primarily because of the full-year costs of legislation enacted in 1956 and 1957 which increased the Federal share of the payments made to recipients and which established a separate formula for matching State medical care expenditures. In addition, average payments to recipients have continued to rise. Caseloads have declined in the old-age assistance program, while coverage under the old-age and survivors insurance program has increased. The budget contemplates that old-age assistance caseloads will decline from 2,511,242 in 1957 to 2,475,000 by 1959, a decrease of 1.5%, while the combined caseloads for dependent children, the blind, and the disabled will increase by 10.6%, from 2,674,589 in 1957 to 2,959,800 in 1959.

As indicated above, the new obligational authority for 1959 for the public assistance program is \$85 million less than in 1958. This is because the financial authorizations for this program for one fiscal year customarily include

amounts which are advanced from the coming fiscal year's appropriation in order to meet State requirements on time. The authorizations for 1958 include more in net advances than those for 1957 or 1959. Accordingly, although the budget figures show a decline from 1958 to 1959, actual program requirements are increasing.

The budget includes a proposed supplemental appropriation for 1958 of \$171 million for this program.

Promotion of public health.—Expenditures for the promotion of health are estimated to increase in 1959 to \$629 million, \$56 million more than 1958 and \$168 million over 1957. The increase is due chiefly to expenditures for construction grant programs as actual construction progresses under appropriations enacted for previous years. New obligational authority recommended for 1959 is \$583 million, a net decrease of \$43 million from 1958, reflecting mainly reduced authorizations for hospital construction for which \$75 million is included.

New obligational authority for research programs sponsored by the National Institutes of Health is recommended at the same level as in 1958. This is an increase of more than 100% over 1956. Some increases are provided to expand senior fellowship programs for selected basic research areas. These increases are in part offset by completion in 1958 of the National Mental Health Survey. Of the total new obligational authority of \$211 million in 1959, \$148 million or 70% is for grants to States, to research and educational institutions, and to individual scientists.

Although the \$75 million of new obligational authority requested for 1959 for grants for waste treatment construction and for the construction of research facilities is the same as in 1958, expenditures are estimated to increase from \$52 million in 1958 to \$91 million in 1959.

Grants made to States by the Children's Bureau to promote the health and welfare of children will amount to \$41.5 million in 1959, the same as in 1958 and \$2 million over 1957.

New obligational authority for other major public health programs, including enforcement of the Food, Drug, and Cosmetic Act; operation of Freedmen's and Saint Elizabeths Hospitals; hospital and medical care for American seamen, Coast Guardsmen, and other beneficiaries; Indian health activities; and assistance to States in providing basic health services, are estimated to be \$180 million in 1959, \$3 million more than in 1958.

Promotion of education.—The budget provides increases in 1959 for the Office of Education for studies of educational organization, methods, and curricula in other countries, for expanding research in cooperation with colleges, universities, and State educational agencies, and for the dissemination of information on the organization, financing, and operation of education both to the education profession and to the general public. New obligational authority of \$40.9 million is included to continue vocational education grants at their current level. In addition, increased support for Howard University is included.

The budget also includes new obligational authority of \$145.5 million under proposed legislation to finance the

first year of a 4-year program for assistance in support of science and general education. This proposal includes assistance to the States or to institutions of higher education for (1) encouragement of able students through early identification of aptitudes, improvement and expansion of counseling and guidance services, and scholarships for those needing assistance to obtain college educations, (2) for strengthening science and mathematics instruction, (3) for expansion of graduate school programs including fellowships, (4) for improving the teaching of modern foreign languages, and (5) for improving educational statistics. The programs to be carried out by the States would be matched on a 50-50 basis.

Legislation is also proposed to revise and continue the programs of aid to local schools where enrollments have been substantially affected by activities of the Federal Government. New obligational authority

estimated for 1959 is \$131 million, \$95 million less than for 1958, chiefly because of the legislative revisions proposed which would define more clearly the proper roles of the Federal Government and the local school districts and which would reduce or terminate Federal assistance to districts on behalf of children whose parents reside on privately owned property which is subject to local taxes.

Other welfare services and administration.—The major portion of expenditures under this category is for the Federal-State vocational rehabilitation program. Federal expenditures for this program in 1959 are estimated at \$55.9 million, an increase of \$4.1 million over 1958. The budget contemplates that 85,000 individuals will be rehabilitated during 1959 as compared to 80,000 in 1958 and 70,940 in 1957. In addition, Federal contributions are made to Gallaudet College (for the deaf) and to the American Printing House for the Blind.

Appropriation (new obligational authority).....	6,779,000	9,300,000	9,410,000

The laws enforced hereunder are designed to protect consumers against adulterated and misbranded foods, drugs, cosmetics, therapeutic devices, and caustic poisons.

1. *Enforcement operations.*—Inspections of domestic plants and examinations of interstate shipments are planned according to the relative incidence and seriousness of probable violations. About 83,000 manufacturers, shippers, and warehouses are subject to inspection. Retail establishments are also subject to the prohibition against adulteration or misbranding of articles from interstate sources. Voluntary compliance with the law is promoted wherever possible and permissible to avoid court action, but legal action is taken when necessary. Standards for foods, and tolerances for poisonous substances in foods, and other required regulations are promulgated.

The 1959 budget estimate for enforcement operations provides for initial staffing and auxiliary expenses of a new district office in Detroit, Mich., authorized to be established and equipped in 1958. Also, funds are included to continue the improvement and modernization of facilities of the Food and Drug Administration.

Workload is reflected in the following summary data:

	1957 actual	1958 estimate	1959 estimate
Establishment inspections.....	16,799	18,700	19,600
Import lots inspected.....	29,140	32,400	33,500
Samples collected for examination.....	27,873	31,000	32,000
Laboratory analyses and other examinations....	34,150	35,000	39,500

2. *Civil defense functions.*—The Administration conducts field tests at the site of nuclear explosions to determine effects on foodstuffs, as well as laboratory tests to determine side effects on foods of the industrial uses of atomic power. Training is given to industrial and governmental officials in methods of protecting food supplies from contamination in the event of enemy attack. This activity was funded in 1957 under the Federal Civil Defense Administration's appropriation for Federal agencies.

Certification is made of antibiotics, insulin, and coal-tar colors for use in foods, drugs, or cosmetics. Tolerances are established for residues of pesticide chemicals on or in raw agriculture products. The services are wholly financed by fees paid by the affected industries which are permanently appropriated for this purpose.

Workload data are as follows:

FREEDMEN'S HOSPITAL

Current authorizations:

SALARIES AND EXPENSES

[Salaries and expenses:] For expenses necessary for operation and maintenance, including repairs; furnishing, repairing, and cleaning of wearing apparel used by employees in the performance of their official duties; transfer of funds to the appropriation "Salaries and expenses, Howard University" for salaries of technical and professional personnel detailed to the hospital; payments to the appropriation of Howard University for actual cost of heat, light, and power furnished by such university; **[\$3,000,000] \$2,975,000: Provided**, That no intern or resident physician receiving compensation from this appropriation on a full-time basis shall receive compensation in the form of wages or salary from any other appropriation in this title: *Provided further*, That the District of Columbia shall pay by check to Freedmen's Hospital, upon the Surgeon General's request, in advance at the beginning of each quarter, such amount as the Surgeon General calculates will be earned on the basis of rates approved by the Bureau of the Budget for the care of patients certified by the District of Columbia. Bills rendered by the Surgeon General on the basis of such calculations shall not be subject to audit or certification in advance of payment; but proper adjustment of amounts which have been paid in advance on the basis of such calculations shall be made at the end of each quarter: *Provided further*, That the Surgeon General may delegate the responsibilities imposed upon him by the foregoing proviso. (*32 D. C. Code 317-320; Department of Health, Education, and Welfare Appropriation Act, 1958.*)

CONSTRUCTION PROGRAM

The first stage of the building program, started in 1956, provided for a women's residence hall, which has been completed, and a physical activities-heating plant building, now under construction.

The 1957 budget provided for a classroom-science building and a speech and hearing clinic for which construction contracts have been let. The third stage of the program, provided by a 1958 appropriation, permits construction of a cafeteria and service building (student union) and a men's residence hall. These are now in the planning stage.

The 1959 estimate of \$123,000 is for the preparation of plans and specifications for an auditorium, a classroom and dormitory building for Kendall School, greenhouses, athletic fields and stands, maintenance group building and apartments, and related services. An estimated additional amount of \$2,017,000 will be necessary in the future for the completion of the fourth and final stage at an estimated cost of \$2,140,000.

The following table shows the construction program and the estimated costs:

[Estimated costs]

Project:	Stage I, 1956	Stage II, 1957	Stage III, 1958	Stage IV

Appropriation (new obligational authority).....	3,300,000	3,800,000	4,000,000

NOTE.—Reimbursements from non-Federal sources above are from tuition, other student fees, gifts and grants, endowment income, and sales by auxiliary enterprises.

The university consists of an undergraduate college, a graduate school offering the master's degree and the degree of doctor of philosophy (in chemistry), and eight professional schools. Federal funds provide approximately 54.2% of the operating costs.

1. *General administration.*—The university is administered by a private board of trustees and staff of officers.

2. *Resident instruction and departmental research.*—This activity includes all direct expenditures for the operation of the educational program in the 10 schools and colleges.

3. *General library.*—The general library serves the needs of 10 schools and colleges, and supervises, in part, the professional collections.

4. *Operation and maintenance of physical plant.*—The operation and maintenance staff services 47 buildings located on the university's 60-acre campus.

5. *Auxiliary enterprises and noneducational expense.*—The dormitories, food service, bookstores, and athletic program included under this activity are intended to be self-supporting and render service at lowest possible cost. The noneducational expense covers cost of student-aid program.

A master development plan and plans and specifications for 10 building projects and 1 alteration project have been authorized and completed. Plans and specifications for 2 additional projects, a home economics building and a physical education building, are underway; the former of which is to be completed and the latter partially completed during 1958. The estimate provides for completion of plans and specifications for the physical education building.

CONSTRUCTION PROGRAM

Since 1945 the Federal Government has been financing a major construction program at Howard University which includes the erection of a number of new buildings and alterations and repairs to the existing physical plant. Both direct appropriations and contract authorizations have been available. The following table sets forth the authorized construction programs and the estimated obligational authority available through 1958. Appropriations in the amount of \$11,160,004 have been made to liquidate \$12,754,804 in contract authority, leaving an estimated balance of \$1,594,800 to be financed to the extent needed. An appropriation of \$163,000 is requested for 1959 to liquidate a portion of the unfinanced contract authority for the men's dormitory.

ACTUAL AND ESTIMATED OBLIGATIONAL AUTHORITY THROUGH 1958

Project	Direct appropriation	Construction authorization including rescissions	Total obligational authority	Status of project
Women's dormitory.....	\$665,220	\$1,085,180	\$1,750,400	Completed.
Science hall alterations.....	307,240		307,240	Do.
Engineering building.....	712,700	1,406,160	2,118,860	Do. ¹
Dental building.....	1,542,221	1,715,459	3,257,680	Do. ¹
Pharmacy building.....	904,500		904,500	Do. ¹
Law school building.....	325,000	977,100	1,302,100	Do. ¹

OFFICE OF EDUCATION

Current authorizations:

PROMOTION AND FURTHER DEVELOPMENT OF VOCATIONAL EDUCATION

[Promotion and further development of vocational education:] For carrying out the provisions of section 3 of the Vocational Education Act of 1946, as amended (20 U. S. C., ch. 2; 70 Stat. 1126), and section 202 of said Act (70 Stat. 925), section 4 of the Act of March 10, 1924 (20 U. S. C. 29), section 1 of the Act of March 3, 1931 (20 U. S. C. 30), the Act of March 18, 1950 (20 U. S. C. 31), and section 9 of the Act of August 1, 1956 (70 Stat. 909), including \$4,000,000 for extension and improvement of practical nurse training, and \$228,000 for vocational education in the fishery trades and industry including distributive occupations therein, \$33,750,081: *Provided*, That the apportionment to the States under section 3 (a), (1), (2), (3), and (4) of the Vocational Education Act of 1946 shall be computed on the basis of not to exceed \$29,267,081 for the current fiscal year: *Provided further*, That the amount of allotment which States and Territories are not prepared to use may be reapportioned among other States and Territories applying therefor for use in the programs for which the funds were originally apportioned. (*Department of Health, Education, and Welfare Appropriation Act, 1958.*)

Appropriation (new obligational authority).....	31,442,081	33,750,081	33,750,081

Grants are made to the States, Alaska, Hawaii, Puerto Rico, the Virgin Islands, Guam, and the District of Columbia on the basis of different formulas for training students and teachers in agriculture, home economics, trades and industry, distributive occupations, practical nurse training, and the fishing trades and industry. Additional grants for vocational education are provided through a permanent appropriation.

While the budget recommends continuation of these programs at the 1958 level, it is expected that by the end of 1959 the Federal Government and the States will have had an opportunity to act on the recommendations of the Joint Federal-State Action Committee that the States assume this function entirely. Therefore, it is anticipated that no funds will be required in the 1960 budget for this purpose, should these recommendations be accepted as practicable by the Congress.

Appropriation (new obligational authority).....	108,500,000	41,700,000	850,000

From 1951 through 1958, \$769.1 million has been appropriated for this program, aiding in the construction of an estimated 35,000 classrooms housing about 1 million pupils in 48 States, Alaska, Hawaii, Puerto Rico, and Guam.

1. *Assistance to local educational agencies.*—Grants are made for school construction in local districts overburdened by Federal activities.

2. *Assistance for school construction on Federal properties.*—Where the local education agency is not able to provide school facilities for children living on Federal properties, the Commissioner of Education provides for the construction of schools.

3. *Payments for technical services.*—While the program has been extended through 1959, the estimate will provide only for technical assistance rendered by other agencies in connection with school construction now in progress or to be authorized in 1958.

A supplemental for 1958 is anticipated and appears below. The program is scheduled to expire on June 30,

1959. An estimate for proposed legislation to extend the program with amendments also appears below.

1. *Administration of school assistance in federally affected areas.*—Applications for school construction and school operation expenses in areas where facilities are burdened by Federal activities are examined and acted upon. The

school construction program has been extended to June 30, 1959. The program of aid for operating expenses expires on June 30, 1958. Legislation will be proposed for amendment and extension of both programs, and estimates for this purpose appear below.

2. *Educational services.*—Information is developed and publications are issued related to elementary, secondary, and higher education, and a clearinghouse of information is maintained on the status and developments in school law, both Federal and State. Consultative and advisory services are provided to Federal, State, and local agencies, to professional groups, and to higher educational institutions, and the States are given assistance in the appraisal and development of vocational education programs. Information is also developed and disseminated on education in other countries; educational exchange programs are administered in cooperation with the Department of State and International Cooperation Administration. An amount of \$50,000 is included in the estimate for development of civil defense educational materials.

3. *Research services.*—Assistance is provided on planning research studies and major responsibility assumed for collection and analysis of basic educational statistics. Research and demonstration projects are carried on in cooperation with colleges, universities, and State educational agencies. Projects are supported in such problem areas as education of the mentally retarded, development of students with special abilities, staffing the Nation's schools, and the educational implications of changes in the country's economy. In 1957, \$647,894 was obligated for 42 cooperative research projects in education of the mentally retarded and \$350,336 for 30 projects in other problem areas.

Payments are made to assist in the maintenance and operation of schools in local districts overburdened by Federal activities. However, where such districts cannot assume responsibility for educating federally connected children, payments are made to other agencies for the direct operation of schools under Federal auspices.

In 1958 payments will be made to about 3,500 school districts enrolling approximately 1,300,000 federally connected pupils in all the States, Alaska, Guam, Hawaii,

Grants are made to the States on a dollar-for-dollar matching basis to assist the States in paying the salaries of teachers of agriculture, trade, home economics, and industrial subjects, and for the training of teachers of these subjects (20 U. S. C. 11-18).

In accordance with the recommendation of the Joint Federal-State Action Committee that the function of vocational education be assumed entirely by the States, legislation is expected to be proposed for repeal of vocational education grants under the Smith-Hughes Act of 1917. Therefore, it is not anticipated that the 1960 budget will carry funds for this purpose.

Program by activities:			
Payments for education in federally affected areas (total obligations).....			\$110,000,000
Financing:			
Proposed supplemental appropriation.....			110,000,000

Under proposed legislation, 1959.—Public Law 874, 81st Congress, which authorizes aid for maintenance and operating expenses of school districts in areas overburdened by Federal activities, expires June 30, 1958. Legislation will be proposed to extend this program for 5 years with amendments to define more clearly the appropriate role of the Federal Government in aiding such local school districts. Included in such amendments will be provision for a gradual decrease in payments on behalf of children whose parents reside on privately owned property while employed on Federal property. A supplemental appropriation of \$110 million is anticipated for 1959.

ASSISTANCE FOR SCHOOL CONSTRUCTION

Program by activities:			
Assistance to States and educational institutions (total obligations).....			\$145,500,000
Financing:			
Proposed supplemental appropriation.....			145,500,000

Under proposed legislation, 1959.—Legislation will be proposed to help strengthen the capacity of our educational system to meet critical national needs. The proposal will include assistance to States or educational institutions for the following purposes: (1) Encouragement of able students through early identification of aptitudes, improvement and expansion of counseling and guidance services, and scholarships for those needing assistance to continue their education, (2) strengthening of science and mathematics instruction in public secondary schools, (3) expansion of graduate education, including fellowships, (4) improvement of modern foreign language teaching, and (5) improvement of educational statistics. A supplemental appropriation of \$145.5 million is anticipated for 1959.

services to handicapped individuals so they may engage in remunerative employment. These services include medical restoration as well as education and training. The requisite State matching varies with per capita income and averages about 38% of the total program.

SIGNIFICANT PROGRAM DATA

	1957 actual	1958 estimate	1959 estimate
Grants to States.....	\$36,054,310	\$41,500,000	\$47,000,000
State matching funds.....	21,629,551	25,800,000	28,400,000
Number of clients.....	238,592	265,000	294,000
Number of completed rehabilitations.....	70,940	80,000	85,000

¹ A proposed supplemental of \$1,400,000 is anticipated to provide additional matching funds for grants for basic rehabilitation services.

2. *Extension and improvement projects.*—Under this activity, funds are provided for grants on a matching basis more favorable to the States to encourage the extension of State programs in providing new services.

3. *Research grants and demonstrations.*—This program supports projects which hold promise of making a contribution to the solution of vocational rehabilitation problems common to all or several States. These funds are made available to public and private nonprofit organizations to cover part of the cost of these projects. Selected demonstration projects provide application of research findings and accelerate services to selected groups of severely disabled persons.

The 1959 request comprises: \$3,100,000 for continuation of research and demonstration projects; and \$500,000 for new projects.

This Office administers the program of grants for vocational rehabilitation, the vocational rehabilitation training program, and the program of licensing the blind to operate vending stands on Federal and other properties.

1. *State plans, grants, and program evaluation.*—Supervision is exercised over State administration of grants financed by the appropriation "Grants to States and other agencies." State plans are approved, allotments and grants made; field relationships with States are coordinated; program accomplishments are evaluated; rehabilitation studies and a program of research and statistics are conducted; publications are prepared; assistance is given to States in interpreting their programs to the public; and old-age and survivors insurance referrals are coordinated.

2. *Specialized services to States.*—Standards pertaining to technical aspects of rehabilitation, medical services and facilities and special services to the blind are developed; and technical advisory services, including organization and management, are provided.

3. *Research grants and demonstrations.*—Grants to States and other agencies for projects to develop new rehabilitation methods are administered under this activity and financed under "Grants to States and other agencies."

4. *Training and traineeships.*—Grants for training and traineeships to provide additional specialized personnel to work in rehabilitation are administered under this activity and financed under "Training and traineeships."

Program by activities:			
Vocational rehabilitation services (total obligations).....		\$1,400,000	
Financing:			
Proposed supplemental appropriation.....		1,400,000	

Under existing legislation, 1958.—A supplemental request of \$1,400,000 is anticipated to provide additional Federal matching funds for grants for basic rehabilitation services. Allotments to States presumed the availability of more State matching funds than were anticipated in the 1958 appropriation.

PUBLIC HEALTH SERVICE

The Service attends to the Federal interest in safeguarding public health by: providing grants-in-aid and technical and consultative services to States for such public health services as the prevention and control of disease, and hospital planning and construction; conducting scientific research and investigations in biology and medicine; enforcing foreign and interstate quarantine regulations; collecting and disseminating information on health problems; and providing medical and hospital care. To perform these major functions the Service is organized as follows: The National Institutes of Health in the research and investigations area; the Bureau of State Services in the Federal-State cooperative health program area; the Bureau of Medical Services in the medical care, hospital, and foreign quarantine area; the National Library of Medicine for the collection, compilation, dissemination, and analysis of medical literature; and the Office of the Surgeon General in the area of administration, formulation of general policy, and planning.

Current authorizations:

For necessary expenses in carrying out the Public Health Service Act, as amended (42 U. S. C., ch. 6A) (hereinafter referred to as the Act), and other Acts, including expenses for active commissioned officers in the Reserve Corps and for not to exceed one thousand six hundred commissioned officers in the Regular Corps; and except as otherwise authorized by the Act of September 30, 1950 (20 U. S. C. 236-244), for expenses of primary and secondary schooling of dependents of Public Health Service personnel stationed in foreign

countries, in amounts not to exceed an average of \$250 per student, when it is determined by the Secretary that the schools, if any, available in the locality are unable to provide adequately for the education of such dependents, and for the transportation of such dependents between such schools and their places of residence when the schools are not accessible to such dependents by regular means of transportation; and for the payment of compensation to consultants or individual scientists appointed for limited periods of time pursuant to section [207 (e)] 207 (f) or section [207 (f)] 207 (g) of the Act at rates established by the Surgeon General not to exceed \$15,000 per annum; as follows: (*Department of Health, Education, and Welfare Appropriation Act, 1958.*)

ASSISTANCE TO STATES, GENERAL

[Assistance to States, general:] To carry out the purposes not otherwise specifically provided for, of section 314 (c) of the Act; to provide consultative services to States pursuant to section 311 of the Act; to make field investigations and demonstrations pursuant to section 301 of the Act; to provide for collecting and compiling mortality, morbidity, and vital statistics; to provide traineeships pursuant to section 306 of the Act; and not to exceed \$1,000 for entertainment of officials of other countries when specifically authorized by the Surgeon General; [\$22,592,000] \$22,889,000. (*Department of Health, Education, and Welfare Appropriation Act, 1958; Federal Civil Defense Act of 1950, as amended.*)

1. Grants—(a) *To States for general health.*—Grants are made to assist the States in supporting basic State and local health services, such as public health nursing, laboratory services, vital statistics, sanitary engineering, and control of communicable diseases. The 1959 estimate will also assist the States in (1) developing health services for the aged, occupational health, accident prevention and diabetes control; (2) encouraging application of new research discoveries; and (3) training public health personnel. The 1958 grant level is proposed to be maintained in 1959.

(b) *For public health training.*—Grants and awards are made to increase the number of professional public health personnel with at least 1 year of graduate or specialized training in public health and to assist in overcoming the acute shortage of trained public health personnel. Approximately 500 man-years of training will be provided in 1958 and 1959.

2. *Direct operations*—(a) *Technical assistance to States.*—Assistance is rendered to State public health activities including civil defense through technical and professional consultative services, dissemination of the results of special studies of public health practices, and the conduct of training programs.

PUBLIC HEALTH SERVICE—Continued

Current authorizations—Continued

ASSISTANCE TO STATES, GENERAL—Continued

(b) *Vital statistics.*—Vital statistics data are collected, analyzed, and disseminated on births, deaths, stillbirths, illnesses, marriages, and divorces.

(c) *International health activities.*—International health responsibilities are to (1) develop the United States position on international health matters, and provide representation at international health meetings; (2) serve as a clearinghouse for information on health conditions and needs in other countries; and (3) administer training programs for foreign health personnel in the United States.

(d) *Special health services.*—(1) *Health of the aged and chronic disease.*—Studies to develop and improve methods for the identification and prevention of chronic illness, for the care and restoration of the chronically ill and aged, and for meeting special health problems of the aged population will be continued. Assistance is given health departments in the application of improved techniques through technical assistance, demonstrations, and training.

(2) *Occupational health.*—Research on occupational disabilities is conducted and assistance is provided to Federal, State, and local agencies and industry in preventing and controlling occupational hazards and diseases and in developing privately financed employee health services.

(3) *Accident prevention.*—A program of research to determine the extent and cause of accidents, and to develop techniques for their prevention will be continued and, through technical assistance, agencies ultimately responsible for accident prevention will be encouraged to adopt proven safety techniques.

These activities supplement public health services in Alaska to meet the needs of an expanding population, and settlement of new areas. These activities include special studies of disease and sanitation problems of Alaska, many of which differ from those in continental United States.

1. *Special grants for—(a) General health.*—This grant supplements Territorial, local, and other funds available to the Alaska Department of Health.

(b) *Mental health.*—This grant is to assist the Territory in paying for the cost of treatment and care of the Alaska mentally ill.

2. *Direct operations—(a) Technical assistance.*—The Public Health Service assists Alaska through loan of personnel, procurement of supplies, and provision of other services relating to control of venereal diseases and tuberculosis and to sanitation and other general health problems.

(b) *Field and laboratory investigations.*—The Service operates the Arctic Health Research Center in Alaska and conducts studies of environmental sanitation, epidemiology, entomology, animalborne diseases transmissible to man, biochemistry and nutrition, and physiology.

Appropriation (new obligational authority).....			6,500,000

Public Law 830, approved July 28, 1956, provides for the progressive transfer of responsibility for the mentally ill of Alaska from the Federal Government to the Territory of Alaska over a 10-year period ending June 30, 1967. As an integral part of this transfer, an appropriation of \$6,500,000 was authorized for the construction of hospital facilities for the mentally ill in Alaska where there are now no facilities, thus eliminating the necessity of transporting mentally ill persons to the United States to be cared for.

The 1959 appropriation of \$6,500,000 will enable the Territory to construct a central hospital of about 225 beds in Anchorage and smaller acute treatment units of 30 and 20 beds each in Fairbanks and Juneau. In addition, if possible within the appropriation, the Territory will construct one- or two-bed brief-care units in general hospitals in strategic areas, and facilities for the administration of preventive and outpatient services.

During 1957 over 350,000 cases of major venereal diseases were reported. The syphilis caseload increased, for the second consecutive year, by over 9,000 for a total of more than 135,000 cases while gonorrhea declined almost 17,000 to 216,500 cases.

1. *Grants to States for venereal disease control.*—Case-finding projects are supported in selected areas where venereal disease incidence and prevalence still remain high.

2. *Direct operations*—(a) *Clinical and laboratory research.*—Research is directed toward maintenance of uniformly satisfactory nationwide serologic services; development and introduction of new syphilis diagnostic tests; development of an immunizing agent for syphilis; improvement of diagnostic techniques for gonorrhea; evaluation of more effective methods of therapy; and the improvement of control procedures.

(b) *Technical assistance to States.*—Epidemiologic services are directed toward the maintenance of nationwide and international intelligence and control of venereal disease in areas of particular concentrations of agricultural, industrial, and military personnel and in numerous small high-prevalence areas that might become the foci for spread of infection. Consultation is furnished to States through the regional offices in determining problem areas, infection sources, and control techniques required. Scientific information and educational media are disseminated through State agencies.

1. *Grants to States for tuberculosis control.*—Grants are made to assist the States in planning and administering specific control measures, including casefinding, case followup, training of professional workers, and clinical operations. The 1959 reduction reflects the progress made in controlling tuberculosis.

2. *Direct operations—(a) Cooperative applied research.*—In cooperation with State and local health departments, medical schools, private investigators, and others, studies are conducted in the epidemiology, prevention, detection, diagnosis, and therapy of tuberculosis.

(b) *Technical assistance to States.*—Assistance is provided through demonstrations, consultative services, operational studies, and training activities in casefinding, case management, and other tuberculosis control practices.

COMMUNICABLE DISEASE ACTIVITIES

[Communicable diseases:] To carry out, except as otherwise provided for, those provisions of sections 301, 311, and 361 of the Act relating to the prevention and suppression of communicable and preventable diseases, and the interstate transmission and spread thereof, including the purchase, erection, and maintenance of portable buildings; purchase of not to exceed nine passenger motor vehicles for replacement only; and hire, maintenance, and operation of aircraft; [\$6,250,000] \$6,200,000.

[Communicable diseases:] For an additional amount for "Communicable diseases", for emergency measures necessary for the further prevention and control of a threatened or actual epidemic of influenza, \$800,000: *Provided*, That \$2,000,000 may be transferred

from funds appropriated for disaster relief pursuant to the Act of September 30, 1950, chapter 1125, section 8 (64 Stat. 1109), for the purposes specified in this paragraph, including the purchase, without regard to section 3709 of the Revised Statutes, and distribution of supplies and materials for prevention and control and grants to States of money and medical supplies and materials, upon a finding by the Secretary of Health, Education, and Welfare, upon the recommendation of the Surgeon General and the National Advisory Health Council, that a threatened or actual epidemic of influenza constitutes an actual or potential health emergency of national significance.] (*Department of Health, Education, and Welfare Appropriation Act, 1958; Supplemental Appropriation Act, 1958.*)

Appropriated 1958, \$7,050,000

Estimate 1959, *\$6,200,000

* Excludes \$40,000 for activities transferred in the estimates to "Hospitals and medical care."

1. *General disease prevention and control.*—Scientific and technical services in the fields of epidemiology, medicine, and biology, including reference diagnostic laboratory services, are made available to State and local health departments by investigations, consultation, and demonstrations. Public health workers are trained in laboratory and other public health techniques, and training materials are produced for use by the States and other agencies.

2. *Specific disease prevention and control.*—These programs assist in the prevention and suppression of certain important communicable diseases including poliomyelitis, encephalitis, hepatitis, acute respiratory, viral, diarrheal, and animalborne and rodentborne diseases. The higher dollar level in 1958 represents the supplemental appropriation made available to combat anticipated outbreaks of the Asian strain of influenza in the fall and winter of 1957–58.

3. *General epidemic and disaster aid.*—This is utilized to prevent and control outbreaks of disease in disaster areas, and to provide disease control assistance during epidemics, upon request of State health officers. During 1957 aid was provided in 30 emergencies in 19 States.

This program is concerned with the identification of public health problems related to our environment and the development of preventive and control measures in supporting sanitary engineering activities of States and localities.

1. *Air pollution.*—This provides for research and technical assistance to study the effect of air pollution on man's health, and to develop effective methods of control. Public Health Service facilities as well as those of other public and private institutions and individuals through contracts and grants are utilized in carrying out the program. Technical assistance is provided State and local agencies upon request.

2. *Water supply and water pollution control.*—Public and private agencies are assisted in safeguarding public water supplies and protecting the quality of water resources. This is accomplished through grants to States and interstate agencies, collection of basic data, research, demonstrations and technical assistance in water pollution and water supply problems. In addition, training and con-

sultative services are provided personnel from public agencies, and from industries. This activity also provides for enforcement against pollution of interstate waters, the development of plans for water supply and water pollution control on an interagency river basin basis, and for the administration of grants for the construction of waste treatment facilities.

3. *Radiological health.*—This includes the development of public health techniques for controlling radiation hazards, training of State and local personnel, and the collection, analysis, and dissemination of information. The increase proposed for 1959 is to prepare for the growing radiological health problem posed by the increasing use of atomic energy.

4. *Milk and food sanitation.*—This provides for research and technical assistance to States in milk and foodborne disease control. Research is carried on to insure that new methods of milk and food processing and distribution will not be hazardous to the public health. Technical services are provided State and local agencies and industry through the certification of interstate milk and shellfish shippers, development and demonstration of methods, evaluation of laboratory techniques, and the presentation of research results.

5. *Interstate carrier and general sanitation.*—This implements the direct Federal responsibility for protecting the health of passengers aboard interstate carriers. It also provides for technical assistance to States on basic sanitation problems, including rural sanitation.

6. *Sanitary engineering center research services.*—This provides the supporting services and specialized technical skills required in common for the various research programs, as well as the maintenance and operating costs of the center.

GRANTS FOR WASTE TREATMENT WORKS CONSTRUCTION

[Grants for waste treatment works construction:] For payments under section 6 of the Water Pollution Control Act, as amended [(70 Stat. 502)] (33 U. S. C. 466e), \$45,000,000, [which together with the amount appropriated under this head in the Second Supplemental Appropriation Act, 1957 (70 Stat. 769) shall be applied to payment on account of allotments made for the current and preceding fiscal years pursuant to said Act, such sums] to remain available only until June 30, [1959] 1960: Provided, That allotments under such section 6 for the current fiscal year shall be made on the basis of \$50,000,000. (Department of Health, Education, and Welfare Appropriation Act, 1958.)

Appropriated 1958, \$45,000,000 Estimate 1959, \$45,000,000

PUBLIC HEALTH SERVICE—Continued

Current authorizations—Continued

GRANTS FOR WASTE TREATMENT WORKS CONSTRUCTION—Con.

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
Grants for construction (total obligations).....	\$37,621,092	\$57,378,908	\$45,000,000
Financing:			
Unobligated balance brought forward.....		-12,378,908	
Unobligated balance carried forward.....	12,378,908		
Appropriation (new obligational authority)	50,000,000	45,000,000	45,000,000

Grants are made to States, municipalities, and interstate agencies to stimulate and assist in the construction of sewage-treatment works.

Funds appropriated for such grants are allocated to States and Territories on the basis of population and economic need. Within these allocations, grants for the specific projects may not exceed 30% of the cost of a project or \$250,000, whichever is smaller, with at least 50% of the funds appropriated reserved for communities of 125,000 population or less.

Approval and priority of construction projects are established by the State agency on the basis of financial and water pollution control needs. Projects must be included in a comprehensive program developed for water pollution control and be in conformity with the State water pollution control plan.

In approving projects, the Surgeon General must consider the propriety of Federal aid in accordance with criteria approved by the President, the public benefits to be derived by the construction, the relation of the cost of the project to the public necessity, and the adequacy of provision by the applicant for proper operation and maintenance of the treatment works after completion of the construction.

While this budget recommends continuation of this program at the 1958 level, it is expected that by the end of 1959 the Federal Government and the States will have had an opportunity to act on the recommendation of the Joint Federal-State Action Committee that the States assume this function entirely. Therefore, it is anticipated that no funds will be included in the 1960 budget for this purpose, should this recommendation be accepted as practicable by the Congress.

The Federal Government provides financial assistance to States and Territories, local governments, and nonprofit agencies to defray part of the costs of construction of hospitals, rehabilitation facilities, diagnostic or diagnostic and treatment centers, nursing homes, public health centers, and related health facilities. In addition, these funds permit the Surgeon General to conduct research, experiments, and demonstrations relating to the effective development and utilization of hospital services, facilities, and resources, or to make grants-in-aid to States, political subdivisions, universities, hospitals, and other public and private nonprofit institutions or organizations for such projects.

Funds for construction grants are authorized to be appropriated for each fiscal year through 1959 for allocation to the States and Territories on the basis of population and economic need. Federal participation varies from one-third to two-thirds. Payments are computed under each individual contract and made as construction proceeds.

As of June 30, 1957, a total of 3,514 construction projects had been approved, of which number 2,346 were completed and in operation, 953 under construction, and 215 in preconstruction stages. Upon completion these projects will provide 152,593 hospital beds and 888 public health and other medical facilities. Of the number of approved projects 66% were general hospitals, 3% mental hospitals, 2% tuberculosis hospitals, 3% chronic disease facilities, 17% public health centers, and 9% other related facilities.

Operations and technical services.—States and communities are assisted in making inventories of their hospitals, public health centers, and other classes of facilities, in determining the types of additional facilities required and the need therefor, and in developing coordinated programs to meet the indicated needs. Proposed hospital and other health facilities projects are reviewed to determine eligibility and compliance with the law and regulations. State plans and their annual revisions are reviewed and approved. Project applications, plans and specifications, wage rates, contracts, and payment requests are reviewed for compliance with standards, and technical assistance is provided in programing, planning, architectural, engineering, and other aspects.

HOSPITALS AND MEDICAL CARE

[Hospitals and medical care:] For carrying out the functions of the Public Health Service under the Act of August 8, 1946 (5 U. S. C. 150), including **[\$1,186,000]** \$1,866,000 to be available only for payments for medical care of dependents and retired personnel under the Dependents' Medical Care Act [(70 Stat. 250-254)] (37 U. S. C., chap. 7), and under sections 307, 321, 322, 324, 326, 331, 332, 341, 343, 344, 502, 504, and 810 of the Public Health Service Act, Private Law 419 of the Eighty-third Congress, as amended, and Executive Order 9079 of February 26, 1942, including purchase and exchange of farm products and livestock; conducting research on technical nursing standards and furnishing consultative nursing services; purchase of not to exceed eleven passenger motor vehicles for replacement only; and purchase of firearms and ammunition; **[\$44,399,000]** \$44,309,000, of which \$1,000,000 shall be **[exclusively]** available only for payments to the Territory of Hawaii for care and treatment of persons afflicted with leprosy: *Provided*, That when the Public Health Service establishes or operates a health service program for any department or agency, payment for the estimated cost shall be made in advance for deposit to the credit of this appropriation.

[The limitation under this head contained in the Third Supplemental Appropriation Act, 1957, for payments for medical care of dependents and retired personnel under the Dependents' Medical Care Act is increased by such sum or sums as may be necessary for the purpose.] (*Department of Health, Education, and Welfare Appropriation Act, 1958; Supplemental Appropriation Act, 1958.*)

Appropriated 1958, **\$44,399,000**Estimate 1959, **\$44,309,000**

* Includes \$40,000 for activities previously carried under "Communicable disease activities."

Program and Financing

Financing:			
Advances and reimbursements from—			
Other accounts	-2,549,030	-3,221,350	-3,431,400
Non-Federal sources (42 U. S. C. 221)	-880,335	-558,150	-897,600
Unobligated balance no longer available	461,645	487,500	
Appropriation (new obligational authority)	40,195,000	44,399,000	44,309,000

Sixteen hospitals and 124 outpatient facilities are operated to furnish medical and dental care to legal beneficiaries of the Service. The major beneficiary groups are American seamen, coastguardsmen and their dependents, Bureau of Employees' Compensation cases, persons afflicted with leprosy, and narcotic addicts. Medical care is also provided to foreign seamen and beneficiaries of other Federal agencies on a reimbursable basis.

1. Operation of hospitals.—This activity consists of 12 general hospitals, 1 tuberculosis hospital, 2 neuropsychiatric hospitals which specialize in the treatment of narcotic addiction, and the National Leprosarium at Carville, La. Inpatient loads and outpatient visits are expected to be as follows:

Hospital outpatient visits.....	540,084	555,000	555,000

2. *Operation of outpatient clinics and offices.*—This activity consists of 25 full-time outpatient clinics and 99 outpatient offices, with 544,193 visits in 1957, and 565,000 estimated for 1958 and 1959. It also finances care of patients in contract hospitals.

3. *Operation of health units.*—The Service operates a health program for the Department of Health, Education, and Welfare and conducts programs for other Federal agencies on a reimbursable basis.

4. *Coast Guard medical services.*—Medical services are provided for Coast Guard personnel at shore stations and on vessels.

5. *Development and coordination of nursing resources.*—Methods are developed and applied to increase and improve nursing services and education throughout the country, and to better utilize nursing personnel skills; research is conducted on the fundamental problems of nursing, and research on nursing problems by independent investigators is stimulated.

6. *Nurse training grants.*—Grants are provided for 800 traineeships in 1959 to prepare nurses to be teachers, supervisors, and administrators.

7. *Personnel detailed to other agencies.*—Medical, dental, and other professional personnel are detailed to certain other Federal agencies on a reimbursable basis.

8. *Dependents' medical care.*—This activity provides funds for care in non-Public Health Service facilities for dependents of Public Health Service beneficiary members of the uniformed services and retired personnel. Direct care is provided in activities 1 and 2 above.

9. *Payments to Hawaii.*—Grants are made to Hawaii to defray the cost of care and treatment of persons afflicted with leprosy. Average daily patient load is expected to be 299 in 1959.

Unobligated balance carried forward	11,526,172	9,472,900	
Appropriation (new obligational authority)	8,762,000	3,130,000	2,374,000

The 1959 funds are required to complete construction of all Indian health projects (except hospitals) which have been previously authorized.

The estimates developed at the time of the original submissions were understated. Furthermore, there has been reported an increase of approximately 5% in construction costs per year. This will require funds of \$2,374,000 distributed as follows: Hospitals and clinics, \$99,600; personnel quarters, \$714,000; alterations, \$1,560,400.

GENERAL RESEARCH AND SERVICES, NATIONAL INSTITUTES OF HEALTH

【National Institutes of Health, general research and services:】 For the activities of the National Institutes of Health, not otherwise provided for, including research fellowships and grants for research projects and training grants pursuant to section 301 of the Act; regulation and preparation of biologic products, and conduct of research related thereto; 【purchase of not to exceed eight passenger motor vehicles for replacement only; not to exceed \$2,500 for entertainment of visiting scientists when specifically approved by the Surgeon General; erection of temporary structures;】 and grants of therapeutic and chemical substances for demonstrations and research;

【\$14,026,000】 \$17,742,000: Provided, That funds advanced to the National Institutes of Health management fund from appropriations included in this Act shall be available for purchase of not to exceed nineteen passenger motor vehicles, of which fourteen shall be for replacement only; not to exceed \$2,500 for entertainment of visiting scientists when specifically approved by the Surgeon General; and erection of temporary structures. (42 U. S. C. 241, 262, and 263; Department of Health, Education, and Welfare Appropriation Act, 1958.)

Appropriated 1958, \$14,026,000 Estimate 1959, " \$17,742,000

* Includes \$3,224,000 for activities previously carried under:
 "National Cancer Institute, Public Health Service"..... \$348,000
 "Mental health activities, Public Health Service"..... 801,000
 "National Heart Institute, Public Health Service"..... 1,120,000
 "Dental health activities, Public Health Service"..... 127,000
 "Arthritis and metabolic disease activities, Public Health Service"..... 193,000
 "Allergy and infectious disease activities, Public Health Service"..... 86,000
 "Neurology and blindness activities, Public Health Service"..... 549,000
 The amounts obligated in 1957 and 1958 are shown in the schedule as comparative transfers.

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
1. Grants:			
(a) Research projects	\$7,937,042	\$9,468,000	\$9,468,000
(b) Research fellowships	1,354,331	2,260,000	2,760,000
(c) Training	1,269,121	2,962,000	2,962,000
Total, grants	10,560,494	14,690,000	15,190,000
2. Direct operations:			
(a) Biologics standards	1,673,813	2,105,000	2,105,000
(b) Review and approval of grants	377,552	455,000	447,000
Total, direct operations	2,051,365	2,560,000	2,552,000
Total obligations	12,611,859	17,250,000	17,742,000
Financing:			
Comparative transfers from (—) or to other accounts	15,444,224	-3,224,000	
Advances and reimbursements from—			
Other accounts	-15,720,034		
Non-Federal sources	-334,720		
Unobligated balance no longer available	120,671		
Appropriation (new obligational authority)	12,122,000	14,026,000	17,742,000

NOTE.—Reimbursements from non-Federal sources above reflect proceeds from sale of meals pursuant to the Department of Health, Education, and Welfare Appropriation Act, 1957, and from the sale of personal property (40 U. S. C. 481 (c)). Reimbursements from other accounts include \$734,000 comparative reimbursable obligations.

Eight appropriations for research operations and grants of the National Institutes of Health are for General Research and Services, the National Cancer Institute, the National Institute of Mental Health, the National Heart Institute, the National Institute of Dental Research, the National Institute of Arthritis and Metabolic Diseases, the National Institute of Allergy and Infectious Diseases, and the National Institute of Neurological Diseases and Blindness. Funds from each of these appropriations are pooled to finance research and selected services provided centrally, including the clinical center, through a management fund.

Obligations for these grant programs and direct operations are as shown in the following table:

	1957 actual	1958 estimate	1959 estimate
Grants	\$123,112,000	\$147,376,000	\$147,626,000
Direct operations	46,744,000	63,538,000	63,557,000
Total, National Institutes of Health grants and direct operations	169,856,000	210,914,000	211,183,000

The appropriation for general research and services finances research and training activities relating to basic problems in public health, medical, biological and chemical fields not related to a particular institute. It also finances the division of biologics standards which is responsible for the regulation of biologic products and the conduct of related research.

1. Grants—(a) Grants for research projects.—Funds for 1958 and 1959 will support approximately 770 grants to medical and other institutions for research projects, compared to 653 in 1957.

(b) *Research fellowships.*—Fellowships are awarded to individuals to increase the number of scientists qualified to carry on independent research. Approximately 721 fellowships will be supported in 1958 and 771 in 1959, compared to 612 in 1957.

(c) *Training grants.*—The experimental training grant program initiated in 1957 will continue in 1958 and 1959. This program has permitted 8 leading medical schools in 1957 and an additional 6 schools in 1958 to explore the various means for identifying and giving special research training to gifted medical students. Funds will support approximately 90 training grants in the basic medical and biological disciplines in 1958 and 1959, compared to 23 in 1957.

2. *Direct operations*—(a) *Biologics standards.*—Activities include administration of the Biologics Control Act, establishment of standards for preparation of biologics, testing of vaccines and their preparation, and research related to development, manufacture, testing, and use of vaccines and analogous products.

(b) *Review and approval of grants.*—Review is made of applications for grants for research projects, research fellowships, and training grants, and approval is given to qualified applicants for awards. Review of such centrally administered programs as the postgraduate and foreign fellowships programs and training grants in the basic sciences also is provided.

NATIONAL CANCER INSTITUTE

【National Cancer Institute:】 To enable the Surgeon General, upon the recommendations of the National Advisory Cancer Council, to make grants-in-aid for research and training projects relating to cancer; to cooperate with State health agencies, and other public and private nonprofit institutions, in the prevention, control, and eradication of cancer by providing consultative services, demonstrations, and grants-in-aid; and to contract on a cost or other basis for supplies and services by negotiation, without regard to section 3709 of the Revised Statutes, in connection with the chemotherapy program, including indemnification of contractors to the extent and subject to the limitations provided in title 10, United States Code, section 2354, except that approval and certification required thereby shall be by the Surgeon General; and to otherwise carry out the provisions of title IV, part A, of the Act;

【\$56,402,000】 \$55,923,000. (42 U. S. C. 281—286; Department of Health, Education, and Welfare Appropriation Act, 1958.)

Appropriated 1958, \$56,402,000 Estimate 1959, * \$55,923,000

* Excludes \$348,000 for activities transferred in the estimates to "General research and services, National Institutes of Health." The amounts obligated in 1957 and 1958 are shown in the schedule as comparative transfers.

1. *Grants*—(a) *Grants for research projects.*—Funds for 1958 and proposed for 1959 will support approximately 1,417 grants to medical and dental schools and other institutions for research projects, compared to 1,167 in 1957.

(b) *Research fellowships.*—Fellowships are awarded to individuals to increase the number of scientists qualified to carry on independent research. Approximately 397 fellowships will be supported in 1958 and 1959, compared to 385 in 1957.

(c) *Training grants.*—Grants are awarded to accredited schools for the improvement of instruction in the curriculum; clinical traineeships are awarded to individuals for specialized postgraduate training and technician traineeships for specialized cytologic training; and grants are awarded to research training centers for individual traineeships. The following table summarizes these grants:

	1957 actual	1958 estimate	1959 estimate
Improvement of instruction.....	140	139	136
Clinical traineeships.....	178	165	165
Technician traineeships.....	1	30	30
Research training centers.....	30	30	30
Number of traineeships.....	(213)	(213)	(213)

(d) *Grants for State control programs.*—Funds are provided to States and Territories on a formula basis for strengthening State and local clinical and educational services.

(e) *Grants for field investigations.*—Grants are made to local health agencies, universities, hospitals, and non-profit professional organizations to develop, initiate, or establish improved types of cancer control techniques and devices.

2. *Direct operations*—(a) *Research.*—Research is conducted in biochemistry, biology, biometry, epidemiology, chemotherapy, endocrinology, environmental cancer, pathology, physiology, radiation, and surgery.

(b) *Review and approval of grants.*—Review is made of applications for grants for research projects, research fellowships, and training grants, and approval is given to qualified applicants for awards.

PUBLIC HEALTH SERVICE—Continued

Current authorizations—Continued

NATIONAL CANCER INSTITUTE—Continued

(c) *Professional and technical assistance.*—Technical guidance and professional leadership is provided to universities, hospitals, clinics, and public and private non-profit organizations engaged in prevention, diagnosis and treatment of cancer. Field studies and investigations are supported for the acquisition, development and application of new knowledge pertinent to the prevention, control and treatment of human cancer.

(d) *Chemotherapy contracts.*—In addition to chemotherapy activities undertaken through direct research and grants, contracts are made with public and private organizations and universities for directed research in cancer chemotherapy.

	35,197,000	39,217,000	37,697,000

1. *Grants*—(a) *Grants for research projects.*—Funds for 1958 and 1959 will support approximately 540 grants to medical schools and other institutions for research projects, as compared to 484 in 1957, and 50 special project grants for mental health.

(b) *Research fellowships.*—Fellowships are awarded to individuals to increase the number of scientists qualified to carry on independent research. In 1957, 147 fellowships were provided and it is estimated that 146 can be provided in both 1958 and 1959.

(c) *Training grants.*—Training grants are awarded to accredited schools for the improvement of instruction in the curriculum and for traineeships to individuals for postgraduate training. In both 1958 and 1959 approximately 500 training grants can be awarded. These include funds for about 1,900 traineeships. In 1957 441 grants provided funds for 1,739 traineeships.

(d) *Grants for State control programs.*—Grants are made to States and Territories on a formula basis to assist in establishing, improving, and maintaining community mental health programs.

2. *Direct operations*—(a) *Research.*—Laboratory and clinical research is conducted in neurochemistry, neurophysiology, psychology, neuropsychiatric studies, socio-environmental studies, and neuropharmacology (including narcotics and barbiturate addiction).

(b) *Review and approval of grants.*—These operations provide for review and evaluation of applications for grants for research projects, research fellowships, and training grants.

(c) *Training activities.*—Consultation is furnished to schools on modification of training procedures, techniques, and curriculum development, and for the inservice training of employees.

(d) *Professional and technical assistance.*—These operations consist of assistance to States in developing, and expanding local mental health programs through consultation services, and field studies in developing preventive and outpatient services; survey and development of special areas in mental health; consultation services for mental hospitals and related institutions; and the psychopharmacology service center.

NATIONAL HEART INSTITUTE

【National Heart Institute:】 For expenses necessary to carry out the purposes of the National Heart Act, 【\$35,936,000】 \$34,712,000. (42 U. S. C. 287; Department of Health, Education, and Welfare Appropriation Act, 1958.)

Appropriated 1958, \$35,936,000 Estimate 1959, = \$34,712,000

* Excludes \$1,120,000 for activities transferred in the estimates to "General research and services, National Institutes of Health." The amounts obligated in 1957 and 1958 are shown in the schedule as comparative transfers.

Appropriation (new obligational authority).....	33,396,000	35,936,000	\$34,712,000

1. Grants—(a) Grants for research projects.—These grants are made to medical schools, other institutions, and to individuals for research projects. Approximately 1,333 research projects will be supported in 1958 and 1959, as compared to 1,245 in 1957.

(b) Research fellowships.—Predoctoral, postdoctoral, special, and part-time medical student fellowships are awarded to individuals to increase the number of research workers in the area of cardiovascular diseases. Approximately 372 awards will be supported in 1958 and 1959, as compared to 318 in 1957.

(c) Training grants.—These grants in 1958 will provide assistance to 101 schools of medicine, osteopathy, and public health for support of undergraduate training. Funds will provide for 73 grants for graduate research and clinical training, including 395 traineeships. In addition, approximately 23 direct clinical traineeships will be awarded to individuals for specialized postgraduate training. In 1957 comparable schools, grants, traineeships, and direct clinical awards were 100, 61, 324, and 98, respectively. Elimination of direct traineeships in 1959 will provide for inclusion of 1 additional medical school in the undergraduate program and 3 additional graduate training grants, including about 16 trainees, with no increase in funds.

(d) Grants for State control programs.—Grants are made to States and Territories, distributed on a formula basis, for improving State and local programs in prevention, education, community services, and operational research concerning cardiovascular diseases.

2. Direct operations—(a) Research.—Research is conducted in new and improved therapeutic agents, diagnostic instrumentation, and in clinical medicine on coronary artery disease, hypertension, arteriosclerosis, congestive heart failure, and related problems.

(b) Review and approval of grants.—Review is made of applications for grants for research projects, research fellowships, and training grants, and approval is given to qualified applicants for awards.

(c) Training activities.—Inservice training is provided for positions requiring unique combinations of cardiovascular training and experience.

(d) Professional and technical assistance.—Technical guidance and professional leadership are furnished to State and local health departments on heart program management in the fields of medicine, nursing, nutrition, medical social work, records and statistics, and program promotion.

1. *Grants*—(a) *Grants for research projects.*—Approximately 257 grants to dental schools and other institutions for research projects will be supported in 1958 and 1959, as compared to 265 in 1957.

(b) *Research fellowships.*—Fellowships are awarded to individuals to increase the number of qualified investigators for research in dental health. Approximately 305 fellowships, including 240 part-time dental students, will be supported in 1958 and 1959, as compared to 307 fellowships for 239 students in 1957.

(c) *Training grants.*—Approximately 15 grants will be awarded to schools to train some 75 individuals for academic teaching and research careers in the various fields of dental science; 15 grants to train 75 individuals were made in 1958, and 19 for 40 individuals in 1957.

2. *Direct operations*—(a) *Research.*—Research is conducted in the fields of periodontal diseases, growth and development, oral surgery, bacteriology, pathology, histology, oral and biological chemistry, epidemiology, and biometry.

(b) *Review and approval of grants.*—Applications for grants for research projects, research fellowships, and training grants are reviewed.

(c) *Professional and technical assistance.*—Funds are provided for the development of effective dental public health methods for widespread application in States and communities and to furnish technical and professional assistance.

(d) *Coordination and development of dental resources.*—Funds are provided for investigations into the status of the Nation's dental health, for study and appraisal of dental manpower, and for evaluation and development of methods for extending the availability of dental care to the American people.

Appropriation (new obligational authority)	15,885,000	20,385,000	\$20,592,000

1. *Grants*—(a) *Grants for research projects*.—Approximately 786 grants to medical schools and other institutions, and to individuals for research projects were supported in 1957. 850 are being supported in 1958 and an additional 5 grants will be made in 1959.

(b) *Research fellowships*.—Awards are made to individuals as a step toward assuring the development of an increasing number of scientists qualified to carry on independent research. 65 fellowships are estimated for 1958 and 1959, as compared to 76 in 1957.

(c) *Training grants*.—During 1958 it is estimated that 134 grants will be awarded to accredited schools, for the improvement of instruction, and 55 traineeships will be awarded to individuals for specialized postgraduate training. The corresponding grants and traineeships in 1957 were 110 and 52 respectively. An additional three awards to schools will be made in 1959.

2. *Direct operations*—(a) *Research*.—Clinical and laboratory research is conducted in the fields of arthritis, rheumatism, diabetes, and other metabolic disorders, as well as studies in the major disciplines including pharmacology, toxicology, physiology, biochemistry, nutrition, chemistry, pathology, endocrinology and physical biology.

(b) *Review and approval of grants*.—A review of applications for grants for research projects, research fellowships, and training grants is made, and approval is given to qualified applicants for awards.

Comparative transfers from (—) or to other accounts	—177,110	86,000	
Unobligated balance no longer available	28,461	22,000	
Appropriation (new obligational authority)	13,299,000	17,400,000	17,497,000

1. *Grants*—(a) *Grants for research projects*.—Grants to medical schools, other institutions, and individuals were 787 in 1957, while funds for 1958 will support approximately 870 grants. Funds for 1959 will provide for approximately the same program level.

(b) *Research fellowships*.—Approximately 31 awards will be made in 1958 and 1959 for predoctoral, postdoctoral and special fellowships to increase the number of scientists qualified to carry on independent research. This compares to 33 awards made in 1957.

(c) *Training grants*.—Funds for 1958 and 1959 will provide approximately 30 grants to train individuals in allergy and immunology, parasitology and tropical medicine, mycology and rickettsiology.

2. *Direct operations*—(a) *Research*.—Laboratory, field, and clinical research is conducted in the broad fields of allergic, infectious, and parasitic diseases. The increase in 1959 will provide funds to expand research in allergy and immunology, virology and other respiratory infections.

(b) *Review and approval of grants*.—Review is made of applications for grants for research projects, research fellowships, and training grants, and approval is given to qualified applicants for awards.

1. Grants—(a) *Grants for research projects.*—Grants to medical schools and other institutions made for research projects, totaled 640 in 1957 and approximately 715 will be supported in 1958 and 1959.

(b) *Research fellowships.*—Fellowships are awarded to individuals to increase the scientific manpower available to do research in the fields related to neurologic and sensory disorders. Approximately 178 fellowships, including 62 part-time awards, will be supported in 1958 and 1959, as compared to 275 fellowships in 1957.

(c) *Training grants.*—Funds for 1958 and 1959 will support approximately 130 grants to training institutions to establish and improve programs to train teachers and clinical investigators in neurology, ophthalmology, and otology. Approximately 140 traineeships will be awarded to individuals for specialized postgraduate training in 1958 and 1959. The grants and traineeships were 109 and 75, respectively, in 1957.

2. *Direct operations*—(a) *Research.*—Research is being conducted on disorders of the brain, spinal cord and peripheral nerves, such as epilepsy, cerebral palsy, multiple sclerosis, apoplexy, and Parkinson's disease; on neuromuscular disorders, such as muscular dystrophy; and on visual and other sensory disorders, such as glaucoma, uveitis, cataract and hearing impairments.

(b) *Review and approval of grants.*—Review is made of applications for grants for research projects, research fellowships, and training grants, and approval is given to qualified applicants for awards.

(c) *Training activities.*—Support is given for inservice training of qualified staff members in subjects related to neurological and other sensory disorders.

The National Library of Medicine, previously the Armed Forces Medical Library, assists the advancement of science through the collection and exchange of medical and other scientific information. In addition to cataloging and indexing, the library also publishes biographical guides and provides reference and research assistance.

Public health methods and reports.—This program is primarily concerned with studies of public health practice, economics, and health trends. It includes (a) interpretation of data to evaluate health problems, to measure the available facilities, health personnel, supplies and organizations against those needs, and to provide a factual foundation for public health programs; (b) the national health survey to obtain information on the amount, distribution, and effects of illness and disability in the United States and the services received for such conditions, and the study of techniques for obtaining such statistical information with a view toward their continuing improvement; (c) the provision of advisory services to other Government and non-Government organizations; (d) staff services for the Surgeon General; and (e) publication of Public Health Reports, the official technical journal of the Public Health Service.

Current authorizations—Continued

CONSTRUCTION OF RESEARCH FACILITIES—Continued

Funds remaining available for 1958 will be used to complete additional parking facilities and a waste chemical disposal plant at the National Institutes of Health in Bethesda, Md., which are the final items under this appropriation in construction of the clinical center and related auxiliary structures. The balance unused at the end of 1958 totaling \$95,346 will be administratively rescinded.

This fund is used to provide canteen items for sale to patients at Fort Worth, Tex., and Lexington, Ky., hospitals (57 Stat. 617). Proceeds of sales are available for replenishing stock and operating expense. The capital investment consists of \$10,000 appropriated in 1944 and \$1,715 of donated assets. Earnings are retained to meet possible future losses.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

NATIONAL INSTITUTES OF HEALTH MANAGEMENT FUND

[National Institutes of Health Management Fund: For the purpose of facilitating the economical and efficient conduct of operations in the National Institutes of Health which are financed by two or more appropriations where the costs of operation are not readily susceptible of distribution as charges to such appropriations, there is hereby established the National Institutes of Health Management Fund. Such amounts as the Director of the National Institutes of Health may determine to represent a reasonable distribution of estimated costs among the various appropriations involved may be advanced each year to this fund and shall be available for expenditure for such costs under such regulations as may be prescribed by said Director, including the operation of facilities for the sale of meals to employees and others at rates to be determined by said Director to be sufficient to cover the cost of such operation and the proceeds thereof shall be deposited to the credit of this fund: *Provided*, That funds advanced to this fund shall be available only in the fiscal year in which they are advanced: *Provided further*, That final adjustments of advances in accordance with actual costs shall be effected wherever practicable with the appropriations from which such funds are advanced.] (Department of Health, Education, and Welfare Appropriation Act, 1958.)

The National Institutes of Health management fund was established under authority contained in the Department of Health, Education, and Welfare Appropriation

PUBLIC HEALTH SERVICE—Continued

Intragovernmental funds—Continued

NATIONAL INSTITUTES OF HEALTH MANAGEMENT FUND—CON.

Act, 1958, to facilitate the efficient conduct of operations of the National Institutes of Health which are financed by two or more appropriations. The activities of the fund are financed primarily from advances and reimbursements from the several institutes. Formulas for determining the contribution from each institute are designed to reflect utilization of services performed by the management fund. Taken into consideration are such factors as use of beds in the clinical center, number of laboratory workers, total personnel, and dollar level of grant or direct operations funds obligated by the institute. A small portion of the funds comes from reimbursements from outside sources, principally cafeteria receipts, and some miscellaneous reimbursements from other Government agencies. The 1959 estimate for these activities holds substantially to the 1958 level of service operations.

The centralized organizations of the National Institutes of Health provide supporting services to all programs as follows:

1. *Research supporting services.*—Provides the central administration and operation of services for the conduct of research activities such as the care and breeding of experimental animals, laboratory equipment design and manufacture and the operation and maintenance of the utility services.

2. *Clinical supporting services.*—Consists of the operation of the 516-bed clinical center together with the laboratory space required for the treatment of research patients.

3. *Business operations.*—Provides the centralized business management and plant safety services to the National Institutes of Health, including financial management; personnel; supply management; transportation; and housekeeping services.

4. *Program direction.*—Provides for the executive direction of the research activities at the National Institutes of Health and fosters the extramural research and other activities at the National Institutes of Health.

5. *Research planning.*—Advises on the development, installation, and maintenance of the intramural scientific research program, and the relationship with related research programs and objectives.

6. *Review and approval of grants.*—Provides for the central administration of the research grant programs through the review of grant applications for eligibility and the formulation of plans, policies, and procedures, governing the administration of the research grant and fellowship programs.

7. *Cafeteria.*—The clinical center cafeteria, operated by the nutrition department, furnishes meals for sale to employees and visitors at rates sufficient to cover the cost thereof. Income and expense for 1957, 1958, and 1959 are as follows:

	1957 actual	1958 estimate	1959 estimate
Income from cafeteria sales.....	\$320,756	\$400,000	\$400,000
Expense:			
Foodstuffs and supplies.....	157,579	200,000	200,000

This fund finances certain supplies, services, and equipment for programs of the Service. It is reimbursed from the appropriations supporting the programs benefited (42 U. S. C. 231). Retained earnings amounting to \$116,258 as of June 30, 1957, are being retained against the possibility of future losses.

The principal operations under the fund are carried out at (a) the medical supply depot at Perry Point, Md., which maintains stocks of drugs and other medical supplies to meet in part the requirements of the Service and requisitions of other Government organizations; and (b) the central supply activities at the National Institutes of Health which maintain stores of scientific and other general-use materials and supplies for the laboratories and offices at Bethesda, Md. In contrast to the operations under this revolving fund, the "National Institutes of Health management fund" is an annual account to which appropriated funds are advanced to facilitate the financing of clinical research, research services, administration, and other activities where the costs of operation are not readily susceptible of distribution.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year (inventories and items on order):				
Commodities for sale	\$1,220,798	\$1,140,247	\$1,106,000	\$1,111,000

Farms and other industries operated at the Fort Worth, Tex., and Lexington, Ky., narcotic hospitals provide patients with occupational outlets as a part of their therapeutic rehabilitation. Useful products are made for sale to the hospitals and other Government institutions (42 U. S. C. 258). The non-interest-bearing capital at the end of 1959 is estimated at \$518,121, consisting of \$134,300 in appropriation, \$58,567 in donated assets. Earnings are retained to meet possible future losses.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

The hospital provides care and treatment for the mentally ill who are either beneficiaries of the Federal Government or residents of the District of Columbia which reimburses the hospital for its residents.

Obligations for 1959 are estimated to be \$16,019,000, an increase of \$349,500 compared with 1958.

1. *Operation and maintenance of hospital.*—This activity covers care and treatment of the mentally ill, research on the causes, prevention, and treatment of mental illness, maintenance of hospital buildings, procurement of supplies and materials, and administrative services.

SAINT ELIZABETHS HOSPITAL—Continued

SALARIES AND EXPENSES—Continued

AVERAGE DAILY PATIENT LOAD

	1957 actual	1958 estimate	1959 estimate
Federal beneficiaries.....	1,838	1,863	1,863
District of Columbia residents.....	5,156	5,167	5,167
Total.....	6,994	7,030	7,030

2. *Operation of farm.*—The hospital farm provides occupational therapy benefits for patients. The value of produce usually exceeds the cost of operation.

3. *Operation of cafeteria.*—The hospital operates a cafeteria for employees and others, and sells meals at not less than cost. Proceeds are credited to the appropriation.

4. *Training program.*—The training program provides a source for medical and nursing staff recruitment by training interns, residents in psychiatry, student nurses, and other groups concerned with care and treatment of psychiatric patients. The number of trainees is as follows:

Plans and specifications for a new 250-bed treatment and cafeteria building are being prepared with funds appropriated in 1958. The proposed building will replace an antiquated treatment building constructed in 1871 which is now structurally and physically inadequate to present-day requirements. The proposed building will also provide food service facilities for two adjacent treatment buildings now lacking facilities of this type.

SOCIAL SECURITY ADMINISTRATION

Current authorizations:

LIMITATION ON SALARIES AND EXPENSES, BUREAU OF OLD-AGE AND SURVIVORS INSURANCE

(Trust fund)

[Salaries and expenses, Bureau of Old-Age and Survivors Insurance:] For necessary expenses, not more than \$130,000,000 \$133,300,000 may be expended from the Federal old-age and survivors insurance trust fund: *Provided*, That such amounts as are required shall be available to pay the cost of necessary travel incident to medical examinations for verifying disabilities of individuals who file applications for disability determinations under title II of the Social Security Act, as amended.

Advances to States, next succeeding fiscal year: For making, after May 31 of the current fiscal year, advances to States under section 221 (e) of the Social Security Act, as amended, for the first quarter of the next succeeding fiscal year, such sums as may be necessary from the above authorization may be expended from the Federal old-age and survivors insurance trust fund. (42 U. S. C. 401-422; *Department of Health, Education, and Welfare Appropriation Act, 1958.*)

Program and Financing

Financing:			
Unobligated balance no longer available	87,014		
Limitation	121,500,000	130,000,000	133,300,000

The old-age and survivors insurance program provides protection to over 90% of the total labor force and their families against the loss of earnings because of old age, disability, and death. Tax contributions from employers, employees, the self-employed, and members of the Armed Forces are deposited in the Federal Old-Age and Survivors Insurance and Federal Disability Insurance trust funds, out of which benefit payments and administrative costs are paid.

New estimates of the volume of work to be received in 1958 indicate the need for a supplemental appropriation of \$5,690,000, as shown below. The volume of work appearing under the activities below reflects the new estimates; however, the amounts shown for 1958 in the program and financing schedule do not provide for financing this additional work.

1. *Maintenance of earnings accounts.*—Eligibility for insurance benefits and the amount of benefit payments are based on earnings of individuals which are recorded by the Bureau. Recordkeeping work depends primarily upon the level of employment. The estimated volume for 1958 and 1959 reflects a continued increase in employment and consequently, an increase in the number of reports.

	1956 actual	1957 actual	1958 estimate	1959 estimate
Earnings items received	230,368,278	247,457,394	268,820,000	275,793,000

2. *Processing old-age and survivors insurance claims.*—Prospective beneficiaries file claims in district offices located in more than 500 cities throughout the country. When a claim is approved the Treasury Department is authorized to issue benefit checks. The 1958 estimated workload is lower than 1957 because of (a) the large non-

SOCIAL SECURITY ADMINISTRATION—Continued

Current authorizations—Continued

LIMITATION ON SALARIES AND EXPENSES, BUREAU OF OLD-AGE AND SURVIVORS INSURANCE—Continued

recurring volume of work in 1957 which resulted from the reduction in the retirement age for women, and (b) a large decrease in the number of farm claims as compared with 1957. The claims estimate for 1959 reflects a more normal level of work.

	1956 actual	1957 actual	1958 estimate	1959 estimate
Old-age and survivors insurance claims:				
Received.....	1,936,928	3,335,782	2,330,000	2,276,000
Processed.....	1,925,848	3,318,039	2,335,270	2,280,500

3. *Maintenance of old-age and survivors insurance beneficiary rolls.*—The beneficiary rolls require constant revision so that benefit checks may be mailed promptly each month to beneficiaries whose entitlement continues, and so that checks may be discontinued when entitlement ceases. The number of beneficiaries added to the rolls in 1957 increased 23%. The number to be added in 1958 will continue at a high rate because of the heavy volume of claims processed. The estimate for 1959 returns to the normal long-term growth inherent in the program. Benefit payments will continue to rise with increasing numbers of beneficiaries and higher average benefits.

	1956 actual	1957 actual	1958 estimate	1959 estimate
Old-age and survivors insurance beneficiaries on roll at end of year.	8,673,545	10,654,574	11,826,000	12,749,000
Old-age and survivors insurance benefit payments (in millions)...	\$5,361	\$6,515	\$7,888	\$8,500

4. *Processing disability claims and maintaining beneficiary rolls.*—Disability claims (either to prevent the period of disability from reducing future benefits or for the payment of monthly benefits) are received in more than 500 district offices. Determination of the existence of a disability is made in most cases by State agencies subject to review by the Bureau to assure uniform administration among States. July 1957 was the first month for which disability benefits were payable. Hence, beginning with 1958, the Bureau has the additional function of recertifying monthly entitlement to disability insurance benefits.

The disability claims estimate for 1959 reflects those anticipated during the first year in which applicants will not be able to establish a period of disability retroactively for more than a year. Prior to 1959 a disability may be established back to the date of onset.

	1956 actual	1957 actual	1958 estimate	1959 estimate
Disability claims:				
Received.....	272,285	319,357	375,000	205,000
Processed.....	282,025	292,547	389,220	222,230
Disability beneficiaries on roll at end of year.	-----	-----	200,000	263,000
Disability benefit payments (in millions)....	-----	-----	\$175	\$215

5. *Hearings and appeals.*—Individuals whose claims are disallowed have the right to appeal. Appeals on disability claims have increased the complexity of the hearings and appeals activity and accounts for the sharp increase in volume of cases over prior years. Inasmuch as staffing has not kept pace with workload receipts, large pending backlogs will be carried forward from 1957 into 1958 and 1959.

	1956 actual	1957 actual	1958 estimate	1959 estimate
Appeals cases:				
Received.....	5,418	12,745	16,185	15,720
Processed.....	4,275	6,340	15,520	16,275

6. *Actuarial services.*—Actuarial studies and estimates are prepared for long-range program planning.

Grants for old-age assistance, aid to dependent children, aid to the blind, and aid to the permanently and totally disabled are made to States that have plans for these programs approved by the Department of Health, Education, and Welfare. Fifty-three jurisdictions including all the States, the District of Columbia, Alaska, Hawaii, Puerto Rico, and the Virgin Islands, have approved plans for old-age assistance, aid to dependent children, and aid to the blind; and in 1959, 48 jurisdictions will have approved plans for aid to the permanently and totally disabled.

The Social Security Act amendments of 1956 increased the Federal contribution to assistance expenditures in all jurisdictions. This increase, effective for 9 months of 1957, was applicable to the Federal share of both money payments to recipients, and payments to vendors for medical and remedial care. For Puerto Rico and the

Virgin Islands, the annual amount of Federal funds that can be made available was increased by 25%. For the remaining 51 jurisdictions, the maximums on individual payments for the needy, aged, blind, and disabled were raised from \$55 to \$60, and the Federal share of assistance payments was increased from four-fifths of the first \$25 per recipient to four-fifths of the first \$30 per recipient plus half the balance within the maximum. In aid to dependent children, the maximums were raised from \$30 to \$32 for the first child and the needy relative and from \$21 to \$23 for each additional child in the same family; the Federal share was increased from four-fifths of the first \$15 per recipient to fourteen-seventeenth of the first \$17 plus half the balance within the maximums.

Effective July 1, 1957, the States are permitted a choice of (1) continuing the above money-payment formula for computing the Federal share of money payments and of vendor medical payments; or (2) using this formula to compute the Federal share of money payments only and a separate formula to compute the Federal share of vendor medical payments. Under the separate computation the Federal share of payments to vendors is half the total amounts expended up to an average of \$6 per adult and \$3 per child.

For 1959 the total amount of Federal, State, and local expenditures for assistance and administration is estimated at \$3,276,100,000, of which \$1,823,900,000 represents the Federal share. The appropriation request of \$1,806,400,000 is \$17,500,000 less than the estimated Federal share, because the States will have available for expenditures \$17,500,000 representing the Federal share of collections and adjustments for prior years. Of the total Federal share, \$1,086,100,000 is for old-age assistance, \$539,000,000 for aid to dependent children, \$47,600,000 for aid to the blind, and \$151,200,000 for aid to the permanently and totally disabled.

Based on the most recent program trends and the anticipated full-year effect of recent amendments to the public assistance titles, it is estimated that a supplemental appropriation of \$170,600,000 will be required for 1958 in addition to the \$1,600,000,000 already appropriated.

The appropriation request of \$1,806,400,000 for 1959 is \$35,800,000 more than the total appropriations for 1958. Since approximately \$11,400,000 of the supplemental request for 1958 is due to the fact that this amount was needed to complete the 1957 requirements, the amount required for 1959 actually represents an increase of \$47,200,000 over the amount required for 1958. Of this, it is anticipated that \$21,700,000 is due to an increase in average monthly payments under all programs; \$17,500,000, to an increase in the number of recipients under all programs except old-age assistance; and \$8,000,000, to an increase in the cost of State and local administration.

The figures for 1958 used in the tables appearing under the activities below include that portion of the supplemental of \$170,600,000 needed for 1958 requirements; the figures shown in the program and financing schedule include only the \$1,600,000,000 already appropriated.

1. *Payments to recipients—(a) Old-age assistance.*—The average number of recipients per month for 1959 is estimated at 0.8% fewer than was estimated for 1958. The estimated average monthly payment is \$1.50 more than the estimate for 1958.

	1957 actual	1958 estimate	1959 estimate
Average number of recipients per month	2,511,242	2,495,000	2,475,000
Average monthly payment	\$57.19	\$61.00	\$62.50
Total expenditures for assistance (Federal, State, and local)	\$1,723,362,264	\$1,826,300,000	\$1,856,200,000
Federal share	\$956,012,510	\$1,022,500,000	\$1,026,100,000

SOCIAL SECURITY ADMINISTRATION—Continued

Current authorizations—Continued

GRANTS TO STATES FOR PUBLIC ASSISTANCE—Continued

(b) *Aid to dependent children.*—The average number of persons to receive assistance per month for 1959 is 3% higher than is estimated for 1958. The estimated average monthly payment per person is \$0.43 more than the estimate for 1958.

	1957 actual	1958 estimate	1959 estimate
Average number of recipients per month:			
Families.....	623,147	661,000	681,000
Children.....	1,751,088	1,857,000	1,913,000
Persons.....	2,296,159	2,435,000	2,508,000
Average monthly payment per person.....	\$25.41	\$26.81	\$27.24

The Bureau administers Federal grants to States for old-age assistance, aid to dependent children, aid to the blind, and aid to the permanently and totally disabled. This program is primarily concerned with the development, maintenance, and improvement of sound public welfare programs and the achievement of self-help for needy recipients.

1. *Program policies and standards.*—Interpretive statements, other written materials and specialized technical assistance are provided to assist State agencies.

2. *Review State plans and grants, evaluate State operations.*—Each of the 207 State public assistance programs involves: approving State plans and amendments thereto; making grants; reviewing State and local operations to insure proper expenditure of Federal funds; and providing general consultative services to State agencies to improve administration and quality of service.

3. *Collect and interpret statistics.*—Information developed cooperatively with State agencies is used by the Bureau and the States in formulating policies, planning program content, setting standards, justifying appropriation requests, making legislative recommendations, and guiding administrative action.

4. *Emergency civil defense programs.*—Performance of delegation to assist State and local jurisdictions in implementing plans for emergency financial assistance and clothing to civilians injured or in want as a result of attack.

The Bureau investigates the health and welfare of children and administers grants to the States for improving maternal and child health services, crippled children's services, and child welfare services.

1. *State and local health services for children.*—Policies and requirements for State maternal and child health and crippled children's programs are developed; State plans are approved; consultative services are given to State agencies, other public and voluntary agencies, and educational institutions engaged in training professional personnel; and guides are prepared on the provision of child health services.

2. *State and local social services for children.*—The same approach is used for the child welfare services as for the child health services.

3. *Technical assistance to States and communities for juvenile delinquency programs.*—Consultation is given to States, communities, and organizations, both public and voluntary, on standards and methods for care and treatment of juvenile delinquents, on content of State or local programs, and on problems of organization and coordination on a statewide or local basis; assistance is given to State agencies and educational institutions in planning for training of professional and nonprofessional personnel in the field of juvenile delinquency.

4. *Research in child life and services for children.*—Studies on child health and welfare are conducted, and the programs and services for children are evaluated. The results are interpreted to the public through printed materials.

5. *Information for parents and others working with children.*—Publications are prepared on child health and welfare services. Upon request, assistance is given to

States in interpreting their child health and welfare programs.

Every 10 years since 1909 the President has called a White House conference on children and youth. These conferences are joint undertakings of the Government, States, Territories, and citizens as represented by national organizations concerned with the well-being of children and youth. The funds requested in 1959 will enable the Children's Bureau to work cooperatively with interested organizations in conference planning.

SOCIAL SECURITY ADMINISTRATION—Continued

Current authorizations—Continued

GRANTS TO STATES FOR MATERNAL AND CHILD WELFARE

[Grants to States for maternal and child welfare:] For grants to States for maternal and child-health services, services for crippled children, and child-welfare services as authorized in title V, parts 1, 2, and 3, of the Social Security Act, as amended (42 U. S. C., ch. 7, subch. V), \$41,500,000, of which \$15,000,000 shall be available for services for crippled children, \$16,500,000 for maternal and child-health services, and \$10,000,000 for child-welfare services: *Provided*, That any allotment to a State pursuant to section 502 (b) or 512 (b) of such Act shall not be included in computing for the purposes of subsections (a) and (b) of sections 504 and 514 of such Act an amount expended or estimated to be expended by the State: *Provided further*, That \$1,000,000 of the amount available under section 502 (b) of such Act shall be used only for special projects for mentally retarded children. (*Department of Health, Education, and Welfare Appropriation Act, 1958.*)

Appropriated 1958, \$41,500,000

Estimate 1959, \$41,500,000

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
1. Maternal and child health services.....	\$15,497,506	\$16,500,000	\$16,500,000

Appropriation (new obligational authority).....	39,361,000	41,500,000	41,500,000

The States are required to match one-half of the amounts appropriated for maternal and child health services and crippled children's services, and the remaining funds are distributed to the States in proportion to their financial need. The States are required by law to pay part of the cost of child welfare services, but the share is not specified.

1. *Maternal and child health services.*—Grants are provided to States for the improvement of health services for mothers and children, especially in rural areas.

2. *Crippled children's services.*—Grants are made to States to improve services for crippled children including medical, surgical, corrective, and other care, especially in rural areas.

3. *Child welfare services.*—Grants aid States to establish and strengthen, especially in rural areas and other areas of special need, child welfare services for the protection and care of homeless, dependent, and neglected children, and children in danger of becoming delinquent, and for the return of runaway children to their homes in other States.

The Office of the Commissioner directs and coordinates the social security program and performs basic research covering the broader phase of social security.

1. *Direction and coordination of the social security program.*—This consists of: (a) formulation of administrative policies; (b) certification of compliance of State laws, plans, and operations with Federal requirements and approval of grants to States; (c) coordinating interprogram activities; and (d) review of administrative management throughout the Social Security Administration.

2. *Appraisal and development of the social security program.*—Provision is made for: (a) basic studies beyond the immediate scope of any bureau; (b) review and coordination of research and statistics work in the Administration; and (c) the development of ways of improving economic security through social insurance and related measures.

Grants to States, next succeeding fiscal year: For making, after May 31 of the current fiscal year, payments to States under titles I, IV, V, X, and XIV, and section 705 of title VII, respectively, of the Social Security Act, as amended, for the first quarter of the next succeeding fiscal year, such sums as may be necessary, the obligations incurred and the expenditures made thereunder for payments under each of such titles to be charged to the appropriation therefor for that fiscal year. (*Department of Health, Education, and Welfare Appropriation Act, 1958.*)

In the administration of titles I, IV, V, X, and XIV, respectively, of the Social Security Act, as amended, payments to a State under any of such titles for any quarter in the period beginning April 1 of the prior year, and ending June 30 of the current year, may be made with respect to a State plan approved under such title prior to or during such period, but no such payment shall be made with respect to any plan for any quarter prior to the quarter in which such plan was submitted for approval. (*Department of Health, Education, and Welfare Appropriation Act, 1958.*)

Federal credit unions are privately owned, cooperative associations organized for the purpose of promoting thrift among their members and creating a source of credit for provident or productive purposes, authorized by the Federal Credit Union Act (act of June 26, 1934) as amended to July 31, 1956 (ch. 14, U. S. C. 12).

The Bureau finances its activities out of fees charged for services performed. Additional working capital was provided in 1954 by the appropriation of an interest-bearing loan of \$250,000. It is estimated that this loan will be repaid by the end of 1960.

The Bureau's activities consist of: (1) Chartering new Federal credit unions; (2) supervising established Federal credit unions; (3) making periodic examinations of their financial condition and operating practices; and (4) administrative services. Data relating to activities are shown below.

	1957 actual	1958 estimate	1959 estimate
Number Federal credit unions chartered	692	650	650
Number regular examinations	7,025	9,201	9,601
Number operating Federal credit unions as of December 31 of the previous calendar year	8,350	8,750	9,150
Assets of Federal credit unions as of December 31 of the previous calendar year. \$1,528,559,101 \$1,814,295,482 \$2,138,600,114			

Relation of cost to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year:				
Deferred charges	\$1,471	\$1,703		
Unpaid undelivered orders	2,404	2,639	\$2,500	\$3,000
Total selected resources at end of year	3,875	4,342	2,500	3,000
Selected resources at start of year		—3,875	—4,342	—2,500
Costs financed from obligation of other years, net (—)			—1,842	
Obligations incurred for costs of other years, net		467		500

Operating results.—Fees from receipts cover the costs of operations. Retained earnings are expected to show an increase to \$751,394 through June 30, 1959.

LIMITATION ON SALARIES AND EXPENSES, BUREAU OF OLD-AGE AND SURVIVORS INSURANCE

Under existing legislation, 1958.—A \$5,690,000 increase in the "Limitation on salaries and expenses, Bureau of Old-Age and Survivors Insurance," is anticipated in 1958 due to an increase in the claims workload over the estimates upon which the 1958 limitation was based.

GRANTS TO STATES FOR PUBLIC ASSISTANCE

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
State expenditures:			
Payments to recipients:			
(a) Old-age assistance.....		\$74,500,000	
(b) Aid to dependent children.....		54,500,000	
(c) Aid to the blind.....		1,200,000	
(d) Aid to the permanently and totally disabled.....		17,000,000	
Total, State expenditures.....		147,200,000	
State and local administration:			
(a) Old-age assistance.....		5,450,000	
(b) Aid to dependent children.....		5,975,000	
(c) Aid to the blind.....		325,000	
(d) Aid to the permanently and totally disabled.....		1,250,000	
Total, State and local administration.....		13,000,000	
Obligations for 1958.....		160,200,000	
Amount used to cover 1957 requirements.....		11,361,101	
Estimated increase in amount of collections (—).....		—961,101	
Total obligations.....		170,600,000	
Financing:			
Proposed supplemental appropriation.....		170,600,000	

Under existing legislation, 1958.—A supplemental appropriation of \$170,600,000 is anticipated for 1958, because current trends under each program indicate numbers of recipients and average monthly payments larger than provided for in the 1958 appropriation.

OFFICE OF THE SECRETARY

This Office is responsible for the supervision, direction and guidance of the operating agencies of the Department.

1. *Executive direction and program coordination.*—In addition to overall direction of the Department, special attention is given the federally aided corporations, Federal-State relations, internal security, and problems affecting the aging population.

2. *Publications and reports.*—This Office directs the Department's public information activities, providing services to press, radio, and other media and specific information to those interested.

3. *Administrative and financial management.*—Guidance is furnished the operating agencies with regard to administrative management, personnel, property and records management, office services, organization, staffing and control problems. Budget analysis is made of the Department's programs; fiscal policies and procedures are developed and internal audit is conducted. In addition, certain direct administrative services are furnished.

1. *Field administration.*—This includes review and evaluation of Department field activities; planning for the field organization; and coordination of program operations through 9 regional offices, which provide administrative services for 13,135 employees located in the field. They also coordinate the Department's regional civil defense plans.

2. *Grant-in-aid audits.*—The Division audits 31 grant-in-aid programs to determine whether these grants were expended by the States and local subdivisions for the purposes for which they were appropriated. There will be an incoming current workload of approximately 2,150 audits in 1959. Audits of medical care for public assistance recipients will affect performance in 1959.

3. *State merit system.*—State merit systems are reviewed for compliance with the requirements of Federal law in the various programs. The Division activities relate to 17 types of grants-in-aid and apply to 70 State merit systems, and 290 agencies administering grant programs.

The fund provides reproduction, tabulating, and supply services on a central basis for Department headquarters (42 U. S. C. 905).

Budget program—1. Reproduction.—Consists of offset printing, mimeographing, photographic visual aids, micro-filming and distribution services for the Department's headquarters and for other Government agencies as required. Also includes procurement of printing from Government Printing Office and other sources and procurement and distribution of congressional materials.

2. Tabulating.—Provides machine tabulation services on a centralized basis for all of the headquarters units of the Department. The services performed cover fiscal, payroll, and statistical processing.

3. Supply services.—Includes purchasing and supply functions on a centralized basis for the headquarters units of the Department.

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year:				
Commodities for sale.....	\$75,091	\$80,484	\$80,490	\$80,000
Unpaid undelivered orders.....	36,480	38,743	39,000	39,500
Deferred charges.....	1,468			
Total selected resources at end of year.....	113,039	119,227	119,490	119,500
Selected resources at start of year (—).....		—113,039	—119,227	—119,490
Obligations incurred for costs of other years.....		6,188	263	10

Operating results and financial conditions.—Government investment at the end of 1959 is expected to consist only of donated assets and retained earnings. The earnings are retained to meet future needs.

GENERAL PROVISIONS

SEC. 202. Appropriations under this title available for salaries and expenses shall be available for payment in advance for dues or fees for library membership in organizations whose publications are available to members only or to members at a price lower than to the general public.

SEC. 203. Appropriations under this title available for salaries and expenses shall be available for services as authorized by section 15 of the Act of August 2, 1946 (5 U. S. C. 55a).

SEC. 204. Appropriations under this title available for salaries and expenses shall be available for travel expenses and for expenses of attendance at meetings concerned with the functions or activities for which such appropriations are made.

SEC. 205. Appropriations under this title available for salaries and expenses shall be available for uniforms or allowances therefor as authorized by the Act of September 1, 1954, as amended (5 U. S. C. 2131).

SEC. 206. None of the funds appropriated by this title to the Social Security Administration for grants-in-aid of State agencies to cover, in whole or in part, the cost of operation of said agencies, including the salaries and expenses of officers and employees of said agencies, shall be withheld from the said agencies of any States which have established by legislative enactment and have in operation a merit system and classification and compensation plan covering the selection, tenure in office, and compensation of their employees, because of any disapproval of their personnel or the manner of their selection by the agencies of the said States, or the rates of pay of said officers or employees.

SEC. 207. The Secretary is authorized to make such transfers of motor vehicles, between bureaus and offices, without transfer of funds, as may be required in carrying out the operations of the Department.

SEC. 208. None of the funds provided herein shall be used to pay any recipient of a grant for the conduct of a research project an amount for indirect expenses in connection with such project in excess of 15 per centum of the direct costs.

SEC. 209. None of the obligations authority available to the Department of Health, Education, and Welfare for planning and/or construction of buildings shall remain available after June 30, 1959: *Provided*, That existing obligational authority to the Department of Health, Education, and Welfare for preparation of plans and specifications for the construction of the general office and the dental research buildings of the National Institutes of Health, and the National Library of Medicine building of the Public Health Service, shall remain available until June 30, 1958.

SEC. 210. None of the funds provided herein shall be used, either directly or indirectly, for construction or planning of any building for the Department of Health, Education, and Welfare under the lease-purchase program, nor shall any of the funds provided herein be used to pay the salary of any person who assists or consults with anyone in connection with the construction or planning of any building for the Department of Health, Education, and Welfare under the lease-purchase program.

SEC. 211. To the extent and under the conditions provided by regulations of the Secretary, officers (including commissioned officers of the Public Health Service) and employees of the Department of Health, Education, and Welfare may hereafter, in connection with their attendance at meetings or in performing advisory services concerned with the functions or activities of the Department, be permitted to accept payment, in cash or in kind, from non-Federal agencies, organizations, and individuals, for travel and subsistence expenses, to be retained by them to cover the cost thereof or deposited to the credit of the appropriation from which the cost thereof is paid, as may be provided in such regulations. (*Department of Health, Education, and Welfare Appropriation Act, 1958.*)

SEC. 901. No part of any appropriation contained in this Act shall be used for publicity or propaganda purposes not authorized by the Congress. (*Departments of Labor, and Health, Education, and Welfare Appropriation Act, 1958.*)

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1959

FOOD AND DRUG ADMINISTRATION								
Salaries and expenses.....	25	\$37,500	25	\$2,500	\$35,000	257		For use of inspectors in traveling to food, drug, and cosmetic factories, canneries, warehouses, seafood packers, and other establishments where products subject to the Food, Drug, and Cosmetic Act are prepared, stored, or sold in pursuance of their duties in enforcing the act. 281 of these vehicles are located in the field and 1 is assigned to the inspector of the Baltimore field district who is located in Washington and operates in Washington and those inspectional areas more convenient to Washington than to the Baltimore district.
FREEDMEN'S HOSPITAL								
Salaries and expenses.....						1		1 ambulance for emergency calls and transportation of patients.
PUBLIC HEALTH SERVICE								
Assistance to States, general.....						23	\$5,000	Professional and technical personnel: General health demonstrations, field training, and consultative services in the field.
Grants and special studies, Territory of Alaska.....						2		Engineers and field personnel: Health and sanitation activities in Alaska.
Communicable disease activities.....	9	13,500	9	2,475	11,025	53	15,000	Technical, professional and other personnel: Investigation and control of communicable diseases, and transportation of material related thereto.
Station wagon.....						6		Do.
Bus.....						2		Do.
Sanitary engineering activities.....	4	6,000	4	1,400	4,600	13	15,000	Engineers and field personnel: Environmental health and sanitation activities in the field.
Station wagon.....	5	9,750	5	2,250	7,500	6		Do.
Control of tuberculosis.....						1	1,000	Public health representatives, professional and technical personnel: Demonstrations, casefinding and training activities related to the tuberculosis program in the field.
Station wagon.....						3		Do.
Salaries and expenses, hospital construction services.....						1	3,000	Hospital consultants, architects, and engineers, and other field personnel: Work incident to the construction of hospitals and health facilities in the field.
Hospitals and medical care.....	5	7,500	5	1,250	6,250	19	8,550	Patients and employees: Transportation incident to operation of medical facilities, transport of emergency purchases in the field.
Station wagon.....	4	7,800	4	600	7,200	6	4,320	Do.
Ambulance.....	2	11,000	2	300	10,700	15	540	Patients: Transportation to and from hospitals and public transportation terminals in the field.
Bus.....						2		Patients: Transportation of large groups to other Government installations in the field. School children: Transportation in accordance with 42 U. S. C. 227.
Foreign quarantine activities.....						47	12,600	Officers and employees at Federal foreign quarantine stations: Inspection and fumigation of ships and airplanes arriving from foreign ports.
Station wagon.....						3	13,680	Do.
Indian health activities.....	9	13,500	17	4,250	9,250	97	28,400	Patients and employees: Transportation of patients to hospitals and clinics. Physicians and other public health personnel: Transportation to field locations to render public health services.
Station wagon.....	14	27,300	6	900	26,400	78	11,400	Do.
Ambulance.....	2	11,000	2	200	10,800	25		Patients: Transportation to hospitals and clinics in the field.
Bus.....						4		Patients: Transportation of large groups to other Government installations in the field.
National Institutes of Health management fund.....	14	21,000	14	700	20,300	21	13,000	Research personnel and research patients: Collecting data and material, and transportation from points where public transportation is not adequately available in the field, and package pickup service on nights and week ends.
Station wagon.....	5	9,750			9,750	7		Same as above. Also transporting mail and personnel between Bethesda, Md., the Department of Health, Education, and Welfare and other points in the downtown Washington area.
Ambulance.....						2		Patients: Transportation between the clinical center, Bethesda, Md., and hospitals and transportation terminals in the Washington area.
Bus.....						2		Scientists and other personnel: Transportation between buildings at the National Institutes of Health.
National Cancer Institute.....						1		Consultants, scientists, and other technical personnel: Cancer research programs in the field.
Mental health activities: Station wagon.....							1,100	Children and staff: Transportation of children to and from public schools, parks, etc., in accordance with therapeutic demands and transportation of staff, equipment, etc., between the National Institutes of Health and Saint Elizabeths Hospital.
National Heart Institute.....						2		Heart control consultants and other technical personnel: Heart research control, and demonstration programs in the field.
Dental health activities.....						1	1,200	Professional and scientific personnel: Dental studies and investigations in the field.
Station wagon.....						7		Do.
Allergy and infectious disease activities.....						5		Research personnel: Collecting scientific data and material, and transportation in connection with epidemiological studies and field studies of the Rocky Mountain Laboratory.
Station wagon.....						2		Do.
Salaries and expenses.....							374	Surgeon General, deputy surgeon general and other personnel: Transportation to and from meetings and conferences in the Washington area.
Patients' benefit fund. Public Health Service hospitals: Station wagon.....						1		Patients: Transporting patients at the Carville, La., hospital within a 1-day travel radius of the hospital to and from their homes on authorized vacation leave since patients afflicted with leprosy cannot be carried by public transportation.
Total, Public Health Service.....	73	138,100	68	14,325	123,775	457	134,164	

Statement of proposed obligations for purchase and hire of passenger motor vehicles for the fiscal year 1959—Continued

SOCIAL SECURITY ADMINISTRATION								
Limitation on salaries and expenses, Bureau of Old-Age and Survivors Insurance.						1		Automobile is used by top-level administrative and technical personnel of the Bureau to provide prompt transportation between widely separated Bureau installations in Baltimore, to transport Bureau employees to railroad stations, and occasionally to provide transportation for other U. S. Government officials, Members of Congress, and representatives of foreign governments.
Station wagon.....						1		
Do.....							480	
Passenger bus.....						1		
Total, Social Security Administration.						3	480	A station wagon is rented from the General Services Administration motor pool in New York City. It is used to transport transcripts of payment rolls between Treasury Department disbursing office and the New York area office. The station wagon is also used to haul mail between the area office and the New York post office. Bus is used by Bureau employees, including messengers, to maintain regular shuttle service among the Bureau's widely separated Baltimore locations. The bus is used to transport employees who have duties to perform in different buildings, to carry small amounts of work among buildings, and to distribute the Bureau's mail among buildings.
OFFICE OF THE SECRETARY								
Salaries and expenses, Office of the Secretary.						2	1,630	
Total, Department of Health, Education, and Welfare.....	99	186,100	93	\$16,825	169,275	725	137,850	Secretary, Under Secretary, assistant secretaries: To transport these officials to and from official meetings and conferences with other Government officials, Members of Congress, and officials of international organizations. Messengers: To deliver classified and special mail in the Washington area.

Statement of proposed obligations for purchase, maintenance, and operation of aircraft for the fiscal year 1959

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Appropriation	Aircraft to be purchased		Aircraft to be exchanged		Net cost of aircraft to be purchased	Old aircraft still to be used	Cost of maintenance and operation of aircraft	Users and public purpose
	Number	Gross cost	Number	Allowance (estimate)				
PUBLIC HEALTH SERVICE								
Communicable disease activities.....						4	\$4,700	Professional and technical personnel: Technical development and epidemic control activities of the Communicable Disease Center, including devising spray equipment, appraising new insecticides, testing application rates and efficacy of larviciding. Also for use in epidemics and disasters.

DEPARTMENT OF THE INTERIOR

The 1959 request for new obligational authority for the Department of the Interior is \$583 million, a reduction of \$67 million from the current year. About two-thirds of the reduction, \$44 million, results from the fact that the 1959 new obligational authority for parkways, park roads and Indian roads was made available in 1958, a year in advance, as provided in the Federal-Aid Highway Act of 1956. Despite the reduction in new obligational authority, expenditures are estimated to rise to \$663 million, mainly because some construction work is to be financed by prior year appropriations.

Approximately 87% of the funds requested for 1959 are for the conservation and development of natural resources. Most of the remainder is for educational services and for the administration of Territories and possessions. The budget contemplates that some programs of the Department will be deferred or curtailed in 1959, where this can be done without loss of investments or failure to meet urgent needs. Funds requested for various other programs, such as soil and moisture conservation work on public lands, are being held to about the 1958 levels. Continued attention is being given to effective utilization of manpower, so that to the greatest degree possible improved efficiency can offset higher costs and workloads.

In addition to long-range economic benefits, many programs of the Department of the Interior result in direct financial returns. The estimated receipts for 1959, classified by major sources, are shown below.

Major source of receipts	Estimated receipts in 1959 (millions)
Sale of power.....	\$149
Collections from water users.....	16
Timber sales.....	25
Mineral leasing.....	193
Other.....	76
Total.....	459

Land and water resources.—Expenditures for the conservation and development of land and water resources make up more than half of the total expenditures for the natural resources programs. Much of this is for multipurpose development of the water resources of the West, with consideration given to irrigation, water supply, flood control, navigation, hydroelectric power, and related recreational and fish and wildlife benefits.

Total expenditures for the Bureau of Reclamation for water resources in 1959 are estimated at \$216 million, most of which will be for continuation of construction underway. The budget provides no funds to initiate construction of new projects by the Bureau of Reclamation in 1959. The estimated increase of \$17 million over expenditures in 1958 mainly results from the greater amounts required to continue work on construction projects started before 1958, principally the Glen Canyon Dam and Reservoir in Arizona and Utah and the Trinity division of the Central Valley project in California. A supplemental appropriation of \$10 million will be re-

quested in 1958 to meet additional contract earnings and other expenditures on the Glen Canyon project. The Bureau will continue construction of transmission facilities to market power generated at the Missouri River Basin project. It will also operate transmission facilities to market power from Reclamation and Corps of Engineers projects in the Missouri River Basin and other Reclamation projects except those in the Pacific Northwest.

The Bonneville Power Administration will continue to construct and operate high voltage transmission facilities to integrate 16 Federal hydroelectric plants and to interconnect the Federal grid with non-Federal utility systems throughout the Pacific Northwest. The Southwestern and Southeastern Power Administrations market power generated at 19 Corps of Engineers projects in the respective areas. Expenditures for these power marketing agencies are estimated at \$38 million in 1959, a decrease of \$3 million from the 1958 level.

The budget provides for the management of 468 million acres of public lands in the United States and Alaska by the Bureau of Land Management. The use of these lands for range, forestry, and minerals has been increasing. Recommended new obligational authority in 1959 for the Bureau of Indian Affairs for the management of the resources of the 56 million acres of Indian lands and the construction of roads, irrigation systems, schools and other needed buildings and facilities will be below the 1958 level. Expenditures are estimated to increase, however, from \$42 million in 1958 to \$50 million in 1959, since some of the construction will be financed from unexpended balances of prior years.

Forest resources.—Revenues from the sale of timber on the Oregon and California revested lands and the Coos Bay Wagon Road grant lands are shared with counties in which these lands are situated. These payments are Federal expenditures which are classified under the heading of conservation and development of forest resources.

Timber management activities on public domain and Indian lands are under the heading of land and water resources.

Fish and wildlife resources.—The budget includes funds for the Fish and Wildlife Service to operate 88 stations for the propagation of fishes and 270 wildlife refuges. Research is to be continued on various aspects of waterfowl and fishery activities. Assistance given to commercial fisheries includes marketing technology and news, and loans in certain cases where commercial loans cannot be obtained privately on reasonable terms. The Service also cooperates with States through Federal aid in fish and wildlife restoration, financed from appropriations of funds derived from tax revenues on hunting and fishing gear.

Recreational use of natural resources.—The budget for 1959 provides funds for the third year of a 10-year development program to provide, by 1966, essential facilities for an estimated 80 million visitors to the national parks. Although expenditures for construction in 1959 will be \$7 million below the 1958 expenditures, work will go forward on the most urgently needed facilities.

Promotion of education.—New obligational authority is requested for 1959 at about the same level as 1958 for the Bureau of Indian Affairs to provide educational services for a large number of Indians who live on tax-exempt Indian trust lands. Under current policies, Indian children are enrolled in public schools wherever possible and financial assistance is given to States and local school districts in meeting the costs of educating these children. In some cases the Government operates dormitories to house Indian children who attend public schools. Where public facilities are inadequate or not available, the Bureau operates boarding and day schools. The Bureau provides for adult education and training programs for the Indians, as well as a relocation program under which Indians on reservations will be assisted in settling in communities away from the reservation where employment opportunities have been developed.

Community development and facilities.—The fiscal year 1959 is the final year of a 9-year, \$70 million program of

public works for Alaska which was first authorized by the Congress in 1949. Fifty percent of the aggregate Federal outlays under this program will be recovered from the Territorial Government or from the local Alaskan communities which request the specific projects.

Other aids to business.—Net expenditures of the Alaska Railroad, which is operated by the Office of Territories, are estimated to decline in 1959. Revenues are expected to increase. Outlays for acquisition of assets will increase slightly in 1959, mainly for track improvements and the purchase of rolling stock.

Labor and manpower.—The budget recommends that the health and safety program of the Bureau of Mines be maintained at the same levels as in the current year. Under this program the Department carries on inspections, investigations, research and rescue work to reduce the working hazards in mines.

Revolving and management funds.....	45,941	32,067	27,824
Proposed for later transmission: Appropriations.....		1,188	21
Total balances carried forward at close of year.....	351,185	346,857	254,931
Obligations incurred, net.....	\$616,638	\$700,204	\$644,483

DEPARTMENTAL OFFICES

Current authorizations:

OFFICE OF SALINE WATER

SALARIES AND EXPENSES

For expenses necessary to carry out provisions of the Act of July 3, 1952, as amended (42 U. S. C. 1951-1958), authorizing studies of the conversion of saline water for beneficial consumptive uses, **[\$725,000] \$825,000.** (*Department of the Interior and Related Agencies Appropriation Act, 1958.*)

Appropriated 1958, **\$725,000**Estimate 1959, **\$825,000**

Program and Financing

	1957 actual	1958 estimate	1959 estimate
Program by activities:			
1. Administration and coordination.....	\$100,663	\$125,000	\$165,000
2. Research and development:			
Contracts and grants non-Federal.....	359,300	540,000	600,000
Federal laboratories.....	50,000	60,000	60,000
Total obligations.....	509,963	725,000	825,000
Financing:			
Unobligated balance no longer available.....	40,037		
Appropriation (new obligational authority).....	550,000	725,000	825,000

This program provides for research to develop low-cost processes for converting saline water to fresh water in quantities sufficient for municipal, industrial, and agricultural use.

1. *Administration and coordination.*—This activity covers departmental administration of federally sponsored research, coordination of approximately 100 known Federal and non-Federal research projects, and stimulation of private and public saline water research.

2. *Research and development.*—This activity relates to the federally sponsored research and evaluation work accomplished by means of contract or grant to Federal or non-Federal agencies, institutions, and consultants.

OFFICE OF OIL AND GAS

SALARIES AND EXPENSES

For necessary expenses to enable the Secretary to discharge his responsibilities with respect to oil and gas, including cooperation with the petroleum industry and State authorities in the production, processing, and utilization of petroleum and its products, and

natural gas; and for controlling the interstate shipment of contraband oil as required by law (15 U. S. C. 715); [including purchase of not to exceed two passenger motor vehicles for replacement only; \$585,000] **\$550,000.** (*Department of the Interior and Related Agencies Appropriation Act, 1958.*)

Appropriated 1958, **\$585,000**Estimate 1959, **\$550,000**

Program and Financing

BONNEVILLE POWER ADMINISTRATION—Con.

CONSTRUCTION—Continued

The 1959 construction program provides for additional transmission and substation capacity, including service connections, to deliver at load centers the increased power production from Federal generating plants under construction in the Pacific Northwest. It also provides for wheeling power generated in non-Federal hydroelectric plants. Construction of transmission facilities will conform with Federal generation schedules as follows:

Project:	Jurisdiction	Initial generation (fiscal year)	Installed capacity (thousands of kilowatts)	
			Current or first year	Ultimate
Bonneville.....	Corps of Engineers.....	In operation.....	518.4	518.4
Grand Coulee.....	Bureau of Reclamation.....		1,944.0	1,944.0
Hungry Horse.....	do.....	do.....	285.0	285.0
Detroit.....	Corps of Engineers.....	do.....	100.0	100.0
McNary.....	do.....	do.....	980.0	980.0
Big Cliff.....	do.....	do.....	18.0	18.0
Lookout Point.....	do.....	do.....	120.0	120.0
Dexter.....	do.....	do.....	15.0	15.0
Albeni Falls.....	do.....	do.....	42.6	42.6
Chandler.....	Bureau of Reclamation.....	do.....	12.0	12.0
Chief Joseph.....	Corps of Engineers.....	do.....	896.0	1,024.0

Roza.....	Bureau of Reclamation.....	do.....	11.25	11.25
Hills Creek.....	Corps of Engineers.....	1962.....	30.0	30.0
Congar.....	do.....	1963.....	25.0	25.0
Ice Harbor.....	do.....	1964.....	270.0	270.0

On July 1, 1958, the installed generating capacity on the Federal system will be 5,281,250 kilowatts with a corresponding peaking capability of 6,057,300 kilowatts. The installed capacity by July 1, 1963, will be 6,244,250 kilowatts with a peaking capability of 7,170,000 kilowatts.

The relationship of costs to obligations is derived from year-end balances of selected resources as reflected in the following table:

This program provides for the operation and maintenance of the Administration's high voltage electric grid system, and for commercial and administrative expenses in marketing wholesale electric power from Federal dams in the Pacific Northwest.

1. *System operation and maintenance.*—This activity consists of the scheduling and dispatching of power; the operation of substations; the maintenance of transmission lines, substations and other electrical facilities; load estimating; the integration of resources; and system engineering.

Transmission facilities of the Administration are expanded as increased generating capacity becomes available. It is necessary to man newly energized substations, schedule and dispatch the increased power supply, and provide service through additional points of delivery and interconnection. Additional maintenance personnel are required throughout the transmission area to maintain the expanded system at levels adequate to insure safe and continuous operation. Power resources and requirements work will be continued to obtain the fullest utilization of generating capacity, streamflows and stored water. The following table shows the rising trend in several of the more important indexes of the operation and maintenance activity.

	1957 actual	1958 estimate	1959 estimate
Transmission lines, structure miles.....	6,730	6,818	7,186
Number of substations.....	178	183	188
Transformer capacity, kilovolt-amperes.....	8,009,000	10,776,000	12,907,000
Energy sales (millions of kilowatt-hours).....	28,216	30,600	34,200
Points of delivery.....	334	315	353

2. *Power contracts and rates.*—This activity consists of the negotiation of power sales contracts, billing and servicing contracts, including the development of service plans, and establishment of wholesale rate schedules. Re-

ceipts which are deposited in the Treasury amounted to \$61,873,196 in 1957, and are estimated at \$71,000,000 and \$79,100,000 for 1958 and 1959.

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate

ADMINISTRATIVE PROVISIONS

Appropriations of the Bonneville Power Administration shall be available to carry out all the duties imposed upon the Administrator pursuant to law, including purchase of one aircraft for replacement only. Appropriations made herein to the Bonneville Power Administration shall be available in one fund, except that the appropriation herein made for operation and maintenance shall be available only for the service of the current fiscal year.

Other than as may be necessary to meet local emergencies, not to exceed 12 per centum of the appropriation for construction herein made for the Bonneville Power Administration shall be available for construction work by force account or on a hired-labor basis. (16 U. S. C. 832-832l; *Executive Order 8526*; 43 U. S. C. 593-A; 16 U. S. C. 825s; 59 Stat. 10, 21-22; 62 Stat. 382; 43 U. S. C. 389, 485h; *Public Works Appropriation Act, 1958*.)

Appropriation (adjusted)	1,913,000	1,939,000	735,000

Power generated at Corps of Engineers dams in a 10-State area of the Southeast is marketed by the Administration through transmission facilities owned by others. A schedule of generation through 1958 at 11 projects follows:

Project	First generation (fiscal year)	Installed capacity (kilowatts)	
		Initial	Ultimate
Allatoona	In operation	74,000	74,000
Philpott	do	14,000	14,000
Center Hill	do	135,000	135,000
Dale Hollow	do	54,600	54,600
Wolf Creek	do	270,000	270,000
John H. Kerr	do	204,000	204,000
Clark Hill	do	280,000	280,000
Jim Woodruff	do	30,000	30,000
Old Hickory	do	100,000	100,000
Bnford	do	86,000	86,000
Cheatham	1958	36,000	36,000

The decrease in the 1959 appropriation estimate results from adopting a procedure whereby for each contract the charges due the agency are netted with charges against the agency and only the remaining balance is paid.

1. *System operation and maintenance.*—Provision is made for scheduling and dispatching power generation; scheduling storage and release of water; administering contractual operation requirements; and determining methods of coordinating operation of present and proposed generating plants to obtain maximum utilization of resources.

2. *Purchase of power and wheeling charges.*—Provision is made for the payment of wheeling fees and for the

purchase of firming energy in connection with disposal of power from the Kerr and Jim Woodruff projects under contracts with utility companies.

3. *Power contracts and rates.*—This provides for negotiation and administration of power contracts, collection of revenue, development of wholesale power rates, and determination of adequate provisions for the amortization of the power investment. Receipts which are deposited in the Treasury amounted to \$14,485,765 in 1957 and are estimated at \$16,820,403 and \$17,450,000 for 1958 and 1959.

5. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year:				
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	\$6,780	\$1,954	\$1,954	\$1,954

Program and Financing—Continued

	1957 actual	1958 estimate	1959 estimate
Financing:			
Unobligated balance no longer available	\$86,676		
New obligational authority	965,000	1,000,000	\$975,000
New obligational authority:			
Appropriation	\$1,000,000	\$1,000,000	\$975,000
Transferred to "Operation and maintenance," Southeastern Power Administration (Public Law 85-58)	-35,000		
Appropriation (adjusted)	965,000	1,000,000	975,000

Power developed at Corps of Engineers dams in four Southwestern States is marketed by the Administration through its transmission system. The Administration also contracts for use of additional transmission facilities, and for the sale, purchase, and interchange of power with other systems.

Receipts which are deposited in the Treasury amounted to \$6,449,373 in 1957, and are estimated at \$6,835,000 and \$7,520,000 for 1958 and 1959. The increase in receipts for 1958 and 1959 results mainly from a rate increase which became effective in the early part of 1958 and continued customer load growth.

1. *System operation and maintenance.*—The Administration operates and maintains a transmission system as follows:

	1957 actual	1958 estimate	1959 estimate
Transmission lines, miles	1,004	1,032	1,032
Number of substations	13	14	14
Substation capacity, kilovolt-amperes	293,300	322,050	322,050
Number of customers	56	57	56

2. *Power contracts and rates.*—This includes (a) negotiations of power contracts, (b) billing and servicing contracts, (c) development of wholesale power rates, and (d) participation in determination of the cost of amortizing the Federal Government's investment in power facilities.

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year:				
Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	\$45,790	\$47,291	\$60,000	\$50,000

Appropriation (new obligational authority)	6,400,000	5,000,000	4,405,000

This fund, accumulated from power receipts, is available permanently for emergency expenses necessary to insure continuity of service. It is also available in such amounts as may be approved annually in appropriation acts to cover costs in connection with the purchase of electric power and rentals for use of facilities for transmission and distribution of power. Electric power is purchased from private utilities and generating and transmission cooperatives. Power is transmitted to customers through wheeling arrangements with private utilities and through lease of the transmission capacity in facilities owned by the generating and transmission cooperatives (16 U. S. C. 825s-1).

BUREAU OF LAND MANAGEMENT

The Bureau of Land Management administers 468 million acres of public lands in the United States and Alaska for the purpose of conserving forest, range, mineral, and water resources. In addition, the Bureau has responsibility for mineral resources on 358 million acres of land under the jurisdiction of other Federal agencies and private land with mineral rights reserved to the United States.

In 1959, the budget continues this program at approximately its current level except that fire suppression costs are not expected to be as high as in the past 2 years.

The work of the Bureau produces revenue from various sources which is distributed as follows:

[In millions]

Cases closed.....	120, 006	136, 828	140, 151	145, 000
Cases pending, end of year....	78, 094	74, 151	74, 000	79, 000

2. *Management of grazing lands.*—The 182 million acres of Federal range used by 30,625 livestock growers are supervised. Proper management of these lands perpetuates forage resources thereon by reducing overuse, unseasonal use and trespass, and provides protection from fire and erosion.

3. *Forestry.*—Nine million acres of commercial forest lands in the United States and 40 million acres in Alaska, plus 110 million acres of woodland type lands, are managed. The 1959 program will permit selling 950 million board-feet of timber having a stumpage value of \$21.5 million.

4. *Cadastral surveys.*—These surveys are required to locate and identify legal boundaries of lands under application for lease or disposal, including submerged lands on the outer Continental Shelf; for administration of timber sales; for management of forest and range lands; to provide legal descriptions for the work of other Federal agencies and to permit States to obtain title to lands granted them by law.

5. *Soil and moisture conservation.*—The 1959 program will benefit 2,006,000 acres of public lands in critical condition from erosion. Cooperative programs with other agencies in river basin areas will continue.

6. *Fire suppression.*—Provision is made for fighting fires on or threatening lands under the jurisdiction of the Bureau of Land Management. Costs of fire suppression during the spring and summer of 1957 have exceeded \$2,000,000. Over a thousand fires have burned 5,400,000 acres in the United States and Alaska. A supplemental appropriation for 1958 is proposed for later transmission.

7. *Maintenance of physical facilities.*—This activity provides for physical maintenance of storehouses, equipment shelters, fire crew barracks, and like buildings used by the Bureau of Land Management in its various activities.

8. *Maintenance of access roads.*—Provision is made for maintenance of access roads to highly valuable stands of timber in the Oregon and California grant lands of western Oregon. Funds provided for this purpose are reimbursed to the Treasury from the Oregon and California land grant fund.

9. *Weed control.*—This activity continues treatment of areas infested by halogeton and other poisonous and noxious weeds.

10. *General administration.*—Provision is made here for providing executive direction for the Bureau as well as furnishing such services as accounting, personnel administration, procurement, budget preparation, and internal auditing to the technical divisions of the Bureau.

CONSTRUCTION

For construction of access roads [on the revested Oregon and California Railroad grant lands]; acquisition of existing connecting roads [adjacent to such lands]; acquisition of rights-of-way [on the revested Oregon and California Railroad grant lands, and on Coos Bay Wagon Road lands and lands in the vicinity of the Gerber Reservoir and the Silvies River, Oregon, and lands in the vicinity of Powder Horn Creek and Wall Mountain, Colorado]; acquisition and construction of buildings and appurtenant facilities; and construction and maintenance of recreational facilities in Alaska; to remain available until expended, [\$5,480,000] \$4,435,000: *Provided*, That the amount appropriated herein for road construction shall be transferred to the Bureau of Public Roads, Department of Commerce: *Provided further*, That the amount appropriated herein for construction of access roads on the revested Oregon and California Railroad grant lands is hereby made a reimbursable charge against the Oregon and California land-grant fund and shall be reimbursed to the general fund in the Treasury in accordance with the provisions of the second paragraph of subsection (b) of title II of the Act of August 28, 1937 (50 Stat. 876).

[Not to exceed \$1,423 of the funds available to the Bureau of Land Management from definite annual appropriations shall be available for reimbursing the city of Monticello, Utah, for the cost of improvements to streets and appurtenant facilities adjoining property under the jurisdiction of the Bureau of Land Management.] (16 U. S. C. 594; 43 U. S. C. 2; 69 Stat. 374; 70 Stat. 130; Department

of the Interior and Related Agencies Appropriation Act, 1958; Supplemental Appropriation Act, 1958.)

Appropriated 1958, \$5,480,000

Estimate 1959, \$4,435,000

Appropriation (new obligational authority).....	4,600,000	5,480,000	4,435,000

1. *Access roads.*—This estimate will continue construction of roads into stands of high value timber on the revested Oregon and California Railroad grant lands in western Oregon. The cost of these roads is reimbursed to the Treasury from the Oregon and California land-grant fund. Construction will begin on similar roads in the Coos Bay Wagon Road grant lands in western Oregon. Rights-of-way will be acquired for additional roads in this area and on public domain lands.

2. *Buildings.*—Provision is made for construction of buildings to house supplies, equipment, and personnel at isolated locations.

3. *Recreational facilities.*—Construction and maintenance of simple recreational facilities in Alaska along highways as an aid to the public and as a fire-prevention measure will be continued in 1958 and 1959.

ADMINISTRATIVE PROVISIONS

Appropriations for the Bureau of Land Management shall be available for purchase of [thirty-one] *twenty-eight* passenger motor vehicles for replacement only; purchase of one aircraft for replacement only; purchase, erection, and dismantlement of temporary structures, and alteration and maintenance of necessary buildings and appurtenant facilities to which the United States has title: *Provided*, That of appropriations herein made for the Bureau of Land Management expenditures in connection with the revested Oregon and California Railroad and reconveyed Coos Bay Wagon Road grant lands (other than those expenditures for reforestation, for construction and operation and maintenance of access roads, and for acquisition of rights-of-way and of existing connecting roads adjacent to such lands, which are reimbursable to the Treasury) shall be reimbursed from the 25 per centum referred to in section C, title II, of the Act approved August 28, 1937 (50 Stat. §76), of the special fund designated the "Oregon and California Land Grant Fund" and section 4 of the Act approved May 24, 1939 (53 Stat. §754), of the special fund designated the "Coos Bay Wagon Road Grant Fund": *Provided further*, That the amount appropriated for maintenance of access roads and [\$900,000] *\$500,000* of the amount appropriated for reforestation on the Oregon and California Railroad grant lands, under the appropriation "Management of lands and resources", shall be reimbursed to the general fund of the Treasury in accordance with the provisions of the second paragraph of subsection (b) of title II of said Act of August 28, 1937. (*Department of the Interior and Related Agencies Appropriation Act, 1958.*)

RANGE IMPROVEMENTS

(Indefinite)

For construction, purchase, and maintenance of range improvements pursuant to the provisions of sections 3 and 10 of the Act of June 28, 1934, as amended (43 U. S. C. 315), sums equal to the aggregate of all moneys received, during the current fiscal year, as range improvement fees under section 3 of said Act and of 25 per centum of all moneys received, during the current fiscal year, under section 15 of said Act, to remain available until expended. (*Department of the Interior and Related Agencies Appropriation Act, 1958.*)

Appropriation.....	37,997,289	40,959,897	42,325,600

1. *Expenses, sale of timber, etc., on reclamation lands.*—A portion of the receipts from timber sales on public lands set aside for reclamation purposes is used to cover the cost of sales (41 Stat. 202; 53 Stat. 1196).

2. *Leasing of grazing lands.*—State, county, and privately owned grazing lands that are intermingled with public grazing lands are managed on a leased basis within the limits of receipts from such arrangements (43 U. S. C. 315m).

3. *Payments to Oklahoma (royalties).*—The State of Oklahoma is paid 37½% of the Red River oil and gas royalties in lieu of State and local taxes on Kiowa, Comanche, and Apache tribal funds (42 Stat. 1448), to be used for construction and maintenance of public roads and support of public schools (44 Stat. 740).

4. *Payments to Coos and Douglas Counties, Oreg., from receipts, Coos Bay Wagon Road grant lands.*—Out of receipts from the Coos Bay Wagon Road grant lands in Oregon, payments in lieu of taxes are made to Coos and Douglas Counties for common schools, roads, highways, bridges, and port districts (53 Stat. 753-754).

5. *Payments to counties, Oregon and California grant lands.*—Fifty percent of the receipts of the Oregon and California land-grant fund, plus the unarmarked portion of an additional 25%, are paid the counties in which the lands are situated, to be used as other county funds (39 Stat. 218).

6. *Payments to States (grazing fees).*—The States are paid 33⅓% of the fees from each grazing district on Indian lands ceded to the United States within the State's boundaries (43 U. S. C. 315j).

7. *Payments to States (proceeds of sales).*—The States are paid 5% of the net proceeds from sale of public land and public land products (31 U. S. C. 711).

8. *Payments to States from grazing receipts, etc., public lands outside grazing districts.*—The States are paid 50% of the grazing fee receipts from public domain lands outside grazing districts (43 U. S. C. 315i, 315m).

9. *Payments to States from grazing receipts, etc., public lands within grazing districts.*—The States are paid 12½% of grazing-fee receipts from grazing district lands within their boundaries (43 U. S. C. 315b, 315i).

10. *Payments to States from grazing receipts, etc., public lands within grazing districts, miscellaneous.*—The States are paid specifically determined amounts from grazing-fee receipts from miscellaneous lands within grazing districts when payment is not feasible on a percentage basis (43 U. S. C. 315).

11. *Payments to States from receipts under Mineral Leasing Act.*—The States and Alaska are paid 37½% of the receipts from bonuses, royalties, and rentals resulting from development of mineral resources under the Mineral Leasing Act (30 U. S. C. 191), and from leases of potash deposits (30 U. S. C. 285), on public lands.

12. *Payments to Territory of Alaska, income and proceeds, Alaska school lands.*—Alaska is paid the income derived from sale of timber and disposition of lands or minerals on public lands reserved for school and other educational purposes (38 Stat. 1214; 53 Stat. 1243; 48 U. S. C. 353).

13. *Payments to Alaska, coal leases.*—Alaska is paid 90% of all net profits from operation of Government mines, and all bonuses, royalties, and rentals under coal leases as provided by law (71 Stat. 282).

BUREAU OF INDIAN AFFAIRS

The responsibility of the United States toward the Indian people and the natives of Alaska includes protection and development of trust property and the furnishing of services not otherwise available to Indians and which are normally provided other citizens through Government and private agencies. Active programs are being aimed toward the integration of like services to Indians and non-Indians through the same sources and toward increased Indian participation in the management of Indian-owned resources. States and counties are participating at an increasing rate in the service programs, usually with financing by the United States demanded because of the tax-exempt status of Indian lands. The ultimate goal of the entire program is to have the Indian people and the natives of Alaska take their proper place in the social and economic life of the Nation on the same basis as other citizens.

Current authorizations:

EDUCATION AND WELFARE SERVICES

For expenses necessary to provide education and welfare services for Indians, either directly or in cooperation with States and other organizations, including payment (in advance or from date of admission), of care, tuition, assistance, and other expenses of Indians in boarding homes, institutions, or schools; grants and other assistance to needy Indians; maintenance of law and order, and payment of rewards for information or evidence concerning violations of law on Indian reservations or lands; and operation of Indian arts and crafts shops and museums; [\$59,460,000] \$57,469,000. (25 U. S. C. 13; 48 U. S. C. 169, 250a, 250f, 631-640; 5 U. S. C. 5a; Department of the Interior and Related Agencies Appropriation Act, 1958.)

The services described are furnished to Indians in the continental United States and to the natives of Alaska.

1. *Educational assistance, facilities and services.*—Financial assistance is extended to public schools enrolling Indian children under State and district contracts. Where such facilities are inadequate or nonexistent, the Bureau operates boarding and day schools. Pupils included in the following table under "Dormitories" attend public schools but are domiciled in federally operated dormitories. Assistance is also given to adult Indians through an education and training program.

NUMBER OF PUPILS

	1957 actual	1958 estimate	1959 estimate
Boarding schools.....	25,040	26,505	26,505
Dormitories.....	2,933	2,950	2,950
Day schools.....	16,023	16,010	16,010
Public schools.....	35,835	39,800	39,950
Other institutions.....	390	530	530
Total.....	80,221	85,795	85,945

2. *Welfare and guidance services.*—Welfare services including direct relief and foster home care are provided for needy adults and children.

CASELOADS

	1957 actual	1958 estimate	1959 estimate
Aid to individuals:			
General assistance.....	7,548	7,075	6,700
Child welfare.....	2,004	2,520	2,520
Total.....	9,552	9,595	9,220

3. *Relocation services.*—The relocation program assists Indians from reservations to settle and secure permanent employment in non-Indian communities away from the reservation, and to adjust to the new living and working conditions encountered. Financial assistance to move to and settle in the new community where employment opportunities have been developed is provided to those Indians who wish to relocate but do not have enough resources to leave the reservation.

NUMBER OF RELOCATIONS

	1957 actual	1958 estimate	1959 estimate
Persons relocated.....	6,964	7,000	7,000

4. *Maintaining law and order.*—Police services and tribal court operations are financed on Indian reservations, and special officers direct enforcement of Federal law.

5. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

RESOURCES MANAGEMENT

For expenses necessary for management, development, improvement, and protection of resources and appurtenant facilities under the jurisdiction of the Bureau of Indian Affairs, including payment of irrigation assessments and charges; acquisition of water rights; advances for Indian industrial and business enterprises; operation of Indian arts and crafts shops and museums; and development of Indian arts and crafts as authorized by law; **[\$17,200,000]** \$17,000,000, and in addition, \$524,000 of the Revolving Fund for Loans, Bureau of Indian Affairs, shall be used in connection with administering loans to Indians: *Provided*, That [], notwithstanding the provisions of section 4 (a) of the Civil Service Retirement Act of July 31, 1956 (70 Stat. 747), not to exceed \$80,000 of this appropriation shall be available for payment of the Federal matching contribution to the retirement fund for Federal employees paid from tribal funds.]

[There is hereby authorized to be transferred to this appropriation, from any other definite annual appropriations from the general funds of the Treasury available to the Bureau of Indian Affairs for the fiscal year ending June 30, 1958, not to exceed \$169,000 for emergency operation and maintenance of the San Carlos irrigation project on a nonreimbursable basis: *Provided*, That [] the Secretary of the Interior is authorized to expend income received from leases on lands on the Colorado River Indian Reservation (southern and northern reserves) for the benefit of the Colorado River Indian Tribes and their members during the current fiscal year, or until beneficial ownership of the lands has been determined if such

determination is made during the current fiscal year. (25 U. S. C. 7a, 13, 16, 305, 381, 385, 631-640; 16 U. S. C. 590a-590f; 48 U. S. This program promotes the economic advancement of the Indians in the continental United States and of the natives of Alaska through the utilization of their resources.

1. *Forest and range lands*.—This activity covers management, protection, and utilization of the forest, range, and wildlife resources on nearly 50 million acres of Indian-owned lands.

	1957 actual	1958 estimate	1959 estimate
Timber cut:			
Million board-feet.....	576	550	700
Dollar value.....	\$12,634,932	\$12,000,000	\$15,000,000
Number of cattle units grazed.....	985,000	985,000	987,000

2. *Fire suppression*.—Funds under this item provide for the payment of the cost of suppression and prevention of fires on or threatening Indian reservations. Approximately 58,299,555 acres require protection.

3. *Agricultural and industrial assistance*.—Funds under this activity provide for improved methods in farming, homemaking, the management of a revolving loan credit program for small business enterprises, and formulation of plans for readjustment legislation pertaining to special trust relationships between Indian tribes and the Federal Government.

4. *Soil and moisture conservation*.—Land-use practices based on land inventories and soil conservation plans are introduced to control noxious weeds and erosion and promote more effective utilization of soil and water resources. Approximately 24.1 million acres, or 42.5% of Indian-owned lands, are severely or critically eroded. The job of soil and moisture conservation is approximately 23% completed, an increase of 3% over 1956.

5. *Operation, repair, and maintenance of Indian irrigation systems*.—Approximately 300 irrigation systems serv-

ing about 864,000 acres of Indian and mixed-ownership lands are operated and maintained. About 82% of the cost is financed from collections from water users, leaving 18% to be met from funds appropriated under this activity.

6. *Development of Indian arts and crafts.*—Production and marketing of the products of Indian crafts are fostered through formation of production groups; establishing of standards; and improving of markets, design, and production methods.

7. *Management of Indian trust property.*—Banking services are provided for Indians; land is purchased, sold, exchanged, and leased; and Indian property and money rights are safeguarded. Consolidation and/or disposal of fractionated land holdings, especially in those areas affected by readjustment legislation, is to be accomplished.

	1957 actual	1958 estimate	1959 estimate
Cases pending, start of year.....	19,409	22,820	24,000
New and reactivated cases.....	53,655	61,180	74,000
Cases closed.....	50,244	60,000	70,000
Cases pending, end of year.....	22,820	24,000	28,000

8. *Repair and maintenance of buildings and utilities.*—Federal buildings and their related utility and communication systems are maintained.

	1957 actual	1958 estimate	1959 estimate
Square-foot buildings maintained.....	18,530,000	19,658,000	20,750,000

BUREAU OF INDIAN AFFAIRS—Continued

Current authorizations—Continued

CONSTRUCTION—Continued

1. *Buildings and utilities.*—This consists of construction and additions to schools, dormitories, quarters, office and other buildings; improvement to sewer systems and waterworks; major repairs and rehabilitation of existing buildings and utilities; preparation of plans; and engineering supervision and surveys.

2. *Irrigation systems.*—This work consists of construction, extension, and rehabilitation of irrigation systems on Indian reservations for the utilization of irrigable lands.

3. *Land acquisition.*—Purchases are made to consolidate lands in heirship status.

4. *Relation of costs to obligations.*—The relationship is derived from year-end balances of selected resources as reflected in the following table:

	1956 actual	1957 estimate	1958 estimate	1959 estimate
Selected resources at end of year: Inventories and items on order:

Relation of costs to obligations.—The relationship is derived from year-end balances of selected resources and applicable adjustments as reflected in the following table:

	1956 actual	1957 actual	1958 estimate	1959 estimate
Selected resources at end of year: Inventories and items on order: Unpaid undelivered orders (appropriation balances obligated for goods and services on order not yet received)	\$538,628	\$509,331	-----	-----
Selected resources at start of year (—)	-----	—538,628	—\$509,331	-----
Adjustment of selected resources reported at start of year	-----	—11,934	-----	-----
Costs financed from obligations of other years, net (—)	-----	—41,231	—509,331	-----

Object Classification

	1957 actual	1958 estimate	1959 estimate
10 Lands and structures	\$50,000	-----	-----
11 Grants, subsidies, and contributions	347,000	\$147,000	-----
13 Refunds, awards, and indemnities	-----	6,786	-----
Total obligations	397,000	153,786	-----

ADMINISTRATIVE PROVISIONS

Appropriations for the Bureau of Indian Affairs (except the revolving fund for loans) shall be available for expenses of exhibits; purchase of not to exceed [three hundred] two hundred sixty-five passenger motor vehicles for replacement only, which may be used for the transportation of Indians; advance payments for service (including services which may extend beyond the current fiscal year) under contracts executed pursuant to the Act of June 4, 1936 (25 U. S. C. 452), and legislation terminating Federal supervision over certain Indian tribes; purchase of ice for official use of employees; and expenses required by continuing or permanent treaty provisions. (*Department of the Interior and Related Agencies Appropriation Act, 1958.*)

TRIBAL FUNDS

(Trust fund)

In addition to the tribal funds authorized to be expended by existing law, there is hereby appropriated [\$2,920,000] \$3,000,000 from tribal funds not otherwise available for expenditure for the benefit of Indians and Indian tribes, including pay and travel expenses of employees; care, tuition and other assistance to Indian children attending public and private schools (which may be paid in advance or from date of admission); purchase of land and improvements on land, title to which shall be taken in the name of the United States in trust for the tribe for which purchased; lease of lands and water rights; compensation and expenses of attorneys and other persons employed by Indian tribes under approved contracts; pay, travel, and other expenses of tribal officers, councils, and committees thereof, or other tribal organizations, including mileage for use of privately owned automobiles and per diem in lieu of subsistence at rates established administratively but not to exceed those applicable to civilian employees of the Government; relief of Indians, without regard to section 7 of the Act of May 27, 1930 (46 Stat. 391), including cash grants; and employment of a recreational director for the Menominee Reservation and a curator for the Osage Museum each of whom shall be appointed with the approval of the respective tribal councils and without regard to the classification laws: *Provided*, That in addition to the amount appropriated herein, tribal funds may be advanced to Indian tribes during the current fiscal year for such purposes as may be designated by the governing body of the particular tribe involved and approved by the Secretary: *Provided, however*, That no part of this appropriation or other tribal funds shall be used for the acquisition of land or water rights within the States of Nevada, Oregon, Washington, and Wyoming, either inside or outside the boundaries of existing Indian reservations, if such acquisition results in the property being exempted from local taxation. (25 U. S. C. 123; *Department of the Interior and Related Agencies Appropriation Act, 1958.*)

Program and Financing
